

## WHY NEW JERSEY

With unmatched regional and global connectivity to offshore wind markets, New Jersey is an emerging hub for offshore wind. Under Gov. Murphy, NJ has taken strategic and consistent steps to support its procurement goal of 11 GW of offshore wind energy by 2038. The state’s Offshore Wind [Strategic Plan](#) and [Energy Master Plan](#) were finalized in 2020 and remain a leading priority in NJ’s economic growth plan.
