ABSTRACT

MILEPOSTS OF INTERSECTIONS OF THE NEW JERSEY STATE HIGHWAY SYSTEM

The primary function of a milepost system is to provide the means for accurately locating traffic accidents. If accidents can be located to within 0.1 mile in rural areas and 0.01 mile in urban areas, highway engineers and law enforcement agencies can more effectively concentrate their efforts toward the prevention of more accidents. This milepost system locates all the intersections and landmarks on the 90 plus routes of the State highway system.

MILEPOST SYSTEM FOR THE STATE OF NEW JERSEY

Information on this system has been updated from the 1968 Milepost Inventory for New Jersey State Highways. The format of the printout is as follows:

Field 1	Field 2	Field 3	Field 4	Field 5			
County	Municipality	Description	Milepost	Int. Type	Control	Landmark Code	Missing Data Code

The milepost listing of each landmark or intersection is recorded from the straight line diagrams of New Jersey State Highways 1968.

Index for Field 5

Intersection type is given by the first digit of field 5.

Code	Intersection Type
1	"T" (Leg enters between 80° and 100° angle)
2	"Y" (Leg enters less than 80° angle or more than 100°)
3	Four legged
4	Five legged
5	Six legged
6	Circle
7	Interchange (Grade separation of intersecting leg includes the entire interchange area)
8	Jughandle
9	"K" (Two legs on same side of roadway regardless of intersecting angle)

Traffic Control

Code	Intersection Type
1	Flashing signal
2	Regular signal

Traffic Control (Continued)

Code	Intersection Type
3	Stop sign
4	Yield sign
5	No control
6	None given

Landmark Code

Code	Designation
1	Landmark
2	No landmark
0	No landmark

Missing Data Code

Code	Designation
1	Item on map but not on tape
2	Item on tape but not on map
3	Item on tape, not on map, no name
4	Item on tape and on map, but different name on map
0	Not identified
