this is public land. the use seems useful to nj. but the public also needs to be protected in this regard. we need to allow trees and vegetatio and wildlife to co exist on this 2057 acres.

we need to make sure if that purpose does not work out for any reason, it is con verted into a wildlife wilderness with trees, vegetation and wildlife allowed to continue to xist on that plot.

that may be its best use in this highly congested state. but we dont want it converted to concrete. we have too much of that already. we definitely need to protect open spaces that are open spaces. so any investment made for barns etc offices need to be removed if the use does not work out.

i am not in favor of the parcel being sold at all. i am tortally opposed to any sale. this land should remain in the publics hands and nj dot hands as well.

we have little enough land without selling it off for such a poor price. it is worth it to citizens of nj to keep that land rather than only get \$114,000 for it. 2000 acre.this is a crazy operation.no sale. no sale. jean publee
