5:23-3.11A Public school facility plan review and inspections; Uniform Construction Code enhancements in public school facilities

(a) Plan review for the following types of projects shall be performed by the Department of Community Affairs. Prior to the release of plans for the following types of projects, the Department of Education shall ensure that the plans meet the standards for educational adequacy set forth in N.J.A.C. 6:22:

1. New public school buildings, including the creation of a new public school building through the change of use of an existing building;
2. Additions to existing public school buildings;

3. Alterations changing the total number of instructional spaces, the size of any such spaces or type of any such spaces;

4. Installations of mobile units; or

5. Any site or building change or alteration for the purpose of making the site and school barrier-free pursuant to N.J.A.C. 5:23-7 and accessible to the handicapped pursuant to section 504 of the Federal Rehabilitation Act of 1973.

(b) In lieu of obtaining construction code plan review and release from the Department of Community Affairs, a school district, upon notice to the Department, may secure construction code plan review and release from any municipal code enforcing agency, pursuant to P.L. 1990, c.23.

1. The municipal code enforcing agency providing construction code plan approval must agree to perform the review and must be appropriately classified for the proposed project in accordance with this chapter.

2. The municipal code enforcing agency performing the construction code plan review may require the payment of any municipal plan review fees.

3. No construction permit shall be issued for a public school facility unless and until the final plans and specifications have been released by the Department or an appropriately classified municipal code enforcing agency.

4. The municipal code enforcing agency within the jurisdiction in which the facility is located shall be responsible for construction permit issuance, construction inspection and certificate of occupancy issuance.

5. Amendments to released plans and specifications for reasons other than educational adequacy shall be submitted for review and release to the Department or the municipal code enforcing agency, whichever originally released the plans.

6. Release of the plans by the Department or the municipal code enforcing agency, as the case may be, shall not preclude the enforcing agency doing the inspection from issuing a stop work order in the event of a violation of the code. The enforcing agency doing the inspection shall not, however, issue a stop work order based on its disagreement with the released plans unless the agency that released the plans, be it the Department or another local enforcing agency, agrees that the issuance of such an order is appropriate. In the event that the enforcing agency doing the inspection believes there to be an error in the plans, that enforcing agency shall give prompt notice of the error that is believed to exist to the Department or the municipal agency that reviewed the plans, as the case may be.

(c) The Department or the municipal code enforcing agency providing construction code plan release or inspection shall be responsible for enforcing the following Uniform Construction Code enhancements in public school facilities:

1. An automatic fire alarm system shall be installed in all new buildings of Use Group E (educational), as designated in the BOCA National Building Code/96 Section 918.4.1 and in accordance with the applicable National Fire Protection Association standards. The system shall utilize:

i. Combination fixed-temperature and rate of rise devices in classrooms and other spaces not covered in (c)1ii below;

ii. Devices to detect abnormal visible smoke densities or gaseous products of combustion in corridors and exit stairs;

iii. An automatic fire suppression system and, in areas where suppression is deleted, automatic detection devices; or

iv. A combination of the above three types of detection devices except that a fixed-temperature detector shall be permitted in approved locations, such as in a boiler room or incinerator.

2. Manual fire alarm boxes, in addition to BOCA/96 Section 918.5 requirements, shall be provided in the natural path of escape from fire, near each exterior door from the corridor, kitchen, heater room and other exits that are required to serve 50 or more persons. Additional fire alarm boxes shall be located in the main office, stage, at each stairway entrance from a corridor or place of assembly and near one exterior exit in each section of a place of assembly. It shall not be necessary to traverse more than 200 feet of unobstructed horizontal distance on the same floor in order to reach a fire alarm box.

3. Each instructional space and room of assembly which is illuminated with the use of high intensity discharge (HID) sources, such as mercury vapor, high pressure sodium and metal halide lamps, shall also be provided with a second source of illumination to provide illumination instantly upon activation of the circuit. All high intensity discharge (HID) lamps shall be of the fail-safe type which will permanently extinguish within 15 minutes after the outer glass of the bulb is broken. All lamps shall be provided with a glass or plastic lens to protect the bulb.

4. All school buildings shall be equipped with a mechanical air supply and exhaust ventilation system which will provide, during periods of occupancy, standard tempered outdoor air supply and mechanical exhaust at the minimum rates set forth in the BOCA National Mechanical Code as amended.

(d) Pursuant to Reorganization Plan No. 004-1996, the Department or the municipal code enforcing agency shall have authority to enforce and cite violations of N.J.A.C. 6:22-5.4.
