

Ivette's COVID-19 Story

When the Covid19 started in NJ it was hard for me and my family. We couldn't get out to food shopping and go anywhere because of the Covid19 spread around. This is a sad thing we live with now. I thank God that my family is doing great and well. To those thinking of the Covid19 out there it's very hard to think about all this. The more you think it is called stressed out and not able to live your life style [sic]. Many people have died from the coronavirus in NJ and it is sad that we [can't] see everyone in the family even if they are in the hospital. Your [sic] in say hello, say goodbye to them you would not see them again unless you see as miracle and trust in the Lord. I could not see some friends and family at all because your [sic] not able to get to see them in the houses or hospital.
