PREFACE

The business growth of southern New Jersey is frequently stymied by the difficulties people encounter in obtaining business and economic data unique to only the eight southern New Jersey counties. The small business owner or manager, whose resources are usually limited, is more likely to be the victim of these difficulties and may give up plans to expand or locate in the southern half of the state.

No one source has focused only on southern New Jersey. The process requires use of a large assortment of publications located in a variety of places. The area's data is often tucked in with data on metropolitan Philadelphia or the entire State of New Jersey.

That situation has now changed. In 1982, with a grant funded by the New Jersey Small Business Development Center at Rutgers, Newark, a research project was undertaken by The Management Institute at Glassboro State College to identify the needs for and feasibility of establishing an economic database in southern New Jersey. This effort was aided by the South Jersey Chamber of Commerce which had previously recognized the lack of data available to businesses approaching them for help.

A follow-up grant was received for 1983 from the SBDC along with matching funds from the South Jersey Chamber of Commerce in order to establish this database for eight southern New Jersey counties. It has been computerized for easy access of data in a variety of groupings and formats.

Dr. Thomas P. Hamer, associate professor of economics at Glassboro State College, compiled this database. The contents of this database are contained in this booklet but are also available in other formats.

DESCRIPTION OF MUNICIPALITY DATA IN REPORT 5

"Municipality Data for Establishment Employment Covered by
Unemployment Insurance"

Total Covered Employment in September, 1977 through 1982:

Covered Employment is a monthly count of full and part-time employees at an establishment located in the municipality, who earned wages during the pay period including the 12th of September, as reported quarterly by employers covered by the New Jersey Unemployment Compensation Law. Basically, any employer paying at least \$1,000 in wages in either the current or preceding calendar year is covered under the law. Jobs not covered by the law fall mainly into the categories of self-employed workers, unpaid family workers, certain agricultural workers, and certain in-home domestic workers.

DESCRIPTION OF MUNICIPALITY DATA IN REPORT 11

"Municipality Data for Local Property Tax Rates, The Qualification and Adoption of a Local Ordinance Under the "Five-Year Tax Abatement Law, and Total Housing Units According to the Decennial Censuses"

1983 Tax Rates, General and Effective:

These are the local property tax rates.

Source: State of New Jersey, Department of the Treasury, Division of Taxation
"Annual Report of the Division of Taxation For the Fiscal Year 1983"

Tax Abatement Law: Municipality is Qualified and/or has Adopted Ordinance:

This information relates to Public Law 1977 c. 12 as amended - 4/6/83 (the so-called "Five-Year Tax Abatement Law"). The data indicate which municipalities are qualified under the law. Also indicated is whether the municipality has gone the second step and passed an ordinance which specifies the area selected for tax abatement. For the municipalities in the eight counties, all of those passing the ordinance had selected the entire municipal area.

PART B: DESCRIPTION AND SOURCES OF DATA FOR COUNTIES,
THE TRI-COUNTY AREA, AND THE ENTIRE AREA

1. Forecasts for the Annual Percentage Change in
Employment in Industries

These forecasts are generated by Dr. Thomas Hamer using econometric models estimated for the historical relationships between percentage changes in the annual average employment in the industries and the percentage changes in price-adjusted Gross National Product. The consensus forecast for GNP from the "Blue Chip Economic Indicators" newsletter is used to calculate the employment forecasts.

2. Business Outlook Survey: Outlook Six Months from Now
Versus Current Month

The Federal Reserve Bank of Philadelphia surveys firms in its entire district each month. The percentages given here are for only the New Jersey manufacturing firms in the sample. Twenty percent of the New Jersey sample is from Mercer County, the rest from Burlington, Camden, and Gloucester Counties.

16. Business Births

The term "birth" means a new reporting of private sector employment covered by unemployment insurance (covered employment). If a firm already in the state opens a new location or if a merger occurs, it is not a birth. If a newly created firm begins reporting, or if an out-of-state firm enters, then it is a birth.

IPC Deposits: Individual, Partnership, and
 Corporate Deposits on June 30.

NOTE: Totals of the numbers of banks for more
 than one county, but not for the State,
 are misleading since one bank can be in
 more than one county, and hence a double
 counting can occur.
