Community Conversations

NJ Dept. of Health / YMCA

I am a senior citizen living on Long Beach Island year-round. After many unsuccessful attempts to reach the NJ Hotline regarding getting an appointment, we tried a different approach.

When the [REDACTED] reached out to me, as a Korean War veteran, to participate in their vaccination program at the [REDACTED] facility in Ocean County, I was happy to get my first shot from them. I found it to be an organized program. I received my first and second shots with no delay at the time scheduled.

My wife received her vaccinations at the [REDACTED] Community Center operated by [REDACTED] Township Health Department. They also had a precise, well-organized schedule. The vaccination was accomplished in a professional, friendly and courteous manner.

These vaccinations have protected us from the Corona virus and we appreciate the many hours and planning that have gone into this massive program.

Thank you all.
