General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally, their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

NOTICE OF PUBLIC COMMENT PERIOD**

Notice of the Department's Remand of a Freshwater Wetlands General Permit #1 DLRP File No. 1508-18-0002.1 (FWW180001) and Minor Technical Modification Flood Hazard Area Individual Permit/Flood Hazard Area Verification/Freshwater Wetlands General Permit #1 and Waterfront Development Individual Permit DLRP File No. 1508-18-0002.1 (FWW210001/FHA210001/FHA210002) and 1500-16-0002.1 (WFD210001) issued to the New Jersey Department of Transportation, Office of Maritime Resources, for further application review and to provide a 30-day comment period.

Project information:

New Jersey Department of Transportation
Office of Maritime Resources
Westecunk Creek Confined Disposal Facility
Block: 1; Lot: 2.01
Eagleswood Township, Ocean County
File Nos. 1508-18-0002.1 FWW180001/FWW210001/FHA210001/FHA210002
1500-16-0002.1 WFD210001

On December 17, 2018, the Department issued a Freshwater Wetlands General Permit #1 for the reconstruction of the existing Westecunk Creek confined disposal facility (CDF). The General Permit #1 authorized reconstruction of the CDF berms to 15' NAVD 88 to store dredge materials from dredging approved under a separate Waterfront Development Individual Permit 1500-16-0002.1 (WFD160001) of Cedar Run State Channel (#146), Westecunk Creek Channel (#147) and Parkers Run Channel (#148), with all construction activity to occur within the previously used footprint of the CDF. The December 17, 2018 General Permit #1 authorized the disturbance of 7.457 acres (324,918 square feet) of freshwater wetlands in the interior of the CDF and the temporary disturbance of 0.299 acres (13,028 square feet) of freshwater wetlands on the exterior of the CDF. On September 15, 2021, the Department issued a minor modification for the permits issued for the CDF reconstruction on Block 1; Lot 2.01, authorizing a change in the construction technique used to dewater the dredged material through the use of geotextile bags and a flocculating polymer. The Department of Transportation modified the project to reduce the height of the berms during the first phase of reconstruction, before reconstructing the berms to 15' NAVD 88. The Department noted that these changes in construction technique would not result in additional impacts to freshwater wetlands, freshwater wetlands transition areas, and riparian zone disturbances.

On November 24, 2021, the Superior Court of New Jersey, Appellate Division issued an opinion in the appeal of the permits issued for this project (A-5525-17 and A-2208-18), remanding the issued Freshwater Wetlands General Permit #1 back to the Department for further consideration. On December 28, 2021, the court granted the Department's request to remand the minor permit modification for further consideration.
