Airport Traffic Statistics

Airport Traffic Dashboard (ATD)

Aviation statistics are released monthly via the Airport Traffic Dashboard. Revisions and updates are reflected as they become available. As of January 2025, please note that revisions have been made to historical data. These recent changes are reflected in the ATD and corresponding CSV file dataset.

Microsoft Power BI

The Airport Traffic Dashboard (ATD) user guide contains additional information on the data presented in the ATD , along with a glossary of terms and helpful tips for navigation. Most data found in the ATD is identical to the data in the Monthly Air Traffic Report (MATR), supplemented by new data categories and detailed views of some existing ones.

To more accurately report AirTrain passengers for JFK, EWR, and the Region, the Monthly Traffic Reports have been retroactively adjusted to break out paid and on-airport (unpaid) passengers. These changes have been made in reports going back to January 2017, with an exception for on-airport (unpaid) EWR AirTrain passengers, which were not captured prior to June 2017. Therefore, the adjusted data is not comparable to data before these times.

Additionally, the “NJ Transit Port Authority Bus Terminal” row in the EWR report has been combined into the “Airport Coach Passengers” row. This reflects all Coach Bus passengers traveling in both directions between EWR and NYC, including connections onward to JFK and LGA.
