The oath of office as President of the Senate was administered to Mr. Stout by Justice Hadyn Proctor.

After the oath was administered, President Stout introduced his family and then addressed the Senate as follows:

January 14, 1958.

Members of the Senate, Friends and Guests:

As President of the Senate for this the One Hundred and Eighty-second Session of the New Jersey Legislature I first express my heartfelt appreciation to my colleagues for bestowing upon me this high honor. I shall be ever mindful of the responsibilities of this high office and I shall at all times endeavor to discharge my duties with fairness to every member of this body.

I welcome to this body today our new colleagues, the Senator from Hudson and the Senator from Passaic and pledge to them my assistance and co-operation as they assume the duties of their new office. I know that I speak for all of my colleagues as well in this pledge.

To my fellow citizens from Monmouth County, many of whom are here today, I express my deep appreciation for the loyal support they have given me during my tenure in this body. I thank them for having made it possible for me to have the opportunity. I assure them—and those who have been unable to be here, that I always shall act to uphold the great traditions which my predecessors from Monmouth have exhibited in the past.

This session of the Legislature will be the first in many years in which the control of the two houses will be in the hands of different political parties. It will be the first time this has come about since the adoption of our New State Constitution of 1947. Many problems of procedure and policy will be raised and each house will be subjected to the public scrutiny for the manner in which it conducts its business. I shall, with the guidance and assistance of my colleagues, conduct the session of the Senate in a manner which will meet with the approval of all of the people of our State.

A major problem, which has plagued this body and the Assembly has been the custom of attempting to accomplish all of the duties and obligations on one given Legislature day—usually Mondays. In addition, the legislative leaders have met the same day with the Governor for a discussion of legislation pending in the Legislature.

During this session we shall meet promptly at 2:00 P. M. on Mondays for our legislative sessions. As the tempo of the session increases it may perhaps be necessary to meet for the adoption of legislation on additional days during the week. We have also decided, in agreement with the Governor, to have our Legislative-Governor's Conference on Thursday mornings instead of Monday mornings as at present. Since only the leaders attend this conference, it is anticipated that the other members will hold whatever public hearings may be necessary on this same day. We further plan to have our party conferences on Thursday afternoons. Inasmuch as the Assembly probably will adopt a similar plan, Thursday will become another day of real legislative activity during which time party conferences may be held on those matters of major importance.

The Legislature, its members, and its committees can well stand an additional day in which to study and consider the measures before it in a body.

I believe that the Monday meetings can thereby be conducted with punctuality and with orderliness. In this connection, I shall order that all unauthorized persons be barred from the Senate floor and the back corridor. I know that all of my colleagues will co-operate in this effort.

It is my hope that this session will be a fruitful one that will bring credit to the Legislature of this State. There are signs that we can make this one of the most worthy of sessions. Some of the major problems facing the State which will be dealt with in this session include:

Water (Situation on which start already has been made),

Highways,

Tax Policy Report,

Traffic Safety,

Schools—Higher Education,

Labor,

Law Enforcement,

Reapportionment,

The Problems of the Aging,

Additional State Office Space,

Rapid Transit,

State Employees,

Unemployment.

Later today, the Governor will present a message to the Legislature. We await his views with interest.

To achieve a record of achievement in the fields mentioned above and to solve in some degree the problems inherent in them calls for co-operation between the Executive, Legislative and Judicial Branches of Government. This can be done by men of good will and men sincerely devoted to the positions they hold.

But I should also add that for the Legislature to fulfill its role in the scheme of this government calls for deliberation, discussion, public hearings, study, research, and long, hard hours in reconciling differences, deciding on long range programs and establishing fundamentally sound bases for action.

It can not be accomplished hastily with little thought, with inadequate facilities and with decisions based on too few facts. If this is to be so—only the people of this State will lose.

We are all pledged to a faithful performance of our duties. We begin this new session with the hope and prayer that Divine Guidance will be with us always.

Mr. Lance moved to proceed with the election of a permanent Secretary of the Senate.

Mr. Lance nominated Henry H. Patterson of Asbury Park, New Jersey, as permanent Secretary of the Senate.

There being no further nominations, President Stout directed a roll call:

In the affirmative were—

GOVERNOR'S MESSAGE

January 14, 1958

Mr. President, Mr. Speaker and members of the Senate and General Assembly:

I come before you, the members of the 182nd Legislature, in accordance with my constitutional duty, to inform you of the condition of the State and to propose courses of action that will better enable New Jersey to meet the challenges of our times.

Since I delivered my last annual message to you on January 8, 1957, there has been a change in the political composition of the Legislature. From the time of my inauguration on January 19, 1954, until the present, it has been my task to deal with a Legislature controlled overwhelmingly by members of the opposite political party.

But on November 5, 1957, the people elected a General Assembly which has a majority of my own party by a count of 42 to 18. Control of the Senate by the opposite party is held by a margin of 13 to 8 compared to 17 to 4 four years ago.

A Heavier Responsibility

These changes can only mean that my party has been charged with a heavier responsibility for the conduct of the Legislature because the record of the 181st Legislature was an issue in last fall's campaign. In that campaign, I talked at length about the caucus system in both Houses, the legislative budget and the unending legislative year.

New Order of Business

Now I am confident that the new Speaker and Majority Leader will act with all possible speed to institute a new order of business in the General Assembly and I trust that the Senate will do likewise.

The people, by electing a new majority in the General Assembly and reducing the old majority in the State Senate, are insisting on a more effective legislative performance. My party, I hope, will give it to them immediately in the General Assembly, and if its program is not accompanied by similar action in the Senate, the latter will be ignoring the temper of public opinion.

THE CAUCUS

For years I have been talking about the caucus, or, as it has been called, "basement government." Under the operation of the caucus, held in secret with both the press and the public barred, no measure could reach the floor of either House unless it was approved at these meetings.

In many cases, a measure which would definitely have commanded a majority for passage was throttled to death in caucus. The minority party members, the press and the public have been compelled to stand idly by while the Star Chambers were in session.

OPEN PROCESS

Meantime, the committee system, familiar to all people from its functioning in Congress, has been allowed to atrophy from disuse. Under that system, on important legislative issues, hearings are held at which all interested parties can state their case, after which measures go to the floor of both Houses for debate and final action. For the most part, the legislative process is and should be observable by the public in all its phases.

In that way, the minority can bring its influence to bear to prevent majority tyranny. In that way, the people of each county can learn of the way its Senator and Assemblymen acted on specific measures.

CURE FOR DEMOCRATIC ILLS

I expect the caucus to be abandoned in this new General Assembly, and I trust it will also be eliminated in the State Senate. In both Houses, we should have a rejuvenation of the committee system, which has proved so valuable a democratic agent in Congress and in the legislatures of many states.

If and when this happens, New Jersey will discover the truth of the old saying that the cure for the ills of democracy is more democracy. If and when this happens, many measures that should have been passed long ago will be sped to action by the force of public opinion. Pitiless (or rewarding) publicity will shine down upon the character and actions of individual members, thus permitting voters to know them as they have not been able to know them before.

WHY A WINTER VACATION?

I have never been able to understand why the Legislature should take a winter vacation after the budget message is delivered in February, only a month after it convenes. Nor have I been able to understand why the Legislature should not set a specific term for the fulfillment of its duties—say a term of 60 or 90 days.

Such a specific term is required by the constitution or laws of various states. Voluntary action of both Houses could easily accomplish this aim, and I trust the action will be taken. The Legislature should make an intensive effort to get its work done and then adjourn.

BI-PARTISAN CONFERENCE

I have long followed the practice of holding a bi-partisan conference on the morning of every legislative day. At these meetings, I outline to the Senate President, the Assembly Speaker and the Majority and Minority Leaders of both Houses, the measures which I believe are needed, at the same time inviting the views of the conferees.

These meetings will be continued. Heretofore the legislative majority has been less than frank in outlining its own plans. I think there should be a freer exchange of views.

The practice of passing bills of doubtful constitutionality should be avoided. The Legislature has a responsibility equal to the courts and the Chief Executive in this regard.

GUIDE FOR THE FUTURE

In looking back to my annual message to the 181st Legislature, I find the following language: "In November of this year (1957), there will be an election for Governor and for 70 of the 81 seats in the Legislature. Therefore, the eyes of the people will be fastened upon you, the Legislature, and upon me, the Governor, to scrutinize our behavior.

"If we permit partisan politics to influence our judgment, if we permit ambitions to sway our actions, we will be judged accordingly. For myself, I promise to work with you in every way consistent with my convictions."

I believe these words remain full of meaning and that they can now be repeated for our mutual benefit, and as a guide for our future cooperation. They apply, of course, to members of both parties.

TWO BROAD CATEGORIES

Let me now proceed to outline some of the subjects on which the Legislature should take action in the coming months. As I see it, these subjects fall largely within two broad categories:

I. To strengthen our resources as a State.

II. To strengthen our democratic processes.

Many of these proposals have been given complete discussion in the past and do not need extended analysis here. As in the past, members of my Cabinet and my staff have been directed to provide any information needed to reach wise legislative decisions.

It is intended here not to compile an encyclopedia of State needs, but to deal with some of the major issues. From time to time, I will present to you additional subjects for legislative deliberation and action.

Before presenting the two broad categories of State needs, may I offer two subjects that require immediate action?

RENT CONTROL

1. It is urged that the rent control law, which expired December 31st following failure of the 181st Legislature to act, be immediately extended, retroactive to December 31st. I am informed that some 17 communities, which have chosen to continue rent control, are affected, and much hardship will result if no action is taken.

PAY CUT RESTORATION

2. Last year, the Legislature while granting an across-the-board increase in the pay of State employees, rejected the usual merit increment, as well as medical-surgical benefits. In the campaign, the subject became a matter of intense discussion and debate.

I feel I am under mandate to propose to you that the usual merit increment be restored and medical-surgical benefits granted. I feel further that the traditional merit increase should be continued in the future. If not, a deadly blow will be leveled at the morale of the State employee as an individual and at the *esprit de corps* of the State service.

FOR VITAL SERVICES

Other cuts were made in the budget last year which severely handicap various State departments, particularly the Department of Institutions and Agencies. If these departments are to function effectively until the end of the present fiscal year, supplemental appropriations should be authorized to repair the crippling cuts.

A supplemental bill to provide the appropriations necessary for these purposes has been prepared and is ready for introduction today.

I. TO STRENGTHEN OUR RESOURCES AS A STATE

WATER

We have made progress toward solving the immediate water problem of North Jersey by acquiring the site of Round Valley in Hunterdon County and by legislation authorizing that it be filled with water from the Raritan River

basin. An appropriation of $250,000 has been made for detailed engineering, appraisal and other costs to expedite the use of Round Valley.

It has been proposed that a bond issue of some $40,000,000 be placed on the ballot next November for the first phase in the development of Raritan Valley water resources.

But various other steps must be taken to complete the project. The law requires a compensating flow in the south branch of the Raritan at three gauging stations. To produce this flow, an on-river dam must be built.

SPRUCE RUN

I recommend that $2,000,000 be appropriated to purchase the reservoir site at Spruce Run in Hunterdon County, providing the engineering report presently under way is favorable. This amount could be returned out of the proposed bond issue, and the appropriation should so provide.

COST OF TRANSMISSION

We must also decide how and by what agency Round Valley reservoir is to be built and how water is to be transmitted to communities in short supply. We have the choice of having these tasks undertaken by the State, by an authority or by an existing agency.

In addition to the reservoir cost of $40,000,000, a nearly equal amount will be needed to build a purification system and to pipe the water to the east. If transmission is to be handled by an authority or an existing agency, it may be desirable to pledge the State's credit to get the best terms in the money market, and to include that additional cost in the bond issue referendum.

In considering these large expenditures for water storage and transmission, it should be borne in mind that the entire project eventually will be self-liquidating through the sale of water.

HIGHWAYS

We are one of 18 states which have fully matched in the fiscal year 1956-57 all Federal funds for interstate highways. But in doing so we have been compelled to neglect construction and improvement of highways which are the sole responsibility of the State, and upon which, to a large degree, depends the continuance of our present program of safety construction. There is a backlog of such projects of approximately $70,000,000. We have also been obliged to forego advance acquisition of rights-of-way for future construction.

GAS TAX INCREASE

I must again point out the urgent need for an increase in the gasoline tax to take care of emergency highway requirements. We must keep abreast of the Federal highway program by which New Jersey, on interstate defense freeways, receives $90 for every $10 it contributes, as well as 50-50 contributions for other roads. We must also provide adequately for State construction and improvement where no Federal funds are forthcoming.

EDUCATION

1. Our needs for higher education have just been set forth by the State Board of Education in a report to the Governor and the Legislature entitled "College Opportunity in New Jersey." This report shows that rising birth rates and increased migration into the State will double the college-age group in little more than a decade.

EXPANSION IS ESSENTIAL

The Board of Education proposes increased facilities at the State University, the six Teachers' Colleges and the Newark College of Engineering, to cost in the neighborhood of $80,000,000. Expansion of higher educational facilities is obviously essential. I reserve for the budget message discussion of whether expansion should be financed on a pay-as-you-go plan or by a bond issue. In any event, we must make a substantial start at once.

BONDS AND SCHOLARSHIPS

2. There is a pressing need for measures which will permit our school districts to finance capital improvements at lowest possible interest rates. A constitutional amendment to permit the use of the present State school fund, and legislation authorizing the pledge of state school aid funds to accomplish this end are under consideration.

3. I urge a scholarship program by which financial aid may be extended to needy, deserving and qualified students who wish to enter New Jersey colleges and universities. This would supplement the scholarship program now operative at the State University and could be linked with a Federal scholarship program, if one should be established.

FURTHER STATE AID

4. Despite the fact that State aid to local school districts has tripled in the last four years, there is a continuing demand for further State aid for operational purposes, and to relieve the burden of homeowners and other local taxpayers. In recognition of this demand, I propose the subject be turned over to the State Tax Policy Commission for its 1958 report and recommendations.

LABOR LAW CHANGES

New legislation is needed in the field of labor, some of which has been repeatedly urged in my annual messages. For instance the minimum wage law is completely unrealistic, since it applies to women and minors but not to men.

We need a State labor relations law by which unfair labor practices may be defined and prevented, and by which collective bargaining representatives may be selected and certified.

I recommend that the Legislature re-examine the level of, and eligibility requirements for, unemployment compensation, temporary disability and workmen's compensation benefits in the light of average wages now paid and in the light of higher living costs.

The unemployment compensation and temporary disability benefits law should be extended to employers with one or more employees, instead of being restricted to employers with four or more employees.

THE MEADOWS

On the New Jersey side of the Hudson River lie 30,000 acres of what is potentially the most valuable land in the entire world. This is known as the Meadows. It is a vast swamp infiltrated with sea water. For a century men have dreamed of reclaiming the land for use.

Some men have done more than dream. The railroads have found ways to lay tracks and build yards through the Meadows. The Newark Airport is built on such reclaimed land. Piers of the New Jersey Turnpike have been given a solid base there. Many highways now traverse the area.

A FRESH LOOK

Let us take a fresh look at the problem. I have in mind that engineers in The Netherlands, a country which has always had to battle the sea for existence, have been able to find ways to separate salt water from low-lying land. I recommend the establishment of a State commission to investigate whether Dutch methods would be feasible here, to determine questions of land ownership in the Meadows, and otherwise to deal with possible reclamation and use of the land.

TAX POLICY

A report of the State Tax Policy Commission is expected to deal with (1) the 100 per cent assessment decision of the State Supreme Court in the Middletown Township case and (2) the question of additional revenue to meet State needs. I will comment on the report in my budget message.

COMPULSORY AUTO INSURANCE

I recommend that the Legislature give serious consideration to the enactment of a compulsory automobile insurance law, to indemnify innocent victims of traffic accidents or

their dependents for loss of life, injury to persons and damage to property. The Unsatisfied Claims and Judgment Fund has met some but not all of the needs of the people in this area. I suggest the Legislature make a study of the operation of the compulsory laws of other states as a guide to possible action.

After 40 Years

I am about to appoint a commission to study the framework of law, policy and administration of the Department of Institutions and Agencies. Since the original Morrow report of 1918, the department, with its system of citizen participation in state and local boards, has made many significant contributions in the field of human welfare.

It is our belief that, after 40 years of operation, we should re-examine the department and its far-ranging tasks, along with its kinship to other departments, to find out if we are doing all we can to meet modern needs. After the commission finishes its study, it will make a report consistent with the statutory mandate that our institutions and agencies "shall be humanely, scientifically, efficiently and economically operated."

No doubt, as in the case of the Morrow report, the Legislature will be called upon for measures to improve the lot of the 125,000 persons who are wards of the State.

Rapid Transit

The report of the Metropolitan Rapid Transit Commission was not received in time to be given consideration in this message. The commission has made an intensive study of the vexing traffic problems of the New York-New Jersey metropolitan area. Year by year these problems grow more difficult and more expensive to solve, and a comprehensive assault on them cannot be much longer delayed.

New State Buildings

New State buildings are urgently needed to house the Departments of Labor and Industry, Education and Health. These departments are now scattered in seriously overcrowded state-owned or rented quarters.

New structures would make possible more efficient operation of these departments in the interest of the public, besides saving large sums in rentals.

Funds for a building for the Department of Labor and Industry are already available; funds set aside for the other two buildings would be a sound investment and would add to the resources of the State.

In September 1956, I sent you a special message dealing with this problem in some detail, and I will certainly renew my recommendation in the forthcoming budget message.

Korean War Termination

The Legislature has not declared a termination date for the Korean conflict. As a result, thousands of grossly discriminatory veterans' property tax exemptions and unfair civil service preferences are being granted each year and will continue to be granted in ever-increasing numbers unless action is taken.

As to all previous wars, the Legislature has specifically limited the duration of each war for exemption and preference purposes to the period of actual hostilities. Actual hostilities ceased on July 27, 1953, in the Korean conflict. I recommend that Chapter 184, Laws of 1951, be amended to correct this inequity.

Conflict of Interest

New Jersey needs a comprehensive conflict-of-interest statute forbidding all employees and officials of the State from serving or representing outside interests which might prejudice or impinge upon their loyalties to the public service.

Radiation Protection

An advisory committee appointed by me has explored the field of radiation and has recommended legislation to provide control of radiation sources in New Jersey. Such control, enforced by a single agency, is required at the State level to protect our citizens. A bill to that effect will be submitted to you.

II. TO STRENGTHEN OUR DEMOCRATIC PROCESSES

Reapportionment and Redistricting

You are aware of your duty to reapportion the Assembly in accordance with population changes. Article IV, Section III, of the State Constitution directs: "...Apportionment of the members of the General Assembly shall be made by the Legislature at the first session after the next and every subsequent census..."

Since the 1950 census, seven Legislatures have come and gone without action on this basic matter. As a result, the people suffer the consequences of unequal representation.

As a practical solution, I recommend a self-enacting constitutional amendment, looking to the 1960 census, to provide adequate representation to each of our counties.

The Classic Seventh

A related subject is congressional redistricting, which has not been done since 1931, more than a quarter century ago. One need only take a look at the Seventh District to understand how badly redistricting has been neglected. This district is a classic example of the gerrymander, a notorious device to keep one individual or one party in office.

Voting Machines

Twelve of the State's 21 counties now use voting machines and their use should be made mandatory in the remaining nine counties which continue to use paper ballots. Is it necessary to repeat what has so often been said, that the voting machine is the most accurate, quickest, most convenient, most trusted and, in the long run, the most economical way to compute election returns?

Mobile Registration

Mobile, or neighborhood registration, is a highly desirable method to take voting machinery directly to the people. Many people find it difficult or impossible during their

hours of employment or because of domestic duties to go to the Court House or the office of the Municipal Clerk to register.

Therefore, by legislative mandate it should be incumbent on the part of the County Election Boards to minister to the convenience of these people. Every county board should be directed to sit at least one night in each ward and at least one night in each municipality, depending on the size of the community.

SUGGESTED COURT CHANGES

Two changes in our court system were recently advocated by Chief Justice Weintraub:

1. He points out that the co-existence of separate county and Superior Courts "has been fettering and restrictive." These courts have overlapping jurisdiction in a substantial area, and the supposed advantages of this division of judicial duties have not come to pass. He suggests consolidation of county and Superior Courts.

2. He points out further that we have 488 separate municipal courts, "in which 30 per cent of the magistrates are poorly paid, and their quarters frequently are inappropriate." It is impossible properly to supervise the work of 488 separate courts, and the Chief Justice suggests a county-wide court, presided over by full-time judges, appointed by the Governor, subject to Senate confirmation.

I commend his views to you for study and for whatever action you deem fit to take.

A LEGALISTIC JUNGLE

More than two decades have passed since New Jersey statutes have been revised. Meantime our laws have become a jungle growth, through which laymen and lawyers must grope their way without much hope of finding Dr. Livingstone.

To change the metaphor, Professor Edwin W. Patterson of Columbia University says that New Jersey statutes "exhibit layers of legislative deposits going back to 1891 and

1902, so that the process of interpretation becomes geological rather than logical." He was speaking specifically of insurance statutes, but what he says is true of other titles as well.

Conspicuous examples of laws needing revision:

Title 11 — Civil Service
Title 14 — General Corporations
Title 17 — Those sections dealing with insurance laws
Title 18 — Education
Title 19 — Election Laws
Title 26 — Health
Title 40 — Counties and Municipalities
Title 48 — Public Utilities
Title 51 — Weights and Measures

In some of these areas, revision is under way. I urge its early completion and a start on work in other areas, including statutes of specific application to each of the 14 State Departments.

CHANGES IN INSURANCE LAW

Last year I asked Professor Patterson, an outstanding authority, to study the administration of the Department of Banking and Insurance.

He recommended legislation which would (1) give the department better and more general notice and hearing provisions; (2) give the Commisioner explicit power to make regulations; (3) give the Commissioner broader discretionary power in refusing to issue or renew, or in revoking an insurer's license; (4) give the Commissioner specific power to force the removal of proved untrustworthy insurance company officers; and (5) revise the liquidation provisions for taking over a domestic insurer.

OTHER INSURANCE PROPOSALS

In addition, I strongly urge that you give early consideration to legislation, introduced but not passed at the last session, which would enable the Commissioner of Banking and Insurance to have more specific and effective powers over the licensing and regulation of insurance agents, brokers and solicitors.

Also, I recommend that you adopt legislation requiring insurance companies to submit reports on internal audits to the Commissioner to help keep him informed of company operations during the period between regular departmental examinations.

These recommendations should be the subject of immediate action. At the same time, we should take steps to undertake a general revision of our insurance statutes to be ready for enactment by the 1959 Legislature.

CRIME REPORTING

I have repeatedly urged the creation of a uniform crime reporting system. Such a system would enable persons responsible for enforcing our criminal laws to collect, collate and use essential facts relating to crime. It would require local, county and state police authorities to make periodic reports about the number and nature of arrests. That information, in turn, would produce statistics of great value and for the first time, form a survey of the frequency, type and concentration of crime. It is a basic requirement of modern-day law enforcement.

POLICE TRAINING

For years, I have pointed out that some system of police training is vitally necessary to our State law enforcement administration. For the past two years, bills have been introduced that advocate some kind of training for rookie patrolmen. The charge that such a system would be subject to State Police control and would violate home rule is simply not true.

Under the proposed legislation, a State-wide commission would create standards of instruction and would approve schools, public or private, which all future law enforcement officers would be required to attend. The commission would not be made up of State officials alone; on the distinct contrary, the bulk of the commission would consist of representatives chosen by policemen's service organizations.

Bills for crime reporting and police training have been prepared and are ready for introduction.

SALE OF PACKAGED MEDICINES

The business of retailing packaged medicines has presented problems that have existed for years. Conflicting views have been held as to whether aspirin, cough medicines and similar products can be sold by persons other than registered pharmacists.

Litigation has been almost constant. In 1954, the State Supreme Court stated that legislation was urgently needed to clarify ambiguities arising from interpretation of the 1901 statute. I hope you will be able to resolve these ambiguities in the light of modern conditions.

SUNDAY SALES

Increasing commercial activity is drastically changing the character of Sunday as a day of rest. We should seek a statewide pattern regulating Sunday activity with a recognition of local needs.

CONCLUSION

Let me express the hope that the next ninety days will become notable in New Jersey's history for the accomplishments of the Legislature. In these uneasy times, it becomes especially important for the law-makers of this State to show qualities of leadership and firm action with regard to our problems.

Many of them, indeed, are not new. They have been discussed, explored and debated for a long time, and there can be no reasonable excuse for further delay. Others will yield to hard study and searching debate in committee and on the floor.

I hope you will keep in mind that the measures here suggested are designed to strengthen the resources of the State, physically and morally, and to strengthen our democratic processes. Never in history has our country had a greater need to marshal its powers and to show to the world how democracy can flower in adversity.

You are concerned with the affairs of one State of the Union, but the example of one State in strong, forward-looking action can have a tonic effect everywhere.

From the time of the American Revolution, New Jersey has been first in many fields—in government, in education, in welfare, in industry, in invention, as well as in the intangible qualities which go to make up what we call civilization.

I feel sure, as you of the 182nd Legislature settle to your tasks, you will draw faith, confidence and inspiration from New Jersey's illustrious past to grasp its brilliant opportunities for the future.

Respectfully submitted,

Following is the address delivered by Governor Meyner at the Inaugural Ceremonies in the War Memorial Building:

SECOND INAUGURAL ADDRESS

Members of the 182nd Legislature, Chief Justice Weintraub, My Friends and Fellow Citizens:

It is a solemn but very happy moment of my life to take the oath of office from my warm friend, the distinguished Chief Justice of New Jersey.

Four years ago I stood here to deliver my first inaugural address, and I did so with a prayer that I be given the strength, the intelligence and the understanding to perform my tasks as Governor. Today I renew that prayer as I enter my second term.

A week ago today I delivered my Annual Message in which I outlined a detailed program of legislative action. By mid-February, I will present to you my budget for the next fiscal year. On this ceremonial occasion I would rather speak in general terms concerning the State of New Jersey and the office of Governor.

Challenges Ahead

We have made progress in the past four years, but the days ahead are full of challenge. Many of the problems I talked about in 1954 are still with us, in altered form. As I pointed out then, "We must ever be conscious that in government, as in life, nothing is ever permanently settled, nothing ever disposed of beyond the need for continuous study and action."

The years that lie just before us will be a period of urgency, a period of test, both for the State and the Nation. Man is penetrating the mysteries of outer space, even as he explores the secret heart of the atom. The possibilities of this modern pioneering stagger the imagination. That our own country lags in this field is a grave challenge to all of us.

On the national domestic scene we face mounting unemployment; a crisis in education; problems involving civil rights, the common defense and the public welfare; declining revenues and increasing costs of government.

Brighten our Corner

We in New Jersey must face up to these challenges. We must do our full part in all these fields. Our area is a limited one, but to paraphrase the old hymn, we can brighten the corner where we are. We can do our best to make State Government a meaningful and efficient instrument for ministering to the progress and well-being of our people. I pledge myself anew to work untiringly to that end.

Three Centuries of Experience

As colony and State, New Jersey has had three hundred years of experience in self-government. That rich and varied experience has made for maturity, balance and stability. As a people dedicated to the common weal and united in purpose, we are not easily given to extremes of optimism or pessimism. We are a fusion of many races and nationalities and backgrounds. We have learned to live together, not with mere tolerance but with active friendship.

We hold high the guarantees of civil rights embodied in our State and Federal Constitutions. When our schools were integrated by the terms of our 1947 Constitution, the process was carried out with hardly an incident because it had the approval of our people. That is only one of many examples of our veneration for the ideals of the Founding Fathers and of our faith in democracy.

Pressure of Population

Many of New Jersey's problems stem from a steadily rising population in a limited land area. Ours is the fourth smallest State in the Union. We have a high strategic importance, however, not only because we lie between two

great metropolitan areas and front 125 miles along the central Eastern Seaboard, but because of our vast industrial output and because we are a vital center of industrial and scientific research.

New Jersey is the most urban of all States, with no fewer than 567 communities. Our urban character has been intensified since Woodrow Wilson, speaking as Governor, said that New Jersey has "the problems of the country in such a form that they are raised to the highest degree of difficulty and complexity." This was, remember, almost half a century ago. Even then, said the Governor, we were faced with "all the great urban problems," among them that of water supply, created by congestion of population.

Growing Pains

We had an example of the growing pains that come with increasing urbanization in our recent necessary acquisition of Round Valley in Hunterdon County. It was the last feasible large reservoir site in the northern part of the State.

Whenever a new highway is projected, we face the problems of dislocating settled neighborhoods. Growing population and the spread of urban developments require that we place a high premium on land for parks and recreation areas and wildlife preserves. This growth, of course, lies at the heart of our agricultural problems. It makes our farm land high-priced, and farm income must therefore be correspondingly high.

Emphasis on Planning

All this compellingly points to the need of our giving strong emphasis to planning. New Jersey is now first among the States in the program that permits Federal and State assistance for planning to municipalities under 25,000 population. It is also first on a per capita basis in terms of co-operation with the Federal Government on advance public works planning.

These problems of population and expanding economy were stressed in my second annual message. We of New Jersey are fortunate and happy in our growth and our strength. Were we not enjoying this progress, we would not need—as we do—more schools, more highways, more recreational facilities and many other things, nor would we be obliged to increase our present services. Growth explains why the costs of State Government are rising. New Jersey is forging ahead and will, I am confident, continue to do so. It is up to us to see that our State Government meets the demands that come from the impact of growth and change.

Informing the People

It has been my constant aim to keep the people of New Jersey fully informed of the operation of their government. I subscribe to the belief of Thomas Jefferson that whenever the people are well-informed, they may be trusted to rule themselves, and when things go wrong, they may be trusted to set them to rights.

We in State Government have used every possible means to tell what is going on at the State Capitol and in all of the 14 departments of government. I meet the able daily press corps twice a week, and at times even oftener, to give out news and to answer questions. Once a month there is a similar session for the editors of the weekly newspapers. On Sunday evening, New Jersey citizens can tune in on a half-hour television and radio report by their Governor on various aspects of State Government, and they may also hear a half-hour program conducted by the Legislature.

Practice of Democracy

Every letter sent to me is answered as promptly as possible. In the past four years, I have made it my business to visit all parts of the State to learn of conditions at first-hand and to exchange views with my fellow citizens. Last

year, I devoted months to intensive campaigning in which I gave a full account of my stewardship. All of this is in accord with my belief that democracy should be constantly practiced as well as preached.

Citizen Participation

This program has been effective. It has enabled us in State Government to know more intimately the great capacity of our citizens to accept and endorse needed change. Most of all, it has made for effective democracy because of greater citizen participation.

Our citizens have shown a genuine capacity to share the burdens of self-government. They make their views known individually or through their effective organizations. They form the public opinion so essential to legislative and administrative action.

Literally hundreds of able people have assumed great burdens on voluntary boards and agencies in State Government, where matters of policy are carefully considered and determined. Administrative action based on these policies is then carried out by our State officers and employees. At the local level, in all phases of county and municipal government and in our school districts, we have literally thousands of citizens who serve their fellow citizens at real personal sacrifice.

Rewards of Public Service

In reflecting on my four years as Governor, I find I have been richly rewarded in the moral, spiritual and intellectual satisfactions that come from public service. I have been given the chance to serve my fellow man.

In the true sense of Lord Tennyson's line, "I am a part of all that I have met." If I have been privileged to help shape the destiny of New Jersey for a few brief years, I, in turn, have been shaped by my friends and colleagues, and by the thousands of New Jerseyans who have consulted me and been consulted by me.

A Mandate

When the election returns came in last November 5th, my deeply felt reaction was that the finest thing in life for a public official is to have his own friends, his own neighbors, and the tens upon tens of thousands of citizens of a great State give him so unmistakable an expression of confidence. It was a mandate to carry on with a program already clearly stated and explained.

I set out on my second term with the feeling that there is nothing esoteric about the job of being Governor. The techniques of democracy are the same—in the village, the township, the city and the State. In the larger units, the pressures may be greater and more zeroes must be added to the budget figures, but fundamentally men govern with the consent of the governed and with whatever ability, understanding and co-operation they can muster. Within proper limits, they are expected to furnish leadership rather than merely follow.

Fresh, Hard Look

Re-election gave me a renewed determination to justify the confidence of the people. At the first Cabinet meeting after November 5th, I asked each department head to take a fresh, hard look at the policies and aims of his department, to lay out forward-looking programs for the next four years, to re-examine methods and, in every possible way, improve the efficiency of our work and our service to the public.

Assembly Majority

And I found another thing had happened on November 5th. Not only had I been rehired by my 5,500,000 bosses, but they had given me a new setting to work in—they had given my party a majority in the House of Assembly and increased its membership in the State Senate. This means that my party will bear heavier responsibility for good

legislative practices and the enactment of a forward-looking program.

My own aim for the next four years is to do the best possible job as Governor of New Jersey, to the limit of the powers and talents with which the Lord saw fit to endow me.

Let me tell you some of the things it means to be a good Governor.

It means he must strive to keep in proper balance the hundreds of conflicting pressures that operate to influence government in our ever more complex and competitive society.

Lobbyist of the People

It means that forever in his mind must be the fact that while it is proper for all special groups to be represented and heard, the Governor is the Chief Lobbyist in all the State—and that his clients are all the people.

It means that his judgment is tested by the character of his appointees who sit in the courts and who direct the activities of the executive departments.

The success of a Governor's administration is dependent on making his views known and his direction felt throughout all the echelons of State service.

Role of State Government

In my third annual message I pointed out the many ways in which State Government touches the lives of the people. It plays a vital role in the education of our children, in the care of the poor, the sick, the retarded, the handicapped and the aged; in the administration of justice; in the preservation of order; in the construction and maintenance of our highways; in safeguarding the rights of labor; in the protection of health.

Indeed, State Government intimately touches upon many of the smallest details of our daily lives. It affects everyone every day, from the person who is assured an honest weight in the food markets, to the person who turns on an electric light, travels in a motor car, buys an insurance policy or deposits money in a bank.

Highways

It means, to be a good Governor, that he should be deeply concerned about our highways in a day when everyone is on wheels.

It means that every time a death occurs on these highways, he must ask: "Could this tragedy have been prevented?"

Labor and Management

It means he is responsible for fair play to the workers, and he must sponsor legislation to improve their lot. And, since the welfare of the workers is dependent upon the prosperity of industry, the Governor must see the labor-management problem as a whole. He must do his best to preserve an atmosphere of peaceful relations and to do whatever lies in his power to foster the progress of business and industry and labor.

He must, through himself, his economic ambassadors, and every agency of State Government, encourage industries to locate here and to prosper, taking advantage of our highly skilled labor force, availability to great markets, excellent transportation facilities and the State's many other attractions.

The Governor must win and retain the trust and confidence of the people and must guard against those who would betray that trust and confidence.

Wards of the State

It is the Governor's responsibility to look after and watch over the many thousands who, for one reason or another, have become wards of the State.

I could give you the numbers—and they are great—but I would rather think of them as human beings rather than as units in a table of statistics.

These are the people in our mental hospitals, in our colonies for the retarded, on the relief rolls and in our prisons and correctional institutions.

Take the people in our mental hospitals. Should we be content with locking them up, in putting them into the misery and idleness of back wards?

No, we should not and we need not. We have entered a new day for treating mental illness, and while I am Governor, these people will be treated—not merely kept in custody—and they will not be forgotten.

Civil Rights

The Chief Executive must strive constantly to be certain that our citizens enjoy the inalienable civil rights guaranteed them by the law of our land and State. Only by constant vigilance at all levels can we be sure that there shall be no tolerance of second- or third-class citizenship.

In my list of things for which a Governor should be held responsible, I leave to the last what is probably, in the long view, the most vital, the most important, the most challenging problem in a democratic society—namely, education.

Aims of Education

For here is the crucible in which the moral strength of our children is formed; here is the place where that amazing gift of God Almighty—the human intellect—is planted with the seeds of knowledge, of noble and useful thoughts, of

high ideals and aspirations, of freedom to think, to speak, to worship and to dare.

It is here where equality of opportunity is furnished our citizens. More and more, all phases of our economic life are relying on our schools to do the screening by which the talented are chosen for leadership in our professions, business and industries.

And perhaps most important of all in these blazing times, when democracy is being challenged all over the world, here in the schools is nourished the education without which democracy cannot endure.

So that, my friends, is my ambition—to be a good Governor. To me it is an inspiring ambition which I welcome the chance of sharing with you and all of the people of New Jersey on this Inauguration Day.

Four-Year Voyage

Inauguration is, in a very real sense, a special day for all of us. Those of you here, those within range of radio and television, those who read this message in our press, are real participants in a four-year voyage on the sea of democracy. The efforts of all of us are essential for effective performance by all three branches of government represented at this ceremony. With your active participation we can continue to move forward.

In the variety of its problems and opportunities, New Jersey is a laboratory where all phases of democracy can be tested, applied and made to work. In an era when our system is under attack all over the world, we in New Jersey must bring new devotion and new vision to the practice of our democratic ideals.

OUR HERITAGE

We ought to count our blessings. We live in a land singularly favored by nature and by the opportunities offered by liberty. It is a country where rich rewards are paid for character, brains and hard work—where a man, however obscure his origin, may aspire to all the good things of life.

It is easy to grow lyrical over such a country and over our magnificent heritage of democracy. Let us in New Jersey guard and cherish our birthright. With God's help and blessing, let us together and with unflagging confidence, move forward into the years that lie ahead.

Respectfully submitted,

ROBERT B. MEYNER,

Governor.

BUDGET MESSAGE

To the Members of the Senate and General Assembly:

Today I present to you my Fifth Budget Message.

The Budget here proposed is the highest in the history of New Jersey. I say this, with no intent, of course, to boast. But I say it, too, without apology. The Budget is the largest ever, but so is our population; so are the needs of our schools and colleges; so is the necessity for highway projects; so are the demands for our humanitarian services.

In my Inaugural Message and in my Fourth Annual Message to this Legislature, I tried to describe—in broad strokes in the Inaugural Message and in detail in the Legislative Mesage—the problems and the opportunities that have come to New Jersey with its remarkable growth and change. The time comes now to consider the dollars-and-cents side of this development. This Budget represents the wages of growth. If you look upon it as plain outlay, it is high, but if you regard it properly as an invesment in the future, we can do no less. During the four years of my first administration we early tripled State aid to education. We put New Jersey in a position to share fully in a Federal highway program that is indispensable to a highly industrialized and commercial State. We broadened the use of our parks and recreation areas; we tightened law enforcement; we brought an enlightened approach to mental health and welfare problems. All these program breed fresh momentum, and the State continues to grow. This Budget will serve a State that will have grown by half a million people since I became Governor four years ago. Most of this population growth has taken place in the ranks of our youth and our senior citizens.

BUDGET REQUESTS

Requests presented to the Budget Director for the fiscal year 1958-59 totaled $512,600,000. These covered normal

operations, State aid programs and a sizable program of capital construction.

These requests were reduced by $113 millions, leaving total recommendations of $399,679,233. An additional $2,493,100 will be required for supplemental appropriations in prior fiscal years. Revenues available under our present tax structure fall far short of this sum.

Revenues

We have available resources of $343,193,561. We must find $56,500,000.

The Budget In Brief

Resources

Estimated Surplus, June 30, 1958:	
Normal Anticipations (after allowance for pending supplemental appropriations)	$5,301,768

Estimated Revenues for 1958-59	324,542,989
Total Resources for 1958-59	$343,193,561

Recommendations

General State Operations	$173,354,593
State Aid	163,769,679
Capital Improvements	62,554,961
Total Recommendations	$399,679,233
Amount Required to Balance the 1958-59 Budget	$56,485,672

Gasoline Tax

In my Annual Message I urged a gasoline tax increase for highway purposes. A one-cent increase would yield $17,700,000. With this enactment we would still need $38,800,000 to balance the Budget. This, of course, would leave us without a surplus on July 1, 1959.

The Need For Additional Revenue

This year we must face the unpleasant task of imposing

a new tax. This necessity arises principally from demands for more funds for education.

While the tax laws do not specifically dedicate any revenue for educational purposes, nevertheless it has become traditional in New Jersey to consider certain tax revenues as available only for such purposes. In this category are the main-stem railroad tax; the cigarette tax; a portion of the corporation business tax; a relatively small part of the pari-mutuel tax; one cent of the motor fuels tax, and income from the State School Fund and the 1837 Surplus Revenue Fund.

In this Budget Message the funds derived from these sources total $75,590,000. The amount recommended for education is $159,417,000. The gap is $83,827,000.

I have previously indicated that to balance this Budget to the penny would require $38,800,000 in new revenue, assuming that the gas tax increase is enacted. Obviously, with a $400,000,000 Budget, it would be foolish to recommend a fiscal program which would leave no surplus, no elbow room for emergencies. In my opinion, the State should plan a minimum surplus on July 1, 1959, of $6,200,000. Therefore, we need $45,000,000 in new revenue.

In its Ninth Report to the Legislature, the Commission on State Tax Policy recommends the enactment of a 3 per business tax applicable to the net income of both incorporated and unincorporated business to provide funds for the replacement of the present locally assessed taxes on household goods and business inventories. If this proposal is adopted, then the State, by increasing the rate from 3 per cent to 5 per cent, can look to the same revenue source for the additional amount necessary to meet its Budget requirements. If the Commission's replacement program is not acceptable, then I recommend the imposition of a corporate net income tax, integrated with the present corporation business tax, to provide additional tax revenue of 45,000,000.

Where The Budget Increases

After providing for pending supplementals, the total appropriations for 1957-58 will be 340,000,000. The $399,-

679,233 recommended for 1958-59 is an increase of $59,700,000 made up as follows:

Capital Construction for Education		$14,650,000
Highway Construction and Extraordinary Maintenance		18,450,000

EDUCATION

The State Board of Education has completed its study of building needs at the teachers colleges, the State University and the Newark College of Engineering. These needs include dormitories which would be self-supporting. The net State outlay under the State Board's program would be $65,000,000. The State Board proposes a bond issue referendum at the next general election. It is my opinion and the opinion of many members of the Legislature that the long-standing problem of water resources, which both political parties are pledged to solve, has priority. I lean to the view of many people that it would be unwise to expect the people of New Jersey to approve both the water and education proposals on the same ballot. For this reason, I have included in this Budget, on a pay-as-you-go basis, a substantial start on the educational building program. This would not preclude the possibility of an education bond referendum next year.

For this year I am recommending $15,550,000 which includes: $2,087,000 for the Department of Education Office Building; $2,950,000 for classrooms, gymnasium and cent-

ral heating plant at the Glassboro State Teachers College; $3,625,000 for classrooms, food service building, central heating system, utility room and men's gymnasium at the Paterson State Teachers College, and $990,000 for a classroom building and necessary site development at the new Union State Teachers College. In addition, there is $500,000 for the purchase of land for the State University to round out holdings in Camden and Newark; $1,000,000 to complete the law center at Newark; $2,500,000 for the biology building on the New Brunswick campus, and $1,000,000 for a library, classroom and study center at Douglass College.

In addition, I recommend $400,000 for a new dormitory and dining room at the School for the Deaf, and $500,000 as the State's share for buildings at the Newark College of Engineering.

Operation of Teachers Colleges

Based on applications led with the various teachers colleges, our enrollment in 1958-59 will be 9,542 students, an increase of 1,549. To meet these new demands, faculty and staff must be increased. The amount required for teachers colleges alone in 1958-59 is $7,070,427, or $1,147,128 more than in fiscal 1957-58. This includes 132 new positions, 87 of them teachers.

Other sums are included for materials and supplies, principally to build up our libraries, which are important in obtaining accreditation by the Middle States Association. At present, only Montclair and Trenton State Teachers Colleges are so accredited. We are seeking accreditation for the colleges at Glassboro, Paterson, Union and Jersey City. Without such recognition, graduates may not be accepted for advanced study elsewhere.

Operation of the State University and Newark College of Engineering

Enrollment at the State University is expected to increase by approximately 600 during the next fiscal year, and more funds are recommended to provide for these additional students. For the General University, Douglas College and the Agricultural Experiment Station, $730,000 more is recommended in 1958-59. There is an additional $85,000 for the Newark College of Engineering.

State Scholarships

In my fourth Annual Message to the Legislature, I urged scholarships for needy, deserving and qualified students who want to study at New Jersey colleges and universities. These would supplement the State University scholarships and could be linked to a Federal scholarship program if one develops. Bills have been introduced to inaugurate these grants. This budget includes $100,000 as a starter. I recommend that such scholarships be awarded by the State Board of Education.

State Aid for Education

State aid to local districts and payments to the Teachers' Pension and Annuity Fund will total $117,396,595 in 1958-59, or $9,960,000 more than the current fiscal year.

The arrival in New Jersey of many refugees re-emphasizes the need for instructing our foreign-born, in the interest of good citizenship. Funds are recommended to re-establish State assistance to local communities for adult education.

The State's cost of education in fiscal 1958-59 will be $159,417,229—roughly 40 per cent of the whole Budget. It is the largest single increase—up $25 million from the current year.

Highways

New Jersey has a backlog of hundreds of millions of dollars in needed highway construction. Since World War II, fewer than 100 miles of new roads have been added to the State system. Meanwhile, motor vehicle ownership and traffic volume have more than doubled. Because the State Highway Department was on short rations, the only major new highways, the Turnpike and Garden State Parkway, were built as toll roads by independent authorities.

The expanded Federal Aid Highway Program seemed to be the answer to New Jersey's highway ills. Through this program, more than 300 miles of freeways will be added to our road system and some existing highways improved. But these benefits can be obtained only if every dollar of Federal money is matched by State funds. We have our matching money, but in getting it we have left nothing for two vital

parts of the State's Highway program. I refer to advance purchase of rights-of-way and to our domestic highway needs. I recommend $17,700,000 for these purposes and $750,000 additional for extraordinary maintenance.

ADVANCED PURCHASE OF RIGHTS-OF-WAY

There are obvious advantages to advance purchase of rights-of-way. Land values are increasing. Land does not remain unimproved for long in this era of rapid growth. Isn't it wiser to acquire right-of-way land when it is vacant—before it becomes the site of a home, a market or a factory—than to wait and put the property owner to greater inconvenience and the State to higher expense?

NON-MATCHING STATE HIGHWAY PROJECTS

The amounts recommended include road and bridge construction not part of the Federal system, utility relocation and drainage projects. Even more important are safety features like traffic signals, center barriers, island closings and jug-handle turns. All of these will improve safety on many of our most outmoded and heavily traveled roads.

INSTITUTIONS AND WELFARE

In the Department of Institutions and Agencies, an increase of $1,983,820 is recommended for operating costs and an additional $987,812 for State Aid.

We have included funds for increased staff at our institutions for the mentally retarded.

MENTAL HEALTH

We continue to see results from our improved mental health program. For two years now, the population of our mental hospitals has decreased. We must work to continue this trend, even in the face of increasing admissions. In this connection, we are providing money to return 475 persons to the community through family care. We are marking additional funds for research. We are including $450,000 as the State's share of community mental health services.

The population at institutions for the mentally retarded is estimated at 5,970, an increase of 859 over 1957. Many of the new cases are more seriously handicapped and require more attention and care. Those less seriously handi-

capped are served in their communities by the Department of Education's typical student program.

Correction and Parole

This Budget anticipates the development of another small residential treatment center patterned after the successful project at Highfields.

It includes $50,675 for basic clothing needs of inmates upon their parole from our correctional institutions. The State, wherever possible, should ease the adjustment for those who have earned parole and help them in these first critical weeks.

I am also recommending additional parole officer positions to reduce case loads and to improve standards for investigation and supervision.

Welfare

In recognition of the anticipated social service case load of the State Board of Child Welfare, I am recommending additional positions to help keep case loads at manageable levels. The agency needs more staff for its adoption program. There are 428 children under this agency's jurisdiction who may be adoptable. On file are 817 adoption requests which must be investigated.

Old age assistance is increased to provide for 305 additional medical institution cases, and to increase the average monthly grant to nursing homes. The Budget reflects a slight increase in the cost of living for other recipients. The increase for maintenance of dependent children is primarily in the area of home life assistance. The anticipiated case load increase of 3,841 brings the total of children and adults involved to 28,841. The per capita costs for boarding children are increased in each category—guardianship, care and custody, and home life assistance—to retain foster homes and to increase family budget allowances.

New Positions

I am recommending a total of 202 new positions in the Department of Institutions and Agencies. Seventy-five would improve staffing and supervision at institutions for the mentally retarded; 27 are needed at Ancora State Hospital; 57 would reduce welfare case loads to reasonable

levels; and 43 will provide special treatment. Offsetting the new positions are 116 jobs which were eliminated through program review and administrative improvements in such areas as laundries, farms, communications and power plants.

HEALTH

On many occasions I have presented the need for new State office buildings. One of these would house the Department of Health. Again I submit this imperative need.

The laboratory of the Health Department, housed on the third and fourth floors of the State House, operates under the most trying conditions. The fourth floor is directly under the roof. The present quarters are hazardous. Any private laboratory under like conditions would be condemned by our own inspectors.

Accordingly, I am recommending that $4,080,000 be transferred from the Veterans Guaranteed Loan Fund and appropriated so that this building can be constructed immediately. I am also recommending that funds be provided for the continuation of a virology program. No more graphic example of the need for this service can be presented than the epidemic of Asian flu.

This Budget contains $100,000 to initiate our Division of the Aging. In addition, $30,000 is provided to expand our chronic illness control program.

LABOR AND INDUSTRY

There is now available to the Department of Labor and Industry $9,000,000 in Federal funds and moneys derived from penalties for late payment of unemployment compensation taxes. This money is not part of our General Treasury but is available for building needs of the Department. I recommend that the Legislature appropriate these funds for a Labor and Industry Building.

I recommend that we step up our program of vocational rehabilitation. Funds are also recommended for two migrant labor schools.

LAW AND PUBLIC SAFETY

This Budget includes some $600,000 for a general issue

of motor vehicle license plates. The remaining cost of this general issue, which should be staggered over a period of time, will be reflected in the Budget for 1959-60.

When permanent motor vehicle registration was adopted in 1951, it was contemplated that new plates would be issued every five years. The Legislature did not provide funds for this purpose. Instead, motorists were to retain their old plates until they were unusable. The Legislature meant this as an economy move. However, it caused untold inconvenience and embarrassment to motorists traveling in other States. A general issue of license plates will eliminate these problems. It is long overdue.

Recreational Areas

In the current fiscal year, $500,000 was made available to the Department of Conservation and Economic Development for the continuance of a program initiated two years ago to provide additional recreational areas, picnic sites and other facilities in our various State parks and forests. In this Budget, there is recommended $500,000 to continue this program and an additional $150,000 for roads and approaches to these areas. New Jersey has valuable lands such as the Worthington Tract, the Wharton Tract and Island Beach, which to a very great extent remain unusable because we have not had sufficient funds to develop them.

Many of our sister states are spending millions of dollars to advertise their advantages to industry and their tourist attractions. There is recommended in this Budget $200,000 for promotional activities during the next fiscal year, an increase of $75,000.

Water Resources and Planning

The people will probably get the chance to vote at the next general election on a bond issue to provide additional water resources in New Jersey. The water problem has been with us for many years. We are concerned not alone with adequate storage of water. We should also attack our salt water intrusion problems and survey our underground water resources. In this Budget are additional sums for appropriate engineering staff for these purposes.

Additional funds have been provided to expand our

regional, State and local planning programs. We cannot afford to lag here.

Banking and Insurance

Provision is being made to strengthen the administrative and investigative operations of the Department of Banking and Insurance. It is hoped that the statutory changes which I previously recommended, together with adequate sums for operation, will permit this department to handle its job more effectively.

Treasury

As an economy measure last year, the Legislature eliminated the Methods and Procedures Unit in the Department of the Treasury. Other states have been reaping the benefits of this type of service. I am recommending in this Budget funds to provide technical help to study improvements in management methods and procedures.

The Division of Budget and Accounting has done considerable work on the Budget, developing work load factors in the various departments. We hope that future Budgets will more effectively disclose the cost of government on a program and performance basis.

In the Division of Taxation we again recommend funds to handle the tremendous task of state-wide equalization. In the Budget for the currnt year, $200,000 is provided for the acquisition of appraisals of commercial and industrial properties to supplement sales data in those districts where sales samples are inadequate for the determination of assessment ratios. For next year provision has been made to carry on this appraisal program within the Division.

As a result of a Supreme Court decision in a recent railroad tax case, the Division has requested $725,000 to meet the estimated cost of an appraisal of all structures in railroad use. Such an appraisal was last made in 1911, thereby raising the question whether present-day assessments based on those valuations are equitable. At the time of closing of the Budget, a decision had not been reached on the necessity for this project so that no amount has been included for this purpose. If this question is settled before the Appropriations Committee concludes its hearings, the results will be brought to the attention of the Committee.

Pensions

In this Budget, there is recommended for contributions to State pension systems, exclusive of the State Teachers' Pension and Annuity Fund, the sum of $10,917,500. The cost to the State of providing for the Teachers' Pension and Annuity Fund and the social security applicable to teachers is $29,026,000. Total pension costs, therefore, approximate $40,000,000 and represent some 10 per cent of the total State Budget for next year.

Inadequate Pensions

I have included $650,000 to increase payments, effective January 1, 1959, to pensioners hardest hit by inflation. This problem has been carefully studied and its merits should be beyond argument.

State Employees

This Budget will continue the normal merit increment to State employees for the next fiscal year. Funds for the normal merit increment, for which they were eligible during the present fiscal year, are provided in Assembly Bill No. 25.

I also recommend $1,200,000 for hospitalization and medical-surgical benefits to all State employees.

Some areas of State service need specific attention on salaries. To correct inequities and to attract specialized personnel, this Budget includes $500,000 for allotment as required. The money would be made available to a department when the need can be conclusively demonstrated to the satisfaction of the Civil Service Commission, the State Treasurer and the Budget Director.

The Legislature

Funds have been recommended for the operation of the Legislature with particular reference to the 183rd Session. At the request of the President of the Senate and the Speaker of the General Assembly, this appropriation has been revised so that costs applicable to each House will be shown separately.

Previously, the appropriations for the Legislature did not cover the cost of a particular session. Under this method it

was impossible for either the Legislature, the Executive or the people to know how much it cost to operate each session. Under the revised plan, the cost of each session will be clearly shown and it should be unnecessary, except under unusual circumstances, for the Legislature to introduce supplemental bills for its operations.

CONCLUSION

New Jersey is a well-endowed State. It has many attributes. Its location, its bright history, its natural advantages as a site for homes and recreation, for farm and business, for industry and research—these are treasures we all share. But greatest of all our resources are the men, women and children of this great State. It is for them that this Budget has been shaped; with major emphasis on opportunities for education, with concern for the handicapped and the unfortunate in our midst, with interest in the development of our park and recreation areas for greater use and enjoyment by our citizens, with attention to the giant need for a modern, safe highway system.

This Budget recognizes the need of getting essential things done. For all of these things a proud State must be willing to invest, not only to make the most of today's opportunities for better living, but also to build a better future for New Jersey and all her people. A Budget to some is a dry document, full of unglamorous detail, dreaded as an unwelcome necessity. In truth, this Budget for our State is warm and human in its impact, exciting in its potential for the continued growth and well-being of New Jersey, challenging in the opportunity it presents to meet the tests of our times and to build for future generations.

Respectfully submitted,

ROBERT B. MEYNER,
Governor of New Jersey.

SENATE RESOLUTION

BY

Senators O'Kelly, McLynch, O'Farley, O'Fox, O'Forbes, McJones, McCay, O'Cowgill, McSandman, Fitz Sharp, O'Hannold, O'Lance, Fitz Ridolfi, McStout, O'Hillery, McMathis, O'Grossi, Fitz Waddington, O'Harper, McCrane, and McDumont.

WHEREAS, Ireland, a wee green dot on the map of the world, has produced unnumbered citizens of New Jer-

sey and the United States because of the Irish love of freedom, equality, adventure, and good government; and

WHEREAS, Ireland had a population of 4,329,587 within 31,839 square miles in 1951, while New Jersey had 4,835,329 citizens happily residing within its borders, comprising 15,358 square miles, in 1950, thereby hinting of a great similarity; and

A CONCURRENT RESOLUTION MEMORIALIZING THE FEDERAL COMMITTEE ON STANDARD METROPOLITAN AREAS AND NEW JERSEY MEMBERS OF CONGRESS TO CREATE TWO ADDITIONAL STANDARD METROPOLITAN AREAS FOR NEW JERSEY.

WHEREAS, The Federal Bureau of the Budget, with the advice of the Federal Committee on Standard Metropolitan Areas, is presently revising the list of Standard Metropoli-

tan Areas as heretofore designated and is adding such new metropolitan areas as may be found consistent with changed conditions, in preparation for the 1960 Federal Census; and

WHEREAS, The State of New Jersey, the most urbanized in the nation, is presently enjoying only two such ratings, to wit: Trenton, our State Capital, and Atlantic City, our nationally known seashore resort; and

WHEREAS, the cities of Newark, the largest in northern New Jersey, with a population of over 450,000, and Camden, the largest in southern New Jersey, with a population of over 125,000, qualify in their own right, but, because of their proximity respectively to the cities of New York and Philadelphia, have, for the past twenty-seven years, been without the many benefits accruing from such a rating, and have, in fact, been blacked out by being treated as parts of these two giant metropolitan areas having as their central core, cities located outside the boundaries of this State; and

WHEREAS, The cities of Newark and Camden have both greatly expanded their areas of economic influence and have long since met and surpassed all the usual federal requirements of qualification as independent metropolitan areas; and

WHEREAS, These cities are in fact experiencing today tremendous urban renewal undertakings in their downtown districts, thus making them more important than ever to their constantly expanding suburban environment; and

WHEREAS, These two New Jersey cities, if they were presently rated independently of their geographical proximity to New York and Philadelphia, respectively, would be well up on the list of over 150 cities enjoying the economic, planning and many other benefits deriving from a metropolitan area rating; now, therefore,

Be It Resolved, By the Senate of the State of New Jersey (the General Assembly concurring), that the New Jersey Legislature assembled in Trenton, at its 1958 session, hereby urges the Federal Bureau of the Budget and the Federal Committee on Standard Metropolitan Areas to

establish forthwith, for the cities of Newark and Camden, independent standard metropolitan area ratings separately and apart from their giant neighbors; and

Be It Further Resolved, That our New Jersey delegation in Congress be asked to lend such aid and support to this request as will bring about as quickly as possible this vitally important objective.

STATE OF NEW JERSEY
GENERAL ASSEMBLY CHAMBER
Mr. President: May 26, 1958.

I am directed by the General Assembly to inform the Senate that the General Assembly has concurred in the following concurrent resolution:

SENATE CONCURRENT RESOLUTION No. 19

A CONCURRENT RESOLUTION MEMORIALIZING THE FEDERAL COMMITTEE ON STANDARD METROPOLITAN AREAS AND NEW JERSEY MEMBERS OF CONGRESS TO CREATE TWO ADDITIONAL STANDARD METROPOLITAN AREAS FOR NEW JERSEY.

WHEREAS, The Federal Bureau of the Budget, with the advice of the Federal Committee on Standard Metropolitan Areas, is presently revising the list of Standard Metropolitan Areas as heretofore designated and is adding such new metropolitan areas as may be found consistent with changed conditions, in preparation for the 1960 Federal Census; and

WHEREAS, The State of New Jersey, the most urbanized in the nation, is presently enjoying only two such ratings, to wit: Trenton, our State Capital, and Atlantic City, our nationally known seashore resort; and

WHEREAS, the cities of Newark, the largest in northern New Jersey, with a population of over 450,000, and Camden, the largest in southern New Jersey, with a population of over 125,000, qualify in their own right, but, because of their proximity respectively to the cities of New York and Philadelphia, have, for the past twenty-seven years, been without the many benefits accruing from such a rating,

and have, in fact, been blacked out by being treated as parts of these two giant metropolitan areas having as their central core, cities located outside the boundaries of this State; and

WHEREAS, The cities of Newark and Camden have both greatly expanded their areas of economic influence and have long since met and surpassed all the usual federal requirements of qualification as independent metropolitan areas; and

WHEREAS, These cities are in fact experiencing today tremendous urban renewal undertakings in their downtown districts, thus making them more important than ever to their constantly expanding suburban environment; and

WHEREAS, These two New Jersey cities, if they were presently rated independently of their geographical proximity to New York and Philadelphia, respectively, would be well up on the list of over 150 cities enjoying the economic, planning and many other benefits deriving from a metropolitan area rating; now, therefore,

Be It Resolved, By the Senate of the State of New Jersey (the General Assembly concurring), that the New Jersey Legislature assembled in Trenton, at its 1958 session, hereby urges the Federal Bureau of the Budget and the Federal Committee on Standard Metropolitan Areas to establish forthwith, for the cities of Newark and Camden, independent standard metropolitan area ratings separately and apart from their giant neighbors; and

Be It Further Resolved, That our New Jersey delegation in Congress be asked to lend such aid and support to this request as will bring about as quickly as possible this vitally important objective.

Kays, a distinguished lawyer of this State who still actively practiced law when he was well over the age of 90 years; and

STATE OF NEW JERSEY

EXECUTIVE DEPARTMENT

July 31, 1958.

SENATE BILL NO. 172

To the Senate:

I am returning herewith, without my approval, Senate Bill 172. The reasons are as follows:

The bill appropriates $10,000.00 for the use of the Senate committee established by Senate Resolution No. 6, to investigate the administration of the Bingo and Raffles Licensing Laws by the Legalized Games of Chances Control Commission.

It should be observed that this bill would supplement P. L. 1957, c. 113, the annual appropriation act for the fiscal year 1957-1958; it would, therefore, appropriate the sum indicated for the fiscal year which ended June 30, 1958. It was introduced on April 7, 1958, prior to the introduction on April 17, 1958, of the general appropriation bill for the current fiscal year, Assembly Bill No. 500. It was not passed until June 16, 1958, only two weeks before the end of the last fiscal year.

Article VIII, Section II, paragraph 2 of the Constitution provides, among other things, that:

"All moneys for the support of the State government and for all other State purposes as far as can be ascertained or reasonably foreseen, shall be provided for in one general appropriation law covering one and the same fiscal year ***."

Obviously, the intended appropriation could not possibly have been applied to the stated purposes during the two-week period which remained between the passage of the bill and the end of the last fiscal year. In addition, this expenditure was not provided for in the general appropriation law for the current fiscal year, although it could have been ascertained or reasonably foreseen when Assembly Bill No. 500 was introduced. There is no provision for the reappropriation of any unexpended balance of the amount called for by the bill.

Although these considerations make it necessary to return the bill without my approval, this should not in any way handicap the realization of the legitimate objectives of Senate Resolution No. 6; the committee there created is directed to investigate the operation and administration of the Bingo and Raffles Licensing Laws. This work is conducted by a duly constituted State agency, which, I am informed, maintains detailed and exhaustive records and data, from which it can, with relatively little difficulty or expense, provide the Senate committee with the information it may legitimately require.

Respectfully,

ROBERT B. MEYNER,
Governor.

NEW JERSEY SENATE

THE HONORABLE RICHARD R. STOUT
President, New Jersey Senate
State House
Trenton, N. J.

Dear Mr. President:

It is with deepest regret that I address this letter to you as President of the Senate containing my resignation from the Upper House of the New Jersey Legislature.

For reasons explained to you last Thursday, I feel in fairness to the members of this body, to the people of Somerset County and the State of New Jersey, that I must resign because in the months ahead I will not be able to give the time that this important job deserves.

In asking the Senate to accept this resignation Monday, I would be grateful if the Senate could also adopt a writ of election for this November so that the people of Somerset County will have an opportunity to choose a successor to fill my unexpired term.

Sincerely,

/S/ MALCOM S. FORBES

MSF/emb

Mr. Lance offered the following resolution, which was read.

Be It Resolved, That the resignation of Senator Malcolm S. Forbes, of the county of Somerset, be accepted.

All wished him success in future business and endeavors.

The resolution accepting his resignation was adopted.

Mr. Lance offered the following resolution, which was read and adopted:

WHEREAS, A vacancy exists in the office of the member of the Senate from Somerset County by reason of the resignation of Malcolm S. Forbes, which has been accepted by the Senate; therefore,

Be It Resolved, That a writ of election do forthwith issue, which shall be in the nature of a proclamation and be signed by the President of the Senate under the Great Seal of the State, directing that an election be held according to the laws of the State of New Jersey in said county of Somerset, on Tuesday, the fourth day of November, one thousand nine hundred and fifty-eight, for the purpose of electing a Senator for said county to fill the vacancy caused by the resignation of said Malcolm S. Forbes.

STATE OF NEW JERSEY

EXECUTIVE DEPARTMENT

December 8, 1958

SENATE BILL No. 68

To the Senate:

I am returning herewith Senate Bill No. 68, without my approval, for the following reasons:

This bill establishes fixed annual salaries for the surrogates, registers of deeds and mortgages, county clerks and sheriffs in all counties of the State, according to a population scale of the counties. In each population category, the salary to be paid to the incumbent of each of these offices is specifically set forth and is set at the same level for all of the offices.

While I am not in disagreement with the underlying idea of revising, coordinating and, where desirable, increasing the salaries of these county officers, due regard must be given to the fact that the salary raises provided in Senate Bill No. 68 must be paid, not by the State, but by the various counties. Moreover, this bill would affect not only the salary level of the incumbents of the enumerated offices but also the salary levels of a larger number of subordinate officials not mentioned in the bill. For example, deputy surrogates and executive clerks in the surrogate's office are entitled to a salary which is to be fixed locally but which is not to exceed three-fourths of the annual salary of the surrogate, N.J.S. 2A:5-16. Similar statutory provisions apply to the assistants to the county clerks, sheriffs and registers of deeds and mortgages, R.S. 40:38-28, 40:39-21 and 40:41-31.

The primary responsibility for the county budget and the county tax rate rests with each board of chosen freeholders. Mandatory increases in these salary levels, therefore, will tend to reduce the control that local officials will have as to budgeted items. Furthermore, it is questionable whether any mandatory salary schedule can serve a useful purpose

for very long. The present salary schedule has been amended and supplemented approximately 30 times. In the light of this history, it would seem more realistic to establish, not a specific salary, but rather a salary range starting with the existing minimums and with maximums at the level proposed by Senate Bill No. 68, giving to the board of chosen freeholders the authority to fix the specific salary within that range.

Finally, Senate Bill No. 68 provides merely that all acts or parts of acts inconsistent with it are repealed. As I have indicated there are approximately 30 acts which are concerned with the salaries here under consideration. If any new salary schedule is to attain a firm and clear status, these overlapping and outmoded measures should be specifically repealed and our statute books cleared of outdated provisions.

I am, accordingly, returning Senate Bill No. 68 herewith, without my approval.

Respectfully,

ROBERT B. MEYNER
Governor

[SEAL]
