1. Before starting the agitator, carefully insert clean, dry measuring stick, seating fully; withdraw and read to the nearest 1/32 inch. Record the measurement, weight, temperature, time of pickup, date and producer's name and number. One copy of the weight ticket shall be left with the producer;

2. Agitate for not less than five minutes and longer if necessary to disperse the butterfat uniformly throughout the tank:

i. The person holding the weigher and sampler certificate issued by the Division of Marketing and Development shall be responsible for ascertaining that the milk is agitated for not less than five minutes and should periodically check the tank timer to determine whether it may be used as a guide; and

ii. It is suggested that each truck carry a timing device which may be used for timing the agitation;

3. After milk has been agitated for at least five minutes with agitator running and before the outlet is open, take a universal sample. The sample shall be taken with a properly cleaned and sanitized stainless steel dipper which is first dipped two or three times into the milk. This sample shall be at least one ounce (30 cubic centimeters). If composite samples are taken, on every day pickup, a ten cubic centimeter dipper of milk shall be added to the composite daily. On every other day pickup, a 20 cubic centimeter sample shall be added to the composite at each pickup.

(b) When taking bacteria samples, special care shall be taken to prevent contamination of sample containers and/or equipment. The sampler's clothes and hands must be clean and dry when sampling. Sterile sample containers and sampling equipment shall be kept protected at all times and properly identified. After milk has been agitated as for taking butterfat samples, remove at least a ten cubic centimeter portion with a properly sterilized device into the sterile sample container. This container shall be immediately

placed in an insulated, properly iced or refrigerated case being sure that the water level is no higher than the milk in the sample container.
