# ICYMI: NJ Transit Readies for the Upcoming Winter Storm

01/28/2022

*Systemwide Cross Honoring in Effect on Saturday, Regular Weekday and Weekend Service will Operate Friday and Saturday as Conditions Warrant*

**NEWARK, NJ** — All NJ TRANSIT services will operate on a regular weekday schedule today, Friday, January 28, 2022 and on regular weekend schedules on Saturday, January 29, 2022 for as long as weather and road conditions safely permit. Customers may see the possibility of delays, detours and potential service cancellations if storm conditions intensify.

Beginning Saturday, January 29 for customers of Bus Route No. 197, NJ TRANSIT rail will cross-honor bus passes and tickets on the Port Jervis Line trains to/from Harriman, Tuxedo and Sloatsburg through the end of the service day on Sunday. Bus service to/from Warwick, N.Y., will originate/terminate at West Milford Park & Ride due to weather conditions.

Cross-honoring will be in effect for rail, light rail, NJ TRANSIT bus and private carrier bus service on Saturday, January 29. Customers should check njtransit.com for updates.

For example, customers who normally take the bus from Rutherford to the Port Authority Bus Terminal may use their bus pass or ticket on the train from Rutherford to New York Penn Station. Customers using their tickets or passes to travel to a destination other than the destination printed on their original ticket will be subject to the appropriate additional fare if applicable.

For the safety of our customers and employees, weather conditions may require temporary service suspensions. Should that occur, NJ TRANSIT will make every effort to provide customers with up to four hours' notice to allow for sufficient time to make return travel arrangements. Customers are encouraged to continuously monitor njtransit.com

NJ TRANSIT's Emergency Operations Center (EOC) will be open and closely monitoring weather forecasts and conditions as the storm develops. Key personnel will monitor any impacts to the system throughout the duration of the storm.

Customers are advised to use extreme caution around bus stops, stations and facilities as slippery conditions may exist. Customers should also build extra travel time into their schedules as delays and cancellations are possible as a result of the storm's impact.

## NJ TRANSIT Preparations for Winter Weather

### Rail Operations

- Rail cars and locomotives have been "winterized," a process that includes checking onboard heating systems, ventilation, thermostats, weather stripping and electronic components, as well as changing locomotive filters and fuel from a summer blend to a winter blend.
- NJ TRANSIT's preventative maintenance program also includes the inspection and winter maintenance of more than 750 switches and switch heaters, overhead wire systems, 12 moveable bridges and wayside power at storage yards and terminals.
- Two jet-engine-powered snow blowers are available to remove ice and snow from tracks and critical switching areas. In addition, all locomotives are equipped with snowplows to clear snow from the rails.
- NJ TRANSIT Rail Operations has approximately 20,000 pounds of salt on hand with the ability to obtain an additional 100,000 pounds, if needed.
- In addition, our year-round tree trimming program proactively minimizes downed trees or limbs along the right-of-way and on our overhead electrical system, personnel are on standby to quickly respond to reports of trees or limbs that could damage overhead wires or prevent safe passage of trains. Our year-round tree trimming program is part of our preventative maintenance program.

### Bus Operations

- Bus maintenance personnel have checked the heating systems, engine fluids, tires, windshield wipers, doors and airbrake systems on NJ TRANSIT's 2,200 buses.
- Bus snow-fighting equipment has been readied and ice/snow-inhibiting supplies have been restocked for winter to keep 52 bus loops, terminals and lots cleared throughout the state.

### Light Rail Operations

- Snowplows are ready to clear station platforms and park/ride lots.
- Switch heaters have been tested throughout NJ TRANSIT's three light rail systems.
- Necessary supplies such as calcium chloride, snow shovels, and scrapers are available and strategically located on the system.
- Snow blowers and backup generators have been checked to ensure they are in working order.
- Subcontractors are under contract to assist work crews in clearing all light rail stations, walkways, and park/ride facilities.
- Management staff for all three lines will be coordinating with local municipalities to discuss snow removal in the light rail's downtown 'street running' territory.

### Access Link

- Access Link anticipates offering regular weekday service, but modifications may be made if severe weather conditions warrant. Customers should continue to monitor the weather as modifications or delays may occur.

### Stations and Terminals

- All rail stations equipped with heaters have been inspected to ensure that they are in proper working order.
- Staff will monitor platform conditions to ensure safe walking conditions.
