

(d) Rules concerning the purchase and/or conversion of Class A credit include the following:

1. The cost of Class B service credit is based on the actuarial factors and such factors provide a retirement benefit which is one-sixth greater than service credited as Class A. If Class A credit is purchased, the cost will be six-sevenths of the amount computed for a Class B purchase. The computation is based on the member's present salary or highest fiscal year base salary multiplied by the actuarial purchase factor for the member's age at the time of purchase with regular interest.

2. If a Class A member converts to Class B, the member will contribute an additional one-sixth of the total contributions that would have been payable based on the member's full Class A contribution rate with regular interest.
