EMPLOYMENT TRENDS

November 1978

December 28, 1978

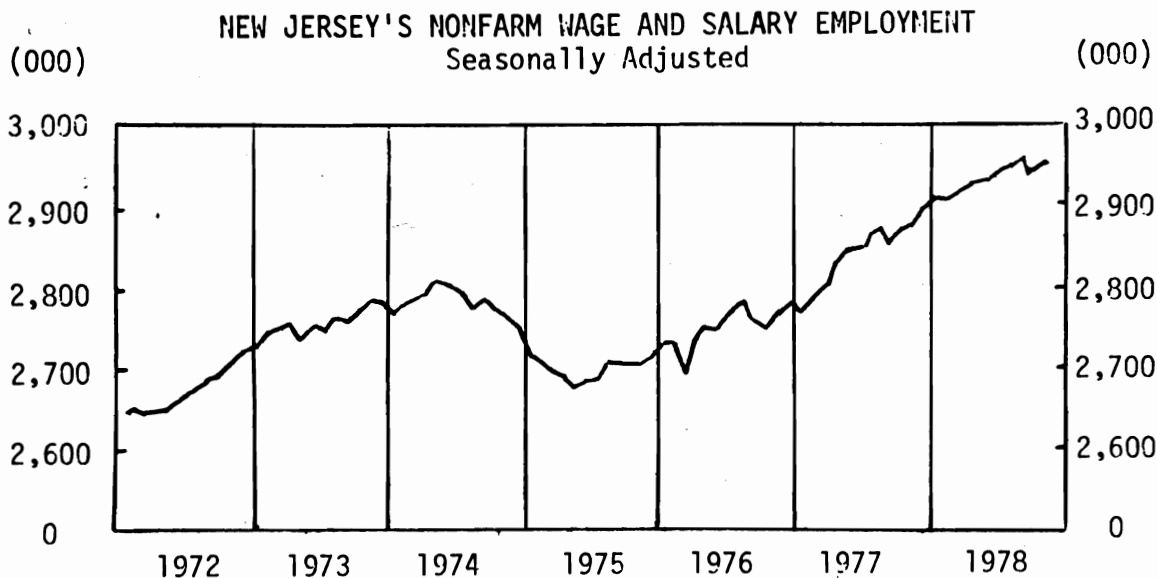

Report No. 15

During November, seasonally adjusted total nonfarm wage and salary employment rose by 6,900 to 2,957,400. Manufacturing employment accounted for 64% of the growth. Private wage and salary employment increased by 5,000 to 2,448,300.

Before seasonal adjustment November nonagricultural employment rose by 5,600 to 2,976,200 with the nonmanufacturing sector providing all of the expansion.

On an unadjusted basis only two out of seven major industry divisions in the nonmanufacturing sector increased over the month. Total government employment increased by 8,400. Local government, spurred by 1,300 teachers returning from strike, accounted for about

90% of the rise. Wholesale and retail trade provided the remaining growth as employment rose by 7,000 due primarily to seasonal expansion in the general merchandise industries. Services had the largest decline in the nonmanufacturing sector, dropping seasonally by 4,600.

Manufacturing employment dropped slightly by 600 since October as an increase of 800 in the durable goods industries was offset by a loss of 1,400 in the nondurable goods industries. Nonelectrical machinery, up by 1,000, registered the largest increase among the durable goods. Miscellaneous manufacturing industries provided almost all of the decline as it dropped seasonally by 800. Among the nondurable goods industries, most employment losses were accounted for in the chemical and apparel industries which had greater than seasonal declines. Soap, perfume, and other cleaning products industries provided all of the 1,100 loss incurred in the chemical industries while about 80% of the 1,900 loss in apparel was due to employment declines in women's and children's outerwear. Partially offsetting these losses was a general increase of 1,100 in the printing industry and employment increases of 500 in both the textile and rubber industries.

On a seasonally adjusted basis, total nonfarm payroll employment rose by 6,900 over the month, which represented increases of 4,400 in the manufacturing sector and 2,500 in the nonmanufacturing sector. Durable goods employment gained 2,300 jobs as only two out of ten industries had employment declines. Nonelectrical machinery accounted for nearly 44% of the durable goods growth as it expanded by 1,000 jobs since October. Nondurable goods employment increased by 2,100 over the month as employment gains more than offset employment losses. Printing and rubber, increasing by 1,200 and 1,100 respectively, had the largest monthly gains while the apparel and chemical industries had the largest declines, each dropping by 500.

Nonmanufacturing employment rose by 2,500 on a seasonally adjusted basis as four out of seven industry divisions gained. Services, up by 2,500, and government which rose by 1,900 accounted for most of the increment while transportation and public utilities, down by 1,800, had the largest loss.

Compared with November 1977, unadjusted nonfarm wage and salary employment rose by 74,500 or 2.6%. Private wage and salary jobs increased by 63,900 over the year. Manufacturing employment climbed by 9,600 since November 1977. Durable goods accounted for all expansion,

increasing by 10,800 while nondurable goods lost 1,200 jobs since last year. Nonelectrical machinery had the largest increase expanding by 3,000 followed by chemicals and allied products which increased by 2,300. The largest loss among manufacturing industries was in apparel products which declined by 2,600.

Among the nonmanufacturing industries mining had the only loss from last year, down by 300. The largest over-the-year gains were in trade and services, each increasing by 15,200, and government, which expanded by 10,600 since November 1977.

HOURS AND EARNINGS OF MANUFACTURING PRODUCTION WORKERS

The weekly earnings of manufacturing production workers averaged \$265.85 during November, an increase of \$4.20 from October and an increase of \$18.69 from a year ago. The average hourly earnings of \$6.36 were up 4 cents from October and 39 cents from a year ago. During the November survey week, production workers averaged 41.8 hours compared with 41.4 hours a month ago.

After seasonal adjustment, the average weekly hours increased to 41.4 hours from 41.2 hours in October and from 41.0 hours in November 1977.

On an unadjusted basis, 17 of the primary manufacturing industrial groups had increases in weekly earnings over the month, while 2 had decreases. The largest increase was in the food products industry which rose \$11.87 because of increased overtime at premium rates. The largest decrease was in the petroleum industry which dropped \$31.32 because of decreased overtime.

The highest average weekly earnings in November were in the transportation industry with \$383.53 for a 44.7-hour workweek. The highest hourly earnings were also registered in the transportation industry with \$8.58. The lowest average weekly earnings were in leather products with \$151.10 for a 37.4-hour workweek.

TECHNICAL NOTES

Nonfarm Wage and Salary Employment

Employment data refer to persons on establishment payrolls who received pay for any part of the pay period which includes the 12th of the month. The data exclude proprietors, the self-employed, unpaid family workers, farm workers, and domestic workers in households. Salaried officers of corporations are included. Government employment covers only civilian employees; federal military personnel are excluded.

Persons on an establishment payroll who are on paid sick leave (when pay is received directly from the firm), on paid holiday or paid vacation, or who work during any part of the pay period but are unemployed or on strike during the rest of the period, are counted as employed. Not counted as employed are persons who, during the pay period which includes the 12th, are laid off, on leave without pay or on strike for the entire period, or who are hired but do not work during the period.

Average Hours and Earnings

Hours and earnings data are derived from reports of payroll and man-hours for production and related workers in manufacturing. When the reported pay period exceeds one week, the payroll and man-hour figures are reduced to a weekly basis.

Average hourly earnings for manufacturing are on a "gross" basis, reflecting not only changes in basic hourly rates, but also such variable factors as premium pay for overtime and shift work, and changes in output of workers paid on an incentive plan. Excluded from average earnings are irregular bonuses, retroactive items, payments of various welfare benefits, and payroll taxes paid by employers.
