

Explanation of Pricila Lucas' Submission:

Goggles: The goggles represent the time in Arizona and when I was in the pool, I would pull out the goggles while wearing them, the water would fall out. I didn't only choose this just for the rainbow water but also because Arizona taught me things. You see some of my family had different points of view and whenever I remember Arizona, I remember I would do that to my goggles.

Rainbow water: Now the rainbow was for the positive times and my creativity and I've improved in art a lot over the months.

Landscape: I chose the character in the water because I've heard that only 5% of the ocean was explored and this year was unpredictable so I added that. The forest represents of how this year was dangerous and forests are dangerous as well.
