February 15, 2011

Dear Reader:

The Planning Committee of the Governor's Council on Alcoholism and Drug Abuse is pleased to present the Comprehensive Statewide Master Plan for Alcoholism and Drug Abuse in New Jersey. This Master Plan, mandated by N.J.S.A. 26:2BB-4.b,d., is a comprehensive plan that outlines New Jersey's efforts to reduce the incidence and effect of alcoholism and drug abuse in our communities.

The designees of 12 state departments or agencies and the appointed public members of the Council, the staff of the Council, as well as the many volunteers who participate with the various committees and subcommittees of the Council are commended for their work in developing the plan. Alcohol, tobacco and other drug abuse remain one of New Jersey's most serious challenges and a disease of vast proportions. This Master Plan, along with the ongoing planning process established within the Council's organization, serves to identify priorities for addressing challenges while coordinating efforts and targeting existing resources for the fullest benefit.

The Master Plan includes detailed information regarding the Municipal Alliance Program, the statewide network of community coalitions whose primary mission is to provide community based education and public awareness. The Governor's Council on Alcoholism and Drug Abuse is proud of the dedication and untiring determination exhibited daily throughout the state by more than 7,000 Municipal Alliance volunteers and coordinators who work to lessen the impact of alcoholism and drug abuse in our communities.

The challenges we face regarding alcohol, tobacco and other drug abuse can only be met by the collective and combined actions of our public and private sectors. The Governor's Council on Alcoholism and Drug Abuse remains committed to coordinating, collaborating and facilitating efforts that bring all stakeholders together to reduce the adverse effects of alcohol, tobacco and other drug abuse in New Jersey.

We thank you on behalf of the Governor's Council on Alcoholism and Drug Abuse for your interest in the Comprehensive Statewide Master Plan and ask for your continued support of our efforts.

Sincerely,

A handwritten signature in cursive script that reads "Mary Lou Powner".

Background

The Governor's Council on Alcoholism and Drug Abuse was established by the New Jersey Legislature in 1989 as an independent body to coordinate, plan, research and review all aspects of alcoholism and drug abuse, as well as maintain a statewide prevention network of Municipal Alliances. The Council is comprised of 26 members: Ten public members are appointed by the Governor, the Senate President and Assembly Speaker each appoint two public members, and 12 ex-officio members represent state departments and agencies.

The Governor's Council on Alcoholism and Drug Abuse adopted its Mission Statement, Vision and Goals following a collaborative process involving a varied and diverse group of stakeholders with interest in substance abuse prevention, education, intervention, treatment and recovery. These guiding principles have formed the foundation for the ongoing development and implementation of a comprehensive and meaningful planning process to address alcoholism and drug abuse in New Jersey.

The Interdepartmental Advisory Panel, which coordinates the Council's state department representation, developed the format used in the State Government Component of the Master Plan. Their efforts made the collection of this comprehensive information possible.

Purpose of the Master Plan

The Governor's Council on Alcoholism and Drug Abuse was established by Chapter 51 of the Laws of 1989. The legislation set forth two primary objectives for the Council; the establishment and maintenance of a statewide network of community coalitions, the Municipal Alliance Program, and the development of a Comprehensive Statewide Alcoholism and Drug Abuse Master Plan.

The law states that the Council shall "adopt and submit to the Governor and the Legislature a Comprehensive Statewide Alcoholism and Drug Abuse Master Plan incorporating and unifying all State, county, local and private alcohol and drug abuse initiatives." Public Law 1989, Chapter 51 also states, "The Council shall take into consideration all matters affecting alcoholism, intoxication, alcohol abuse, drug addiction and drug abuse and shall formulate comprehensive policies for the prevention and control of alcoholism and drug abuse in order to unify in a comprehensive program all efforts." The legislation also mandates that the "Council shall review and make recommendations with regard to the revision of existing statutes relating to alcoholism and drug program and policies."

This Master Plan is the continued evolution of an effort that began several years ago when the Council developed a strategic planning process. The current approach by the Council is a Master Plan that not only looks at the current status of alcoholism, intoxication, alcohol abuse, drug addiction and drug abuse efforts in New Jersey, but sets forth objectives and strategies for the future.

The 2010 Master Plan came from the vigorous efforts of the Council's Planning Committee, the Alliance Prevention Committee, and the Criminal/Juvenile Justice, Legislative, Treatment and Veteran's and Military Family Subcommittees. It has been reviewed and adopted by the members of the Governor's Council on Alcoholism and Drug Abuse.

2011 Alliance Committee Objectives

Objective #1:

To increase the Alliance Committee's effectiveness in order to better influence the planning and coordination of the state's efforts to prevent alcoholism, drug addiction, and abuse of tobacco and other substances. Additionally, promote programs for youth and young adults that foster resiliency.

Strategy for Achieving Objective with Time Frames:

- Increase capacity building efforts by incorporating representatives and presentations from various prevention affiliates and program facilitators. (ongoing)
- Recommend a prevention presentation topic by January 2011 which covers the purview of this objective for the Municipal Alliances through a workshop at the GCADA Summit.
- Continue working with associations and organizations that have a focus on primary prevention services for youth and young adults in order to examine ways to integrate and collaborate to foster resiliency in their constituencies. (ongoing)

Objective #2:

Educate legislators about the benefits of evidence based prevention programs that addresses alcohol, tobacco and other drug addictions and abuse affecting the residents of New Jersey.

Strategy for Achieving Objective with Time Frames:

- Work collaboratively with GCADA's various committees to educate legislators concerning the importance of promoting the benefits of alcohol, tobacco and other drug prevention. (ongoing)
- Develop presentations to educate and inform GCADA members about prevention and evidence based practices. (ongoing)
- Incorporate ad hoc committee functions to enhance GCADA's efforts. (ongoing)

Objective #3:

Research and investigate programs on emerging trends and areas of need that foster resiliency to prevent the abuse of, but not limited to, alcohol, tobacco, prescription medications, other drugs, and problem gambling.

Strategy for Achieving Objective with Time Frames:

- Identify and work with organizations focused on the identified trends to encourage the development of programs to foster resiliency in their constituencies. (ongoing)
- Develop a mechanism for communicating a list of prevention programs for the GCADA website that follow evidence based practices and incorporate environmental change strategies and submit to the Planning Committee for action by July 2011.
- Notify and educate Municipal Alliance members on state and local initiatives in areas such as, but not limited to, underage drinking, prescription drug abuse, tobacco prevention, and underage gambling.
- Recommend a prevention presentation topic by January 2011 on the identified trends for the Municipal Alliances through a workshop at the GCADA Summit.

Evaluation:

- Maintain 60% attendance of membership at each meeting throughout the year.
- Publish the resource list on prevention programs that follow evidence-based practices and incorporate environmental change strategies on the GCADA website by December 2011.
- Continue monthly report to GCADA.
- Provide three (3) guest speakers to the Alliance Committee on identified trends.

2011 Criminal Justice/Juvenile Justice Subcommittee Objectives

Objective #1:

Reorganize subcommittee so that it is viable and fully functioning.

Strategies:

- GCADA Planning Committee Chair will appoint a permanent subcommittee chair.
- Solicit GCADA member agencies, counties and other groups for interested persons in membership on the subcommittee.
- Establish a 2011 meeting schedule.

Objective #2:

Explore opportunities to coordinate and collaborate with other state agencies around criminal justice, drug court, juvenile justice, prevention and re-entry initiatives, and local planning efforts.

Strategies:

- Arrange for speakers and presentations for both the subcommittee and the GCADA on criminal and juvenile justice issues.
- Organize community based forums with collaborating partners on criminal and juvenile justice issues.

Objective #3:

To increase the knowledge of criminal and juvenile justice officials, treatment providers, legislators, social service and mental health professionals on the impact of substance abuse on the criminal and juvenile offender population.

Strategy:

- Through invitation allow various state and community agencies, and other organizations with an interest to attend the criminal justice/juvenile justice subcommittee meetings to present an overview of their respective duties and responsibilities relative to alcohol and drug addiction prevention and treatment.

Objective #4:

Work with GCADA's subcommittee on veterans and military families on raising awareness in the criminal justice and juvenile justice field of the unique challenges and impacts of substance abuse faced by veterans and their families. Educate policy makers on the services available to veterans and military families.

Strategy:

- Assist in identifying appropriate agencies and officials in the criminal justice and juvenile justice field to receive veteran's service directory compiled by GCADA's ad hoc committee on veterans and military families.

2011 Legislative Subcommittee Objectives

Objective #1:

Increase GCADA's awareness and knowledge about legislative activity related to alcohol, tobacco and other drug abuse, to assist the Council in making an informed decision whether to support, oppose or take no action on a bill and/or recommend legislation.

Strategies:

- Identify and track legislation related to alcohol, tobacco and other drug abuse issues.
- Review and research related legislation, formulate policy recommendations, draft resolutions of support or opposition, and present recommendations to the Council for adoption.
- Establish appropriate measures to initiate and draft recommended legislation.
- Continue distribution of related public policy information to Council members.
- Sponsor presentations at Council meetings in 2011 on public policy issues.

Objective #2:

Notify stakeholders as may be appropriate of positions adopted by the full Council on proposed legislation related to alcohol, tobacco and other drug abuse.

Strategies:

- Ensure the timely distribution of the Council's actions on policy and legislative positions to the administration, legislature, Alliance coordinators, substance abuse professionals and other stakeholders.
- Monitor, recommend and take further actions to educate stakeholders regarding the Council's position on legislation (i.e. press releases, legislative testimony, communication with legislative committee chairs and staff, etc.)
- Ensure the Council's official position on legislation is included in certain GCADA publications, presentations, and webpage.

Objective #3:

Educate legislators and other public policy decision makers about alcohol, tobacco and other drug abuse issues

Strategies:

- Sponsor an event, such as the Day of Advocacy, at the State House in coordination with other subcommittees of GCADA, other state agencies and constituent groups.
- Continue to send GCADA publications to legislators and public policy decision makers.
- Encourage advocacy teams and ongoing advocacy efforts.
- Make a special effort to bring new legislators up to date on GCADA's mission.

2011 Treatment Subcommittee Objectives

Objective #1:

Educate GCADA members about the barriers to accessing treatment services, emphasizing the extensive waiting lists for those individuals seeking treatment.

Strategy:

Make presentations at Governor's Council meetings with an emphasis on types of treatment, need for additional treatment resources, and gaps in the continuum of care.

Objective #2:

Educate public policy makers and other stakeholders about addiction, treatment, prevention, and recovery services in New Jersey to include information on the continuum of care, identifying gaps between systems and covering all developmental stages and special populations e.g. older adult etc. populations.

Strategy:

Collaborate with the GCADA legislative subcommittee on assisting counties in the planning and conducting of events to educate legislators (e.g. legislative breakfast) about issues regarding the AEREF fund, workforce development, and access and barriers to individuals seeking treatment.

Assist in the distribution of the service directory developed by the Council's ad-hoc committee on veterans and military families to the treatment community.

Objective #3:

Increase the knowledge base of treatment and prevention professionals on the issue of substance abuse and provide networking opportunities to promote professional development.

Strategy:

Support and/or organize workshops and trainings at the GCADA annual summit, and other local or regional presentations for treatment professionals in an effort to improve the linkage between treatment and prevention community. Conduct a survey to assess the success of these trainings.

Objective #4:

Improve collaboration between the Alliances and treatment providers in each county

Strategy:

Schedule meetings with representatives from the Alliances and treatment providers to enhance awareness of substance abuse issues and increase opportunities for collaboration.

2011 Veteran's and Military Family Subcommittee Objectives

Objective #1:

Increase GCADA's awareness and knowledge about military and veteran activity in New Jersey especially as it relates to alcohol, tobacco and other drug abuse.

Strategies:

- Identify and track activity at the local, county, state and federal levels including veteran service organizations.
- Review and research related legislation as it relates to military and veteran issues, draft resolutions of support or opposition, and present recommendations to the Council for adoption when necessary.
- Sponsor presentations at Council meetings in 2011 on military and veteran issues and initiatives.

Objective #2:

Maintain and update as needed hardcopy and website of the Military And Veterans' Resource Guide.

Strategies:

- Annually review contents of the resource guide and contact all agencies, hotlines, websites for accuracy.
- Continue and monitor distribution of the resource guide and replenish stock as needed.

Objective #3:

Maintain partnerships with military and veteran groups

Strategies:

- Attend military and veteran sponsored events, such as job fairs, Operation college Promise conferences etc.
- Encourage advocacy teams and ongoing advocacy efforts.
- Continue to represent the Veteran Enhancement Team Coalition (VETC) with legislator, interest groups etc.

- Make a special effort to bring diverse representation to VETC core leadership group.

ADMINISTRATIVE OFFICE OF THE COURTS

Judiciary Mission Statement: The Judiciary is an independent branch of government constitutionally entrusted with the fair and just resolution of disputes in order to preserve the rule of law and to protect the rights and liberties guaranteed by the Constitution and laws of the United States and this State.

Drug Court Mission Statement: The purpose of drug courts is to stop the abuse of alcohol and other drugs and related criminal activity. Drug courts are a highly specialized team process within the existing Superior Court structure that addresses nonviolent drug-related cases. They are unique in the criminal justice environment because they build a close collaborative relationship between criminal justice and drug treatment professionals.

Criminal Practice Division

ADULT CRIMINAL DRUG COURT

The Adult Drug Court is operational in all of New Jersey's 21 counties. The Judiciary and the Division of Addiction Services entered into a Cooperative Agreement to manage the treatment component of the program's funding. The adult drug courts are an alternative to incarceration for a vast majority of participants who otherwise would have been sentenced to a term in state prison.

The program targets the criminal offender who has an addiction, and who has been charged with a non-violent, drug-driven offense. Following application, the Prosecutor's Office in the county of the offense makes a determination as to defendant's program eligibility under statutory requirements. The offender also completes a comprehensive assessment with a TASC (Treatment Assessment Services for the Courts) Evaluator employed by the courts to determine if treatment for chemical dependency is indicated. Once an offender is accepted into the program, a referral for treatment at the appropriate level of care is made in collaboration with the treatment providers designated by the Division of Addiction Services for drug court, including long term residential, short term residential, halfway houses and intensive outpatient.

Drug court programs are rigorous, requiring intensive monitoring of the program participants by the courts' Probation Services Division. Requirements include frequent drug testing and court appearances, along with tightly structured regimens of treatment and recovery services. This level of very close supervision permits the program to support the recovery process, but also allows the drug court program staff to react swiftly to impose appropriate therapeutic sanctions or to reinstate criminal proceedings when participants do not comply with program provisions.

Legislation that became effective August 1, 2008 permitted the drug courts to expand total new admissions by a third. Between July 2009 and June 2010, 1,367 offenders

were sentenced to drug court. As of June 30, 2010, there were approximately 3,928 active drug court participants. More than half of the program participants are male. Over 1,900 offenders have graduated from the drug court program to date.

Funding Amount: \$ 13.2 Million for Judiciary Staff/Operating Expenses (FY 2010)
\$ 24.4 Million for Drug Court Treatment (FY 2010)

Funding Source: State of NJ, Special Purpose Funding

Family Practice Division

JUVENILE DRUG COURT

Currently, New Jersey has three Juvenile Drug Courts in the Camden, Hudson, and Passaic Vicinages. Juvenile Drug Courts focus on juvenile offenders who have drug-dependency problems. The juvenile drug courts serve as a diversion from the formal court process for some cases and also as an alternative to incarceration in state juvenile correctional facilities. They provide an intermediate sanction between probation and state correctional facilities as well as better treatment outcomes for juveniles with alcohol and drug-related problems. Juvenile drug courts allow intensive supervision for at-risk adolescents who are receiving community and court services.

The purposes of the Juvenile Drug Courts is to reduce recidivism, which creates a safer community; to allow juveniles to be alcohol and/or drug free, which will enable them to go back into, or continue, attending school or to become employed; to alleviate detention overcrowding; to implement effective case processing measures; to provide services for family members; and to heighten community awareness of substance abuse.

The three Juvenile Drug Courts have enrolled a cumulative total of approximately 850 juvenile offenders. Over 260 have graduated from the programs and there are currently approximately 59 active participants.

Funding Source: Other

FAMILY DEPENDENCY DRUG TREATMENT COURT

New Jersey also has three pilot Family Drug Courts – in Essex, Morris, and Sussex Counties. The purposes of the Family Drug Courts are to help parents become abstinent from alcohol and drugs, to maximize and balance child safety and permanency while preserving family integrity and functioning, and to increase retention of parents in major services mandated and provided by the Family Drug Court. The Family Drug Court results in much closer monitoring for parents involved in child abuse and neglect cases. The program is expected to result in a higher percentage of reunifications of affected families, and increase the chance for parents to remain drug-free and to ultimately provide a better life for their children.

The Family Drug Courts have enrolled a cumulative total of approximately 138 clients. There are currently 43 enrolled in the programs and there have been 56 program graduates.

Funding source: Other

Criminal, Family and Probation Divisions

TREATMENT ASSESSMENT SERVICES FOR THE COURT

Working in all 21 New Jersey counties, the **Criminal** Division's Treatment Assessment Services for the Courts (TASC) professional evaluators interview defendants, subject them to substance abuse screening to identify current drug use, and prepare drug assessments or reports for criminal and drug court judges, detailing drug abuse histories, identifying treatment needs and recommending counseling at appropriate drug and alcohol treatment centers when support is needed to overcome addiction. Substance abuse evaluators interview defendants charged with drug and property offenses to determine the extent of their involvement with addictive drugs. This program also serves as a resource for judges when determining appropriate community support systems for defendants who are being released from jail. Failure to complete treatment may result in sanctions, including bail or probation revocation with a loss of liberty.

The **Family** Division's TASC professional evaluators are located in Bergen, Essex, Hudson, Monmouth, Morris, Passaic, and Sussex Counties. The evaluators interview juvenile offenders and adult litigants to identify current drug use, and prepare drug assessments or reports for Family judges, detailing drug abuse histories, identifying treatment needs and recommending counseling at local drug and alcohol treatment centers when indicated. This program is very helpful to judges in determining appropriate case dispositions.

TASC Evaluators in the **Probation** Division provide substance abuse assessment services to probationers in Mercer and Essex counties.

Between July 2009 and June 2010, approximately 5,800 court-involved individuals were evaluated for alcohol/drug treatment services.

Funding Source: State of NJ

DEPARTMENT OF CHILDREN AND FAMILIES

Intervention

DIVISION OF YOUTH AND FAMILY SERVICES

CHILD PROTECTION SUBSTANCE ABUSE INITIATIVE

Known as CPSAI, this program serves families involved with the Division of Youth and Family Services (DYFS) by providing substance abuse assessment, drug screening, treatment referrals, case management, and support services to parents or caregivers referred for substance abuse or suspected substance abuse. The population served presents an array of challenges including poverty, homelessness, mental illness and past trauma, in addition to substance abuse. Services are available through three statewide contract provider agencies. The initiative allows substance abuse specialists to be assigned to each local DYFS office in the state to provide on-site services to families, and consultation and education to staff on matters related to substance abuse.

The Department of Human Services' Division of Family Development (DFD) and DYFS are collaborating to promote and coordinate substance abuse services for families who exceed the 250% Federal Poverty threshold and are not an active welfare case. The funding commitments are set forth in a Memorandum of Understanding between the two Divisions.

Service Information: Data from the period from July 1, 2009 - June 30, 2010 indicates that 15,527 clients were referred to the initiative by DYFS staff. Of these clients, 11,766 were assessed, 6,385 met the DSM IV criteria and 2,771 clients entered various levels of treatment. The instruments used to screen clients include the ASI-F, ASAM Patient Placement Criteria. The DYFS 11-46 referral form that includes background information on parents and caregivers from the DYFS safety and risk assessment interview is also used.

Funding

The program has multiple funding sources through State and Federal appropriations.

Funding Amounts and Sources:

NCCAN -	\$525,000 (Federal)
Grants & Aid -	\$72,881 (State)
Special Appropriation +	\$2,325,587 Million, (State)
DFD -	\$6 Million (State)
	Total Funding: \$8.9 Million

Treatment

CHILD WELFARE REFORM PLAN/ADOLESCENT TREATMENT

This Child Welfare Reform Plan Initiative provides a coordinated network of specialized substance abuse treatment services in licensed facilities targeted to adolescents with first priority to those under the supervision of the Division of Youth and Family Services (DYFS). Services include long-term residential treatment that provides a structured recovery environment, combined with professional clinical services designed to address

addiction and living skill problems for adolescents with a substance abuse diagnosis who require longer treatment stays to support and promote recovery. Thirty beds are available for adolescents to receive these services. Intervention focuses on reintegrating into the greater community with emphasis on education and vocational development.

One hundred and seventy-six (176) slots are available to adolescents needing variable levels of care in outpatient settings. These services include individual, group and family counseling and include access to support services. Joint case planning and case conferencing between the DYFS caseworker and the treatment provider are an essential component to this initiative.

DYFS also purchases additional residential beds on a per diem basis from two licensed programs. While contracted beds will be utilized first, DYFS is committed to purchasing on an as needed basis residential treatment services for any youth whose treatment plan identifies that this service is needed.

Funding Amount and Source: \$3,014,000 Million (State)

CHILD WELFARE REFORM PLAN/PARENTS WITH CHILDREN INITIATIVE

The Child Welfare/Parents with Children Initiative has allowed for the expansion of existing DAS substance abuse treatment services for parents and their children under the supervision of DYFS. This initiative has provided residential treatment services for a minimum of six (6) months to include a woman with an average of two (2) children, outpatient variable level of care and methadone outpatient variable level of care treatment.

The expansion of these services has allowed the programs to continue serving mothers, fathers and their children who are DYFS involved as a high priority population. First priority is given to referrals made by the Child Protection Substance Abuse Initiative (CPSAI) drug abuse counselor located in the local DYFS offices following the established protocol. Second priority is given to self-referrals ("walk-ins") or referrals made by various sources (Probation, court, other providers, etc.) of women who are under DYFS supervision. Third priority is given to eligible women with dependent children who are in need of treatment and who are not under DYFS supervision. All priorities include pregnant women. Treatment is family-centered and is both gender and trauma-specific. During this fiscal year, the 36 IOP slots for fathers with dependent children were maintained to the overall treatment array provided to DYFS families. These slots are geographically located throughout the state where the greatest need has been identified by DYFS. Substance abuse treatment and other therapeutic interventions are provided to address issues of domestic violence, sexual and physical abuse, relationships and parenting. These services are enhanced with case management, childcare, transportation, and referrals to services in the community. DYFS keeps all cases that are participating in this initiative open for the duration of treatment, and its ultimate goal is the reunification of these families.

In SFY 10, approximately \$14 million dollars was given by DCF/DYFS to the Department of Human Services, Division of Addiction Services (DAS) through a Memorandum of Understanding (MOU) for the continuation of Child Welfare (CW) substance abuse

services for adolescents and adults. This funding allows for these CW programs to continue providing the level of services needed for DYFS involved families.

Listed below are the individual CW programs, number of slots, Level of Services (HWH - Halfway House Women and Children, Intensive Outpatient Program – IOP, Women & Children – W&C, Adolescent – ADOL, RLT - Residential Long Term, Methadone Intensive Outpatient Program – MIOP, Adolescent Outpatient Services – OPPS) and funding amount.

Eva’s Sheltering Programs is an agency that provides Non Enhanced Intensive Outpatient services for Women and Children. Services for Non Enhanced mean that women are receiving traditional IOP treatment but do not have the full array of enhanced services as the other CW programs do. However, families are residing full time on site and provided all of the advantages of the housing services

CONTRACTED SERVICE PROVIDERS (Vendor Agreements with DYFS)

HUNTERDON PREVENTION RESOURCES

Contract # 11PJKC

This program provides substance abuse assessments, in-home urinalysis or testing in the Hunterdon DYFS office for families under DYFS supervision residing in Hunterdon County.

Funding Amount and Source: \$396,000 (State)

TRINITAS HOSPITAL

Contract # 10DBXM

This program provides substance abuse assessments, case management support and treatment referrals for families under DYFS supervision in Union County.

Funding Amount and Source: \$56,848 (State)

NEW HOPE FOUNDATION

Contract # 10CANC

This program provides inpatient adolescent residential substance abuse treatment facilities located in Secaucus (males & females) and in Marlboro (males only). This program serves adolescents statewide who are under DYFS supervision.

Funding Amount and Source: \$ 573,100 (State)

CAPE COUNSELING SERVICES

Contract # 10AAES

This program provides outpatient substance abuse counseling services. This program is for adolescents under DYFS supervision in Cape May County.

Funding Amount and Source: \$17,073 (State)

**RECOVERY SERVICES – LIGHTHOUSE
Contract # 11XNAS**

This program provides residential in-patient substance abuse treatment for adolescents who are Atlantic County residents under DYFS supervision.

Funding Amount and Source: \$3, 234,215 (State)

**CUMBERLAND COUNTY ALCOHOL TREATMENT SERVICES
Contract #10AOF5**

This program provides outpatient substance abuse counseling to Atlantic County resident adults referred by the DYFS District Office.

Funding Amount and Source: \$73,630 (State) \$\$14,925 (Match) = \$88,555

VINELAND RESIDENTIAL TREATMENT CENTER (DYFS)

This program provides substance abuse treatment, prevention, education and individual counseling to adolescents under DYFS supervision who are residents of the center.

Funding Amount and Source: \$16,000 (State)

EWING RESIDENTIAL TREATMENT CENTER (DYFS)

This program provides substance abuse treatment, prevention education and individual counseling to adolescents under DYFS supervision who are residents of DYFS Ewing Residential Treatment Center.

Funding Amount and Source: \$16,000 (State)

**SERVICES TO OVERCOME DRUG ABUSE IN TEENS (S.O.D.A.T.)
Contract # 10AYHS**

This program provides outpatient substance abuse treatment to Salem County adolescents referred by the DYFS District Office.

Funding Amount and Source: \$34,366 (State)

**OPTIONS COUNSELING CENTER
Contract # 10FJRN**

This program provides outpatient substance abuse treatment to families residing in Passaic County under DYFS supervision.

Funding Amount and Source: \$116,705 (State)

**THE COMMUNITY YMCA
Contract # 10ASNC**

This program provides outpatient substance abuse treatment, rehabilitation, group counseling and psychological assessment to families residing in Monmouth County referred by the DYFS District Office.

Funding Amount and Source: \$4,109 (State)

**SEASHORE FAMILY SERVICES OF NJ
Contract # 10AHQC**

This program provides outpatient substance abuse assessment and treatment services for adults and adolescents residing in Ocean and Monmouth Counties referred by the DYFS District Office.

Funding Amount and Source: \$98,817 (State)

**MERCER STREET FRIENDS
Contract # 10APLC**

This program provides family reunification support and parenting education to at risk families or families who have experienced the removal of minor child or children by DYFS. Services are provided at the facility and in Mercer County's DYFS Office.

Funding Amount and Source: \$75,085 (State)

OCEAN MENTAL HEALTH SERVICES

This program provides outpatient substance abuse and mental health treatment services for families under DYFS supervision in northern Ocean County.

Funding Amount and Source: Open Purchase Agreement (State)

**SAINT FRANCIS COMMUNITY CENTER
Contract # 10AVQC**

This program provides counseling for recovering substance abusers, psycho-educational supports and parenting groups.

Funding Amount and Source: \$26,981 (State)

**FAMILY GUIDANCE CENTER OF WARREN
Contract # 10ACWN**

The program provides outpatient substance abuse assessments, treatment referrals, substance abuse education and counseling services for families under DYFS supervision.

Funding Amount and Source: \$21,144 (State)

**NEW BRUNSWICK COUNSELING CENTER
Contract # 10JVMM**

This program provides outpatient substance abuse assessments, treatment referrals, counseling, drug screening and psychological evaluations for families under DYFS supervision in Middlesex County.

Funding Amount and Source: 13,605 (State)

**CATHOLIC CHARITIES (MERCER)
Contract # 10BLLC**

This program provides outpatient substance abuse urinalysis and treatment referrals, individual and group counseling for families under DYFS supervision in Mercer County.

Funding Amount and Source: \$31,344 (State)

DIVISION OF PREVENTION AND COMMUNITY PARTNERSHIPS

School Based Youth Services Program (SBYSP)

The New Jersey School Based Youth Services Program (SBYSP) was initiated by the New Jersey Department of Human Services in 1987. In 2007, SBYSP moved to the new Department of Children and Families (DCF) with the consistent goal of helping young people navigate the adolescent years, finish their education, obtain skills leading to employment or continuing education, and graduate healthy and drug free.

Many teenagers have multiple challenges that call for different support and services. SBYSP was designed with input from teens, to provide employment, health and social services that are available to all youth. Recreation is also provided. There are no fees or eligibility requirements. In addition to the following core services, each site develops resources to respond to local needs, such as on-site child care so that teen parents can stay in school. The core services are:

- √ Mental Health and family services
- √ Pregnancy prevention programs
- √ Healthy youth development
- √ Learning support services
- √ Access to primary and preventive
- √ Family involvement Health services
- √ Referrals to community based service providers
- √ Substance abuse counseling
- √ Recreation
- √ Employment services

Over 130,000 youth were served in FY2010

Funding Amount and Source: \$20,058,000 (State) and \$4,062,000 (Federal)

Outreach to At-Risk Youth (OTARY)

As part of the Governor's crime prevention plan DCF funded the Outreach to At-Risk Program (OTARY) in October of 2007. The goals of OTARY include expanding adolescent programming in communities which have demonstrated high crime and gang violence; deterring gang violence in these communities; and partnering with law enforcement, community based organizations, or other youth serving entities to affect gang violence. Program design utilizes nationally recognized models of positive youth development. Programs identifying as implementing positive youth development often include services that: prevent

teen pregnancy, deter gang involvement, improve a youth's ability to enroll in college, offer street outreach services in gang involved or homeless youth, support youth to lead healthier and drug free lives, and provide services assisting youth in the transition into adulthood.

Over 2,200 youth were served in FY2010

Funding Amount and Source: \$1,100,000 (State) and \$1,000,000 (Federal-TANF)

NJ 2NDFloor Youth HELPLINE

The NJ 2NDFLOOR Youth HELPLINE is a Statewide, 24-hour interactive telephone line for youth and young adults (ages 10-24), staffed by counseling professionals and specially trained volunteers. The overall goal of this initiative is to promote healthy youth development by providing immediate interactive, respectful professional helpline services with linkage to information and services that address the social and health needs of youth.

The Helpline offers:

- information, education and crisis counseling by telephone and/or email to youth and youth adult callers on issues such as gang intervention, suicide, sexual orientation/identity issues, eating disorders, substance abuse, and domestic violence;
- information and education regarding issues affecting youth;
- guidance in formulating a comprehensive plan to address identified issue(s)/problem(s);
- referral information about local agencies and organizations that may offer additional or more intensive services and telephone assisted linkage to provider(s) when indicated;
- follow-up services, such as counseling and verification of linkage of service providers, when authorized by caller;
- caring support and reassurance to youth; and
- supportive services to parents and/or guardians.

During FY2010 over 180,000 calls were received, with over 100,000 website hits.

Funding Amount and Source: \$626,000 (State)

DEPARTMENT OF CORRECTIONS

Department/Agency Mission Statement: The mission of the New Jersey Department of Corrections is to ensure that all persons committed to the state correctional institutions are confined with the level of custody necessary to protect the public and that they are provided with the care, discipline, training, and treatment to prepare them for reintegration into the community.

Current/Future Plans: The following plan represents substance abuse programs offered by the New Jersey Department of Corrections on an on-going basis. Therefore, plans are to increase and/or augment the same when and where financially feasible and programmatically appropriate.

Treatment Information

Division of Programs and Community Services

OFFICE OF DRUG PROGRAMS

NJ DEPARTMENT OF CORRECTIONS IN-PRISON THERAPEUTIC COMMUNITY SUBSTANCE USE DISORDER TREATMENT PROGRAM

In the Therapeutic Community (TC) model, substance abuse/ dependence is viewed as a disorder of the whole person, one that necessitates extensive changes in lifestyle and self-identity to overcome the negative affect of chemical dependency. The treatment is designed to equip the resident with requisite coping skills and techniques to assist him/her to reintegrate successfully into society and to remain drug/ alcohol free. In general, most residents spend nine (9) to twelve (12) months in a prison-based Therapeutic Community (TC) program. However, in some situations a resident may require a longer stay depending on their rate of treatment progress as well as other relevant factors with respect to their capacity to remain void of substances upon societal reintegration. Institutional matriculation is the first phase of the substance use disorder treatment continuum.

Service Information: This program serves incarcerated individuals who have been identified as having a substance use disorder. Recommendations for treatment placement are made based on a number of factors inclusive of (1) assessment of the offender's level of drug/alcohol abuse, (2) treatment need, (3) criminal history, and (4) other key elements that contributed to the offender's criminal deviance that led to substance abusing behavior. Offenders with the most severe addiction issues that meet the Department's treatment eligibility criteria are referred to one of the prison-based Therapeutic Community (TC) Programs.

The New Jersey Department of Corrections (NJDOC) allocates a total of 1,356 beds (1,296 male, 60 female), distributed among ten (10) programs located in six (6) correctional institutions. Five hundred four (504) allocated beds service the youth population who are between the ages of 18 to 26 years, and the remaining eight hundred and fifty-two (852) beds service the population aged 26 and above, inclusive of the female population. Additionally,

these treatment services are delivered in the following counties: Burlington, Cumberland, Essex, Hunterdon and Mercer.

Outcome Measures - outcome data is collected and reported as needed and/requested. The Office of Drug Programs receives daily and monthly bed fill statistics from the several programs and monitors bed-vacancies regularly. The complete Addiction Severity Index (ASI) assessment is administered to all residents admitted to the program at the institutional level, and random inmate urinalyses are conducted throughout the program experience. A part of this random selection includes testing of residents upon entry to and exit from program treatment. Residents receive a minimum of twenty (20) hours of treatment per week of hands on treatment during their tenure in the therapeutic community.

The NJDOC continues to engage in a formal outcome study of Therapeutic Community participation in collaboration with Rutgers, the State University of New Jersey.

The average length of time an inmate is placed on the waiting list(s) varies from institution to institution and is contingent upon the rapidity of inmate matriculation. However, conservatively it is less than six months.

Funding Amount: \$5.100 million

Funding Source: Federal and State of New Jersey

NEW JERSEY DEPARTMENT OF CORRECTIONS ALTERNATIVE SUBSTANCE ABUSE AWARENESS AND EDUCATION PROGRAM – LIVING IN BALANCE (LIB)

The Living In Balance (LIB) program is a research-based program designed as a practical instructional system for conducting sessions on drugs and the disease of addiction from an educational perspective with individuals who abuse or are addicted to alcohol and other drugs of abuse. The LIB Component serves as an alternative to the traditional Therapeutic Community (TC) concept and is designed to provide addiction education and relapse prevention techniques that address the disease of addiction and further supports the recovery process. Specifically, LIB targets that segment of the inmate population determined to ineligible for TC treatment placement based on the department's established criteria.

The Living in Balance program is delivered through a variety of interactive client worksheets in which each client worksheet constitutes a living in balance program session. The programmatic design is structured in a manner that requires the reading and subsequent retaining of information that is evidenced via written exercises geared toward retention and reinforcement of education, skills, techniques and preventive measures.

The LIB schematic structure is divided into twelve (12) core client worksheet sets, representing twelve (12) core client sessions. These sessions encompass basic addiction terminology, substances of abuse, triggers and relapse prevention techniques, the co-relation between sex and substances of abuse, as well as emotional components associated with addiction and recovery. Also, there are twenty-one (21) supplemental components that focus on self-help and twelve-step program facilitation, stress reduction techniques, social and family issues, compulsive sexual behaviors, grief and loss, as well as other topics that impact and/or influence abusive or relapse behavior. Upon completion of the LIB Program, participants are issued a certificate program completion, and a centralized file is maintained of all participants

completing the program. The pilot program was implemented at Northern State Prison in Newark, New Jersey and currently is on-going at Bayside State Prison, the Central Reception and Assignment Facility (CRAF), East Jersey State Prison, Edna Mahan Correctional Facility for Women, Mid State Correctional Facility, and New Jersey State Prison.

Plans are to implement the LIB program throughout our correctional institutions to the inmate population identified as having a substance use disorder, but are ineligible for the traditional therapeutic community construct. Additionally, it is critically important to implement this program at those institutions that do not house a therapeutic community or offer any other type of substance abuse programming. The LIB program is a unique means that can be offered to those offenders found guilty of violating the Department's zero-tolerance policy. To this end, the LIB Program has a strong message regarding relapse education and prevention and as such will afford this category of inmate the opportunity to address their drug behavior and subsequent criminal lifestyles.

The duration of the LIB Program is twelve weeks and the waiting list varies based on inmate application and time eligibility.

Funding Amount: -0- Program operating with existing staff resources

Funding Source: State of New Jersey

NEW JERSEY DEPARTMENT OF CORRECTIONS MUTUAL AGREEMENT PROGRAM

Mutual Agreement Program (MAP) is a formal cooperative agreement between the New Jersey Department of Corrections (NJDOC) and the Department of Human Services (DHS) that offers substance abuse services via state-licensed, residential community-based agencies throughout New Jersey for inmates assigned to the same. Currently, the Mutual Agreement Program contracts with four (4) community-based substance abuse treatment facilities.

In order to receive inmates for treatment placement under the the Mutual Agreement Program, these agencies must hold the requisite licensure granted by the Department of Human Services and must comply with the conditions established by the New Jersey Department of Corrections and the Department of Human Services.

Service Information: Inmates who participate in MAP must be approved for community release by meeting departmental requirements as follows: be in full minimum custody status, obtain medical and psychological clearance and cannot have any non-permissible warrants, detainers or open charges. Additionally, MAP placements are usually of six month duration, and upon completion further treatment is provided in a residential halfway house facility or the inmate is paroled.

Conceivably, the predominant MAP client- population is male; however, females from the women's institution are also eligible for participation. MAP contract agencies are located in Essex, Mercer and Passaic counties. Program duration is 180 days/6 months. Current total bed capacity is forty (40).

Outcome Measures - the Department will examine the effectiveness of all Mutual Agreement Programs by data collection indicators such as recidivism, relapse and employment of program graduates. Program evaluation and assessment of activities to ascertain adherence

to stated policies as well as the accomplishment of goals is facilitated through the submittal of required reports received from the contract agency.

Funding Amount: \$1 million

Funding Source: State of New Jersey

NJ DEPARTMENT OF CORRECTIONS COMMUNITY-BASED PROGRAM HALFWAY HOUSE FACILITIES

In addition to the two (2) Assessment and Treatment Centers (see below), the Department of Corrections contracts with private agencies for 2,720 beds in 24 residential community release programs throughout the State. Many of these programs provide substance abuse awareness and relapse prevention services, while others provide employment and/or educational services. These programs espouse a structure of strict discipline while designed to focus on preparing the offender to re-enter society. Of necessity, they are closely supervised so as to assure the highest levels of security and accountability by and for the offender population.

Service Information: Candidates eligible for participation in Residential Community Programs-Halfway House and substance abuse support facilities are inmates who are approved for community release and have successfully completed the assessment process. Additionally, they must be of full minimum custody status, have medical clearance, receive a favorable psychological evaluation, satisfactory institutional adjustment, and have less than 18 months remaining toward the completion of their maximum sentence or parole eligibility. For those identified as having a significant substance use disorder, this assignment typically represents the third phase of treatment and is designed to build on the prison-based TC continuum step-down as well as Assessment Center exposure.

The population served is predominantly male (2,401 male, 319 female for a total complement of 2,720 beds). The average program duration is approximately seven (7) months. The programs are located in Burlington, Camden, Essex, Hudson, Hunterdon, Mercer, Middlesex, Passaic and Union counties.

Outcome Measures - the Office of Drug Programs, in consort with other relevant Departmental offices, develops appropriate training for facility staff on an ongoing/as needed basis in areas of drug/alcohol treatment, inmate accountability and urine monitoring. To this end, an examination of the effectiveness of Halfway House programs is conducted via a number of mechanisms. Most significant to the measurement of program effectiveness is data collection with respect to recidivism, relapse and employment of program graduates. In addition, on-site program observation and monitoring is on-going in order to assure programmatic compliance as mandated by Department of Corrections' policies and procedures, rules and regulations.

The number of inmates on the waiting list varies from month to month based on the classification process, but is minimal.

Funding Amount: \$25 million

Funding Source: State of New Jersey

NJ DEPARTMENT OF CORRECTIONS COMMUNITY BASED PROGRAMS – ASSESSEMENT CENTERS

All male and female inmates, once approved for community release, must matriculate through the Assessment Center prior to assignment to a Halfway House. These Centers conduct a comprehensive battery of risk/ need assessments to determine community readiness, community placement, and to substantiate continued substance use disorder treatment needs or support services initially identified by prison-based treatment professionals. In the furtherance of service-need identification, the centers also administer various tests and/or evaluations to ascertain offender social service needs (education, employment, housing and medical).

Service Information: The offender must meet the requirements for community release as established by the Department of Corrections in order to move from the institution to the Assessment Center. These requirements are consistent with and the same as those required for halfway house consideration. For those inmates identified as having a significant substance use disorder, this assignment designed to build on the prison-based Therapeutic Community continuum experience so as to further prepare the offender for community reintegration, represents the second phase of substance use disorder continuum.

This program serves 722 males and 77 females (capacity) from two locations and the duration is one (1) to three (3) months. Inmates who remain less than three months are usually those who are paroled prior to the three month completion requirement.

Outcome Measures - the Department is planning to examine the effectiveness of both Assessment Centers by reviewing indicators such as recidivism, relapse and employment of program graduates. In addition, an ongoing assessment will be conducted through the review of required programmatic reports submitted by the contract vendor to determine whether stated goals are accomplished.

The number of inmates on the waiting list varies from month to month based on the classification process, but is minimal.

Funding Amount: \$21 million

Funding Source: State of New Jersey

NEW JERSEY DEPARTMENT OF CORRECTIONS ALTERNATIVE PROGRAMMING SUBSTANCE ABUSE AWARENESS AND EDUCATION PROGRAM –

PROJECT INSIDE - SUBSTANCE ABUSE EDUCATION AWARENESS AND INFORMATION INITIATIVE

The Project Inside Substance Abuse Education Awareness and Information Initiative is a collaborative between the Offices of Drug Programs and Educational Services. It is a college-level program that specifically targets offenders twenty six years (26 yrs.)* of age and under. The pilot was implemented in January, 2007 at the Garden State Youth Correctional Facility. It is a college level program that is structured into three components as follows: Component I Addiction – Identification and Definition; Component II – Commonly Used Street Drugs (especially those prevalent in New Jersey); Component III – Drugs and the Brain. This is a thirty-six hour presentation of six week duration, two hours (2 hrs.) per week, twelve hours (12 hrs.) of independent study and homework assignments, and twelve hours of Journal documentation.

*Effective January 2010 the age of acceptance into the Project Inside Program will change from 26 years and under to 18 – 35 years of age.

Service Information - the program is geared toward the youthful offender (26 years and under) enrolled in the Project Inside College Program. Moreover, it is designed to provide preventive education and information so as to circumvent future drug involvement whether usage or sales that further gravitates into criminality.

Upon completion of the program, the inmate is presented a Certificate of Completion. The goal of this initiative is to impart research-based educational information with respect to the negative affects of drugs and addiction to the youthful offender so as to plant preventive concepts that might attenuate any future substance abusing behavior that leads to criminal behavior. Additionally, it is the aim of the Office of Drug Programs to provide a diversity of programming for inmates who do not meet criteria for the traditional therapeutic community constructs. In this regard, the Substance Abuse Education Awareness and Information Initiative is viewed as beneficial toward institutional/community release requirements of program participation. It is also an alternative method of offering preventive education to those offenders found guilty of violating the Department's zero-tolerance policy. The Substance Abuse Education Awareness and Information Initiative is on-going at Garden State and Albert C. Wagner Youth Correctional Facilities.

Outcome Measures – the Office of Drug Programs is maintaining a current list of program completions for follow-up comparative analysis as these inmates are released to determine the existence of recidivism.

At this juncture there is no waiting list as inmates are selected based on their matriculation in the Project Inside College level program.

Funding Amount: \$3,000 and operating with existing staff resources

Funding Source: Federal and State of New Jersey Resources

ENGAGING THE FAMILIES – (Parenting and Substance Abuse Initiative)

The New Jersey Department of Corrections was one of a few states selected by the U.S. Department of Health and Human Services' to participate in a pilot that seeks to promote healthy marriages and responsible fatherhood. Hence, the grant awarded will support the project entitled "Engaging the Family in the Recovery Process - An Innovative Approach for the Max-Out Offender." The program focuses on an underserved population, specifically those who will max-out (complete their sentence) while still incarcerated. This initial pilot construct was designed to reconnect and strengthen families upon the offender's reintegration into society.

Service Information – The program is designed to engage the spouse and/or children of offenders in dialogue and activities geared toward ending the criminal and subsequent addictive lifestyle of the offender and their loved ones. The overall goal of the program are threefold: (1) to strengthen marriage and family relationships of the incarcerated offender, (2) enhance the well-being of children of incarcerated fathers and (3) motivate and prepare incarcerated fathers to maintain a lifestyle abstinent of drugs so as to attenuate further

gravitation toward criminality. To this end, case managers will develop treatment goals and a treatment plan with the offender prior to release.

The uniqueness of this initiative is centered on integrating the constructs of drug treatment, specifically the Living in the Balance Program (LIB) into parenting workshops. Utilizing research-based education and information, the offender and family is exposed to a reinforcement of parenting skills, knowledge and techniques geared toward strengthening the family bond. This exposure culminates with the case manager establishing specific links to social and drug treatment services in preparation for release. Additionally, the case manager will continue to be a resource to the ex-offender and the family upon societal reintegration as it relates to referral and networking resources.

Outcome Measures – As part of the grant, the N.J.D.O.C. has contracted with the College of New Jersey to conduct process and outcome evaluations. The New Jersey project was also selected to be part of a national outcome evaluation. To this end, the Office of Drug Programs will maintain requisite data with respect to those offenders participating in the program, completing the programs and co-relate this information with those who recidivate. Additionally, ODP will work in consort with relevant agencies both internal and external to the Department, to ascertain the offender's success as it relates to maintaining family ties as well as to abstain from subsequent drug involvement.

The Engaging the Family Program has been in existence three years operating under a five year grant allocation. Upon entering its fourth year the program is ongoing at four institutional sites, Northern State Prison, Southwoods State Prison, Garden State Youth Correctional Facility and Mid State Correctional Facility. The current program duration consists of six month cycles. However, four month cycles are being considered as this would allow for the implementation of more programs and thereby availing the same to a larger complement of inmate-participants and their families.

Recruitment of program participants is on-going, and as such a waiting list is maintained. While many of the inmates seeking to participate in the program are not time eligible (must be within six months of maxing out); they are fused into the program as they meet eligibility criteria

Funding Amount: \$394,000

Funding Source: Federal and State of New Jersey Resources

Community Based Relapse Prevention

Service Information – The Relapse Prevention Program is designed for inmates returned from community-based agencies for the use of drugs and/or violation of Departmental rules and regulations with respect to drug involvement. The Program affords inmates the opportunity to address issues of relapse and/or continue in the recovery path. To this end, the program seeks to impart skills and tools so as to empower them to recognize triggers that lead to use.

Although, the program is facilitated under the auspices of the C4 Committee, and managed by the Office of Drug Programs, the physical location and subsequent operation is carried out in the Assessment Centers. The C4 Committee interviews inmates returned from Community-based facilities for drug-related offenses. This Committee further determines the appropriate

reassignment based on the offense that occasioned the return consistent with their current custody level. A representative from the Office of Drug Programs is present to assure that inmates returned from drug-related offenses (i.e., 204a, 552a or zero-tolerance) are referred to the Relapse Prevention Program at the Assessment Center. There are two Assessment Centers used by the Department – Talbot Hall and Bo Robinson. The female inmates are assigned to Bo Robinson, and the male inmates are assigned to both.

There is no waiting list since inmates are referred to the Relapse Prevention Program upon being seen by the C4 Committee and meet custody requirements for matriculation in the community.

Funding Amount: -0- Program operating with existing staff Resources

DEPARTMENT OF EDUCATION

Department/Agency Mission Statement: The New Jersey State Board of Education, in collaboration with the Department of Education, establishes policy and provides leadership to prepare all students for their role as citizens and for the career opportunities of the 21st century.

Prevention Information

DIVISION OF STUDENT SERVICES

FEDERAL SAFE AND DRUG-FREE SCHOOLS AND COMMUNITIES ACT FORMULA GRANTS TO ALL LOCAL EDUCATIONAL AGENCIES

The capacity for local school response to behavioral, social-emotional and health problems has been supplemented by federal funding provided specifically for school substance abuse and violence prevention activities. Under the *Federal Safe and Drug-Free Schools and Communities Act (SDFSCA)* program (Title IV-A of the *No Child Left Behind Act*). A total of \$5.5 million dollars was provided through the New Jersey Department of Education (NJDOE) to local school districts for this purpose in 2009-2010, a 36% reduction in Federal funding provided under the SDFSCA for the 2006-2007 school years and a 43% reduction from the allocation in the 2003-2004 school years. This funding decrease dramatically reduced the fiscal resources available to schools and the NJDOE for responding to substance abuse and other school safety and security needs.

Funding for the SDFSCA program has been eliminated from the Federal budget for the 2010-2011 school year. While some local educational agencies (i.e., school districts, charter schools, private, non-profit schools) may choose to use FY10 carryover funds to support limited activities in the 2010-2011 school year, it is anticipated that the elimination of Federal SDFSCA funds will severely compromise the capacity of school districts to plan and deliver comprehensive substance abuse prevention programs, services and activities.

Since 1987, the SDFSCA had been the NJDOE's sole source of funding dedicated to supporting all local educational agencies in New Jersey in the development, implementation and evaluation of comprehensive programs and activities coordinated with other school and community-based services and programs, and designed to: (1) foster safe and drug-free learning environments (grades K-12) that support academic achievement; (2) be consistent with the Principles of Effectiveness, per Section 4115(a)1 of Title IV, Part A; (3) prevent or reduce violence, the use, possession and distribution of illegal drugs, and delinquency; and create a well-disciplined environment conducive to learning, including consultation between teachers, principals and other school personnel to identify early warning signs of drug use and violence and to provide behavioral interventions as part of classroom management efforts; and (4) promote the involvement of parents in the activities or programs; promote coordination with community groups and coalitions and government agencies; and distribute information about the local education of agency's needs, goals and programs.

Target Population Served: Public and nonpublic school students

Numbers Served: 1,061,335 students in grades K-12(ages 5-17)
in 21 counties*.

Coverage Area: Statewide
Funding Amount: \$5,520,628 (includes \$356,748 in Carry Forward Funds)
Funding Source: Federal

**Indicates services provided in FY09.*

SOCIAL NORMS PROJECT

This cooperative initiative between the NJDOE and the Center for Addiction Studies and Awareness, Rowan University is designed to use established social psychological principles concerning the influence of group norms on individual behavior to reduce student alcohol, tobacco and other drug use in participating high schools and student bullying, harassment and intimidation in participating middle schools. The project is based on the research literature and the successful implementation of the social norms approach in New Jersey colleges by the New Jersey Higher Education Consortium. The project, initiated in the 2005-2006 school year, provided a fifth year of services in the in the 2009-2010 school year, and is scheduled to conclude in February 2011, due to the elimination of SDFSCA funds.

Target Population Served: High schools and middle schools

Numbers Served: 12 high schools and 13 middle schools

Coverage Area: The participating schools represented three regions (i.e., north, central, south) and diverse settings (i.e., urban, suburban, rural) of the state. Additionally, all middle schools and high schools in the state will benefit from the dissemination of project support materials, technical assistance and training and evaluation findings at the conclusion of the project.

Funding Amount: \$300,000 (December 1, 2009 – February 28, 2011)

Funding Source: Federal

- Project Website – <http://www.rowan.edu/casa/currentprojects/njdesnp.html>

DEVELOPING SAFE AND CIVIL SCHOOLS: A COORDINATED APPROACH FOR SOCIAL-EMOTIONAL AND CHARACTER DEVELOPMENT

Reports of the research literature document that when both social-emotional and academic learning become part of schooling, students are more likely to remember or use what they are taught and are less likely to engage in high-risk behavior. In response to these important findings, the NJDOE collaborated with Rutgers University to implement a project intended to assist participating school staff in fully integrating social-emotional learning throughout the educational program and organizing existing resources, programs and services to create strong social and emotional learning conditions.

Participating school districts and schools received assistance in coordinating student support services and selecting, developing and implementing projects based on findings derived from a needs assessment. The technical assistance was provided by experts from the national Collaborative for Academic Social and Emotional Learning and New Jersey experts with demonstrated experience in creating well-coordinated and effective social-emotional learning conditions in schools to support project initiatives.

The intent was to reduce at-risk student behavior, develop positive learning climates and improve academic performance among students in participating schools. The project was initiated in the 2005-2006 school year and will conclude in January 2011, due to the elimination of SDFSCA funds.

Target Population Served: School building and school district staff. Priority was given to schools identified for corrective or other action through the NJDOE's Collaborative Assessment for Planning and Achievement (CAPA), since the findings from the CAPA process identify educational vulnerabilities that are directly related to the purposes of the project.

Numbers Served: By 2009-2010, working relationships had been established with staff from 204 participating school districts

Coverage Area: Statewide

Funding Amount: \$438,394 (July 1, 2009 through January 31, 2011)

Funding Source: Federal

TITLE IV-A AND UNSAFE SCHOOL CHOICE OPTION TRAINING AND TECHNICAL ASSISTANCE PROJECT

This cooperative initiative between the NJDOE and the Center for Applied Psychology, Rutgers University is designed to assist the NJDOE in fulfilling the statutory requirements of Title IV-A (the SDFSCA) and the Unsafe School Choice Option (Title IX, Part E, Subpart 2, Section 9532) of the No Child Left Behind Act. The project assists the NJDOE by increasing its capacity to provide schools and NJDOE staff with technical assistance, training services and support for resource development for the successful implementation of the requirements under Title IV-A and the Unsafe School Choice Option (USCO) Policy. The assistance and supportive resources are provided to schools utilizing federal Title IV-A funds and schools determined by the NJDOE to be persistently dangerous or in early warning status and special services schools identified under the USCO Policy. The project was initiated in the 2005-2006 school year, continued through the 2009-2010 school year, and will conclude in June 2011 due to the elimination of SDFSCA funds.

Target Population Served: All school districts that accepted Title IV-A funds and all nonpublic schools that benefited from district's Title IV-A awards; schools identified under the USCO Policy as either persistently dangerous or in early warning status; and NJDOE staff who provided support to schools for Title IV-A grant applications and the USCO Policy.

Numbers Served: 383 schools and 3,269 staff

Coverage Area: Statewide

Funding Amount: \$249,513 (November 1, 2009 through June 30, 2010)

Funding Source: Federal

Website:

- Project Website – <http://sdfsc.rutgers.edu/index.php/>

TRUANCY REDUCTION PILOT PROJECT

The project was a collaborative initiative among the Office of the Attorney General (OAG), the New Jersey Juvenile Justice Commission (NJJC), the Administrative Office of the Courts, the Department of Children and Families, the Department of State and the NJDOE designed to keep young people in school and engaged in learning. The initiative was implemented in collaboration with the teams of school and community stakeholders in each of the pilot cities (Asbury Park, Camden, Newark, Paterson, Trenton and Vineland) formed under the direction of the Office of the Attorney General.

The general services provided to the six pilot cities, in collaboration with the State agency partners, featured local needs assessment and planning, training, ongoing technical support, materials development, assistance in the implementation of evidence-based truancy prevention and intervention programs, taking into consideration current local resources and programming for truancy prevention and intervention, and project evaluation. Additionally, an online course in truancy titled Truancy and Dropout: Mending Cracks in the Graduation Pipeline was developed, which is available to all New Jersey citizens free of charge.

Target Population Served: School staff and students

Numbers Served: Six school districts

Coverage Area: Asbury Park, Camden, Newark, Paterson, Trenton and Vineland

Funding Amount: \$104,800

Funding Source: Federal

Website:

- Truancy and Dropout: Mending Cracks in the Graduation Pipeline (online course) – <http://www.partnershipuniversity.org/>

HARASSMENT, INTIMIDATION AND BULLYING (HIB)

To assist school districts in developing the required HIB policies, the authorizing statute (N.J.S.A. 18A:37-13 et seq.) required the NJDOE to develop and issue a model policy applicable to grades kindergarten through twelve. The NJDOE's model policy and guidance was developed and disseminated in December 2002 and revised in April 2006, April 2007 and again in November 2008. Regulations (N.J.A.C. 6A:16-7.9) regarding harassment, intimidation and bullying were adopted by the State Board of Education in August 2005 and readopted in

September 2006 as part of the re-adoption of *N.J.A.C. 6A:16*, Programs to Support Student Development. Additionally, the NJDOE developed HIB Complaint Procedures and Investigation Protocols for use by county offices of education, and providing county office staff with training, in responding to concerns regarding school-based HIB.

Target Population Served: Staff and students in public school districts

Numbers Served: All staff and students in all public school districts

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: State

- HIB Regulations – <http://www.state.nj.us/education/code/current/title6a/chap16.pdf>

VIOLENCE AWARENESS WEEK

The NJDOE provided guidelines and information to local boards of education for use in planning the activities that are required (*N.J.S.A. 18:36-5.1*) in observance of the week for each year the requirement has been in effect, beginning in September 2004. The guidelines have been revised and reissued each year, including in FY10.

Target Population Served: Staff and students in public school districts

Numbers Served: All staff and students in all public school districts

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: State

Website:

- Guidance – <http://www.state.nj.us/njded/students/safety/violence.htm>.

PUBLIC HEARINGS ON VIOLENCE AND VANDALISM

For each year the requirement (*N.J.S.A. 18A:17-46* and *N.J.A.C. 6A:16-5.2* and *5.3*) has been in effect, the NJDOE has provided guidelines and information to local boards of education for complying with the statute, beginning in September 2004.

Target Population Served: Public school districts and constituent communities

Numbers Served: All public school districts and communities

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: State

Website:

- Guidance – <http://www.state.nj.us/njded/students/safety/violence.htm>

PARTNERSHIPS IN CHARACTER EDUCATION PROGRAM

In 2002, New Jersey was one of five states to receive a four-year federal grant award under the Partnerships in Character Education Program (Title V, Part D of the No Child Left Behind Act). Under this grant, New Jersey created the New Jersey Center for Social and Character Development (formally the New Jersey Center for Character Education) at the Center for Applied Psychology in the Graduate School of Applied and Professional Psychology at Rutgers, The State University of New Jersey. The creation of the New Jersey Center for Social and Character Development (NJCSCD) provided key leadership for maximizing New Jersey's ability to guide schools in adopting evidence-based programs and strategies.

The NJCSCD continued to serve as a primary partner in the provision of technical assistance, services and resources to schools statewide in support of social and character development under the 2006-2010 Federal Partnerships in Character Education Program (PCEP) grant. This four-year, \$2.7 million grant program enabled the NJDOE to fully incorporate character education into the mainstream of changes that have occurred in school-based curriculum standards and student services by: 1) increasing the capacity of New Jersey school systems to implement and sustain social-emotional and character development programs in the context of current state reform efforts; and 2) evaluating the impact of social-emotional and character development programs on the social inclusion of students with disabilities, a population of students that previous efforts have not adequately addressed.

Under the four-year grant, the NJCSD created a comprehensive Website designed to provide information, resources and assistance to the public regarding all of the projects and products developed under the grant. For ease of use, the primary content categories are organized as follows:

- *Best Practices*: This section is designed to provide teachers with innovative character education practices and approaches for engaging students in learning that have been implemented in New Jersey classrooms. All of them have been honored as *Promising Practices* by the Character Education Partnership or as *Best Practices* by the NJDOE.
- *Process Model*: This section includes information regarding *The Seven Guideposts* that were developed under the Fostering School Change and Culture through Character Education pilot administered under this grant. The *Guideposts* provide a process framework for social and character development in schools that has been designed to assist educators in mapping a plan for comprehensive changes in school climate and culture. The *Guideposts* are based on the experience of the Center for Social and Character Development (CSCD) at Rutgers University in coordinating with a wide variety of schools that have experience in implementing character education programs.
- *Research and Resources*: The resources and information found in this section range from developing positive student behavior and changing school culture to preventing bullying and teasing, instilling empathy for individual differences, and confronting social injustices. These resources include information on successful strategies and how they worked.

- *Evaluation/Assessment*: This section provides information on the steps a school should take to evaluate and assess their school environment/climate. Information is included on assessing school strengths and devising strategies for improving the conditions for learning.
- *Code of Student Conduct*: Under the PCEP grant, the NJCSCD developed an online Code of Student Conduct Tutorial that, when posted, will serve as a resource to local school districts and the public regarding the requirements in *N.J.A.C. 6A:16-7*, Student Conduct.
- *What Parents Can Do*: This section provides parents with information on assisting schools in their character development efforts and ideas for schools to encourage parent involvement.

Target Population Served: Public school districts

Numbers Served: All public school districts on an ongoing basis; 12 school districts in the pilot project; 10 school districts in the evaluation project.

Coverage Area: Statewide

Funding Amount: \$510,155

Funding Source: Federal

NEW JERSEY STUDENT HEALTH SURVEY

In 2004-2005, the NJDOE first conducted the bi-annual New Jersey Student Health Survey (NJSHS) among a sample of public school students. This survey, which is based on the Youth Risk Behavior Survey sponsored by the United States Centers for Disease Control and Prevention (CDC), asks students to self report on their actions in six areas that are highly related to preventable, premature injury or illness. Concerning alcohol, tobacco, marijuana and other drug use, the survey includes questions on age of first use, 30-day use and lifetime use, use on school property, sale of drugs, and perceived harm. Concerning violence, the survey includes questions on carrying a weapon, carrying a gun, having been in a physical fight, having personal property stolen or damaged at school, having been hit by a boyfriend or girlfriend, having been forced to have sex and trying to commit suicide. Some questions are asked every other survey administration.

The findings are used by state agencies for planning, program assessment and federal reporting. Reports of findings are distributed to school staff and published on the NJDOE Website.

Target Population Served: Students in grades 9-12

Numbers Served: 1,757 students

Coverage Area: 34 high schools in the survey sample

Funding Amount: \$167,577

Funding Source: Federal

ELECTRONIC VIOLENCE, VANDALISM AND SUBSTANCE ABUSE REPORTING SYSTEM

Pursuant to *N.J.S.A. 18A:46* and *N.J.A.C. 6A:16-5.3*, school staff who witness or who have knowledge of an incident of violence, vandalism or substance abuse must file a report of the incident with the school principal, and the district must annually report all incidents to the NJDOE. The Commissioner of Education is required to annually report all incidents to the Legislature and the Governor. In addition, the chief school administrator is required to provide a summary of all such incidents annually at a public hearing, pursuant to *N.J.S.A. 18A:36-5.1*.

The Commissioner's report provides the Legislature and the Governor with data in four broad categories of incidents: violence, vandalism, weapons and substance abuse. This report also notifies the Legislature, the Governor and the public of the actions taken by the Commissioner, the State Board of Education and the NJDOE to address the problems indicated by the data.

Since the 1999-2000 school year, school districts have been recording their incidents of violence, vandalism and substance abuse over the Internet on the Electronic Violence and Vandalism Reporting System (EVVRS). To promote consistency in reporting, the NJDOE provided regional trainings for school staff to facilitate understanding of the EVVRS incident definitions and accuracy in data entry procedures.

Target Population Served: Public school staff

Numbers Served: All public schools (EVVRS); 240 school staff (EVVRS training)

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: Federal and State

Website:

- The Commissioner's report to the Legislature and On-line reports of school, school district and state summary data from the EVVRS – <http://www.state.nj.us/njded/schools/vandv/index.html>.

CHIEF OF STAFF

SCHOOL SAFETY AND SECURITY - The NJDOE's School Security Unit (SSU) disseminated the *Critical Incident Response* CD-ROM, which contains an interactive training program, to all public, charter and nonpublic schools. The CD-ROM was developed in collaboration with the New Jersey Office of Homeland Security and Preparedness as a result of a recommendation made by the School Security Task Force. Approximately 4,000 CD-ROMS were distributed to school administrators to assist with the training of all school staff in responding to critical incidents in schools, in accordance with N.J.S. 18A:41-7 and N.J.A.C. 6A:16-5.1(d). This guidance directly supports the priorities of the School Security Task Force and the Governor's Domestic Security Preparedness Task Force, pursuant to P.L.2001, ch.246, the Domestic Security Preparedness Act. The CD-ROM is to be used by local educational agencies to establish appropriate practice drills, provide staff training and strengthen collaboration with emergency responders to assist with meeting district's training needs. The guidance will help district boards of education fulfill their requirement to provide in-service training to all employees to enable them to recognize and appropriately respond to safety and security concerns. Practicing the procedures will help to strengthen the emergency response system in schools.

N.J.S. 18A:41-1, an act concerning school security drills, was signed into law on January 11, 2010. This statute requires that schools hold one fire drill and one school security drill each month when school is open. In addition, it requires all schools to ensure that full-time employees receive training on school safety and security and related drills. Security drills, which are similar in duration to fire drills, will be used to practice school's procedures for responding to emergencies, as outlined in the document titled *School Administrator Procedures: Responding to Critical Incidents* that the NJDOE disseminated in October 2007. Schools continue to coordinate with local emergency responders by updating safety and security plans and procedures for drilling, managing and responding to school emergencies. The Office of School Preparedness and Emergency Planning (OSPEP) was the department's liaison to the Office of Homeland Security and Preparedness (OHSP) and the School Security Task Force regarding this legislation, which took effect on November 1, 2010. In preparation for this new law, OSPEP is collaborating with the SSU, the New Jersey State Police and the School Security Task Force to develop school security drill guidance, pursuant to N.J.S. App.A:9-86 Development, dissemination of building security drill guide, training materials. The department is planning to provide regional training and additional guidance on school security drills, pursuant to 18A:41-1, to support local training and planning efforts.

Target Population Served: All public, charter and nonpublic school building and school district administrators.

Numbers Served: 4,000 school administrators

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: State and Federal

Website: www.nj.gov/education/schools/security/

DIVISION OF ACADEMIC STANDARDS, CURRICULUM AND ASSESSMENTS

CORE CURRICULUM CONTENT STANDARDS

The New Jersey State Board of Education adopted revised Core Curriculum Content Standards (CCCS) in Comprehensive Health and Physical Education (CHPE) in June 2009. The revised standards contain specific indicators under Standards 2.3 (Drugs and Medicines), 2.1 (Wellness), 2.2 (Integrated Skills) and 2.4 (Human Relationships and Sexuality) that require public schools to teach substance abuse and violence prevention skills, including media resistance, peer pressure resistance, peer leadership, problem solving, conflict resolution and stress management. Topical strands infused in each of the CCCS in CHPE help teachers locate specific content and skills related to substance abuse and violence prevention skills. The standards are further defined by progress indicators at grades two, four, six, eight and twelve. *Web resources have been developed* to assist educators in locating standards and in addressing topics related to substance abuse and violence prevention and positive social and emotional development. The New Jersey CCCS in CHPE and the related resources provide an age-appropriate and culturally sensitive focus that helps students develop the knowledge and skills that lead to healthy, active lifestyles.

Target Population Served: Public school students in grades K-12

Numbers Served: All public school students

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: State

Website:

- Core Curriculum Content Standards and supportive resources – <http://www.njcccs.org/> <http://www.nj.gov/education/cccs/2009/final.htm>

SUBSTANCE AWARENESS COORDINATOR CERTIFICATION

In April 2005 the New Jersey State Board of Education amended the Educational Services Certificate requirements (N.J.A.C. 6A:9) for the substance awareness coordinator (SAC) endorsement issued by the New Jersey State Board of Examiners. (In May 2009, the Legislature changed the professional title of “substance awareness coordinator” to “student assistance coordinator;” however, the SAC certification regulations have not been modified to reflect the new title at this point in time.) The endorsement authorizes the holder to perform the functions of a SAC, as set forth in N.J.S.A. 18A:40A-18, in grades preschool through 12. The amended regulations expanded the eligibility requirements to increase the types of professionals who may apply to obtain the endorsement, increased the clock hours for the required curriculum and expanded the required areas of study.

Target Population Served: SACs or appropriately certificated school staff performing SAC functions in New Jersey public school districts

Numbers Served: All certificated SACs

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: State

Website:

SUICIDE PREVENTION

In support of N.J.S.A. 18A:6-111, which requires all public school teaching staff members to complete at least two hours of instruction in suicide prevention as part of their required 100 clock hours of professional development, the NJDOE issued guidance for fulfilling the professional development requirement to all chief school administrators in August 2006. The guidance also addressed the provision in the statute requiring that the New Jersey Core Curriculum Content Standards for Comprehensive Health and Physical Education be revised to include suicide prevention. .

Target Population Served: Public school staff and students in grades K-12

Numbers Served: All public school staff and all public school students in grades K-12

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: State

OFFICE OF STATE BUDGET AND ACCOUNTING

DRUG ABUSE EDUCATION FUND PROJECT

Per the provisions of N.J.S.A. C.2C:43-3.5 and N.J.S.A. C.54A:9-25.12 *et seq.*, a Drug Abuse Education Fund (D.A.E.F.) was established from portions of taxpayer-designated refunds and penalties assessed against individuals adjudicated or convicted of certain crimes. The resources accumulated in the fund are appropriated annually to NJDOE for distribution to non-governmental entities for the use of law enforcement personnel in providing drug abuse education to students in grades K-12 on a statewide basis. Under the appropriation for these statutory provisions, the NJDOE issued funds to D.A.R.E. New Jersey, Inc. for the eighth year of services for the 2009-2010 school year.

Target Population Served: Public and nonpublic school students, parents and other adults, schools, school districts and government agencies

Numbers Served: 430 schools in 143 communities

Coverage Area: Statewide

Funding Amount: \$375,000

Funding Source: State

Intervention & Referral Information

DIVISION OF STUDENT SERVICES

INTERVENTION AND REFERRAL SERVICES INITIATIVE

The Intervention and Referral Services (I&RS) Initiative supports implementation of the I&RS regulations (N.J.A.C. 6A:16-8) by providing technical assistance to districts for the establishment and operation of building-based multidisciplinary problem-solving teams. These teams are designed to assist students who are experiencing learning, behavior or health difficulties, and to assist staff members who have difficulties in addressing students' learning, behavior or health needs.

The technical assistance provided by the NJDOE includes a comprehensive *Resource Manual for Intervention and Referral Services*, a four-part series in video and DVD formats and accompanying flyer , and the provision of training and technical assistance to prepare building administrators and building-based teams to implement the I&RS regulations. .

Target Population: I&RS team members

Numbers Served: I&RS team members in all public school buildings serving grades K-12

Coverage Area: Statewide

Funding Amount: \$125,000

Funding Source: Federal

Website:

- *Resource Manual for Intervention and Referral Services* – <http://www.state.nj.us/njded/students/irs/>
- Four-part Video Series – <http://www.etc.net/Intervention/inrsVideo/index.html>

INTERVENTION AND REFERRAL SERVICES TECHNICAL ASSISTANCE PROJECT

This cooperative initiative between the NJDOE and The Richard Stockton College of New Jersey is designed to assist the NJDOE in increasing its capacity to provide technical assistance, consultation, professional development, networking and materials development and dissemination services to support school building and school district staff in the effective implementation of *N.J.A.C. 6A:16-8*, Intervention and Referral Services (I&RS) and the NJDOE's best practices in support of *N.J.A.C. 6A:16-8*. Approximately 1,579 building-based teams have been trained since April 2000, including 225 teams trained by project staff (676 school staff) in the 2009-2010 school year. Approximately 112 school staff who were added to their school's I&RS teams also were provided training in the 2009-2010 school year. In addition to providing annual training in I&RS team practices, supplemental training programs were provided to 1,445 I&RS team members since 2005-2006, with 872 being trained in 2009-2010, in response to the results of a professional development needs survey conducted in the spring of 2006.

Target Population Served: I&RS team members and other school staff and administrators serving grades K-12

Numbers Served: Staff from 96 school districts (see additional numbers in the description above)

Coverage Area: Statewide

Funding Amount: \$400,000

Funding Source: Federal

RANDOM TESTING OF ALCOHOL AND CONTROLLED DANGEROUS SUBSTANCES

Pursuant to *N.J.S.A. 18A:40A-25*, the New Jersey State Board of Education adopted regulations at *N.J.A.C. 6A:16-4.4*, Voluntary policy for random testing of student alcohol or other drug use, in November 2007. The regulations apply only to districts that *choose* to adopt a policy for the *random testing of alcohol and controlled dangerous substances* of the district's students in *grades nine through twelve*, who participate in extracurricular activities or who possess parking permits. These rules implement the statute requiring the establishment of parameters for implementing random student drug testing as a means to deter drug use and for the early detection of student's with drug problems so that counseling and rehabilitative services may be offered.

Target Population Served: Schools with students in grades nine through twelve

Numbers Served: Schools choosing to implement a voluntary random drug testing program in grades nine through twelve

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: State

Website:

- Random Testing Regulations – <http://www.state.nj.us/education/code/current/title6a/chap16.pdf>

UNSAFE SCHOOL CHOICE OPTION (USCO) POLICY

As a condition for the NJDOE and public school districts to receive funds under the federal *No Child Left Behind Act* (NCLB), the NJDOE was required to establish and implement a statewide policy requiring that students attending persistently dangerous schools or who become victims of violent criminal offenses while in or on the school grounds that they attend be allowed to transfer to a safe public school within the local educational agency. The NJDOE's policy was adopted by the State Board of Education in June 2003 and reissued in July 2010. All local educational agencies must comply with the provisions of the policy, as appropriate.

Target Population Served: Schools identified under the USCO Policy by the NJDOE as being persistently dangerous or at risk of becoming persistently dangerous

Numbers Served: Zero persistently dangerous schools; eight early warning schools

Coverage Area: Statewide

Funding Amount: Not available

Funding Source: Federal

Website:

- USCO Policy and Related Information – <http://www.nj.gov/education/grants/nclb/guidance/usco/>

Planning, Coordination and Collaboration Information

NEW JERSEY HIGH SCHOOL GRADUATION CAMPAIGN

In partnership with the America's Promise Alliance, New Jersey launched the *New Jersey High School Graduation* Campaign through a symposium and a summit to focus on combating the high rate of high school dropouts. The campaign involved 500 partners from across New Jersey, representing schools, businesses, non-profit and faith-based organizations, and was planned by the Office of the Attorney General, the NJDOE, the New Jersey Commission on Higher Education, Rutgers University, NJ After3, Communities in Schools and Teach for America. The NJDOE will review the findings and recommendations in the first-year report, *Forging New Jersey's Cradle to College and Workforce Pipeline for All Children*, to inform next steps in New Jersey's commitment to improving the graduation rates for all New Jersey students and to enhancing the NJDOE's collaboration with America's Promise Alliance.

TRUANCY FOCUS GROUP

In April 2010, the NJDOE convened a focus group discussion among a broad cross-section of staff from New Jersey schools to advise the NJDOE on critical issues pertaining to student unexcused absences and truancy. The school issues, concerns, practices and recommendations that were generated during the discussion will aid the NJDOE and other state agencies and will be considered by the State Interagency Truancy Working Group in addressing concerns with related statutes, regulations, policies, practices and resources.

STATE INTERAGENCY TRUANCY WORKING GROUP

In April 2010, the NJDOE convened an ongoing state interagency working group to continue to study and manage issues, concerns, practices and recommendations regarding student unexcused absences and truancy. Emphasis is being placed on considering the findings from the NJDOE's Truancy Focus Group, assessing and addressing the effects of existing statutes and regulations on unexcused absences and truancy and on examining and advancing the effectiveness of the courts, schools, human services agencies and other resources in addressing truancy cases. It is anticipated that an Attendance-Truancy Tool Kit will be prepared as a result of the working group's activities. The working group comprised representatives from the Administrative Office of the Courts, the Superior Court of New Jersey, the county courthouse, the Department of Children and Families and the Juvenile Justice Commission.

COLLABORATION WITH LAW ENFORCEMENT

The NJDOE coordinates with the New Jersey Department of Law and Public Safety on matters related to safety and the illegal use or possession of substances and weapons through the Attorney General's Education and Law Enforcement Working Group. The working group comprises representatives from county prosecutors, Administrative Office of the Courts, State Police, local police, juvenile and probation officers, executive county superintendents, New Jersey School Boards Association, New Jersey Association of School Administrators, New Jersey Principals and Supervisors Association, New Jersey Education Association, the Catholic Conference and local school districts.

As set forth in N.J.A.C. 6A:16-6, Law Enforcement Operations for Alcohol, Drugs, Weapons and Safety, each school district is required to establish a memorandum of agreement (MOA) with local law enforcement authorities. The MOA, which is reviewed and signed annually by local education and law enforcement officials, forms the basis for information sharing among education and law enforcement representatives and sets parameters for law enforcement investigations on school grounds regarding alcohol, drugs, weapons and safety. The MOA must be consistent with the format and content established by the Attorney General and the Commissioner of Education in the *Uniform State Memorandum of Agreement between Education and Law Enforcement Officials*.

In November 2007, the Attorney General and the Commissioner of Education issued a revised MOA, which contains new information on school safety and security, including information on school security plans and training; gang threats, recruitment and information sharing; harassment, intimidation, and bullying; offenses involving computers; offenses involving hazing; reports of child abuse or neglect; law enforcement units; inquiries regarding law enforcement operations, stationhouse adjustments, and notification of arrests or charges filed against school personnel; notification of emergencies; and School Violence Awareness Week.

The NJDOE coordinates with the Office of the Attorney General on the Gang Awareness Initiative. On October 12, 2007, N.J.S.C. 52:17B-4.7 was enacted, which requires the Attorney General, in coordination with the Commissioner of Education, to develop seminars to teach school administrators to recognize signs of gang involvement or activity. The law also requires that a seminar on gang awareness be held annually in each county for all public and nonpublic school administrators. These training sessions are offered by each county prosecutor's office in conjunction with the county office of education, and the training programs address gang awareness and related topics and are facilitated by trainers from various law enforcement agencies.

COLLABORATION WITH HUMAN SERVICES AGENCIES AND STUDENT SUPPORT SERVICES STAFF

One of the conclusions drawn from widely publicized violent incidents in our society is that schools should examine how they collaborate with local mental health agencies and how they utilize existing student support services staff. The effective use of student support services staff and the development of cooperative relationships between them and mental health providers are important components of schools' responses to violence. Therefore, the NJDOE continues to forge links among New Jersey schools, mental health, and other human service and health providers to establish effective working relationships, identify areas of concern, and consider strategies for improving the delivery of student support services.

Specifically, NJDOE staff collaborates with the leadership of the Association of Student Assistance Professionals of New Jersey, the New Jersey Association of School Psychologists and the New Jersey School Counselors Association on comprehensive student support services issues. Representatives of these organizations serve on advisory committees for NJDOE projects, including the Social Norms Project and the Developing Safe and Civil Schools: A Collaborative Approach for Social-Emotional and Character Development initiative.

COLLABORATION WITH CHILD WELFARE AGENCIES

In an effort to provide supportive services and resources that address the needs of the whole child, the NJDOE has increased its efforts to collaborate with child welfare agencies for the purpose of information-sharing, support and access to schools and policy development. Specifically, the NJDOE coordinates with the New Jersey Department of Children and Families (DCF) in a number of ways:

- New Jersey Task Force on Child Abuse and Neglect – The NJDOE remains a member of the Task Force on Child Abuse and Neglect, which consists of key stakeholders, including state agencies, community representatives and child advocates. NJDOE's participation on this

task force has facilitated increased information-sharing, collaboration and prevention planning on issues related to the welfare of children in New Jersey.

- NJDOE and DCF Workgroup – The NJDOE co-chairs this workgroup which was created to address the issues regarding educational barriers for children in out-of-home placement raised by the Child Welfare Citizens Review Panel (CWCRP) at the 2007 Roundtable. This workgroup, composed of a number of external stakeholders, including, but not limited to, representatives from the Association of Children of New Jersey (ACNJ), Court-Appointed Special Advocates (CASA), Legal Services, Statewide Parent Advocacy Network (SPAN) and Office of the Child Advocate (OCA) has coordinated over the past two years to establish a standardized training program on reporting child abuse and neglect to increase and improve communication and collaboration between education and child welfare agencies and to support the educational needs of children in out-of-home placements. As a result, the workgroup has:
 - Developed a training module for reporting child abuse and neglect entitled: *Reporting Child Abuse and Neglect: What School Personnel Need to Do*. The purpose of the training is to provide all school staff with the content necessary to ensure that local school district staff members consistently implement the requirements established in N.J.A.C. 6A:16-11, Reporting Potentially Missing or Abused Children, and to foster collaboration among DCF and other external agency trainings to school staff on reporting abuse and neglect. The training was piloted and identified as a comprehensive training tool that would prove useful to districts in implementing the training requirements at N.J.A.C. 6A:16-11(a)8.
 - Drafted a *Memorandum of Agreement between the Department of Education and the Department of Children and Families (MOA)*. The MOA is designed to promote, develop and enhance collaboration between school, child protective, behavioral health and prevention agencies and other interested organizations and parties to improve the well-being of children in New Jersey. The MOA achieves this objective by creating a framework for promoting interagency collaboration and communication that supports educational stability and continuity for children in out-of-home care by outlining specific activities of each partner agency as well as those of local school districts and DCF personnel. The draft MOA is currently being reviewed by DOE and DCF.
 - The DOE coordinated with the DCF and OCA in the development of proposed Legislation to comply with the federal *Fostering Connections Act*, which is designed to foster educational stability for children in out-of-home placements. The Legislation (P.L.2010, ch. 69) was adopted in September 2010.

OTHER COLLABORATIVE PARTNERSHIPS

The NJDOE aims to continue to collaborate with the following groups: New Jersey School Boards Association, New Jersey Association of School Administrators, New Jersey Principals and Supervisors Association, New Jersey Education Association, New Jersey School Counselors Association, Association of Student Assistance Professionals of New Jersey, New Jersey Association of School Psychologists, New Jersey Association of School Social Workers, University of Medicine and Dentistry of New Jersey (UMDNJ), including the Violence Institute of New Jersey at UMDNJ and the County Traumatic Loss Coalitions for Youth administered by UMDNJ, the Departments of State, Health and Senior Services, Human Services, Children and Families and Law and Public Safety, including the Juvenile Justice Commission and the Domestic Security Preparedness Task Force and affiliated committees and work groups, the Administrative Office of the Courts, the Attorney General's Office, including the Education and Law Enforcement Working Group, and other organizations, associations and agencies.

The NJDOE continues to be represented on the following organizations and their subgroups: Governor's Council on Alcoholism and Drug Abuse, Governor's Youth Suicide Prevention Advisory Council, Governor's Advisory Council on Domestic Violence, Governor's Advisory Council on Sexual Violence, New Jersey Association of County Youth Services Coordinators, Juvenile Justice Delinquency Prevention Committee and School-based Probation Committee, New Jersey Coalition for Bullying Awareness and Prevention, Childhood Drinking Coalition and intends to continue to support the various collaborative initiatives described above.

The NJDOE coordinates with the New Jersey Alliance for Social and Character Development (NJASECD) on information and resource-sharing and technical assistance to local school districts regarding social-emotional and character development. The NJDOE has served as a collaborator in annual conferences held by the organization, and continues to serve as a resource to the NJASECD Advisory Board. The NJDOE also actively served on the Commission on Bullying in Schools.

TUBERCULOSIS (TB) PREVENTION

This program provides literature and pamphlets regarding TB to clients at Alcohol and Drug Abuse Treatment Centers. Materials Provided to TB Program at no cost by CDC or TB Regional Training and Medical Consultation Centers.

Funding Amount: Unfunded

Division of HIV/AIDS Services (DHAS)

HIV/AIDS

The DHAS supports the provision of HIV prevention services to injecting drug users (IDU) through the Patient Incentive Programs (PIPs). PIPs, located at drug treatment centers in Newark, Trenton, Asbury Park and Atlantic City, provide community outreach, HIV counseling, testing and referral services, HIV health education/risk reduction behavior change programs, and free drug treatment to hard to reach IDUs who would otherwise not be in treatment. Female sex partners of IDUs receive HIV prevention services through two specialized HIV Prevention for Women (HIP4W) programs located at healthcare provider agencies in Trenton and Newark.

Funding Amount and Source:	PIP Federal	\$ 973,362
	State	\$ 498,830
	HIP Federal	\$ 232,300
	State	\$ 201,500

Division of Family Health Services

Perinatal Addiction Prevention

The six Maternal and Child Health Consortia are funded to provide regional risk reduction coordination for women of childbearing age. The major objectives of the Perinatal Addictions Prevention Project include providing professional and public education, encouraging all prenatal providers to screen their patients for substance use/abuse and developing a network of available resources to aid pregnant substance abusing women.

The risk-reduction coordinators in each of the consortia provide these services. They also provide information, training, advocacy and support for programs that serve families of children adversely affected by prenatal alcohol and drug exposure. The Coordinators work with staff from the six Centers of Excellence throughout the

State. Children who have been affected by drugs and/or alcohol are referred to these Centers for appropriate services.

Service Information: During the 2010 grant year, over 29% of the pregnant women throughout the state were screened for alcohol, tobacco, and/or drug use during their pregnancy. The majority of these screenings were done in hospital clinics. The results of these screenings show that 14% of the pregnant women say that they consumed alcohol in the month before they knew that they were pregnant. Because most women do not know they are pregnant during the first month, those babies were exposed to alcohol. Similarly, when women were asked if they had smoked cigarettes in the month before they knew they were pregnant, over 15% responded that they had smoked. These percentages have not changed significantly compared to the information from those who had been screened during the previous two years. If a screening reveals risk behavior, it results in the women receiving prevention education, being referred for a substance abuse assessment or entering treatment when appropriate.

Programs designed to educate the general public about the risks of substance use during pregnancy have reached 18,528 women and men during 316 offerings. There were 136 programs offered to 2782 nurses, physicians and social workers. The goal all of this education is to raise awareness of the treating professionals and encourage their participation in the universal screening project.

Intervention & Referral Information

Division of Epidemiology, Environmental And Occupational Health Services

TB Intervention

This program provides materials (syringes, antigens) to Alcohol and Drug Abuse Treatment Centers for Mantoux tuberculin skin testing of clients. The funding utilized to provide these TB testing materials are provided by the state, but recordkeeping does not exist to determine the value of the TB testing materials supplied to Alcohol and Drug Abuse Treatment Centers. If latent TB infection is detected through these screening activities, referrals may be made to TB clinics funded by the Program. These clinics are funded by both state and federal sources, but there is no mechanism to determine the costs associated with services provided specifically for referrals from Alcohol and Drug Abuse Treatment Centers.

Funding Amount: Undetermined

the development of a statewide media campaign focused on prevention and the development of a web site www.bein.theknownj.org

Service Information: During Fiscal Year 2010, 5,586 children were screened for FAS, 96 were identified with FAS and 54 have been identified with FASD. To date, 32,369 children have been screened for FAS through the Diagnostic Centers. A multidisciplinary team completes an evaluation and then develops a comprehensive report and intervention plan that is discussed with the family. Members of the team include: developmental pediatrician, licensed psychologist, physical and occupational therapists, speech pathologist, social worker and family counselor. This treatment plan may include the following: diagnosis of medical and psychosocial conditions, treatment referrals to community resources, out patient services and school-based programs, medical and/or behavioral monitoring and case management and counseling which include family support, behavior modification and education planning. During this year, 265 children have received complete evaluations. The six centers have developed a standardized screening tool for identifying children at risk. In addition a standard four digit diagnostic grid developed by the University of Washington is used make a diagnosis of FAS. Performance indicators used were delete previous two words insert developed have resulted in increased screening of children utilizing the standard tool and the identification of children with a diagnosis of FAS using the University of Washington diagnostic guide.

Division of Epidemiology, Environmental And Occupational Health Services

TB Treatment Support

TB education/training is made available for providers of care to substance abusers who work in various centers throughout the state; medication is provided for treatment of active disease and latent TB infection; and field follow-up occurs for an individual who was overdue for examination, treatment and/or clinic appointment, and for directly observed therapy of new cases among substance abusers. The funding for these field services is often provided by health service grants funded by both federal and state sources. It is not possible to determine the amount of funding that is used specifically to provide services for individuals also served by Alcohol and Drug Abuse Treatment Centers.

Funding Amount: Undetermined

TB Administration

Technical assistance is provided and policies and procedures regarding TB control activities are developed. These services are provided by TB Program staff funded by both state and federal sources. It is not possible to determine the time and effort of these employees specifically for Alcohol and Drug Treatment Centers.

Funding Amount: Undetermined

Division of Family Health Services Chronic Disease and Prevention Control/Chronic Disease Management

OFFICE OF TOBACCO CONTROL (OTC)

The main goals of the OTC is to increase cessation, reduce tobacco acceptability, decrease tobacco-related disparities and decrease involuntary exposure to second-hand smoke

The information provided in this report includes the tobacco programs that remain in operation after the termination of tobacco funding from the state budget for Year 2010.

New Jersey Quitline, a toll-free (1-866-NJSTOPS) telephone based counseling service offering services from brief advice to extensive one-on-one telephone counseling. The OTC was awarded federal funds from the American Recovery Reinvestment Act (ARRA) to increase the NJ Quitline utilization by expanding health communication strategies, particularly targeting the population with a disproportionate burden of tobacco use and exposure, and offering a one time-limited of Nicotine Replacement Therapy. This funding will run until February 3, 2012

State Funding Amount: **\$ 200,000**

Federal Funding Amount (ARRA): **\$ 938,000**

Tobacco Age of Sale Enforcement Program (TASE): this program is responsible to perform tobacco inspections to retailers in order to test the law of non-selling tobacco to minors less than 19 years of age. The main goal is to reach non-compliance violation rate of less than 20% as mandated by the federal Center for Substance Abuse Prevention and Treatment (SAPT). TASE Tobacco Inspectors and student associates perform year-round inspections to retailers selected through a random sampling. Starting SFY 2010, TASE will perform only the mandated federal inspections to be completed by September 30th of each year.

Total State Funding Amount for TASE program **\$ 500,000**

(Projected revenues from the license tobacco fees collected by the Division of Taxation).

Tobacco-Diabetes Integration Project: A total of seven organizations continue to provide services to all populations in the state: adults and young adults, young and expectant mothers, multicultural groups, college students, the workforce, smokers and nonsmokers, and people with tobacco related illnesses. Each of the partner organizations possess different areas of expertise, therefore establishing a comprehensive approach to all issues surrounding tobacco use, abuse and a multitude of health concerns and diseases. Their services focus on community mobilization, population-based health communications/education and policy action. In order to maximize the efficient use of limited resources, all health communication messages about tobacco control activities within New Jersey is being coordinated through the ***Tobacco Free for a Healthy New Jersey*** promotional strategy. This strategy was developed by the seven funded organizations to increase collaboration and message consistency and impact throughout the state.

Total CDC Federal Funding amount: \$ 680,000

Total State Funding amount: \$ 400,000

Comprehensive Tobacco-Free School Policy Initiative: with ARRA funding through February 3, 2012, the program will continue to ensure the implementation of the comprehensive tobacco free school policy initiative within a minimum of 30 High Schools throughout New Jersey.

Total Federal ARRA funding amount: \$ 390,00

Youth Tobacco Survey (YTS): The OTC continues to work with the University of Medicine and Dentistry – School of Public Health for the implementation of the 2010 Youth Tobacco Survey.

CDC Federal Funding Amount: \$ 250,000

DEPARTMENT OF HUMAN SERVICES

Department/Agency Mission Statement: The Department of Human Services is dedicated to providing quality services that consistently meet or exceed expectations with the goal to protect, assist and empower economically disadvantaged individuals and families, and people with disabilities to achieve their maximum potential. We strive to ensure a seamless array of services through partnerships and collaborations with communities statewide. We seek to promote accountability, transparency and quality in all that we do.

Core Functions

- Serve as a safety net for low income people through the TANF, GA, Food Stamps, child support and emergency shelter programs. Help people transition toward greater independence and self sufficiency.
- Provide health care coverage for low income, aged, blind and disabled people.
- Operate state institutions and provide residential and community based supports and/or treatment to people with developmental disabilities, mental illness and substance abuse so they can live in the most independent situation possible and achieve quality of life, wellness and recovery.
- Communicate effectively with the public, the media, consumers of Human Services and DHS staff. Provide equal access to public information within the purview of this department to all interested citizens.
- Effectively manage the Human Services' budget, maximize revenue, ensure fiscal integrity and maintain the public trust.
- Assure a sufficient workforce that is competent and diverse in both state and contracted services.
- Develop and formulate public policy related to human services in collaboration with community partners, stakeholders and government leaders to address identified local and state issues and priorities.
- Ensure that all Department services are carried out with quality, efficiency, safety, fiscal integrity and dignity for the people we serve.

Prevention Information

Division of Addiction Services

THROUGH THE MEDIA

The Partnership for a Drug-Free New Jersey develops large-scale prevention media campaigns to impact communities, schools, families and workplaces.

Service Information: Services include information dissemination to youth, parents, educators, the media, prevention, and education and other activities that also relate to their "Drug Free Workplace Programs. Recent initiatives focused on medication abuse and underage drinking. Partnership messages go beyond "traditional" media. Their anti-drug messages can be found on PATH and New Jersey Transit trains and buses. More messages are placed in the Bell Atlantic Yellow Pages, in Motor Vehicle Commission registration renewal notifications, milk cartons, shopping bags, car litter bags, and many other venues.

The Partnership has also developed The American Medicine Chest Challenge, a community based public health initiative, with law enforcement partnership, designed to raise awareness about the dangers of prescription drug abuse and provide a nationwide day of disposal – at a collection site or in the home - of unused, unwanted, and expired medicine that was held on November 13, 2010 in communities across the country.

The American Medicine Chest Challenge provides a unified national, statewide, and local focus to the issue of medicine abuse by children and teens. It is designed to generate unprecedented media attention to the issue of prescription and over-the-counter medicine abuse and to challenge all Americans to take the 5 Step American Medicine Chest Challenge:

- Take inventory of your prescription and over-the-counter medicine.
- Lock your medicine chest.
- Dispose of your unused, unwanted, and expired medicine in your home or at an American Medicine Chest Challenge Disposal site.
- Take your medicine(s) exactly as prescribed.
- Talk to your children about the dangers of prescription drug abuse

SPORTS, VIOLENCE AND ADDICTIONS "PARENTING AN ATHLETE"

This is a project with the Institute for Prevention at St. Barnabas Healthcare to reach parents of middle and high school athletes regarding youth sports, leadership, personal development, and prevention

Service Information: Prevention education was provided to 112 parents and 42 Parent Coaches.

Funding Amount and Source: \$182,500 (Federal)

RUTGERS AND WILLIAM PATERSON UNIVERSITIES – RECOVERY SUPPORT AND ENVIRONMENTAL PREVENTION STRATEGIES ON CAMPUS

This initiative that began in the fall of 2008 provides funding to two New Jersey universities – Rutgers (at both the New Brunswick and Newark campuses) and William Paterson, in Wayne, to enable them to provide recovery and substance-free housing to students in recovery, students at risk of a SUD, and students not in recovery who choose not to misuse alcohol and illicit drugs, with a supportive community that promotes physical, psychological, social, and spiritual health. By providing this support, it is easier for a student that is in recovery to thrive in the college setting and work toward their academic goals. It also provides comfort to families

who have to deal with the fears and reservations of letting their recovering loved one enter an environment that is well-known for drinking and partying.

The colleges also utilize environmental strategies to reduce the supply of and demand for alcohol and other drugs by making them less available and their use less acceptable. The strategies require the leadership of college administrators in collaboration with government agencies, campus task forces, and community coalitions (and includes public safety officials, students, high school- and college personnel, policymakers, and community members) to reduce alcohol and other drug - related problems and to promote academic achievement. The strategies also seek to offer alcohol and other drug-free social and recreational options, to establish health-promoting normative environments, to restrict marketing of alcohol, and to increase enforcement of alcohol and other drug laws and policies (on and off college campuses).

Funding Amount and Source: \$490,000(State and Federal)

COMMUNITY BASED PRIMARY PREVENTION GRANTS

In response to the Unification Plan developed with each county in 2007, 50 contracts were awarded to provide science-based primary substance use prevention programming in all 21 counties. The goal of each contract was to reduce the risk factors identified during the county planning process. Additionally, agencies provided intensive services in high-need communities to indicated populations such as at-risk youth, children of substance abusers and/or special populations, such as older adults or court adjudicated youth.

Service Information: Prevention services were provided to 104,787 members of the targeted populations in all 21 counties. Services included prevention education, environmental strategies, alternative activities, parenting classes, hotline services, and other activities. Performance indicators varied depending on individual contract objectives.

Strengthening Families - This evidence-based parenting program is age specific focused and provides skill development for both parent and child with built in practice sessions to support competency in skill achievement. There are incentives for parents, children and agencies providing the program to retain maximum attendance.

Service Information: Twenty-one community-based agencies have provided this program to over 1,200 families statewide for SFY 2009. This skill development program is offered in seventeen New Jersey counties to target populations such as DYFS involved families, court involved families, school-based families, and indicated high risk families.

Funding Amount and Source: \$5,800,000 (Federal)

SERVICES TO FAMILIES OF MILITARY VETERANS

Working with the New Jersey National Guard Family Program and its eight Family Assistance Centers based at armories around the state, the New Jersey Prevention Network is funded to provide programs to serve returning military personnel and their families through two evidence-based programs, Coping with Work and Family Stress and the Strengthening Families Program. Both programs are designed to enhance protective factors to support military

members and their families in making responsible parenting and individual choices in regards to drug and alcohol use.

Website: <http://www.state.nj.us/humanservices/das/prevention/special/>

Funding Amount and Source: \$325,000 (Federal)

SERVICES TO GAY, LESBIAN, BISEXUAL, TRANSGENDERED, AND QUESTIONING YOUTH

The odds of substance use for gay, lesbian bisexual, transgendered and questioning (GLBTQ) youth are on average 190 percent higher than for heterosexual youth, according to a study by University of Pittsburgh researchers published in the March 2008 issue of *Addiction*. What's more, for some sub-populations of GLBTQ youth, the odds were substantially higher, including 340 percent for bisexual youth and 400 percent for lesbians, researchers found.

DAS awarded funding to the North Jersey Community Research Initiative to expand their existing programs for high-risk GLBTQ youth of color by using a prevention model developed by the Centers for Disease Control, early intervention services, social marketing, and structured recreational activities.

Website: <http://www.state.nj.us/humanservices/das/prevention/special/>

Funding Amount and Source: \$225,000 (Federal)

PROGRAMMING TO ASSURE THE DELIVERY OF CULTURALLY AND LINGUISTICALLY-COMPETENT PREVENTION SERVICES IN NEW JERSEY

To ensure access to quality services by diverse populations, DAS awarded funding to PROCEED to develop new and/or enhance existing systems for assuring the provision of culturally and linguistically competent prevention services among DAS-funded providers throughout New Jersey. Training and technical assistance services are individualized for each prevention provider and based upon the results of an extensive assessment of the provider's needs and capacity.

Website: <http://www.state.nj.us/humanservices/das/prevention/special/>

Funding Amount and Source: \$200,000 (Federal)

PRIMARY PREVENTION RESOURCE CENTERS

New Jersey Prevention Network member agencies receive funding to offer programs and services that have a common goal of reducing the incidence and prevalence of alcoholism, addiction and related problems through primary prevention efforts. The network refers those needing and requesting help for their own or another individual's problems related to use and abuse of alcohol, tobacco and other drugs to an appropriate established organization or center that most closely meets their needs. Additionally, NJPN is funded to organize and convenes an annual statewide conference that provides programming and information to drug and alcohol professionals, law enforcement and the community-at-large.

Service Information: 65,000 New Jersey residents from all 21 New Jersey counties were served by county-based resource centers. Services provided included information dissemination, prevention education and other activities as needed. Over 600,000 pieces of printed educational materials were distributed.

Funding Amount and Source: \$2,400,000(Federal)

WISE

The WISE Program is a wellness and prevention program targeting older adults, which is designed to help them celebrate healthy aging, make healthy lifestyle choices and avoid substance abuse. It provides educational services to older adults on topics including nutrition and exercise, medication use, stress management, depression and substance abuse.

Service Information: WISE promotes health through education concerning high-risk behaviors in older adults. Since the program was launched in 1996, prevention programs presented by WISE Volunteers have reached over 68,000 individuals.

Funding Amount and Source: \$235,000 (Federal)

STIGMA REDUCTION

The many New Jersey residents with an alcohol or drug addiction, as well as those who are in recovery from this disease, routinely encounter stigma and discrimination. Existing policies, laws, practices and misplaced perceptions undermine acceptance of addiction as a treatable disease and health condition and restrict access to appropriate health care, employment, housing, and public benefits. NCADD- New Jersey provides extensive education and public information to help reduce the incidence of stigma related to alcoholism or drug addiction.

Funding Amount: \$624,000 (Federal)

CHILDHOOD DRINKING

This is a statewide initiative that includes a coalition of key stakeholders who focus on reducing underage and childhood drinking. All 21 New Jersey counties have developed local coalitions to promote awareness and support educational programs for children and their parents.

Service Information: Education activities for K-3 students were delivered to 6200 students and 2100 parents. Over 180 Town Hall meetings were held along with 21 county meetings to increase community awareness of the problem. Over 9600 people were in attendance.

Funding Amount and Source: \$1,030,000 (State)

STRATEGIC PREVENTION FRAMEWORK STATE INCENTIVE GRANT

The Strategic Prevention Framework (SPF) changes the approach to prevention, and helps move the vision of a healthier US to state and community-based action. The SPF is built on a community-based risk and protective factors approach to prevention and a series of guiding principles that can be utilized at the federal, State/tribal and community levels.

The SPF requires States and communities to systematically:

1. Assess their prevention needs based on epidemiological data,
2. Build their prevention capacity,
3. Develop a strategic plan,

4. Implement effective community prevention programs, policies and practices, and
5. Evaluate their efforts for outcomes.

DAS funded eleven communities to adopt and implement the SPF to deliver and sustain effective substance abuse prevention and mental health promotion programs in their communities by institutionalizing a data-driven planning process to decrease both underage drinking and the harmful consequences of alcohol and drug use among 18 to 25 year olds at the community level. The NJ SPF is a public health, outcomes-based prevention approach that uses data to drive prevention decision-making. The goals and objectives of the NJ SPF are being achieved through strong collaborations among State, community, and academic partners, who work together to implement the NJ SPF, and develop prevention expertise and infrastructure to sustain the process in selected communities.

Funding Amount and Source: \$2,100,000 (Federal)

COMPULSIVE GAMBLING

This contract provides statewide assessment, treatment, prevention, and helpline services through the Council on Compulsive Gambling of NJ. The Council offers counseling services provided by certified treatment providers; a helpline (1-800-GAMBLER) that provides information on problem gambling and connects callers to treatment programs and Gamblers Anonymous/Gam-Anon meetings; ongoing public awareness activities; and educational materials for compulsive gamblers, families, and others affected by gambling problems. The Council also conducts outreach to at-risk populations such as older adults, adolescents, criminal offenders, and alcohol/drug dependent persons. Advanced professional training workshops and program development assistance are offered throughout the year. The Council's annual statewide conference focuses on promising approaches to assessment, prevention and treatment of compulsive gambling.

Service Information: The helpline received approximately 20,000 calls, and the website generates 70,000 hits monthly. The Council delivered 62 presentations to schools and colleges, 56 presentations to seniors, and 66 presentations to other at-risk populations. 461 people received treatment.

Funding Amount and Source: \$970,000 (State)

WORKFORCE DEVELOPMENT

In order to ensure the quality, effectiveness, and availability of prevention and treatment services in New Jersey, a workforce development and training initiative was established by DAS in September 2006 to increase and enhance its addiction workforce capacity and competency. The program provides scholarships to attend Certified Alcohol and Drug Counselor (CADC) training for staff working in DAS-licensed addiction treatment agencies and is offered at 12 geographically diverse sites throughout New Jersey. Instructors are master's level clinicians who teach courses approved by the Addiction Professionals Certification Board of New Jersey (APCBNJ). In addition, scholarships are offered for CADCs and LCADCs to attend specialized trainings covering topics such as cultural diversity, co-occurring disorders, and ethical and legal standards. Courses are also offered to individuals to obtain the Certified Clinical Supervisor (CCS) and the Certified Prevention Specialist (CPS).

Service Information: Since its inception in 1996, the program has had 643 students complete CADC coursework required to become certified in New Jersey. Of that number, 135 individuals have become licensed or certified as alcohol and drug counselors in New Jersey

Funding Amount and Source: \$1,030,000 (Federal)

Division of Medical Assistance and Health Services

MANAGED CARE

Mental health and substance abuse services are obtained under Medicaid Fee-for-Service (FFS) with the exception of clients of the Division of Developmental Disabilities (DDD), who receive these services under the Medicaid managed care contract. The HMOs who service the Medicaid managed care contract are responsible for providing mental health and substance abuse services (except for partial care and partial hospital services) to DDD enrollees. HMO enrollee handbooks describe how to access mental health and substance abuse services.

The State's contract with HMOs, that provide health care services to Medicaid and NJ Family Care beneficiaries, provides that the HMOs identify relevant community issues and the health education needs of their enrollees. This includes smoking cessation programs, which must have targeted outreach to adolescents and pregnant women, as well as prevention and treatment of alcohol and substance abuse.

Although mental health and substance abuse services are furnished through Medicaid FFS, the HMOs have the responsibility for screening and identifying enrollees with substance abuse service needs and for providing them with referrals to appropriate providers.

Managed care enrollees who require special health care services, including substance abuse services, may request care coordination services through the HMO that will help coordinate care and link the enrollee to needed services.

Service Information: The HMOs offer counseling and pharmaceutical management for smoking cessation to all managed care enrollees. This may include participation in disease management programs, the Getting Early Maternity Services program referral to the NJ QuitLine and the Department of Health and Senior Services smoking cessation program. In addition, HMO participating providers are advised to counsel patients about smoking cessation. Some HMOs also produce educational materials about the hazards of second-hand smoke inhalation.

Division of Developmental Disabilities - Office for Prevention of Developmental Disabilities

PREVENTION OF FETAL ALCOHOL SPECTRUM DISORDERS AND OTHER PERINATAL ADDICTIONS EDUCATIONAL GRANTS PROGRAM

Service Information: The Office for Prevention of Developmental Disabilities (OPDD) funds grants to educate the community about the effects of prenatal exposure to alcohol, drugs and nicotine upon developing fetuses. These funds are also used to support Pregnant Pause events in every county annually. Targeted educational programs focus on specific audiences, including high school students, pregnant women, and staff and clients of substance addiction treatment centers. An estimated 500,000 persons receive information about perinatal addictions annually through these grants.

Website: <http://www.state.nj.us/humanservices/opmredd/fasd/index.html>

Funding Amount and Source: Grants totaling approximately \$200,000 are implemented annually (State funds)

Intervention

Division of Addiction Services

THE ADDICTION HOTLINE OF NEW JERSEY

The Addiction Hotline of New Jersey provides a statewide, 24-hour information and referral line disseminating information about prevention, intervention and support resources for New Jersey residents with concerns about the use of Alcohol and Other Drugs of Abuse. The hotline provides referral information to over 30,000 calls a year. The Hotline maintains an educational website capable of handling traffic of 14,000 site hits per year. Interpreters are provided for callers whose native language is not English. Within the next month DAS plans to operationalize a much enhanced Addictions Hotline thru 211 which will provide treatment and fiscal screening, as well as a "warm hand-off" to a targeted treatment referral and case-management/ care coordination which can only serve to improve potential client engagement and service to support individuals who reach-out for help.

Funding Amount and Source: \$460,000 (State and Federal)

Treatment

Division of Addiction Services

DRUG COURT

Drug Court is a cooperative initiative between the Administrative Office of the Courts (AOC) and DAS which commenced in 2002. This agreement allows the AOC to transfer treatment

funding to DAS who then secures and implements a complete continuum of care for Drug Court offenders sentenced in New Jersey Superior Court. Drug Court participation is voluntary and clinically-driven. Fifteen vicinage Drug Courts function within the existing Superior Court structure to provide treatment along the full continuum of care and diversion opportunities for non-violent offenders who otherwise may be incarcerated in State prisons for drug related offenses. Research shows there is only 14% recidivism after 5 years in this program. As of September 2010, 74% of the active DC participants were employed full-time, 186 drug free babies, and 1,947 successful graduates.

Service Information: In SFY 2010, New Jersey Drug Court had 198 pre-paid long-term slotted beds with 6 residential treatment providers. These beds were assigned to each of the 15 vicinages at a cost of \$24,353 per bed per year. In addition, Drug Court had 25 pre-paid halfway house slotted beds with 4 halfway house providers. Drug Court also has over 110 Fee-for-Service providers in their network with modalities including short term residential, halfway house, medication assisted treatment, IOP, partial hospitalization and outpatient treatment. In SFY 2010, approximately \$28 million was dedicated for treatment through the Drug Court program as a jail diversion strategy.

Funding Amount and Source: \$27,836,000 (State)

MUTUAL AGREEMENT PROGRAM (MAP)

In SFY 2010, DHS/DAS continued to oversee the Mutual Agreement Program (MAP), an Inmate/Parolee Substance Abuse Treatment Project implemented through Memorandums of Agreement between the Division of Addiction Services and the Department of Corrections (DOC), and the State Parole Board (SPB). This funding is a combination of direct appropriations to DAS and funds transferred from the DOC and SPB. Funding for long term residential is available for DOC inmates pending parole through a network of fee-for-service providers. For SPB, these funds support a similar fee-for-service network which offers the full continuum of care including long term and short term residential care, halfway house, partial care, detoxification, intensive outpatient, and outpatient treatment for SPB parolees.

Funding Amount and Source: \$ 4,100,000 (State)

THE JUVENILE JUSTICE TREATMENT INITIATIVE

DAS, through a Memorandum of Agreement (MOA) with the Juvenile Justice Commission (JJC), allotted funds to treat adolescents who had been committed to a state juvenile institution and adolescents placed on probation. This initiative allows for coordinated planning and joint funding of services to juvenile offenders. DAS funded 33 out of the 41 residential adolescent substance abuse treatment beds. The remaining eight (8) beds were supported by a transfer of funds from the JJC. DAS will allow discretion to the providers to utilize JJC beds for juveniles involved in the criminal justice system or court involved; however, JJC youth shall have priority. JJC shall maintain responsibility for placing JJC juveniles in funded beds.

Website: <http://www.state.nj.us/humanservices/das/treatment/adolescent/>

Funding Amount and Source: \$1,650,000 (State)

SUBSTANCE ABUSE TREATMENT AND REHABILITATION SERVICES

DAS strives to ensure equitable client access to drug and alcohol treatment services and engagement in appropriate Levels of Care (LOC) as determined by the ASAM PPC-2R guidelines. Comprehensive substance abuse treatment services are provided statewide through contracts with licensed facilities.

Service Information: DAS' substance abuse treatment service continuum of care for adults and adolescents is structured according to four major phases of treatment: I. Inpatient Treatment, II. Outpatient Treatment, III. Pre-Treatment Recovery Support, and IV. Post Treatment Recovery Support. Many providers offer specialized programs for women, children and adolescents, which are consistent with the LOC classification but include additional services appropriate to these populations.

- I. DAS' inpatient treatment services include six levels of care of varying intensity
 - 1) Sub-Acute Detoxification (ASAM PPC-2R level III.7 D)
 - 2) Sub-Acute Enhanced Medically Managed Detoxification (ASAM PPC-2R level III.7 D), this level include the ability to treat the following:
 - a) individuals with co-occurring disorders
 - b) pregnant women
 - c) poly-addicted persons including those addicted to benzodiazepines
 - d) individuals who may or may not be on opiate replacement therapy
 - e) clients with non-life-threatening medical condition(s)
 - 3) Short-Term Residential (ASAM PPC-2R level III.7)
 - 4) Long-Term Residential Treatment (ASAM PPC-2R level III.5)
 - 5) Halfway House Services (ASAM PPC-2R Level III.1)
 - 6) Residentially Assisted Day Treatment (ASAM PPC-2R Level III.1)
- II. DAS' outpatient treatment service includes six levels of care of varying intensity:
 - 1) Early Intervention (ASAM PPC-2R level 0.5)
 - 2) Outpatient (ASAM PPC-2R level I)
 - 3a) Intensive Outpatient (IOP) (ASAM PPC-2R level II.1)
 - 3b) Methadone Intensive Outpatient (MIOP) (ASAM PPC-2R level II.1)
 - 4) Day Treatment/Partial Hospitalization (ASAM PPC-2R level II.5)
 - 5) Ambulatory Detoxification (ASAM PPC-2R level II.D)
 - 6) Opioid Maintenance Therapy (OMT) (ASAM PPC-2R level I)
- III. Pre-treatment Recovery Support - See under Intervention section
- IV. Post-treatment Recovery Support is the coordination of personal, family, and community resources to achieve the best possible quality of life. It can range from Oxford Houses, which are peer-led group recovery homes, to low level contact such as quarterly telephone conversations to high level contact such as coaching, depending on support needed. Support for involvement of recovering persons in self-help groups such as Alcohol Anonymous and Narcotics Anonymous is also routinely provided as part of recovery planning, beginning in treatment and continuing upon discharge.

Funding Amount and Source: \$42,300,000 (federal and State)

Medication Assisted Treatment Initiative (MATI)

Through funding legislated through the Bloodborne Disease Harm Reduction Act, DAS has developed the Medication Assisted Treatment Initiative (MATI). This initiative includes mobile medication units with corresponding outreach, office based services and case management, as well as supportive housing, sub-acute enhanced medically managed detoxification, vouchers for other treatment services, and an evaluation of the project.

The mobile medication units prioritize the provision of pharmacological treatment to individuals in cities and towns that have no access and/or limited access to methadone and suboxone treatment, and to clients referred through the Sterile Syringe Exchange Programs. According to DAS' NJ-SAMS data, the total number of MATI client admissions for the six pilot sites is 2,824 thru SFY 2010, while the total number of SEP participants admitted to treatment is 1,411. Statewide, 50% of MATI admissions have been SEP participants.

The MATI also includes a pilot housing first program. This supportive housing program provides for a total of 63 housing units, 31 units in Camden and 32 units in Atlantic City. To date, a total of 107 individuals are receiving both services and housing in Camden and Atlantic City.

Two providers were awarded contracts to develop these ten sub-acute enhanced medically managed detoxification beds for priority use of clients involved in the mobile medication units. A total of 182 unduplicated clients have received enhanced sub-acute detoxification services.

Website: <http://www.state.nj.us/humanservices/das/treatment/neti/>

Funding Amount and Source: \$ 11,100,000 (State)

GROUP RECOVERY HOME LOAN FUND

Funding is provided to Oxford Houses to provide administrative and programmatic oversight of the statewide network of peer-led group recovery homes in New Jersey. This funding is provided only for the maintenance of the 72 existing homes in New Jersey.

Oxford Houses are democratically run, self-supported, drug-free living environments for clients needing housing during or post-treatment. No direct treatment or clinical services are provided within these homes, however, all individual members attend 12-Step meetings and may be encouraged to utilize outside professionals whenever such utilization is likely to enhance recovery from alcoholism.

DAS has proposed the inclusion of Oxford Houses in GCADA's revised Resource Guide for Military, Veterans & Families and staff will encourage Oxford Houses to expand housing resources specifically for our underserved veteran population in New Jersey.

Funding Amount and Source: \$158,000 (Federal)

COUNTY COMPREHENSIVE ALCOHOL AND DRUG ABUSE SERVICES

The Alcohol Education, Rehabilitation and Enforcement Fund (AEREF) is a non-lapsing, revolving fund from which the twenty-one counties receive annual allocations to plan and

deliver comprehensive addiction services across the full continuum of care, including prevention, early intervention, treatment and recovery support, based on a county-sponsored, community-based needs assessment and planning process. These dedicated funds are annually disbursed to the counties according to statutory formula found in P.L.1989, Chapter 51, with a twenty-five percent county match requirement. The funds support county-wide needs assessment, planning, coordination and provision of the full range of addiction services for indigent adult and adolescent county residents.

Direct state appropriations supplement dedicated AEREF allocations to the counties for expanded detoxification, case management, rehabilitative treatment, and post-treatment recovery support services.

Funding Amount and Source: \$16,138,000 (State)

CHILD WELFARE/ADOLESCENT TREATMENT

The Child Welfare Reform Plan Initiative provides a coordinated network of specialized substance abuse treatment services in licensed facilities targeted to adolescents with first priority to those under the supervision of the Division of Youth and Family Services (DYFS). Services include long-term residential treatment that provide a structured recovery environment, combined with professional clinical services designed to address addiction and living skill problems for adolescents with substance abuse diagnosis who require longer treatment stays to support and promote recovery. Forty eight (48) beds are available for adolescents to receive these services. Intervention focuses on reintegrating into the greater community with emphasis on education and vocational development.

One hundred seventy six (176) slots are available to adolescents needing variable levels of care in outpatient settings. These services include individual, group and family counseling and include access to support services. Joint case planning and case conferencing between the DYFS case worker and the treatment provider are an essential component to this initiative.

Website: <http://www.state.nj.us/humanservices/das/treatment/adolescent/>

Funding Amount and Source: \$4,238,000 (State)

TREATMENT SERVICES FOR ADOLESCENTS

The Division funds 233 long-term residential treatment beds, nine (9) short-term treatment beds and 18 partial care beds for adolescents in licensed facilities. Of these, 41 beds were reserved for adolescents under the jurisdiction of the Juvenile Justice Commission (JJC). Long-term residential treatment provides a highly structured recovery environment, combined with professional clinical services designed to address addiction and living skill problems for adolescents with substance abuse diagnosis who require longer treatment stays. Short-term residential services provide highly structured environment, combined with a commensurate level of professional services, designed to address specific addiction and living skills problems for youth who are deemed amenable to intervention through short-term treatment. Partial care treatment provides a broad range of clinically intensive treatment services in a structured environment for a minimum of 30 hours per week, during day or evening hours. Treatment includes substance abuse counseling, educational and community support services. Programs have ready access to psychiatric, medical and laboratory services.

Website: <http://www.state.nj.us/humanservices/das/treatment/adolescent/>

Funding Amount and Source: \$7,511,198, (Federal and State)

PREGNANT WOMEN/WOMEN WITH DEPENDENT CHILDREN (PW/WDC) INITIATIVE

This initiative provides a coordinated network of specialized substance abuse treatment services targeted to pregnant women and women with dependent children (PW/WDC). Services include methadone maintenance, residential, halfway house, and outpatient level of care services. Programs are required to provide gender specific services that are family centered and address the full range of women's needs ranging from clinical treatment, clinical support and community support services. Specialized services include primary medical care for women, referrals for prenatal care; primary pediatric care i.e., immunizations for their children; trauma informed and trauma responsive treatment using the "Seeking Safety" program; therapeutic interventions for women to address issues of relationships, sexual and physical abuse and parenting; therapeutic interventions for children in custody of women in treatment which may, among other things, address their developmental needs, their issues of sexual and physical abuse, and neglect; case management, transportation and child care to ensure that women and their children have access to these services. Additional services include aftercare, linkages, assistance with housing, and recovery supports and management.

Website: <http://www.state.nj.us/humanservices/das/treatment/women/>

Funding Amount and Source: \$7,160,000 (Federal)

CHILD WELFARE/WOMEN WITH CHILDREN INITIATIVE

The Child Welfare/Women with Children Initiative provides substance abuse treatment services to women and children under the supervision of DYFS. Services include residential treatment (a minimum of six (6) months to include a woman with an average of two (2) children), halfway house, intensive outpatient and methadone intensive outpatient level of care treatment. First priority is given to referrals made by the Child Protection Substance Abuse Initiative (CPSAI) drug abuse counselor located in the local DYFS offices following the established protocol. Second priority is given to self-referrals ("walk-ins") or referrals made by various sources (Probation, court, other providers, etc.) of women who are under DYFS supervision. Third priority is given to eligible women with dependent children who are in need of treatment and not under DYFS supervision. All priorities include pregnant women. Treatment is family-centered and is both gender and trauma-responsive using the "Seeking Safety" program. Substance abuse treatment and other therapeutic interventions are provided to address issues of domestic violence, sexual and physical abuse, relationships and parenting. These services are enhanced with case management, childcare, transportation, linkages, referrals to services in the community as well as recovery supports and management. DYFS keeps all cases that are participating in this initiative open for the duration of treatment, with the ultimate goal of family reunification.

Website: <http://www.state.nj.us/humanservices/das/treatment/women/>

Funding Amount and Source: \$7,880,000 (State)

CHILD WELFARE/FATHERS WITH CHILDREN INITIATIVE

The Child Welfare Fathers with Children Initiative provides substance abuse treatment services to fathers with children under the supervision of DYFS. Four licensed substance abuse treatment providers in Camden, Essex and Ocean counties provide intensive outpatient level

of care treatment and methadone intensive outpatient treatment to fathers with dependent children. Referrals are made by the CPSAI drug counselor located in the DYFS local offices following established protocol. Services are reflective of the specialized needs of fathers and their dependent children. Services include substance abuse treatment that are family centered and other therapeutic interventions i.e., individual, family and group counseling, flexible evening and weekend treatment services to accommodate work schedules, parenting classes, Strengthening Families Program, vocational and education services, therapeutic interventions for children in custody of fathers that can address developmental needs, sexual and physical abuse and neglect. These services are enhanced with case management, transportation, linkages, referral to services in the community as well as recovery supports and management. DYFS keeps all cases open for the duration of treatment with the ultimate goal of family reunification.

Website: <http://www.state.nj.us/humanservices/das/treatment/women/>

Funding Amount and Source: \$1,000,000 (State)

PREVENTION AND TREATMENT SERVICES FOR DEAF, HARD OF HEARING AND DISABLED INDIVIDUALS

This funding provided for prevention, education, treatment, intervention, communication accessibility, and advocacy services for the population of individuals who are Deaf, hard of hearing, and/or disabled.

Service Information: Communication accessibility was coordinated to provide sign language interpreters or Computer Assisted Real-Time Translation (CART) for individuals who were identified as Deaf or hard of hearing seeking substance abuse treatment at any level of care. Funding was provided for assessment, case management, mobile counseling, outpatient treatment, housing placement and outreach via culturally Deaf staff for this population of individuals who were in need of substance abuse treatment. Funding was also provided for case management and outpatient substance abuse treatment services, focusing on recovery for individuals who may have physical, cognitive or developmental disabilities, including but not limited to traumatic brain injury, fetal alcohol syndrome, epilepsy, and other physical, cognitive or developmental disabilities. Other funding offered prevention and education regarding substance abuse risk factors, early intervention, advocacy and referral resources for disability service providers, substance abuse treatment agencies, disability service consumers, and substance abuse treatment clients.

Website: <http://www.state.nj.us/humanservices/das/treatment/disabilities/>

Funding Amount and Source: \$555,000 (Federal and State)

SOUTH JERSEY INITIATIVE (SJI)

This initiative targets adolescents (ages 13-18) and young adults (ages 18-24) from eight (8) counties (Ocean, Atlantic, Burlington, Camden, Gloucester, Cape May, Salem and Cumberland). It provides a continuum of care that includes methadone maintenance, detoxification, residential, halfway house, and outpatient treatment services.

Service Information: During SFY 2010, 1,382 individuals (ages 13-24) were serviced by the initiative. Sixty-nine percent (69%) of the funds were used for residential services for adolescents and young adults, thirty-one percent (31%) was used for outpatient services.

Website: <http://www.state.nj.us/humanservices/das/treatment/sjia/>

Funding Amount and Source: \$3,600,000 (State)

CO-OCCURRING SERVICES

The Detoxification Initiative is a contract wherein DAS and DMHS provide funding to four (4) licensed residential subacute detoxification facilities located throughout the state. These funds provide 14 bed slots for persons with co-occurring disorders referred through designated DMHS screening centers.

Website: <http://www.state.nj.us/humanservices/das/treatment/coamhd/>

Funding Amount and Source: \$530,502 from DAS, \$530,502 from DMHS (State)

CO-OCCURRING SERVICES NETWORK

Co-occurring services were provided by the Co-Occurring Services Network (COSN). In SFY 2010, the COSN was comprised of 53 DAS-licensed treatment providers that met eligibility criteria for the network. These agencies provided treatment, on a fee-for service basis, to clients with co-occurring disorders.

Website: <http://www.state.nj.us/humanservices/das/treatment/coamhd/>

Funding Amount and Source: \$ 1,300,000 (State)

HIV/AIDS SERVICES

The Division funds for Early Intervention Services (EIS) and HIV Specialist positions at seventeen (17) substance abuse treatment providers statewide. Services were available in areas of the state that had the highest rate of HIV infection, as well as the greatest need for these services.

Service Information: In SFY 2010, HIV/AIDS services were available at seventeen (17) substance abuse treatment agencies throughout the State providing outpatient treatment, which included on-site intensive medical care, counseling, case management, referral, and drug treatment services. Services for HIV disease at these sites included pre- and post-test counseling, as well as the availability of HIV testing for all clients. Additional funding, via an MOA with Robert Wood Johnson Medical School, provided for the directorship and technical support necessary for approximately twenty (20) DAS-licensed agencies to operate a clinical laboratory to implement on-site rapid HIV testing. Other set-aside funding was allocated to the Public Health and Environmental Laboratories (PHEL) to ensure that continued HIV testing and other laboratory support services were provided to the participating HIV EIS clinics.

Website: <http://www.state.nj.us/humanservices/das/treatment/hiv/>

Funding Amount and Source: \$ 2,347,000 (Federal)

DRIVING UNDER THE INFLUENCE (DUI) INITIATIVE

New Jersey has set aside \$7.5 million to support the treatment of financially indigent residents of New Jersey who have been convicted of Driving under the Influence (DUI). These treatment funds, which cover the full range of the continuum of care throughout the state, became available in November 2005. Financially indigent drunk drivers can receive the appropriate level and duration of treatment warranted, thus reducing the incidence of

recidivism and ultimately creating safer highways. There are over 150 DAS licensed sites in the DULL network providing all levels of treatment services. From November 2005 through July, 2010 there were approximately 16,000 intoxicated drivers served under this initiative.

Website: <http://www.state.nj.us/humanservices/das/treatment/dui/>

Funding Amount and Source: \$7,500,000 (State)

Division of Medical Assistance and Health Services

Medicaid reimburses for drug and alcohol treatment for both inpatient and outpatient hospital services and services provided at independent clinics, as well as other non-clinical, non-hospital services.

Within this report we expanded drug and alcoholism abuse diagnosis coverage to include secondary, as well as primary diagnoses. For this reason, the numbers of recipients and payments for their services have increased over the previous fiscal years' figures.

INDEPENDENT CLINIC SUBSTANCE ABUSE SERVICES

Service Information: The population served was 16,949. It included three (3) groups: 1) children 21 and under (2,019); 2) adults 22-64 (14,787); and 3) adults 65 and over (143). 1,222 of these children were female; 797 were males. 8,220 of the adults in the 22-64 age grouping were females; 6,567 were males. In the 65 and over age group, 50 were females; 93 were males. The largest racial group in each of the three (3) population groups is Caucasian.

Funding Amount and Source: \$31,082,844.97 (Federal and State)

INPATIENT HOSPITAL ALCOHOL AND DRUG DEPENDENCE TREATMENT SERVICES

Inpatient substance abuse services are combined both for alcohol and drug dependence.

Service Information: A total of 16,249 people were served. Of these, 5,411 were children 21 and under; 10,751 were adults 22-64; and 87 were adults 65 and over. The number of female children, 21 and under, who received services was 3,469 and the number of male children serviced was 1,942. Within the 22-64 age grouping, 7,133 females and 3,618 males received services. 46 females and 41 males received services in the 65 and over age group. The largest racial group in each of the three (3) population groups was Caucasian.

Funding Amount and Source: \$9,659,942.10 (Federal and State)

OUTPATIENT HOSPITAL ALCOHOL TREATMENT AND OUTPATIENT HOSPITAL DRUG TREATMENT

This program offers outpatient hospital treatment services for alcohol and drug abuse. Data for these services are combined.

Service Information: A total population of 4,591 received services. Children, 21 and under, serviced, totaled 752. Within the adult age groups, 3,798 adults 22-64 and 41 adults 65 and over received services. 372 of the children serviced were female and 380 were male. 1,964 adult females and 1,834 adult males received the services within the 22-64 age grouping.

Within the adult age group 65 and over, 15 females and 26 males received services. The largest racial group in each of the three (3) population groups was Caucasian.

Funding Amount and Source: \$34,305,374.98 (Federal and State)

NON-CLINICAL AND NON-HOSPITAL SERVICES

This program includes but is not limited to: ambulance transportation, physician visits, and psychotherapy services.

Service Information: The number of people served was 32,678. Services were provided to 3,818 children ages 21 and under; 27,157 adults ages 22-64; and 1,703 adults ages 65 and over. 2,427 of the children who received services were female; 1,391 were male. Within the adult 22-64 age group, 14,046 recipients were female; 13,111 were male. 750 of the adults in the 65 and over group were female; 953 were male. The largest racial group in each of the three (3) populations serviced was 1) African-American; 2) African-American; and 3) Caucasian, respectively.

Funding Amount and Source: \$18,906,581.86 (Federal and State)

Division of Mental Health Services

RESIDENTIAL ALCOHOL AND DRUG REHABILITATION

The Division of Mental Health Services (DMHS) contracts with Maryville in Williamstown, a residential rehabilitation center, which provides beds for use by Ancora Psychiatric Hospital and Trenton Psychiatric Hospital to serve as a step down service for individuals in need of residential rehabilitation for alcohol and drugs.

Service Information: This is a 28-day alcohol and drug rehabilitation center.

Funding Amount and Source: Maryville: \$190,125 (State)

PARTIAL CARE

Partial care provides a highly structured program with an emphasis on life skills for individuals in the community with severe and persistent mental illness who need services at a level higher than outpatient treatment. Within all partial care programs are individuals who have co-occurring substance use disorders, but programs within this level of care differ in their dual disorders approach. Some partial care programs provide specialized tracks, some provide specialized groups and others are designed to specifically meet the needs of individuals with these co-occurring disorders. Partial care programs typically provide medication monitoring and education as part of their service.

Website: <http://www.state.nj.us/humanservices/dmhs/services/community/>

Funding Amount: Included within \$18,395,325 state appropriation for partial care services and within the Medicaid fee-for-service reimbursements.

NEW VIEWS TREATMENT PROGRAM

New Views is a private non-profit agency, providing services to individuals under commitment to Greystone Park Psychiatric Hospital (GPPH). The agency provides specific co-occurring disorders interventions. Services are provided both on wards, and at a central location. Length of stay in the program depends on clinical need. This contract was terminated as of July 1, 2010. GPPH staff provides assessment and treatment to individuals with a co-occurring disorder.

Funding Amount and Source: \$627,095 (State)

SCREENING

Screening is the point at which emergent care is provided in the mental health system. There is at least one (1) screening center in each county. Screening centers provide emergency assessment, crisis stabilization, referral and in some cases mobile outreach to individuals with severe and persistent mental illness. An average screening episode is approximately eight (8) hours in duration. Not all screening centers have the capacity to hold individuals overnight for stabilization. The DMHS funds five co-occurring specialists who work in screening centers throughout the state who provide assessment and referral to consumers who may need addictions treatment. DMHS also funds two Early Intervention Support Services (EISS) pilots in Atlantic and Morris counties who have co-occurring specialty staff who are equipped to assess and treat consumers who have co-occurring issues.

Website: <http://www.state.nj.us/humanservices/dmhs/services/centers/>

Funding Amount: Included within the \$46.9 million state appropriation for screening/emergency services.

TRAINING

DMHS provides statewide training on co-occurring mental illness and substance use disorders directly from Central Office and through contracted agencies. Training is provided to agency staff and directly to consumers. All Central Office training sessions are approved by the Addiction Professionals Certification Board of New Jersey. Topics presented range from beginning clinical technique, topics for wellness, recovery and life management, advanced best practice models.

Funding Amount: \$220,000 (State)

DETOX PROJECT

DMHS and DAS jointly fund 14 beds statewide to serve as a diversion to state hospital admission for individuals who present in screening centers with co-occurring mental illness and substance use disorders. This Project was terminated for FY 2011 effective July 1, 2010.

Service Information: Service utilization database maintained and updated by DAS

Funding Amount: \$530,502 from DAS, \$530,502 from DMHS (State)

INPATIENT PSYCHIATRIC HOSPITALIZATION

The mental health system has many resources throughout the state for inpatient treatment for individuals who have severe and persistent mental illness and are in need of a high level of service, highly structured programming and 24 hour supervision for stabilization. Within the system, inpatient treatment is provided in State and County Hospitals, Community Mental Health Centers and "free standing" hospitals. Within all of the hospitals, there are individuals in treatment who also have co-occurring substance use disorders.

Funding Amount: Included within the state and/or county appropriations and insurance fee payments for inpatient care.

OUTPATIENT

DMHS has a large network of agencies statewide that provides outpatient treatment to individuals with severe and persistent mental illness. Agencies that provide this level of care include Community Mental Health Centers, free-standing outpatient agencies, and satellite programs. In FY 2009, DMHS budgeted \$2.96 million for the implementation of IOP programs.

Website: <http://www.state.nj.us/humanservices/dmhs/services/community/>

Funding Amount: Included within the \$51.3 million state appropriation and insurance fee reimbursements for outpatient services.

CASE MANAGEMENT

DMHS provides case management both through specific agency contract and as one element of services that are offered in agency based treatment. Clinical case management consists of advocacy, referral, follow-up, and intervention both within the mental health system and across several different systems of care to meet identified needs. As with all DMHS services, this element of care has a primary target population of individuals with severe and persistent mental illness.

Funding Amount: Included within the \$23.0 million state appropriation and the Medicaid fee reimbursements for case management services.

Division of Family Development

WORK FIRST NEW JERSEY SUBSTANCE ABUSE INITIATIVE (WFNJ/SAI)

The Work First New Jersey Substance Abuse Initiative (WFNJ/SAI) was implemented in 1998 through collaboration among the Division of Family Development (DFD), Division of Addiction Services (DAS) and Division of Medical Assistance and Health Services (DMAHS). The SAI combines public health and managed care principles to provide substance abuse services for eligible Temporary Assistance to Needy Families (TANF) and General Assistance (GA) clients. Consistent with the goals of WFNJ, the SAI uses an employment directed approach to address substance abuse as a barrier to work activities.

The SAI is operational statewide. It has two key components: (1) a managed care model of Assessment and Case Management services, and (2) prior authorization fee-for-service treatment offered by providers in the SAI Provider Network.

As part of an ongoing collaboration with the Department of Children and Families Division of Youth and Family Services, DFD has partially funded an expansion of the Child Protective Substance Abuse Initiative (CPSAI). Additionally, SAI implemented cross-systems Intensive Case Management for TANF and GA parents with active child welfare cases.

The statewide client flow totals for TANF and GA clients in FY 2009: (1) unduplicated (initial) referrals, completed assessments and treatment entries were 5,637, 4,857 and 4,057 respectively; and (2) duplicated numbers (e.g., volume of clients) for the same categories were 11,412, 8,128 and 7,085. The average episodes of care per client is three (3) to four (4), but the range is between one (1) and twelve (12) episodes.

The Division of Family Development has partnered with researchers from The National Center of Addiction and Substance Abuse at Columbia University (CASA) to independently evaluate the SAI Intensive Case Manage (ICM) model for TANF clients. The research evaluation will assess clients' employment and recovery outcomes along with the economic and health costs to state. It is anticipated that the findings will guide DHS and national policy on implementing cost-effective best practices which ensure fiscal and clinical integrity and help families/clients transition toward greater independence and self-sufficiency.

Website: <http://www.state.nj.us/humanservices/dfd/programs/workfirstnj/sai/>

The SFY 2010 total DFD funding (combined State and Federal funds) for substance abuse was \$33,132,000; \$6.3 million for the expanded CPSAI; \$8.1 million for SAI Care Coordination and Intensive Case Management services; \$18,732,000 million for SAI treatment services.

Planning/Coordination/Collaboration

Division of Addiction Services

Co-Occurring Task Force

The Co-Occurring Task Force (COTF) was jointly facilitated by DAS and the Division of Mental Health Services. The COTF consisted of 32 members chosen through a public application process. COTF members included representatives of state agencies, non-profit mental health provider organizations, non-profit substance use disorder provider organizations, consumers, and professional trade associations. The COTF and its subcommittees met from February, 2009 through April 2010. The final report was made public September 2010 and represents the compilation of the work of the three subcommittees and was reviewed and updated after the 2011 State Budget merged the DMHS and DAS.

Work is already underway to implement some of these recommendations, including the establishment of a stakeholder merger advisory committee for the new Division of Mental Health and Addiction Services (DMHAS), a review of client information systems and opportunities for collaboration, the initiation of efforts to coordinate consumer advocacy activities and a Co-Occurring Learning Collaborative that will bring Mental Health and Substance Abuse treatment providers together to improve agency specific services for individuals with co-occurring disorders.

County Substance Abuse Directors

DAS has been working closely with the County Substance Abuse Directors in reviewing their plan updates which incorporate strategies for prevention, early intervention, treatment and

recovery support. Technical assistance is being provided on an ongoing basis using webinars and a regional forum structure.

Collaboration with DHSS

DAS presented a workshop on alcohol/substance abuse at the "Working Together on Public Health Priorities: DHSS, DHS & Local Public Health" forum held in May 2010 which was hosted by the Department of Health and Senior Services (DHSS). It was intended to strengthen the connection between state and local public health initiatives.

DAS staff and DHSS' Division of HIV/AIDS Services continue to coordinate data and ensure seamless referral processes from the SEPs to the MATI sites around the State. DAS and DHSS have also collaborated to convene their contracted evaluation teams to discuss evaluation protocols and the possibility of sharing data to track clients participating in both the SEP and substance abuse treatment.

State Chronic Disease/Health Promotion Steering Committee

DAS has been participating in the State Chronic Disease/Health Promotion Steering Committee since July 2010 and will be presenting at the 2010 Chronic Disease Summit "Vital Links: Creating NJ Partnerships for Health Promotion & Chronic Disease Prevention" in November 2010 which is co-sponsored by DHSS and other partners. Purposes include enhancing disease prevention programs, maximizing health care resources through partnerships and to generate a statewide chronic disease plan.

The New Jersey Student Health (High School) Survey

DAS and the Department of Education agreed in SFY 2010, via MOA, to implement a Student Health Survey on health behaviors in New Jersey high school students. Included in the survey items will be substance use questions and questions regarding factors protecting and posing risk to adolescent substance use. This will assist in prevention and treatment planning, community organization and coalition building and school planning.

In Depth Technical Assistance

In 2009 the State of New Jersey was awarded a two year In-Depth Technical Assistance (IDTA) grant through the National Center of Substance Abuse and Child Welfare (NCSACW), a program of the Substance Abuse and Mental Health Services Administration (SAMHSA) Center for Substance Abuse Treatment (CSAT), and the Administration for Children and Families (ACF) Children's Bureau, Office on Child Abuse and Neglect (OCAN). New Jersey's selection as an IDTA site was based on the State's demonstrated commitment to collaborative systems change, and on the NCSACW's intent to focus on sites at various levels of development in terms of cross-system collaboration. The IDTA program is structured to provide intensive technical assistance over a continuous period of at least eighteen months. This initiative is led by New Jersey's Department of Human Services (DHS) Division of Addiction Services (DAS); Department of Children and Families (DCF) Division of Youth and Family Services (DYFS), and the Administrative Office of the Courts (AOC). The three systems are committed to developing and implementing a state-wide, coordinated plan to work with families who are involved with the child welfare system and affected by substance abuse disorders.

New Jersey has identified three priority areas for technical assistance: joint outcomes and data sharing across Departments and the Divisions; a pilot project for the integration of the DYFS Substance Abuse Child Welfare Consortia and Family Dependent Drug Court in Essex County, including collection of data on the activities of the court and outcomes, and the

possible introduction of recovery mentors; and on going training and staff development across the three systems on the coinciding issues of substance abuse and child maltreatment.

2010 Returning Service Members, Veterans, and Their Family Members Policy Academy

NJ was part of a 2010 Returning Service Members, Veterans, and Their Family Members Policy Academy conducted by SAMHSA. A team was selected and sent to Maryland to participate and develop a strategic plan to serve this target population. The New Jersey Veteran Enhancement Team Coalition (VETC) was comprised of DHS representatives from DAS, DMHS, and Medicaid, as well as DMAVA, Veterans Service Organizations, The Department of Law and Public Safety, the Department of Labor, Office of the Attorney General, the Governor's Council on Alcoholism, The NJ and PA Veterans Administration, The NJ Army National Guard, and other stakeholders. The VETC was charged to develop a strategic plan including five priority areas that was submitted to SAMHSA and to the Governor's Office. Staff from DHS are assigned to co-chair the workgroup focusing on the priorities to identify existing exemplary service in New Jersey; integrate, expand, enhance the service delivery system; and coordinate/expand outreach and engagement strategies that work to assist veterans and their families regarding mental health and substance use disorders. The VETC was invited to participate in Tennessee's Operation Immersion at the National Guard Regional Training Facility in Smyrna, TN. A representative participated in this training which provides a taste of military culture by placing the participant in various situations such as sleeping in barracks, eating at the mess hall, having MRE's for dinner, going through grueling physical training, tour of military hardware and classroom information.

Division of Developmental Disabilities- Office for Prevention of Developmental Disabilities

FETAL ALCOHOL SPECTRUM DISORDERS and OTHER PERINATAL ADDICTIONS TASK FORCE

The Fetal Alcohol Spectrum Disorders (FASD) and other Perinatal Addictions Task Force, a committee of the Governor's Council on the Prevention of Developmental Disabilities, is an interagency body composed of representatives of three state agencies that include the Department of Human Services (DDD – OPDD, DMAHS and DAS), the Department of Health and Senior Services, and the Department of Children and Families. Other agencies represented on the Task Force include: the University of Medicine and Dentistry of New Jersey, the NJ FASD Training Center, the six Maternal and Child Health Consortia - Perinatal Addictions Program Coordinators, the six FASD Diagnostic Centers, The Arc of New Jersey, The Arc of Atlantic County, the Weisman Center and other community agencies. The mission of the Task Force is to enhance coordination among agencies and to encourage collaboration. The Task Force meets on a quarterly basis and is responsible for producing and disseminating a five year plan to educate and prevent perinatal addictions. The Task Force has implemented a media campaign, Be in the **kNOw**, to educate New Jersey citizens about not drinking, smoking or taking drugs during pregnancy. The Task Force has implemented an interactive website, www.beintheknownj.org, which provides information about perinatal addictions and direct links to treatment services and the FASD Diagnostic Centers.

Funding Amount and Source: \$80,000 of State funds are used to support the FASD Task Force activities

DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT

Department/Agency Mission Statement: With a commitment to the highest standard of customer service, we will ensure the opportunity for employment at fair wages in a safe environment; enhance the quality of the State's labor force and labor market activities; stimulate economic growth; promote labor management harmony; and administer income support services to unemployed or disabled workers.

Intervention & Referral Information

Workforce Development

WORKFORCE DEVELOPMENT

There is a partnership between Department of Labor and Workforce Development (LWD), Division of One-Stop Programs and Services and the Department of Human Services, Division of Family Services (DFD) (DHS) whereby recipients of WorkFirst New Jersey (WFNJ) cash assistance can be referred to the DHS Substance Abuse Initiative (SAI) by LWD counselors and interviewers. During outpatient substance abuse treatment or upon completion of inpatient treatment, the WorkFirst NJ registrant can be referred to LWD for job placement and other employability development services such as job search skills training, work experience, etc.

Service Information: The target population for this ongoing initiative is Work First NJ recipients.

Funding Amount: Funding for this program is part of the Division's operations.

Division of Vocational Rehabilitation Services

VOCATIONAL REHABILITATION SERVICES

Vocational Rehabilitation Services is a statewide program that provides counseling, case management and individualized vocational rehabilitative services to individuals with disabilities, some of whom are substance abusers, to enable them to obtain and maintain employment. Services provided also include appropriate referrals to other agencies.

Service Information: In Fiscal Year 2010, 3,448 participants in this program were identified as having a primary or secondary substance abuse related disabilities.

Funding Amount: Funding for this program is part of the Division's operations.

Work/Life and Employee Assistance Programs

WORK/LIFE AND EMPLOYEE ASSISTANCE PROGRAMS

The Department's Employee Assistance Program (EAP) provides confidential employee assistance services to LWD employees with a variety of personal issues and concerns including drug and/or alcohol abuse, compulsive gambling and/or a family member's substance abuse. Services provided by the EAP include problem identification and assessment, referral and follow-up services. The program also provides supervisory training and consults with management on ATOD-related situations. EAP services have been shown to decrease absenteeism, workers' compensation claims, grievances and workplace injuries and increase productivity.

Service Information: This program serves employees and management of the Department of Labor and Workforce Development.

Funding Amount: Funding for this program is part of the Department's administrative operations.

DEPARTMENT OF LAW AND PUBLIC SAFETY

PREVENTION INFORMATION

DIVISION OF ALCOHOLIC BEVERAGE CONTROL

"DANGERS OF UNDERAGE DRINKING" BILLBOARD/CALENDAR INITIATIVE

This Statewide initiative is designed to encourage middle school students and their parents to work together to create images and messages depicting the dangers of underage drinking, to be used on calendars and billboards Statewide.

Funding Amount: \$25,000

Funding Source: Federal

"DANGERS OF UNDERAGE DRINKING" RADIO PUBLIC SERVICE ANNOUNCEMENT

In response to increasing concerns about alcohol use among middle school students and the critical role parents play in helping to combat underage drinking at this age, this initiative educates both students and parents about the dangers of underage drinking. Specifically, middle school students throughout the State will be asked to create written 30 second radio public service announcements that "talk" directly to parents about the role they play in preventing underage alcohol use.

Funding Amount: \$17,000

Funding Source: Federal

COPS IN SHOPS/UNDERCOVER OPERATIONS

Cops in Shops is a Statewide initiative designed to combat underage drinking by bringing local undercover police officers and retail liquor establishments together to both prevent the illegal purchase of alcohol by underage individuals and to stop adults from purchasing alcohol for people under the legal age. With Undercover Operations, police officers working undercover as patrons in retail consumption establishments, conduct operations identifying underage purchasers as well as those who serve them.

Funding Amount: \$181,000

Funding Source: Federal

LOLLANOBOOZA

Lollanobooza provides college students with a chance to engage in alcohol-free activities and programs. This event provides a social outlet that does not support the consumption of alcohol, while reinforcing the positive messages given to students during their orientation week and throughout their college years, regarding underage drinking.

Funding Amount: \$10,000

Funding Source: Federal

FATAL VISION GOGGLES

The Fatal Vision Goggles program is designed to inform young people about the dangers of alcohol and the effects on perception and body control. Specifically, Fatal Vision goggles give young people the opportunity to experience firsthand the potentially fatal consequences of alcohol impairment. These goggles serve as a critical tool for schools and substance abuse organizations to use when addressing the issues of underage drinking and driving.

Funding Amount: \$26,000

Funding Source: Federal

TELEVISION PUBLIC SERVICE ANNOUNCEMENTS

The Division will run its, "Down the Shore" PSA during the 2011 summer months. The PSA was designed to inform young people of both the consequences and dangers of underage drinking and that underage drinking will not be tolerated in New Jersey. The 30-second TV announcement will run during shows that typically attract a younger viewing audience.

Funding Amount: \$15,000

Funding Source: Federal

DIVISION OF STATE POLICE

TEEN DRIVER EDUCATION PROGRAM – NJ DRIVE

Despite all current advertising and educational efforts, teen drivers continue to suffer a disproportional amount of injuries and deaths across the country while driving under the influence of drugs and/or alcohol. The NJ Drive Program allows the teenage driver to experience the affects of alcohol and reaction time on a controlled course while operating a golf cart while their vision is distorted with the use of fatal vision goggles. This practical exercise combined with the classroom presentation explains all consequences relating to drinking and driving. The innovative program has a dramatic and long lasting effect on students.

Funding Amount: \$31,762

Funding Source: Federal (NJ Division of Highway Traffic Safety)

YOUTH LEADERSHIP SAFETY PROGRAM

The Youth Leadership Safety Program instruction consist of fourteen lessons on social skills, drug and violence avoidance and prevention, and the development of decision making skills and strategies. The program is a comprehensive safety curriculum that encourages elementary and middle school students to take responsibility for their own safety by providing them with an

awareness of illegal drug use and drug dependence as well as providing them with a sense of purpose and selective positive alternatives.

The New Jersey Department of Education conducted an objective review of the Youth Leadership Safety Program in 2009. The program's objectives and associated activities/resources were determined to be aligned with the NJ Core Curriculum Content Standards. The program was found to focus on integrated skills of decision making, goal setting and effective communication in situations that may have an impact on the child's health and safety.

Funding Amount: Undetermined

Funding Source: State

NEW JERSEY RACING COMMISSION

PREVENTION, EDUCATION & TREATMENT PROGRAMS FOR THE BENEFIT OF COMPULSIVE GAMBLING

Beginning in FY 2004, the New Jersey Racing Commission began assessing the racing industry on an annual basis and forwarding funds to the Department of Health and Senior Services. These funds are used by that Department for prevention, education and treatment programs for compulsive gambling.

Service Information: Outcome measures include behavioral intentions, attitudes and knowledge.

Funding Amount: \$200,000

Funding Source: Dedicated (Assessed to Racing Industry)

RANDOM URINE TESTING

The New Jersey Racing Commission administers a random urine test program for jockeys, grooms, drivers and racing officials. Samples are tested by laboratories staffed by State Police personnel for the presence of controlled dangerous substances. New Jersey racetrack and horse owners fund this program. This mandated program pays for the lab fees related to the services provided by the State Police on site. A specific evaluation and treatment program is required.

Service Information: Outcome measures include attitudes, reduced risk factors and increased protective factors.

Funding Amount: \$300,000

Funding Source: Dedicated (Assessed to Racing Industry)

RANDOM BREATHALYZER TESTING

The New Jersey Racing Commission staff administers a random Breathalyzer test to race participant's jockeys, grooms, drivers and racing officials. In FY 2011, the Racing Commission will extend its random breathalyzer testing to include thoroughbred exercise riders. New Jersey racetrack owners fund this program. Participants in violation would be fined or have their Racing Commission license suspended.

Service Information: Outcome measures include attitudes, reduced risk factors and increased protective factors.

Funding Amount: \$25,000

Funding Source: Dedicated (Assessed to Racing Industry)

DIVISION OF HIGHWAY AND TRAFFIC SAFETY

DWI ENFORCEMENT PROGRAMS

The "Over the Limit, Under Arrest" crackdown was conducted on December 7, 2009 – January 3, 2010 and again from August 20 – September 6, 2010 to raise public awareness about the danger of impaired driving through increased enforcement and media activities. While the Division invited all 490 police agencies to participate in the initial campaign, 110 departments were awarded overtime grants. The remaining agencies were asked to support the crackdown with their own resources. In addition to the enforcement effort, the Division used earned media to deliver the message. A Statewide press release was issued to print and broadcast media and police department grantees were also asked to engage their local media in reporting the initiative. Both activities generated strong newspaper and radio coverage around the State. The crackdown resulted in 1,959 DWI arrests. Police agency participation was also strong with 370 taking part in the campaign. In addition, the participating police departments issued 8,015 and 4,338 speeding and seat belt summonses respectively. While the crackdown's focus was on impaired driving, motorists were also reminded of the State's commitment to proper restraint and observing posted speed limits.

The "Over the Limit, Under Arrest" driving campaign was conducted from August 20 to September 6, 2010. The law enforcement community conducted high-visibility checkpoints and roving patrols during the campaign. Media events were conducted to raise awareness of the campaign. Highlights of the two-week campaign included participation by over 400 police agencies and over 1,700 DWI arrests were made.

Funding Amount: \$1,964,000

Funding Source: Federal

NORTHERN BURLINGTON COUNTY EFFORT

A cooperative law enforcement effort was implemented in five towns in Northern Burlington County to combat drunk driving. The first of its kind effort allowed five towns (Bordentown Township and City, Mansfield Township, Chesterfield Township and North Hanover Township) to share law enforcement resources for drunk driving saturation patrols. Under this initiative, officers from all five jurisdictions patrolled across municipal lines to stop and arrest drunk drivers.

The cooperative program enhances the efforts of smaller towns to apprehend drunk drivers by increasing law enforcement visibility. Forty-three drunk driving arrests were made in the five participating towns.

Funding Amount: \$44,250

Funding Source: Federal

TRAINING

The Alcohol/Drug Test Unit (ADTU) coordinators continued to train new breathalyzer operators at five-day Breathalyzer Operator Courses in 2010. There are currently over 10,000 certified breathalyzer operators in the State. The ADTU coordinators re-certified breathalyzer operators, conducting one-day re-certification classes. ADTU coordinators also trained police officers in DWI identification, apprehension, processing and prosecution at the Standardized Field Sobriety classes. Additionally, the ADTU re-certified officers at one-day Standardized Field Sobriety Test refresher courses.

The ADTU coordinated the Drug Evaluation Classification/Drug Recognition Expert training program. This training enabled police officers to classify operators of motor vehicles as being under the influence of one or more of seven categories of drugs other than alcohol.

Funding Amount: \$490,300

Funding Source: Federal

COLLEGE/HIGH SCHOOL PROGRAMS

The College of New Jersey hosted its 9th Statewide Peer Institute in 2010. The event serves to train peer educators and leaders from New Jersey colleges and the tri-state area to become peer educators on their respective campuses. Programs were also developed with the campus police force and Ewing Township Police Department to address alcohol and other drug related issues. Police from both agencies worked collaboratively to patrol off-campus housing areas and popular student gathering spots.

Stockton College sponsored alcohol/drug education workshops on campus emphasizing risks associated with alcohol/drug abuse and driving. In addition, personnel from local taverns and restaurants were trained on how to prevent drunk driving by student customers. The prevention program included an intensive three-hour training session leading to certification from Stockton College and regular communication with local restaurants and taverns to offer confidential counseling programs to students that are experiencing problems with drinking and driving.

Funds were provided to New Jersey City University to address the link between substance abuse, irresponsible behavior and highway safety among university and high school students in the Jersey City area. The program focused on strengthening the relationship between university and inner city high school students through interactive role modeling exercises and a peer education training program. A highway safety outreach program on the New Jersey City University campus, consisting of presentations, information tables with resources on substance abuse and highway safety and a peer mentoring high school program was

developed. Peer educators were used to reach student groups in elementary, middle and senior high schools as well as to conduct community outreach with local social service agencies.

The Rutgers Comprehensive Alcohol and Traffic Education and Enforcement Program focused on helping to reduce the number of people killed or seriously injured in crashes caused by impaired drivers. The program combined community prevention efforts in law enforcement with innovative educational and community outreach activities on campus. A series of supplemental enforcement programs were scheduled, which included DWI stops and the comprehensive Check for 21 Program. The education component provided training resources for police officers to disseminate materials throughout the Rutgers community. Rutgers police officers also received training on alcohol and drug abuse prevention training techniques. Police officers served as mentors and conducted drug and alcohol abuse education programs for the campus population.

Funding Amount: \$205,530

Funding Source: Federal

COMMUNITY OUTREACH PROGRAM

Funds were provided to develop and deliver a teen driving community outreach program for Hispanic youth, 17-20 years of age. Two agencies, FOCUS Hispanic Community Center in Newark and the Puerto Rican Action Committee of Southern NJ located in Penns Grove, received awards that were used to develop, script, produce, and distribute public service announcements aimed at Hispanic young drivers. Spanish language billboards were placed in Newark promoting the dangers of drinking and driving. Simulation goggles which demonstrate to teens the impact alcohol has on driving were used to initiate outreach efforts throughout Salem and Cumberland Counties.

Funding Amount: \$155,000

Funding Source: Federal

DRUNK DRIVING ENFORCEMENT FUND

The Drunk Driving Enforcement Fund establishes a \$100.00 surcharge on each conviction for drunk driving. Monies in this fund are distributed to municipalities and to State, county and interstate law enforcement agencies. The purpose is to increase enforcement of the laws pertaining to drinking and driving. Each law enforcement agency whose officers make arrests leading to DWI convictions and imposition of the surcharge is entitled to grants representing its proportionate contribution to the fund.

Municipalities, the Division of State Police, interstate law enforcement agencies and county law enforcement agencies apply to the Division to use Drunk Driving Enforcement Fund monies for additional DWI enforcement patrols and any appropriate measures pertaining to other DWI activities as approved by the Director of the Division of Highway Traffic Safety.

A total of \$3.6 million was made available to law enforcement agencies during State Fiscal Year 2010 (July 1, 2009 to June 30, 2010) in an effort to reduce alcohol-related fatalities and crashes.

Funding Amount: \$3.6 million

Funding Source: Dedicated

JUVENILE JUSTICE COMMISSION

FATAL VISION GOGGLES

The Juvenile Justice Commission participates in the "Enforcing the Underage Drinking Laws Grant Program" through the use of Fatal Vision Goggles. This program increases the knowledge and understanding of youth both in correctional and non-correctional settings, about the laws, consequences and experience of being under the influence of alcohol using simulator goggles and supportive classroom materials.

Funding Amount: \$13,000 FY 2010/2011 (Overlapping Fiscal Years)

Funding Source: The Division of Alcoholic Beverage and Control subgrants the Federal monies to Juvenile Justice Commission.

INTERVENTION & REFERRAL INFORMATION

DIVISION OF STATE POLICE

EMPLOYEE ASSISTANCE PROGRAM (EAP)

The general purpose of the New Jersey State Police Employee Assistance Program is to help those individuals with persistent behavioral or personal problems that affect work performance. The program provides training, prevention information, confidential professional assistance and subsequent referral services.

Funding Amount: Undetermined

Funding Source: State

TREATMENT INFORMATION

NEW JERSEY RACING COMMISSION

ON-SITE ALCOHOL AND OTHER DRUG COUNSELING

The Backstretch Benevolent Fund provides funding, on occasion, to support salaries of an on-site (racetrack) alcohol and other drug counselors for an expanded group of backstretch personnel. The funding amount varies.

Funding Amount: Variable

Funding Source: Dedicated (Assessed to Racing Industry)

DIVISION OF CRIMINAL JUSTICE

RESIDENTIAL SUBSTANCE ABUSE TREATMENT (RSAT) FOR STATE PRISONERS GRANT PROGRAM – NO RETURN I

The Department of Corrections utilizes these funds to support a 160 bed therapeutic community treatment program located at the Garden State Youth Correctional Facility. This program is designed to address the treatment needs of the State's youthful offender.

Funding Amount and Source: \$76,831 (Federal), \$25,610 (State)

RESIDENTIAL SUBSTANCE ABUSE TREATMENT (RSAT) FOR STATE PRISONERS GRANT PROGRAM - DEVELOPING OPPORTUNITIES AND VALUES THROUGH EDUCATION AND SUBSTANCE ABUSE TREATMENT (D.O.V.E.S)

The Juvenile Justice Commission utilizes these funds to support a 17 bed Residential Therapeutic Community; two beds are designated for relapse intervention. Substance abuse counselors provide assessment, case management, counseling, aftercare referral and follow up.

Funding Amount and Source: The Division of Criminal Justice subgrants funds to JJC: \$76,831 (Federal), \$25,610 (State)

RESIDENTIAL SUBSTANCE ABUSE TREATMENT (RSAT) - CUMBERLAND COUNTY LOCAL JAIL-BASED TREATMENT PROGRAM

The Cumberland County Alcohol and Drug Abuse Services utilize these funds for a jail-based RSAT program for inmates housed within the Cumberland County Department of Corrections. There are four 12 week cycles providing substance abuse treatment to approximately 96 inmates per year. The program provides alcohol and drug related education; relapse prevention sessions; group therapy and other services.

Funding Amount and Source: The Division of Criminal Justice subgrants funds \$55,108 (Federal), \$18,370 (County)

SUBSTANCE ABUSE TREATMENT PROGRAM

The Juvenile Justice Commission will use grant funds to provide substance abuse counseling to juvenile offenders assigned to continue substance abuse treatment in secure facilities, juvenile justice substance abuse programs, or contracted substance abuse programs. The program will provide counseling upon intake, with a continuum of care throughout the juvenile's commitment. This initiative will help address the increasing number of problems facing juveniles involved in the criminal justice system and reduce the number of repeat offenders upon their release.

Funding Amount and Source: The Division of Criminal Justice subgrants funds to JJC: \$180,000 (Federal)

JUVENILE JUSTICE COMMISSION

JUVENILE ACCOUNTABILITY BLOCK GRANT (JABG)

The purpose of the JABG Program is to provide states and units of local government with funds to develop programs to promote greater accountability in the juvenile justice system. Funds are available for 17 purpose areas, one of which is substance abuse.

Funding Amount and Source: \$115,190 FY 2010 Federal
 \$11,519 FY 2010 State

COMPREHENSIVE SUBSTANCE ABUSE ASSESSMENTS

Comprehensive substance abuse assessments are conducted on youth entering the Juvenile Justice Commission. The Commission has contracted with the Mercer Council on Alcohol and Drug Addiction for the services of two Certified Alcohol and Drug Counselors. Information compiled through the use of customized assessments is correlated with the American Society of Addiction Medicine's Adolescent Patient Placement Criteria (ASAM-PPC-2R) for use in determining level of care.

Funding Amount: \$133,417

Funding Source: State

ALPHA META

The JJC Residential Substance Abuse Program at New Jersey Training School for Boys, Jamesburg (NJTSB) provides treatment, placement, aftercare referral and evaluation to participants of this 52 bed, residential Therapeutic Community. An administrator coordinates all aspects of substance abuse treatment. Substance abuse counselors provide case management, counseling, aftercare referral and follow up. The Office of Substance Abuse Administration interfaces with NJTSB classification to ensure proper referrals to the Substance Abuse Programs, coordinates transfers to programs in the community and provides follow up case management for all juveniles placed in community programs and aftercare services. Drug testing is done two times per month on all residents on a routine basis in order to maintain a drug free environment.

Funding Amount: \$325,820

Funding Source: State

NJ DEPARTMENT OF HEALTH AND SENIOR SERVICES-CONTRACTED BEDS

Through a memorandum of Agreement (MOA) between the Department of Health (DOH) and the Juvenile Justice Commission (JJC), the Division of Addiction Services (DAS) provides residential substance abuse treatment to juveniles under the custody and care of the JJC. The JJC has the use of 67 beds and reimburses the DHS for eight beds via the MOA. The following DAS programs are utilized by the JJC: Integrity Newark, Integrity Secaucus, New Hope Secaucus, New Hope Marlboro, and Newark Renaissance.

Funding Amount: \$233,816

Funding Source: Grants-in-Aid

JJC RESIDENTIAL COMMUNITY HOME (RCH): CAMPUS RCH

Campus RCH, located in Camden County, is the Commission's original substance abuse treatment program which serves up to 40 male residents. It utilizes the principle rational emotive behavioral therapy supported by a customized social learning curriculum within a Therapeutic Community milieu.

Funding Amount: \$1,262,000

Funding Source: State

JJC RESIDENTIAL COMMUNITY HOME (RCH): OCEAN RCH

Ocean RCH, located in Ocean County, serves up to 40 male residents. It utilizes the principle of rational emotive behavioral therapy supported by a customized social learning curriculum within a Therapeutic Community milieu.

Funding Amount: \$1,151,000

Funding Source: State

AMERICAN RECOVERY AND REINVESTMENT ACT (ARRA)

This funding provides substance abuse services to youth in the JJC's Juvenile Reception and Assessment Center in Bordentown, New Jersey.

Funding Amount: \$180,000

Funding Sources: Federal

STATE FACILITY EDUCATION ACT (SFEA)

SFEA funding provides substance abuse clinical supervision to three JJC residential substance abuse treatment homes: DOVES, Ocean and Campus.

Funding Amount: \$60,000

Funding Sources: SFEA

NO CHILD LEFT BEHIND

Funds are used to provide outpatient, individual and group counseling.

Funding Amount: \$150,000

Funding Source: The Department of Education subgrants Federal monies to the Juvenile Justice Commission.

DRUG ENFORCEMENT DEMAND REDUCTION PENALTY ACT (DEDR)

Purpose of the funding is to be determined by the Juvenile Justice Commission.

Funding Amount: \$100,000

Funding Source: To be determined by the Juvenile Justice Commission

PLANNING, COORDINATION AND COLLABORATION

DIVISION OF ALCOHOLIC BEVERAGE CONTROL

COLLEGE TRAINING INITIATIVE TO PREVENT UNDERAGE DRINKING

The main purpose of this program is to host an annual Statewide conference for representatives from New Jersey colleges and universities to discuss the pervasive problems related to underage drinking in the college environment and to develop strategies best suited to each college community. Most recently in the spring of 2010, a two-day conference focused on prevention and enforcement and brought together experts on research, prevention and programming, to show recent innovations, effective strategies and community-university collaborations. An additional one-day conference that focused on enforcing the underage drinking laws, including the judicial affairs process, was held in the Fall 2010.

Funding Amount: \$30,000

Funding Source: Federal

LOCAL COMMUNITY-BASED EFFORT TO PREVENT UNDERAGE DRINKING

The Local Community-Based Effort to Prevent Underage Drinking program will seek to address the issue of underage drinking through a community effort involving parents, PTA/PTO groups, youth, SADD or other similar organizations, educators and community members, through the use of town hall meetings, parental programs and peer leadership groups.

Funding Amount: \$40,000

Funding Source: Federal

DEPARTMENT OF MILITARY AND VETERANS' AFFAIRS

Department Mission Statement: The New Jersey Department of Military and Veterans Affairs' mission is to provide trained and ready forces prepared for rapid response to a wide range of civil and military operations, while providing exemplary services to the citizens and veterans of New Jersey.

Drug Demand Reduction Program Information

New Jersey National Guard

RED RIBBON CAMPAIGN

The New Jersey National Guard is actively involved in the Aviation Role Model Program, an initiative in which Army National Guard pilots educate students on the benefits of a drug free life style and promote healthy life choices.

Service Information: The New Jersey National Guard, DEA, County Coalitions and local schools distributed an estimated 35,000 red ribbons to schools, law enforcement agencies and community-based organizations with the goal of bringing awareness of the current drug problem to the forefront. This program served 6,000 students in grades 5-12 located in 21 counties. The program is measured by the number of informational brochures, red ribbons, videos and CD ROMs distributed, as well as the number of students that were reached through drug awareness presentations.

Funding Amount: 70,000

Funding Source: Federal

YOUTH CAMPS – NJ NATIONAL GUARD – COUNTERDRUG TASK FORCE

The New Jersey National Guard and D.A.R.E. New Jersey, as well as other local law enforcement agencies, reduce risk factors by rewarding youth that have repeatedly shown an adherence to a drug free lifestyle. The selection criteria are rigid, but students that are recommended and selected are encouraged to continue their healthy life choices.

Service Information: This program served 240 children in grades 5 and 6 as well as 15 children in grades 7 and 8. Both male and female students were equally represented in grades 5 and 6. There were more males than females in the older grades. In grades 5 and 6, all 21 counties were represented. In grades 7 and 8, Essex, Hudson, Monmouth, Ocean, Passaic and Sussex counties were represented. This program is an alternative activity. The program is measured by the number of participants.

Funding Amount: 50,000

Funding Source: Federal

DRUG AWARENESS EDUCATION

The New Jersey National Guard provides drug awareness education in an attempt to develop students' individually held values and knowledge about drugs and society. The program is designed to demonstrate how our personal values and the choices we make impact drug use.

Service Information: Three thousand five hundred sixty six students in grades 5-12 from Bergen, Burlington, Camden, Essex, Hudson, Middlesex, Ocean, Passaic, Sussex and Union counties participated in this program. The program is measured by the number of students reached and schools visited throughout New Jersey.

Funding Amount: 140,000

Funding Source: Federal

STAY ON TRACK

The New Jersey National Guard provides the Stay on Track program to Middle School students, their teachers, and their families. The primary focus of the Stay on Track program is to provide a curriculum of materials and supplemental products to reduce future substance abuse by reinforcing the drug-free commitment of America's youth through Cognitive Development, Social Skills Development, and Emotional Development.

Service Information: The New Jersey National Guard implemented the Stay on Track program in 2010 for Camden county and will implement the program for Burlington, Sussex and Hudson counties in the Spring of 2011. The program will serve 800 children in grades 6th, 7th, and 8th through 12/45-minute lessons in school classrooms, after-school settings and other school and youth-organization settings. The Stay on Track program contributes directly to Middle Level National Learning Standards for students in Health, Life Sciences and Language Arts. The program uses instruction and assessment to enhance optimal physical, mental, social, and emotional development of students necessary for lifelong health and learning.

Funding Amount: 160,000

Funding Source: Federal
