General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Narrative	The applicant purchase the property on 11/30/2007 for \$69,000 and had plan to build a new house to replace the house that had been demolished. Due to the economy it did not make sense to build a house at that time. As the economy improved in 2014 he again considered constructing a residential dwelling on the property. The owner was unaware the prior house was constructed in 1920 in an area that is now considered wetlands and transition area. The applicant had submitted an LOI for Footprint of Disturbance (1713-14-0004.1) The lot is serviced by municipal water and sewer, connection onsite) and has been maintained as a lawn area since the property was acquired. If denied it is a financial hardship for the owner/applicant. In addition to the purchase price he has paid taxes and utility assessments. The properties appearance has not changed since the demolition and the construction of the house after 7-8 years instead of the 5 year time period will not cause any additional impacts on the environment, particularly since the site is serviced by municipal sanitary sewer. The site is located within a developed neighborhood with houses located on the adjacent properties. The applicant request the five year limit on reconstruction be waived so he can construct a house within the original footprint.
