# OUTLINE HISTORY OF NEW JERSEY.

---

Within the limits of what is now the State of New Jersey, aside from any evidences of the presence of prehistoric man in the "Trenton Gravels," the original inhabitants of the commonwealth were Lenni Lenape, or Delaware, Indians. This subdivision of the great Algonkin family occupied the river valleys of the State, had made some progress in agriculture and in elementary arts, were peaceable but small in numbers, and at last have become totally extinct in this portion of the United States.

In its settlement, New Jersey was not an English colony. The claims of the Crown, based upon early discovery and various grants, were totally ignored by two great commercial nations of Europe—Holland and Sweden. It was not until 1664, practically a half century after the first occupancy of New Jersey by a white man, that England had aught more than a slight influence upon the destinies of the State. In settlement, Holland was first to send out planters, under the auspices of the Dutch West India Company. Claiming both the valleys of the Hudson and the Delaware, by virtue of the explorations of Hudson and Mey, land was taken up upon the banks of the Hudson, Passaic, Hackensack, Raritan and smaller streams tributary to New York harbor, as well as at Gloucester upon the Delaware. By 1630 these claims were well established by occupancy, and by the creation of a centre of local government in what is now New York city. Upon the rapidly growing influence of Holland, Sweden looked with jealous eye. Gustavus Adolphus, in his plan to make Sweden a world-power, saw the Dutch to be dangerous rivals in America. In 1638 there was equipped a Swedish expedition to settle the valley of the Delaware. What is now the State of Delaware, the valley of the Schuylkill and isolated portions of the west bank of the Delaware River were occupied, civil and military government was established, and the colony of farmers and traders entered upon a brief career of prosperity. The death of Gustavus Adolphus, internal dissensions in Sweden, the inherent weakness of the Delaware settlements, and the constantly increasing power of Holland brought matters to a crisis. In 1655 New Sweden was conquered by New Netherlands,

and for nine years the soil of New Jersey was absolutely under Dutch control.

Emerging from the interregnum of the Cromwells, the restoration of the House of Stuart brought peace to England. On the 12th of March, 1664, Charles II., with royal disregard for previous patents, grants and charters, deeded to his brother James, Duke of York, a vast tract embracing much of New England, New York and all of what is now New Jersey. This was accompanied by active preparations to drive the Dutch from America, as they, in alien claims to New Jersey, practically separated the New England colonies from Virginia, Maryland and the Carolinas. In the summer of 1664 armed vessels appeared in New York harbor. After negotiations, the Dutch surrendered and the power of Holland in North America became simply a matter of history. In the meantime James, Duke of York, transferred to two favorites of the House of Stuart—John, Lord Berkeley, and Sir George Carteret—practically what is now the State of New Jersey. In honor of Carteret's defense of the Island of Jersey (Caesarea) during the Parliamentary wars, the territory was called New Jersey (Nova Caesarea).

Carteret and Berkeley, in granting a liberal frame of government and extolling the advantages of their colony so well located for agriculture, commerce, fishing and mining, attracted settlers not only from England, but from Scotland and New England, particularly Long Island and Connecticut. These planters were largely Calvinists, from Presbyterian and Congregational communities, and mainly occupied land in Newark, Elizabeth and upon the north shore of Monmouth county. The valley of the Delaware remained unsettled. The Calvinists brought into East Jersey distinctive views upon religious and civil matters. Early legislatures punished many crimes by death, the penalties being similar to those of the Jewish dispensation, while the "town-meeting" strengthened the individual action of the small communities. There was an intense individualism in every phase of political and religious development, the life of the people centering around the church and the school house, the head of both, as in New England, being the minister.

In 1676 a division of the interests of Carteret and Berkeley occurred. In the meantime Berkeley had disposed of his rights to a company of English Quakers, a conflict had ensued, and to establish the claims of all parties concerned, the two colonies of East and West Jersey came into existence. A line was drawn from a point in Little Egg

Harbor to the Delaware Water Gap, Berkeley and his assigns retaining West Jersey as their moiety, Carteret obtaining East Jersey.

By Berkeley's transfer the dominant influence in West Jersey was that of the Society of Friends. Salem was settled in 1675, Burlington, Gloucester and the site of Trenton about five years later, while within ten years thereafter the "shore" communities of Cape May and Tucker-ton came into existence. The Society of Friends established in West Jersey a series of communities in which the life of the people was different from that of East Jersey. As East Jersey resembled New England in civil government, so West Jersey resembled Virginia. The political and social centres of the large plantations were the shire-towns, slave owning was common, a landed aristocracy was established, prominent families intermarried, and under the advice of William Penn and his friends good faith was kept with the Indians. Capital punishment was practically unknown and disputes were settled frequently by arbitration.

Two elements of discord marked the genesis of East Jersey and of West Jersey. One, external, was the attitude of the Duke of York after he became James II. In 1673 New Jersey was recaptured by the Dutch, who held the colony until the early spring of 1674. A question arose as to the Duke of York's title after 1674, reconveyances were made, but in spite of past assurances, James II. claimed the proprietary right of government. To that end Sir Edmund Andros was commissioned Governor of New Jersey, and a climax was reached in 1680 when the proprietary governor of East Jersey was carried prisoner to New York. In 1681 the Crown recognized the justice of the proprietors' contention, and local government was re-established, but not before the seeds of discontent were sown that bore fruit in the Revolutionary War.

An internal disturbance was a contest between the Boards of Proprietors and the small land owners. Both in East and West Jersey, Carteret and Berkeley and their assigns had transferred to wealthy combinations of capitalists—most of whom were non-residents—much of the broad acreage of the colonies. With the land went the right of selection of Governors and of members of Executive Councils, which right Berkeley and Carteret had derived from the Crown. This, with "quit-rent" agitations in East Jersey, led to much bitterness. Finally, disgusted with turmoil, and viewing a sentiment of revolt on the part of the people, the Boards of Proprietors sur-

rendered to the Crown, in 1702, their rights of government, retaining only their interest in the soil, East and West Jersey were united, and the two provinces became the royal colony of New Jersey.

From 1702 until the outbreak of the Revolution the political history of the colony was quite uneventful. Throughout the period of seventy-five years there was almost constant friction between the Legislature and the Governor and his Council. The governors, in the main, were Crown favorites sent over the sea without a personal knowledge of the colony and with but an ill-concealed ambition to wrest from the people as much money as could be secured for the support of themselves and the executive office. The Councils, composed of wealthy land owners of the Society of Friends and rich merchants from East Jersey, were quiescent, and even the members of the popular branch of the Legislature were chosen by those possessing property qualifications. The small non-voting farmers raised the cry of "aristocracy," and the equivalent of "taxation without representation," and while loyal to the Crown were open in their expressions of dissatisfaction to the personal attitude of their governors. In 1738 New Jersey, in recognition of this sentiment, was given a governor separate from the one appointed jointly for the colonies of New York and New Jersey.

During this period the farm was the centre of the activities of the life of the people; particularly was this true in the western part of the colony, where favoring climate and soil, slave labor and the proximity of Philadelphia led to abundant crops and a good market. In East Jersey a commercial spirit was more active. Perth Amboy threatened to rival New York, and Jersey ships from Newark, Elizabeth and the Monmouth villages were to be found from Boston to Charleston. The repressive economic policy of the Crown precluded the development of manufactures. In the southern part of the State, sand and unlimited forests of oak and pine led to the development of glass making, while "bog iron," with abundance of lime from oyster shells, gave an impetus to the erection of forges and bloomaries. These, as well as the copper mines of the trap rock region, were throttled by adverse Parliamentary legislation. Ship building was a recognized industry, and cedar was extensively "mined" from the sunken forests of the tide-water district. Whaling and other fisheries were unhampered, and were profitable, as was also the trade in skins and in hay from the salt meadows of the coast.

Throughout the years from 1702 to 1776 gold and silver and copper money was scarce. In obedience to the demand of the English merchants that competition should be crushed, legislation was enacted to draw "hard" money away from the colony. An inflated paper currency, first issued in 1707 to provide ways and means to aid the Canadian expedition against the French, poured from the printing presses. Trade was reduced to barter, and gold, silver and copper were practically at a premium for nearly three generations.

Of the more prominent incidents during the period were the organized attempts to suppress piracy in New York and Delaware bays, the growth of a well-defined system of transportation by land and water between New York and Philadelphia, the establishment of ferries and post roads, the reclamation of waste land, the injection of Huguenot, Scotch-Irish and Palatinate German elements into the settled population, the chartering of Princeton University and Rutgers College, the religious revival led by Whitefield, the propagation of abolition doctrines by Woolman, the erection of a series of barracks owing to the French and Indian war, and what is probably of supreme importance, the growth of a sentiment of independence fostered by the stupid policy of the Crown, and carried from hamlet to hamlet, as much by itinerant hawkers and by "Redemptioners," who had served their time, as by any other cause.

The opening of the Revolution found New Jersey's sentiment unevenly crystalized. Few, if any, were favoring absolute independence. There were three elements. One, the Tory party, was led by Governor William Franklin, the illegitimate son of Benjamin Franklin. This conservative class embraced nearly all the Episcopalians, a vast proportion of the non-combatant members of the Society of Friends and some East Jersey Calvinists. Another element was composed of men of various shades of belief, some in favor of continual protest, others desirous of compromise. This included at the outbreak of the struggle most of the Calvinists, some few Quakers of the younger generation, and the Scotch-Irish. The third party drew its support from a few bold, aggressive spirits of influence whose following included men who believed that war for independence would benefit their fortunes.

The part played in the Revolution by New Jersey has been frequently told. Events passed rapidly after the affairs of Trenton and Princeton; Monmouth and Red Bank will never be forgotten, while the raids at Salem, Spring-

field, Elizabeth, in the valley of the Hackensack, and the winter at Morristown are a part of national history. Occupying a position between New York and Philadelphia, its soil was a theatre where the drama of war was always presented. At no time was the Tory element suppressed, finding its expression in open hostility, or in the barbaric cruelties of the "Pine Robbers" of Monmouth, Burlington, Gloucester and Salem counties. Though under suspicion, the Society of Friends were neutral, for conscience sake, remaining close to the teachings of their creed.

The close of the struggle found the people of New Jersey jubilant and not disposed to relinquish their sovereignty. The Articles of Confederation were weak and had become a by-word and a jest. There was much State pride and much aristocratic feeling among the old families who continued to dominate State politics. The Constitution of 1776, adopted by New Jersey as a makeshift war measure, provided that all State officers of prominence should be elected by a Legislature, which was chosen by voters possessing property qualifications. As in the colony, the Governor was Chancellor, and class distinctions were closely drawn. In spite of agitation, all proposed changes were rejected, and a strong federal union with the other States was viewed with dislike and suspicion. The State, in a quarrel with New York, at one time refused to obey the requests of Congress, and, in the exercise of her sovereignty, established a Court of Admiralty and coined money.

While the spirit of "State rights" was dominant, it was recognized by leaders of public thought that New Jersey was too weak to stand alone. She entered the Annapolis convention called to revise the Articles of Confederation, and whose lasting monument was the present Federal Constitution adopted in Philadelphia in 1787. Upon the 15th of June of that year the "New Jersey Plan" was presented, which, while lost as a measure, led to the famous compromise upon representation, whereby in the Senate of the United States the States were given equal vote, with a representation based on population in the House.

The adoption of the Constitution of the United States led to the rapid growth of political parties in New Jersey as elsewhere. In spite of the intense conservatism of the State, led by the Quakers of West Jersey, who were Federalists almost to a man, the anti-Federalist sentiment developed rapidly, spurred by a virulent party press, the death of men who had been trained in colonial methods of thought and the democratic tendency of the Methodist Episcopal Church, which grew in strength in West Jersey.

In the eastern part of the State there was among the individualistic Calvinists a strong anti-Federal spirit. This, in 1800, led to the election of Thomas Jefferson as President of the United States, and in 1801 the election of his political ally, Joseph Bloomfield, as Governor of the State of New Jersey. The death of Hamilton at the hands of Burr, and the death of Livingston, the "war" Governor, tore down the strongest pillars of Federalism in New Jersey, and led to the absolute domination of the State by the anti-Federalists, who held power until the outbreak of the second war with England.

The period from 1790 to 1812 in New Jersey was marked by a demand for internal improvements and better transportation. The agitation concerning the Delaware and Raritan Canal, Stevens' experiments in 1802 with steam, along the lines laid down in 1785 by Fitch, the project of the Society for Establishing Useful Manufactures at Paterson as early as 1791, and highways conducted through the northwest portion of the State, indicate the trend of public sentiment.

The second war with England was not altogether a popular measure in New Jersey. The Federalists, the "Peace Party," secured control of the Legislature and elected their Governor. Nevertheless the State furnished her quota of troops. The one permanent effect of the struggle upon the State was indirect. Owing to the movement of supplies and the necessity of quick transportation between Philadelphia and the exposed port of New York, the wagon roads between Bordentown and Perth Amboy, and between Trenton, New Brunswick, Metuchen, Rahway, Elizabeth and Newark, were improved and their advantages as "short routes" demonstrated. Upon these lines two later railroads, now a part of the Pennsylvania Railroad system, were constructed.

The era following the close of the war of 1812 until the opening of the Civil War was one of stupendous activity. Interrupted only by the financial depressions of 1817 and 1837, and slightly retarded by the Mexican War, the progress of the State was beyond the wildest dreams of the enthusiast, Alexander Hamilton. In the eastern part of the State, aided by a constantly increasing foreign population, Jersey City rose from the marshes, Newark grew toward her present greatness, Paterson became a centre of industry, while in the west, Camden was recognized as an available site for manufactures. The public school system was established and extended, reforms in the caring for the criminal, defective, delinquent and dependent

classes were instituted, railroads were reaching every town of size, in the vicinity of New York and Philadelphia, ferries were erected, banks established, post offices opened and newspapers printed. In 1844, when social unrest was most marked, the present State Constitution was adopted by a large popular majority and needed reforms tending to elevate the legal position of married women, imprisoned debtors and bankrupts were adopted.

The year 1860 brought a termination to the then impending conflict. While every other State north of Mason and Dixon's line by 1850 had set the black man free, there were still 236 negroes in bondage in New Jersey. The abolition movement made slow progress and an anti-war party had a decided following. But when the die was cast New Jersey responded to the call for men and money. She furnished 88,305 men, or within 10,501 of her entire militia. For organizing, subsisting, supplying, supporting and transporting her troops she paid \$2,894,385, and upon the field sustained the reputation for bravery she had won during the days of Trenton and Monmouth.

Since the Civil War New Jersey has become the centre of marvelous activity in nearly every line of human progress. Her mills clothe multitudes; within her borders are found the termini of every railroad system of the United States, with one exception, penetrating the South and West; her market gardens feed 5,000,000 people; a series of cities arisen upon the desolate sands of the sea shore furnish health and pleasure to hundreds of thousands of visitors; her mines supply iron, zinc and copper; her fisheries are world-famous, and her farms and dairies are models.

# DECLARATION OF INDEPENDENCE

## OF THE

# UNITED STATES.

---

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident: that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it, and to institute a new government, laying its foundations on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly, all experience hath shown that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But, when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Such has been the patient sufferance of these colonies, and such is now the necessity which constrains them to alter their former systems of government. The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having, in direct object, the establishment of an absolute tyranny over these States. To prove this, let facts be submitted to a candid world:

He has refused his assent to laws the most wholesome and necessary for the public good.

He has forbidden his Governors to pass laws of immediate and pressing importance, unless suspended in their operations till his assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other laws for the accomodation of large districts of people, unless those people would relinquish the right of representation in the Legislature—a right inestimable to them, and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable and distant from the repository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly, for opposing, with manly firmness, his invasions on the rights of the people.

He has refused, for a long time after such dissolutions, to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the State remaining, in the meantime, exposed to all the dangers of invasions from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose, obstructing the laws for the naturalization of foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice, by refusing his assent to laws for establishing judiciary powers.

He has made judges dependent on his will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of officers to harass our people, and eat out their substance.

He has kept among us in times of peace, standing armies, without the consent of our Legislatures.

He has affected to render the military independent of, and superior to, the civil power.

He has combined, with others, to subject us to a jurisdiction foreign to our constitutions, and unacknowledged by our laws; giving his assent to their acts of pretended legislation:

For quartering large bodies of armed troops among us;

For protecting them, by a mock trial, from punishment, for any murders which they should commit on the inhabitants of these States;

For cutting off our trade with all parts of the world;

For imposing taxes on us without our consent;

For depriving us, in many cases, of the benefit of trial by jury;

For transporting us beyond seas to be tried for pretended offenses;

For abolishing the free system of English laws in a neighboring province, establishing therein an arbitrary government, and enlarging its boundaries, so as to render it at once an example and fit instrument for introducing the same absolute rule into these colonies;

For taking away our charters, abolishing our most valuable laws, and altering, fundamentally, the forms of our governments;

For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here, by declaring us out of his protection, and waging war against us.

He has plundered our seas, ravaged our coasts, burned our towns, and destroyed the lives of our people.

He is, at this time, transporting large armies of foreign mercenaries to complete the works of death, desolation and tyranny, already begun, with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the head of a civilized nation.

He has constrained our fellow-citizens, taken captive on the high seas, to bear arms against their country, to become the executioners of their friends and brethren, or to fall themselves by their hands.

He has excited domestic insurrection among us, and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these oppressions, we have petitioned for redress, in the most humble terms; our repeated petitions have been answered only by repeated injury. A prince whose character is thus marked by every act which may define a tyrant, is unfit to be the ruler of a free people.

Nor have we been wanting in our attentions to our British brethren. We have warned them, from time to time, of attempts by their Legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them, by the ties of our common kindred, to disavow these usurpations, which would inev-

itably interrupt our connections and correspondence. They, too, have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our separation, and hold them, as we hold the rest of mankind, enemies in war, in peace, friends.

We, therefore, the representatives of the United States of America, in General Congress assembled, appealing to the Supreme Judge of the World for the rectitude of our intentions, do, in the name and by the authority of the good people of these colonies, solemnly publish and declare, that these United Colonies are, and of right ought to be, Free and Independent States; that they are also absolved from all allegiance to the British crown, and that all political connection between them and the State of Great Britain, is, and ought to be, totally dissolved; and that, as Free and Independent States, they have full power to levy war, conclude peace, contract alliances, establish commerce, and do all other acts and things which Independent States may of right do. And, for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other, our lives, our fortunes and our sacred honor.

And if vacancies happen by resignation, or otherwise, during the recess of the legislature of any State, the executive thereof may make temporary appointments until the next meeting of the legislature, which shall then fill such vacancies.

7. Judgment, in cases of impeachment, shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust or profit under the United States; but the party convicted shall, nevertheless, be liable and subject to indictment, trial, judgment and punishment according to law.

## MEMBERS OF CONGRESS—HOW ELECTED.

## POWERS AND DUTIES OF EACH HOUSE.

## Section V.

1. Each house shall be the judge of the elections, returns and qualifications of its own members; and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner and under such penalties as each house may provide.

## RULES, &amp;C.

2. Each house may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

## JOURNALS.

3. Each house shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may, in their judgment, require secrecy; and the yeas and nays of the members of each house, on any question, shall, at the desire of one-fifth of those present, be entered on the journal.

## ADJOURNMENT.

## APPOINTMENT TO OFFICE.

2. No senator or representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased, during such time; and no person holding any office

under the United States, shall be a member of either house during his continuance in office.

### REVENUE BILLS.

#### Section VII.

1. All bills for raising revenue shall originate in the house of representatives; but the senate may propose or concur with amendments, as on other bills.

### PASSING BILLS, &C.

2. Every bill which shall have passed the house of representatives and the senate, shall, before it become a law, be presented to the President of the United States; if he approve, he shall sign it; but if not, he shall return it, with his objections, to that house in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If, after such reconsideration, two-thirds of that house shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved by two-thirds of that house, it shall become a law. But in all such cases the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the congress, by their adjournment, prevent its return, in which case it shall not be a law.

### ORDERS AND RESOLUTIONS.

3. Every order, resolution or vote, to which the concurrence of the senate and house of representatives may be necessary (except on the question of adjournment), shall be presented to the President of the United States, and before the same shall take effect, shall be approved by him, or, being disapproved by him, shall be repassed by two-thirds of the senate and house of representatives, according to the rules and limitations prescribed in the case of a bill.

### POWERS OF CONGRESS.

#### Section VIII.

The congress shall have power:

1. To lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defense, and

general welfare of the United States; but all duties, imposts and excises shall be uniform throughout the United States.

3. No State shall, without the consent of congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit delay.

## ARTICLE II.

### THE EXECUTIVE POWER.

#### Section I.

1. The executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

#### HOW ELECTED.

2. Each State shall appoint, in such manner as the legislature thereof may direct, a number of electors equal to the whole number of senators and representatives to which the State may be entitled in congress; but no senator or representative, or person holding an office of trust or profit under the United States, shall be appointed an elector.

#### ELECTORAL COLLEGES.

3. The electors shall meet in their respective States, and vote by ballot, for two persons, of whom one, at least, shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each; which list they shall sign and certify, and transmit, sealed, to the seat of the government of the United States, directed to the president of the senate. The president of the senate shall, in the presence of the senate and house of representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed; and if there be more than one who have such majority, and have an equal number of votes, then the house of representatives shall immediately

choose by ballot, one of them for President; and if no person have a majority, then from the five highest on the list, the said house shall in like manner choose the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors, shall be the Vice-President. But if there should remain two or more who have equal votes, the senate shall choose from them, by ballot, the Vice-President. [See XIIth amendment.]

4. The congress may determine the time of choosing the electors, and the day on which they shall give their votes, which day shall be the same throughout the United States.

#### WHO MAY BE ELECTED PRESIDENT.

5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years, and been fourteen years a resident within the United States. [See XIIth amendment.]

#### ON THE DEATH, REMOVAL, &C., OF THE PRESIDENT, THE POWERS AND DUTIES DEVOLVE UPON THE VICE-PRESIDENT.

6. In case of the removal of the President from office, or of his death, resignation or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President; and the congress may, by law, provide for the case of removal, death, resignation or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly, until the disability be removed, or a President shall be elected.

#### COMPENSATION OF THE PRESIDENT.

7. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected; and he shall not receive, within that period,

any other emolument from the United States or any of them.

#### TREATIES, AMBASSADORS, &C.

2. He shall have power, by and with the advice and consent of the senate, to make treaties, provided two-thirds of the senators present concur; and he shall nominate, and by and with the advice and consent of the senate shall appoint, ambassadors, other public ministers and consuls, judges of the supreme court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law. But the congress may, by law, vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of department.

#### APPOINTING POWER.

3. The President shall have power to fill up all vacancies that may happen during the recess of the senate, by granting commissions, which shall expire at the end of their next session.

#### DUTIES OF THE PRESIDENT.

##### Section III.

He shall, from time to time, give to the congress information of the state of the Union, and recommend to their

2. In all cases affecting ambassadors, other public ministers and consuls, and those in which a State shall be party, the supreme court shall have original jurisdiction. In all the other cases before mentioned, the supreme court shall have appellate jurisdiction, both as to law and fact, with such exceptions and under such regulations as the congress shall make.

# STATE CONSTITUTION.

---

A CONSTITUTION agreed upon by the delegates of the people of New Jersey, in convention begun at Trenton on the fourteenth day of May, and continued to the twenty-ninth day of June, in the year of our Lord one thousand eight hundred and forty-four, ratified by the people at an election held on the thirteenth day of August, A. D. 1844, and amended at a special election held on the seventh day of September, A. D. 1875, and at another special election held on the twenty-eighth day of September, A. D. 1897.

We, the people of the State of New Jersey, grateful to Almighty God for the civil and religious liberty which He hath so long permitted us to enjoy, and looking to Him for a blessing upon our endeavors to secure and transmit the same unimpaired to succeeding generations, do ordain and establish this Constitution:

## ARTICLE I.

### RIGHTS AND PRIVILEGES.

1. All men are by nature free and independent, and have certain natural and unalienable rights, among which are those of enjoying and defending life and liberty; acquiring, possessing and protecting property, and of pursuing and obtaining safety and happiness.

2. All political power is inherent in the people. Government is instituted for the protection, security and benefit of the people, and they have the right at all times to alter or reform the same, whenever the public good may require it.

3. 4. There shall be no establishment of one religious sect in preference to another; no religious test shall be required as a qualification for any office or public trust; and no person shall be denied the enjoyment of any civil right merely on account of his religious principles.

5. Every person may freely speak, write and publish his sentiments on all subjects, being responsible for the abuse of that right. No law shall be passed to restrain or abridge the liberty of speech or of the press. 3. Each house shall choose its own officers, determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, may expel a member.

4. Each house shall keep a journal of its proceedings, and from time to time publish the same; and the yeas and nays of the members of either house on any question shall, at the desire of one-fifth of those present, be entered on the journal.

3. The legislature shall not pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or depriving a party of any remedy for enforcing a contract which existed when the contract was made.

4. To avoid improper influences which may result from intermixing in one and the same act such things as have no proper relation to each other, every law shall embrace but one object, and that shall be expressed in the title. No law shall be revived or amended by reference to its title only; but the act revived, or the section or sections amended, shall be inserted at length. 9. No private, special or local bill shall be passed unless public notice of the intention to apply therefor, and of the general object thereof, shall have been previously given. The legislature, at the next session after the adoption hereof, and from time to time thereafter, shall prescribe the time and mode of giving such notice, the evidence thereof, and how such evidence shall be preserved.

10. The legislature may vest in the circuit courts, or courts of common pleas within the several counties of this State, chancery powers, so far as relates to the foreclosure of mortgages and sale of mortgaged premises.

And members-elect of the senate or general assembly are hereby empowered to administer to each other the said oath or affirmation.

## ARTICLE V.

### EXECUTIVE.

1. The executive power shall be vested in a governor.

2. The governor shall be elected by the legal voters of this State. The person having the highest number of votes shall be the governor; but if two or more shall be equal and highest in votes, one of them shall be chosen governor by the vote of a majority of the members of both houses in joint meeting. Contested elections for the office of governor shall be determined in such manner as the legislature shall direct by law. When a governor is to be elected by the people, such election shall be held at the time when and at the places where the people shall respectively vote for members of the legislature.

3. The governor shall hold his office for three years, to commence on the third Tuesday of January next ensuing the election for governor by the people, and to end on the

Monday preceding the third Tuesday of January, three years thereafter; and he shall be incapable of holding that office for three years next after his term of service shall have expired; and no appointment or nomination to office shall be made by the governor during the last week of his said term.

4. The governor shall be not less than thirty years of age, and shall have been for twenty years, at least, a citizen of the United States, and a resident of this State seven years next before his election, unless he shall have been absent during that time on the public business of the United States or of this State.

5. The governor shall, at stated times, receive for his services a compensation which shall be neither increased nor diminished during the period for which he shall have been elected.

6. 7. Every bill which shall have passed both houses shall be presented to the governor; if he approve he shall sign it, but if not, he shall return it, with his objections, to the house in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it; if, after such reconsideration, a majority of the whole number of that house shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved of by a majority of the whole number of that house, it shall become a law; but in neither house shall the vote be taken on the same day on which the bill shall be returned to it; and in all such cases, the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the governor, within five days (Sunday excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the legislature by their adjourn-

In such case he shall append to the bill, at the time of signing it, a statement of the items to which he objects, and the appropriation so objected to shall not take effect. If the legislature be in session he shall transmit to the house in which the bill originated, a copy of such statement, and the items objected to shall be separately reconsidered. If, on reconsideration, one or more of such items be approved by a majority of the members elected to each house, the same shall be a part of the law, notwithstanding the objections of the governor. All the provisions of this section in relation to bills not approved by the governor shall apply to cases in which he shall withhold his approval from any item or items contained in a bill appropriating money.

8. No member of congress, or person holding an office under the United States, or this State, shall exercise the office of governor; and in case the governor, or person administering the government shall accept any office under the United States or this State, his office of governor shall thereupon be vacant. 9. The governor, or person administering the government, shall have power to suspend the collection of fines and forfeitures, and to grant reprieves, to extend until the expiration of a time not exceeding ninety days after conviction; but this power shall not extend to cases of impeachment.

10. 11. The governor and all other civil officers under this State shall be liable to impeachment for misdemeanor in office during their continuance in office, and for two years thereafter.

12. In case of the death, resignation or removal from office of the governor, the powers, duties and emoluments of the office shall devolve upon the president of the senate, and in case of his death, resignation or removal, then upon the speaker of the house of assembly, for the time

being, until another governor shall be elected and qualified; but in such case another governor shall be chosen at the next election for members of the legislature, unless such death, resignation or removal shall occur within thirty days immediately preceding such next election, in which case a governor shall be chosen at the second succeeding election for members of the legislature. When a vacancy happens, during the recess of the legislature, in any office which is to be filled by the governor and senate, or by the legislature in joint meeting, the governor shall fill such vacancy and the commission shall expire at the end of the next session of the legislature, unless a successor shall be sooner appointed; when a vacancy happens in the office of clerk or surrogate of any county, the governor shall fill such vacancy, and the commission shall expire when a successor is elected and qualified. No person who shall have been nominated to the senate by the governor for any office of trust or profit under the government of this State, and shall not have been confirmed before the recess of the legislature, shall be eligible for appointment to such office during the continuance of such recess.

13. In case of the impeachment of the governor, his absence from the State or inability to discharge the duties of his office, the powers, duties and emoluments of the office shall devolve upon the president of the senate; and in case of his death, resignation or removal, then upon the speaker of the house of assembly for the time being, until the governor, absent or impeached, shall return or be acquitted, or until the disqualification or inability shall cease, or until a new governor be elected and qualified.

14. When a memorial or bill is referred to a committee praying or providing for an act of incorporation, or for any other act, notice of the application for which is required by law to be previously advertised, the committee shall not have leave to report such bill unless satisfactory evidence has been presented to the committee that the application for such act has had a bona fide advertisement according to law; and all committees reporting such bills referred to them shall certify to the Senate that such proof has been presented and is deemed satisfactory.

15. The titles of all bills and the parts of bills affected by amendments, together with the amendments, shall be entered on the Journal.

16. When leave is asked to bring in a bill, its title shall be read for the information of the Senate, and if objected to it shall be laid over for one day; and all public and private bills and joint resolutions shall, after the first reading, be printed for the use of the Senate, but no other paper or document shall be printed without special order.

17. All bills, joint resolutions and concurrent resolutions shall be numbered by the Secretary as they are severally introduced, and a list made of the same. Committee reports upon bills, joint resolutions and concurrent resolutions shall be in writing, signed by a majority of the committee, and shall show whether the same are reported favorably or otherwise, and how each member of the Committee voted upon the question of the report.

Bills, resolutions and reports shall be called up by the President for consideration, in the order in which they are reported and stand upon the calendar, unless otherwise ordered; and the Secretary shall read from the said list or calendar, and not from the file of bills or reports.

18. No bill shall be committed or amended until it shall have been ordered to a second reading, after which it may be referred to a committee. Upon the written request of seven Senators to the Chairman of a Committee to which a bill shall have been referred, said Committee shall forthwith report such bill.

19. All bills may be made the order of a particular day, and public bills when called for shall have the preference of private bills; and when two or more bills shall be called for by Senators, they shall be taken up according to their seniority, reckoning from the date of their introduction.

20. On the second and third readings of bills and joint resolutions, printed copies thereof shall be used.

21. When bills or joint resolutions are introduced, the Secretary of the Senate shall forthwith deliver the same to the Supervisor of Bills, who shall prepare them for printing, in conformity with the rules defining the duties of said officer.

22. Original bills and joint resolutions, after being printed, shall be delivered by the Supervisor of Bills to the Secretary.

23. Bills and joint resolutions originating in and passed by the Senate and amended by the House, when concurred in by the Senate, shall be delivered by the Secretary to the Supervisor of Bills for re-printing.

24. Bills and joint resolutions which have passed their second reading, together with all amendments thereto, shall be delivered by the Secretary to the Supervisor of Bills, who shall see that the same are in proper form for printing for third reading.

25. When the Supervisor of Bills receives from the printer the bill or joint resolution ordered to a third reading and the same shall be found correct, he shall affix his official stamp to each page of the copy to be used as the official copy and intended to be submitted to the Governor for his approval, and shall deliver the same to the Secretary.

26. Two copies of every bill and of every joint resolution ordered to a third reading shall be printed on good bond paper, to be approved by the Supervisor of Bills, one of which copies shall be retained in his office and the other of which shall be delivered to the Secretary to be used thereafter as the official copy of said bill or joint resolution.

27. The Supervisor of Bills shall have printed for the use of the members of the Legislature at least one hundred copies of every bill or joint resolution ordered to a third reading, which shall be known and designated as "Official Copy Re-print." The Supervisor of Bills shall deliver twenty-one copies of all bills and joint resolutions designated as "Official Copy Re-print" to the Secretary of the Senate, and sixty copies to the Clerk of the House, and he shall retain the remainder in his own custody for the use of State and Legislative officers.

28. Except as otherwise provided, the system and procedure which have heretofore prevailed shall be followed in the preparation of all bills and joint resolutions for their various readings as far as practicable.

29. The consent of the majority of the Senators present shall be sufficient to print or re-print any bill or joint resolution, but no bill or joint resolution shall pass unless there shall be a majority of all the Senators personally present and agreeing thereto, and the yeas and nays of Senators voting on the final passage of any bill or joint resolution shall be entered on the Journal and the like entry on any other question shall be made at the desire of any Senator.

30. Every bill and joint resolution shall receive three readings previous to its being passed; and the President shall give notice at each reading whether it be the first, second or third, which readings shall be on three different days; but no bill or joint resolution reported adversely by the committee to which it shall have been referred shall receive a second reading except upon motion for that purpose made by or in the presence of the introducer of such bill or joint resolution and concurred in by a majority of all the Senators.

31. The final question upon the second reading of every bill or joint resolution originating in the Senate shall be whether it shall be read a third time; and no amendment shall be received at the third reading unless by unanimous consent of the Senators present, but it shall be in order, before the final passage of any such bill or joint resolution, to move its recommitment, and should such recommitment take place and any amendment be reported by the committee, the said bill or resolution shall be again read a second time and considered and the aforesaid question again put. Instead of recommitting any bill it shall be in order, before

the final passage thereof, to move that it be placed back on second reading for amendment.

32. When a bill or joint resolution shall have been lost, and reconsidered and lost again, the same shall not again be reconsidered but by the unanimous consent of the Senate.

33. Bills and joint resolutions, when passed by the Senate, shall be signed by the President.

34. When a Senate bill or joint resolution shall have been passed, the same shall be signed, taken to the House of Assembly, and its concurrence therein requested, without a motion for that purpose.

35. When a bill or resolution passed by the Senate shall be carried to the House of Assembly, all papers and documents relating thereto on the files of the Senate shall be carried by the Secretary, with such bill or resolution, to the House of Assembly.

36. The introducer of a bill may annex thereto a brief statement explaining the object of the bill, which statement shall contain not exceeding three hundred words and shall be printed at the end of the bill under the caption "Statement."

When a bill is introduced amending an existing law, it shall in the body of the bill, have new matter underscored, and matter proposed to be omitted, printed in its proper place, enclosed in brackets.

The introducer of a bill amending or supplementing an existing law shall designate at the head thereof the page of the Compiled Statutes, or the chapter or page of the Pamphlet Laws, where may be found the law proposed to be amended or supplemented.

It shall be the duty of the Secretary to cause any bill not complying with this rule to be returned to the introducer to be made to conform hereto, and when put in proper form, to be printed and restored to its place on the calendar.

When a bill has passed to a third reading, no explanatory statement, special marks, underscoring or brackets shall be printed in the same; but if the bill has been amended, such amendments shall be printed and distributed for the convenience of the members.

37. The annual, supplemental and incidental appropriation bills shall not be considered until at least one week has elapsed after they shall have been introduced, printed and placed upon the desks of members.

38. No bill or joint resolution shall be considered on third reading until five days after the second reading thereof, except by unanimous consent.

39. The Secretary of the Senate shall cause to be

printed and distributed prior to each day's session, a daily memorandum which in addition to the transactions of the preceding legislative day, and other matter heretofore furnished, shall contain a day calendar of bills on second and third reading, and a list of bills awaiting the third reading calendar. The calendars shall be called in order, and matters on the third reading calendar, reached and not acted on, unless passed for the day or otherwise disposed of, shall be reserved generally, to be restored to the calendar of the following day on request. No bill, joint resolution or concurrent resolution not on the printed calendar for third reading, shall be considered on third reading except by unanimous consent. At the close of each legislative day, the Secretary shall cause to be posted upon the bulletin board in the corridor, the calendar of bills on third reading for the next succeeding legislative day.

42. All motions entered on the Journal of the Senate shall be entered in the names of the Senators who make them.

43. If the question in debate contains several points, any Senator may have the same divided; but a motion to strike out and insert, or to commit with instructions, shall not be divided.

44. The rejection of a motion to strike out and insert one proposition shall not prevent a motion to strike out and insert a different proposition, nor prevent a subsequent motion simply to strike out; nor shall the rejection of a motion simply to strike out prevent a subsequent motion to strike out and insert.

45. On filling blanks the question shall be first taken on the largest sum, the greatest number, and the most distant day.

46. When motions are made for reference of the same subject to a Select Committee, and to a Standing Committee, the question of reference to a Standing Committee shall be put first.

47. When a question is before the Senate, no motion shall be received but—

1. To adjourn.
2. To proceed to the consideration of Executive business.
3. To lay on the table.
4. To postpone indefinitely.
5. To postpone to a certain day.
6. To commit.
7. To amend.

Which several motions shall have precedence in the order in which they stand arranged.

48. The motion to adjourn, or to fix a day to which the Senate shall adjourn, shall always be in order, except when a vote is being taken or while a Senator is addressing the Senate.

49. The motions to adjourn, to proceed to the consideration of Executive business, and to lay on the table, shall be decided without debate.

50. A motion to strike out the enacting clause of a bill shall have precedence of a motion to amend, and if carried shall be equivalent to its rejection.

51. When a motion shall have been once made and carried in the affirmative or negative, it shall be in order for any Senator who voted on the prevailing side to move a reconsideration thereof on the same day or next succeeding day of actual session; but no motion for the reconsideration of any vote shall be in order after a bill, resolution, message, report, amendment or motion upon which the vote was taken, announcing their decision, shall have gone from the possession of the Senate, and they shall not pass from the possession of the Senate until the expiration of the time in which a reconsideration is permitted; and every motion for reconsideration shall be decided by a majority of votes, except a motion to reconsider the vote on the final passage of a bill or joint resolution, which shall require the same majority as is necessary for their final passage.

#### MEMBERS.

52. The seats within the bar shall be reserved exclusively for the Senators, the officers of the Senate, and the reporters of the press who may have seats assigned them.

53. No Senator shall speak in any debate without rising, nor more than three times on any subject of debate, unless he shall first obtain leave of the Senate.

54. Every Senator, in speaking, shall address the President, confine himself to the question under debate, and avoid personality.

55. Any Senator may change his vote before the decision of the question shall have been announced by the Chair.

56. No Senator shall have his vote recorded on any question, when the yeas and nays are called, unless he shall be present to answer to his name.

#### MESSAGES.

57. All messages shall be sent to the House of Assembly by the Secretary, under the direction of the President, as a standing order, without a vote thereon.

58. Messages may be delivered at any stage of the business, except when a vote is being taken.

59. When a message shall be sent from the Governor or House of Assembly to the Senate, it shall be announced at the door by the Sergeant-at-Arms.

#### SENATE BILLS IN THE HOUSE.

60. When an amendment made in the Senate to a bill from the House of Assembly shall be disagreed to by that House, and not adhered to by the Senate, the bill shall be considered as standing on a third reading.

61. An amendment of the House of Assembly to a Senate bill shall not be divisible.

62. In case of disagreement between the Senate and House of Assembly, the Senate may either recede, insist and ask a conference, or adhere, and motions for such purposes shall take precedence in that order.

63. When a Senate bill shall be returned, amended by the House of Assembly, the sections of the bill so amended, together with the amendments, shall be read by the Secretary for a first reading and be entitled to a second reading without special motion, at which reading the proposed amendments shall be open to the action of the Senate. And if, at its third reading, upon the question being put by the President, "Will the Senate concur in the House amendment to Senate bill No. —?" a majority of the whole Senate should, by a vote of yeas and nays, concur, the question shall then be upon ordering the bill to be re-printed. If so ordered, the bill shall be re-printed, the amendments embodied therein and the re-printed bill examined and reported by the Committee on Printed Bills and read in open Senate, to the end that it may be known to be correctly printed, and shall be then signed and certified as other bills.

#### DISORDER.

64. In case of any disturbance in the gallery or lobby, the President shall have power to order the same to be cleared.

65. The Sergeant-at-Arms shall aid in the enforcement of order, under the direction of the President.

66. No Senator, in speaking, shall mention a Senator then present by his name.

## SPECIAL ORDERS.

67. When the hour shall have arrived for the consideration of a special order, the same shall be taken up, and the Senate shall proceed to consider it, unless it shall be postponed by the Senate.

68. The unfinished business in which the Senate shall have been engaged at the last preceding adjournment shall have the preference in the special order of the day.

69. No concurrent resolution shall pass unless by the consent of a majority of the Senators elected.

## SECRET SESSION.

70. On motion made and seconded to shut the doors of the Senate on the discussion of any business which may, in the opinion of a Senator, require secrecy, the President shall direct the chamber to be cleared, and during the discussion of such motion the doors shall remain shut.

## RULES.

71. No standing rule or order of the Senate shall be suspended unless by the consent of two-thirds of the Senators elected, nor rescinded or amended but by the same number, and one day's notice shall be given of the motion for rescission or amendment.

## EXECUTIVE SESSION.

72. When nominations shall be made by the Governor to the Senate, they shall, unless otherwise ordered by the Senate, be referred to appropriate committees; and the final question on every nomination shall be, "Will the Senate advise and consent to this nomination?" which question shall not be put on the same day on which the nomination is received, nor on the day on which it may be reported by a committee, unless by the unanimous consent of the Senate.

73. When acting on Executive business the Senate shall be cleared of all persons except the Senators and Secretary.

74. All information or remarks concerning the character or qualifications of any persons nominated by the Governor to office shall be kept a secret.

75. The Legislative and Executive proceedings of the Senate shall be kept in separate and distinct books.

76. All nominations approved by the Senate, or otherwise definitely acted on, shall be transmitted by the Secretary to the Governor, with the determination of the Senate thereon, from day to day, as such proceedings may occur; but no further extract from the Executive journal shall be furnished, published or otherwise communicated, except by special order of the Senate.

# HOUSE OF ASSEMBLY.

## RULES ADOPTED IN 1915.

---

### OF THE MEETING OF THE HOUSE.

1. Any member or members less than a quorum may meet and adjourn the House from day to day, when necessary.

2. Every member shall attend in his place precisely at the hour to which the House was last adjourned; and in case of neglect, he shall be subject to a reprimand from the Chair, unless excused by the House; nor shall any member absent himself from the House for more than the space of a quarter of an hour without leave previously obtained.

3. In case a less number of members than a quorum shall be present after the arrival of the hour to which the House stood adjourned, they are hereby authorized to send their Sergeant-at-Arms, or any other person or persons by them authorized, with a warrant duly executed, for any and all absent members, as the majority of such as are present may agree, and at the expense of such absent members, respectively, unless such excuse for non-attendance shall be rendered as the House, when a quorum is convened, shall judge sufficient. Immediately after the appointment of the Standing Committees, the members shall arrange among themselves their several seats appropriated to their counties; and in case of disagreement, the same shall be decided by lot.

### OF THE DUTIES OF THE SPEAKER.

4. He shall take the chair at the hour to which the House shall have adjourned, and immediately call the members to order; and on the appearance of a quorum, shall cause the journal of the preceding day to be read, which may then be corrected by the House.

5. He shall preserve order and decorum, and in debate shall prevent personal reflections, and confine members to the question under discussion; but he shall not engage in any debate, nor propose his opinion on any question, without first calling on some member to occupy the chair. When two or more members rise at the same time, he shall name the one entitled to the floor.

6. He shall decide questions of order, subject to an appeal to the House, when demanded by any four members, on which appeal no member shall speak more than once, unless by leave of the House.

7. All questions before the House shall be stated by the Speaker, and distinctly put in the following form, to wit: "As many as are in favor of (the question) will say aye;" and after the affirmative is expressed, "Those of a contrary opinion, no." If the Speaker doubts, or a division be called for, the House shall divide; those in the affirmative of the question shall first rise from their seats, and afterwards those in the negative; and in case of an equal division, the Speaker shall decide.

8. All Committees shall be appointed by the Speaker, unless otherwise specially directed by the House.

9. All acts, addresses and joint resolutions shall be signed by the Speaker; and all writs, warrants and subpoenas issued by the order of the House shall be under his hand and seal, and attested by the Clerk. If the Speaker be absent, a less number of members than a quorum may appoint a Speaker pro tempore, who may sign any warrants, or perform any act requisite to bring in absent members.

10. He shall have a general direction of the hall, and he may name a member to perform the duties of the Chair; but such substitution shall not extend beyond a second adjournment.

#### OF THE ORDER OF BUSINESS.

I. Letters, petitions and memorials, remonstrances and accompanying documents may be presented and disposed of.

II. Reports of Committees may be read.

III. Original resolutions may be offered and considered; items of unfinished business referred; motions to reconsider and to appoint additional members of Committees made; and leave of absence, leave to withdraw documents, and leave to introduce bills asked.

#### LEAVE FOR BILLS AND TO INTRODUCE BILLS.

IV. Bills and joint resolutions on a third reading may be taken up.

V. The House shall then proceed in the order of the day, preference being always given to the unfinished business of the previous sitting; after which bills and joint resolu-

tions on a second reading shall be taken in their order; and the House, in its afternoon session, will proceed to business as though there had been no adjournment of its morning session, excepting that original resolutions, and leave to introduce bills of Committees, be the first business in the afternoon session; and shall, on demand of the majority, proceed with the order of the day.

12. The Clerk shall make a list of all public bills and joint resolutions. He shall keep a separate calendar of private bills. No bills for granting, continuing, altering, amending, or renewing a charter for any corporation, other than a municipal corporation, shall be placed on the calendar of public bills. All bills, public and private, shall be numbered according to the time of their introduction into the House. They shall be taken up and considered in the order of time in which they were reported, or ordered to a third reading, as appears by the calendar; and the calendar shall be proceeded in until all the bills thereon are called up before the commencement of the calendar anew. The Clerk shall post in a conspicuous place in his office a list of all hearings to be held on bills.

13. All messages shall be sent from this House to the Senate by the Clerk.

#### OF DECORUM AND DEBATE.

14. When a member is about to speak in debate, or communicate any matter to the House, he shall rise from his seat and respectfully address himself to the Speaker, confining himself to the question under debate, and avoiding personality.

15. If any member in debate transgress the rules of the House, the Speaker shall, or any member may, call him to order, in which case the member so called to order shall immediately sit down, unless permitted to explain. The House shall, if appealed to, decide on the case, but without debate; if there be no appeal, the decision of the Chair shall be submitted to. If the decision be in favor of the member called to order, he shall be at liberty to proceed; if otherwise, he shall not be permitted to proceed without leave of the House, and if the case require it, he shall be liable to censure of the House.

16. If a member be called to order for words spoken in debate, the person calling him to order shall repeat the words excepted to, and they shall be taken down in writing at the Clerk's table; and no member shall be held to answer, or be subject to the censure of the House, for words spoken in debate, if any other member has spoken.

or other business has intervened after the words spoken, and before exception to them shall have been taken.

17. No member shall speak more than twice, or longer than five minutes each time, without leave of the House.

18. While the Speaker is putting any question, or addressing the House, none shall walk out of or across the hall; nor in such case, or when a member is speaking, shall anyone entertain private discourse; nor shall anyone, while a member is speaking, pass between him and the Chair.

19. No member shall vote on any question in the event of which he is particularly interested, nor in any case where he was not within the bar of the House when the question was put.

20. Every member who shall be in the House when the question is put shall give his vote, unless the House for special reasons shall excuse him. All motions to excuse a member from voting shall be made before the House divides, or before the call of the yeas and nays is commenced; any member requesting to be excused from voting may make a brief verbal statement of the reasons for such request, and the question shall then be taken without further debate.

21. Petitions, memorials and other papers addressed to the House shall be presented by the Speaker, or by a member in his place; a brief statement of the contents thereof shall be made by the introducer, and, if called upon, he shall declare that it does not, in his opinion, contain any indecent or reproachful language, or any expressions of disrespect to the House, or any committee of the same.

22. It shall be the duty of the Sergeant-at-Arms, at all times, not to allow any person to smoke in the Assembly chamber.

#### ON MOTIONS.

23. Every motion shall be reduced to writing, if the Speaker or any member desire it.

24. When a motion is made and seconded, it shall be stated by the Speaker, or being in writing, it shall be handed to the Chair and read aloud by the Clerk, when it shall be deemed to be in the possession of the House and open to debate; but it may be withdrawn at any time before a decision or amendment.

25. When a question is under debate no motion shall be received but—

1. To adjourn.
2. A call of the House.

3. To lay on the table.
4. For the previous question.
5. To postpone indefinitely.
6. To postpone to a day certain.
7. To go into a Committee of the Whole on the pending subject immediately.
8. To commit to a Committee of the Whole.
9. To commit to a Standing Committee.
10. To commit to a Select Committee.
11. To amend.

Which several motions shall have precedence in the order in which they are stated, and no motion to postpone to a day certain, to commit, or to postpone indefinitely, being decided, shall be again allowed on the same day, and at the same stage of the bill or proposition.

26. A motion to strike out the enacting clause of a bill or joint resolution shall have precedence of a motion to amend, and if carried shall be considered equivalent to its rejection.

27. A motion to adjourn shall be always in order, except when the House is voting, or while a member is addressing the House, or immediately after the question to adjourn has been negatived; that, and the motion to lay on the table, shall be decided without debate.

28. Any member may call for a division of the question, which shall be divided if it comprehends questions so distinct that one being taken away from the rest may stand entire for the decision of the House; a motion to strike out and insert shall be deemed indivisible; but a motion to strike out being lost, shall preclude neither amendment nor a motion to strike out and insert.

29. When any motion shall be made and seconded, the same shall, at the request of any two members, be entered on the Journal of the House.

30. When a motion has been once made and carried in the affirmative or negative, it shall be in order for any member who voted with the prevailing party to move for the reconsideration thereof, on the same day or on the next day of actual session of the House thereafter; all motions may be reconsidered, by a majority of the members present; but bills, to be reconsidered, must have the same majority that would be necessary to pass them; and such vote, on motion to reconsider, shall be by taking the yeas and nays.

31. When a blank is to be filled, the question shall first be taken on the largest sum, or greatest number, and remotest day.

32. The yeas and nays shall be entered on the Journal of the House, when moved for and seconded by five members, and in taking the yeas and nays the names of the members, including the Speaker, shall be called alphabetically.

33. The previous question shall be put in this form: "Shall the main question be now put?" It shall only be admitted when demanded by a majority of the members present, and its effect shall be, if decided affirmatively, to put an end to all debate, and bring the House to a direct vote upon amendments reported by a committee, if any, then upon pending amendments, and then upon the main question; if decided in the negative, to leave the main question and amendments if any, under debate for the residue of the sitting, unless sooner disposed of by taking the question, or in some other manner. All incidental questions of order arising after a motion is made for the previous question, and pending such motion, shall be decided, whether on appeal or otherwise, without debate.

34. After the Clerk has commenced calling the yeas and nays on any question, no motion shall be received until a decision shall have been announced by the Chair.

#### ON BILLS AND JOINT RESOLUTIONS.

42. All bills and joint resolutions shall be introduced by motion for leave, or on the report of a committee, and the member offering the same shall indorse his name on them, that the committee may confer with him should they so desire.

If ordered to a third reading, the amendments shall be read, but these readings shall be on different days; the question shall then be, "Will the House of Assembly concur in the Senate amendments to Assembly bill No. —?" upon which question the votes shall be by yeas and nays. If concurred in by a majority of the whole House, the bill shall be re-printed, the amendments embodied therein, and the re-printed bill examined and reported upon by the Committee on Printed Bills, and read in open Assembly, to the end that it may be known to be correctly printed, and then signed and certified as other bills.

they shall report to the House with such recommendation as they think fit. Such report shall be made promptly.

67. That hereafter any motion or resolution which will result in relieving a standing committee of a bill referred to it shall not be entertained unless twenty-four hours' notice shall be given the House of the introduction of such motion or resolution; provided, however, that on a written request of fifteen members, duly presented to the House, said request shall be read, and delivered forthwith by the Clerk to the chairman of the committee named therein; said committee shall, within twenty-four hours, report on the bill, resolution, motion or matter named in said request.

An equal number of copies of such statement and bill shall be printed and a copy of the statement shall be attached to each copy of the bill. Such statements shall not exceed in length one printed page or four hundred and fifty words.

72. All resolutions, bills, amendments to bills and resolutions shall be presented in one original, together with a copy thereof; and all bills, original and copy, shall be typewritten and printed.

73. No bill or joint resolution shall be considered on third reading and final passage until seven days after the second reading thereof.

74. All standing committees shall meet at least once each week for the consideration of measures referred to them, and all committee hearings shall be announced in open session and advertised by posting a notice thereof in a conspicuous place in the Assembly Chamber and also at some prominent point in the main corridor of the State House.

The said committee shall report on the day of presentation to the Governor, which time shall also be carefully entered on the Journal of each House.

## STATE INSTITUTIONS.

## THE STATE CAPITOL.

This edifice, a massive structure, erected at sundry times and various periods, is located on West State street, at the corner of Delaware street, running thence westerly along State street to the grounds of the late ex-Chancellor Green, and southerly to the Water Power. The location is a good one, and the building presents a very imposing appearance.

The seat of Government was fixed at Trenton by an act of the Legislature, approved November 25th, 1790. James Cooper, Thomas Lowery, James Ewing, Maskell Ewing, George Anderson, James Mott and Moore Furman were appointed commissioners to select, purchase or accept so much land as was needed, and to erect thereon suitable buildings for the use of the Legislature. They purchased the present site, containing about three and three-quarters acres—a frontage on Second street (now West State street) of 247 feet and 6 inches, and a depth from the front to low water line of the Delaware river of 666 feet—at a cost of £250 5s. The old State House was a plain, bare-looking, rough-cast building, and was erected at a cost of £3,992 3s. ½d. By an act of March 4th, 1795, a building was erected to serve as an office for the Secretary of State, and for the preservation of the public records, at a cost of £620 19s. 10d. Numerous improvements and repairs were made, and on March 3d, 1806, an act was passed appointing commissioners to make certain repairs to the State House, to provide and hang a suitable bell, &c. This was done, and the bell was used for informing the members of both houses, as well as the courts, of the hour of meeting. The bell was eventually discarded, and an American flag substituted, which waves from the building unto this day, when the Legislature is in session, and upon holidays and State occasions. In 1848, the State House was altered by the removal of the rough-casting, and changing the front to the style of the Mercer County Court House, placing neat porticoes over the front and rear entrances, and erecting two additional buildings adjoining the main one, as offices for the Clerks of the Chancery and Supreme Courts. The rotunda was also erected, and the grounds fenced, graded, laid out and

shade trees planted, all at a cost of \$27,000. The commissioners under whose direction the work was completed, were Samuel R. Gummere, Samuel R. Hamilton and Stacy A. Paxson. In 1863, '64 and '65, appropriations were made and expended in building additions for the State Library, Executive Chambers, &c. In 1871, Charles S. Olden, Thomas J. Stryker and Lewis Perrine were appointed commissioners to cause a suitable addition to be built—more commodious apartments for the Senate and Assembly, &c. The sum of \$50,000 was appropriated, and the buildings for the Legislature were ready for occupancy in time for the meeting of the Legislature in 1872. In 1872, \$120,000 was appropriated for completing the building, \$3,000 for fitting up the Executive Chamber, \$4,000 for fitting up the Chancery and Supreme Court rooms, and \$2,000 for fitting up the offices on the first floor of the east wing. In 1873, the sum of \$43,000 was appropriated for the improvement of the front of the building, completing unfinished repairs and improvements, and for fitting up the Library, &c. On March 18th, 1875, the sum of \$15,000 was appropriated for the purpose of putting a new three-story front to the building, and to fit up offices on the second floor for the Clerks of the Court of Chancery and Supreme Court, and for providing a suitable museum for geological specimens, and the battle-flags of New Jersey volunteer regiments, carried during the war of the Rebellion.

On March 21st, 1885, the front portion was destroyed by fire, and the Legislature appropriated \$50,000 for rebuilding, and, in 1886, an additional appropriation of \$225,000 was granted.

The new building was finished in 1889. It is of rectangular shape and of the Renaissance style of architecture, with a frontage of one hundred and sixty feet on State street, with a depth of sixty-seven feet, and three and a half stories high, with a rotunda thirty-nine feet across, which connects the new section of the Capitol with the original part. The rotunda is surmounted by a dome one hundred and forty-five feet high.

The building has about sixty feet more frontage than the former one, and approaches about ten feet nearer the street.

The walls are constructed of solid, fire-proof, brick masonry, faced with a light-colored stone from Indiana, known as Salem Oolitic, with foundations and trimmings of New Jersey free stone, from the Prallsville quarries,

in Hunterdon county. The portico, door-head and trimmings about the door are of the same material. The portico, with balcony, is supported by massive pillars of polished granite and surmounted by the coat of arms of the State.

The apartments used for offices are very spacious, fitted throughout in the most approved modern style, and each department is supplied with one or more of the finest fire-proof vaults. The first and second stories are set aside for offices, and the entire third story is used for the State Library. This front portion, including the dome, was designed and constructed under the plans and supervision of L. H. Broome, architect, of Jersey City.

The old State Library apartments have been improved and extended, and are now used as offices for the Attorney-General, State Superintendent of Public Instruction and Commissioner of Banking and Insurance. A new story was added, which is used for the Geological Museum and State offices.

In 1891, a new Assembly Chamber was erected. The old one was too small and poorly ventilated, and besides, there was a lack of suitable committee rooms. The Legislature of 1891 passed a Joint Resolution, which was approved on March 20th, authorizing the Governor "to provide a suitable chamber and committee rooms for the use of the General Assembly of this State," &c., and also, "to make such additions and alterations as will afford the necessary accommodations for the Supreme Court and Court of Errors and Appeals, or for other State offices, and sufficient money is hereby appropriated for that purpose, to be paid by the Treasurer of this State on the warrant of the Comptroller, after approval by the Governor."

The new chamber was built by James W. Lanning, of Trenton, from plans prepared by James Moylan, of Jersey City, and under the superintendency of Bernard J. Ford of Newark. It covers the site of the former chamber, and extends beyond it to Delaware street on the east and to the water power on the south. It has a frontage on Delaware street of 120 feet and a depth of 75 feet. The exterior finish and design of the building are similar to the adjoining portion of the Capitol. The foundation is of brown stone, from the Stockton quarries, and the trimmings of light Indiana stone. The interior is finished in Trenton tile, quartered oak and Italian statuary

marble. It is a fire-proof building throughout, and is specially ventilated. The committee rooms are ample and convenient, and the interior design arrangement and finish make it a model legislative chamber. It cost the State \$140,500. The cost of the steam heating and ventilating systems was about \$25,000.

The other new addition to the Capitol provides a consultation room for the Judges of the Supreme Court and the Court of Errors and Appeals and a private room for the Governor, a room for the Museum of the Geological Survey, and other offices, and cost \$34,500.

An electric light apparatus was also placed in the Capitol, which cost \$23,000. Every department in the building is now lighted by electricity.

Two Otis elevators have been placed in the building, which gives easy access to all the upper floors.

In 1900 the Legislature appropriated \$96,000 for additions and alterations to the Capitol, which included the cost of an electric light plant.

A new Senate Chamber was erected in 1903, and was ready for occupancy in 1904, at a cost of about \$182,000. In 1904 about \$60,000 was expended for other improvements in the Capitol.

Another addition was made to the Capitol in 1907 at a cost of about \$100,000. It is a massive structure of a classical style of architecture and is finished in stucco to match the rest of the Capitol. It contains four stories above a deep basement. The construction is fire-proof, consisting of solid brick walls, steel beams and columns and concrete floors. The exterior is attractive with its classic lines and Indiana limestone trimmings. The structure was designed and all the plans drawn by George E. Poole, State Architect.

In 1911 the Legislature made an appropriation of \$60,000 for the extension of the west wing of the front part of the building, and in 1912 \$70,000 was appropriated for the extension of the east wing.

### THE STATE LIBRARY.

This valuable collection of books is located on the third floor of the State Capitol. The old saying, "Great oaks from little acorns grow," most appropriately applies to this institution.

The first library of the State was a case ordered to be procured by Maskell Ewing, Clerk of the House of As-

sembly, for the keeping and preservation of such books as belonged to the Legislature. It was ordered by a resolution passed March 18th, 1796. This was the nucleus of the present extensive library. On February 18th, 1804, William Coxe, of Burlington; Ezra Darby, of Essex, and John A. Scudder, of Monmouth, were appointed a Committee on Rules to make a catalogue; they reported that there were 168 volumes belonging to the State, and presented a code of seven rules, which was adopted. On February 10th, 1813, an act (the first one) was passed, entitled "An act concerning the State Library." Up to 1822 it appears that the Clerk of the House had charge of the books, as Librarian, and, on November 16th, 1822, an act was passed for the appointment of a State Librarian, annually, by joint meeting. In 1846, on April 10th, an act was passed making the term of office three years. The Law Library at that time belonged to the members of the Law Library Association. The only persons allowed the use of the Library were members of the Association, the Chancellor, and the judges of the several courts. Stacy G. Potts was Treasurer and Librarian of the Association. The Law Library was kept in the Supreme Court room until 1837, when the Legislature authorized the State Librarian to fit up a room adjoining the Library for the care and reception of the books and papers belonging to the State Library. Thus the two Libraries were consolidated. On March 13th, 1872, \$5,000 per year for three years was appropriated for the Library by the Legislature, and by the act of March 15th, 1876, the sum of \$2,500 was appropriated for finishing and refurnishing the Library room. In 1890, the Library was removed to the third story of the new part of the Capitol.

In 1904 the Legislature made a special appropriation of \$15,000 for the installation of steel stacks, and the shelf-space was doubled. There is room now for more than 125,000 books and pamphlets. About the same time the decimal classification system was introduced and the work of making a modern card catalogue begun, which was practically finished in 1905.

### THE STATE ARSENAL.

The building now used as the State Arsenal was formerly the old State Prison. It is situate on Second street, in the Sixth Ward of the city of Trenton, and has on its front the following inscription:

Labor, Silence, Penitence.  
 The Penitentiary House.  
 Erected by Legislative Authority.  
 Richard Howell, Governor.  
 In the XXII. Year of American

 Hic Labor, Hoc Opus.

In the messages of Governors P. D. Vroom and S. L. Southard, recommending the erection of the new prison, it was proposed that the old one be converted into an Arsenal for the safe keeping of the arms and military property of the State, which, previous to that time, had been kept in the old State Bank, corner of Warren and Bank streets, with accoutrements and camp and garrison equipage at the State House. After the removal of the State convicts from the old prison, permission was given to the county of Mercer to occupy it as a jail until its jail, then in course of completion, was finished, and when it was again vacated it was converted into an arsenal.

Among the stores, &c., at the Arsenal are one bronze gun, French, of the date of 1758; two bronze guns, English, four-pounders, and two iron six-pounders. There is also one gun captured at the battle of Trenton, December 26th, 1776, and two guns captured at Yorktown, October 19th, 1781. There are also a large quantity of fire-arms, ammunition, ordnance, tents, clothing, blankets, &c.

### STATE HOSPITAL.

Trenton.

This institution is located on the left bank of the Delaware River, about two miles northwest of the City Hall. The buildings are constructed of reddish sandstone, obtained from quarries near the hospital, and are located on an elevation of about seventy-five feet above the river. The front of the Main, or Administration Building, is ornamented by a handsome porch of Ionic architecture, designed by the celebrated Notman, from which may be obtained one of the finest landscape views in the State.

In 1844, after repeated and unsuccessful attempts to cause action to be taken by the Legislature for

the building of a State institution for the special care and treatment of the insane, a commission was appointed, chiefly through the earnest efforts of Dr. Lyndon A. Smith, of Essex, and Dr. Lewis Condict, of Morris, and the eminent philanthropist, Miss D. L. Dix, to select a site. An appropriation of \$35,000 was made to purchase the land and to commence the erection of the building. The present site was selected by the commissioners from among many that were offered in various sections of the State, because of the large spring of excellent water found on the place. This spring was developed, and furnished a daily supply of about one-half million of gallons of pure water for many years. In the severe drought of 1880 the supply was greatly diminished, falling off nearly two hundred and fifty thousand gallons. In 1907 the city sewer, running about 200 feet from the spring, burst or overflowed, and this caused contamination of the water supply, resulting in a typhoid epidemic, so that it was necessary to discontinue the use of the spring. At present the hospital is supplied with water by six artesian wells, one of which gives 150 gallons of water per minute. The spring has been filled up, and thus an important landmark destroyed.

Work was commenced on the main building in November of 1845, and the hospital was opened for the reception of patients on the 15th day of May, 1848. Numerous additions have been made from time to time to the building, increasing its capacity.

In 1887 the Legislature passed an act appropriating \$100,000 for providing additional accommodations. The new building is a handsome structure of red sandstone, and similar to that used in the main building. This is five hundred feet long, three stories in height, and capable of accommodating three hundred patients, one hundred and fifty of each. The building is designed to accommodate the chronic incurable class, and was a great relief from the overcrowded state that existed in the main building prior to its completion. The building was completed within the appropriation, and opened for the reception of patients in the month of October, 1889.

Much has been done for the comfort and pleasure of the patients. A greenhouse has been erected for the purpose of furnishing plants and flowers for the

patients' corridors, handsome pictures adorn the walls, and everything about the hospital presents a comfortable and homelike appearance.

The institution possesses a library, one of the largest, if not the largest, in this country, connected with a hospital for the insane. The books are accessible to all members of the household. They have been freely used, and do much to relieve the monotony of many an hour of hospital life. The library now consists of about 4,000 volumes, and is the result of the bequest of a former nurse (Anne Robinson) who, by will, bequeathed her earnings for several years as a nurse and attendant in this hospital. She made the bequest, as she herself expressed it when making her will, for the purpose of purchasing books to be used for the pleasure and benefit of those to whom she had, for so many years, endeavored to minister.

During the year 1898 a handsome amusement room, capable of seating about four hundred, was finished; also, a large and commodious chapel, in which religious exercises are held every Sunday, when various clergymen, without regard to denominational preference, officiate. The new chapel is capable of seating about five hundred patients. In 1904-1905 an appropriation of \$250,000 was made for the erection of two additional wings to the annex building, which will accommodate 400 more patients. In 1905 the Legislature appropriated \$12,500 for the construction of fire escapes.

A few years ago a modern laboratory building was erected, and at the present time is fully equipped for scientific work.

In 1907 the new wings, spoken of above, were opened for the reception of patients, so that now the hospital is not overcrowded.

In 1908 the Legislature appropriated \$111,000 for extraordinary improvements, which included installation of modern plumbing throughout the buildings, also tiling for toilet rooms, water sections, etc.

Two buildings for tuberculosis patients, male and female, have been erected, and will accommodate twenty-five, each known as the "open air" ward.

Since January 1st, 1908, there has been no mechanical restraint of any kind used in the hospital. All restraint apparatus, chairs, straight jackets, straps,

etc., have been removed from the hospital building, and are stored away where no one can get at them.

During the year 1909 the plumbing and tiling of the old building was completed, and the sanitary arrangements for the hospital have been considered by those competent to judge, to be the best of any public institution of this character.

In both the male and female departments a hydrotherapeutic apparatus has been installed for giving the continuous bath treatment. This apparatus was made especially for the hospital, and has given satisfactory service in the treatment of acutely excited cases.

The Legislature of 1911 appropriated \$103,000 for extraordinary improvements. Two farms in the neighborhood of Trenton Junction have been purchased, which will add 250 acres of farm land to the hospital. A new laundry has been erected and equipped with modern machinery, at a cost of \$30,000.

The Legislature appropriated \$2,800 for research work, which enables the hospital to employ two trained field workers who go out in the community and look up facts regarding the patients' heredity and personal history, which gives valuable information to the medical history. They also engage in "after care" work, i. e., in visiting discharged patients at certain intervals, investigating their condition, and reporting to the hospital any unusual conditions which have any bearing on the recurrence of mental disease. During the years 1910 and 1911 \$5,000 has been spent for furniture for the wards. The Legislature of 1912 appropriated \$165,000 for new buildings, including one for the criminal insane.

### STATE HOSPITAL.

Morris Plains (P. O. Greystone Park).

Further provision for the accommodation of the insane being made necessary by the overcrowded condition of the State Hospital at Trenton, the Legislature of 1871 appointed a commission to select a site and build a hospital in the northern part of the State.

At a cost of \$78,732.36 a tract of 408 acres of land, beautifully situated in the hills of Morris County, was purchased and work on the hospital buildings begun.

Additional tracts of land have since been purchased at a cost of \$32,318.00, making a total of 897 acres, at a total cost of \$111,050. The original building, now known as the "Main Building," was erected, at a cost of \$2,511,622. The "Dormitory Building" and a new reservoir, made necessary by its construction, cost, when completed, about \$650,000; a new laundry building, \$18,200; the nurses' cottage, \$20,000, and in 1907 the annual appraisal placed the personal property of the hospital at \$294,709, thus making the total cost of the entire plant approximately \$3,605,581.

The location is ideal for an institution caring for the mentally afflicted, and is unsurpassed in this particular by any similar institution in the United States. The buildings command a magnificent view of the surrounding country, and the air is cool and balmy in Summer and crisp and stimulating in Winter.

The main building, opened in 1876, is four stories in height, 1,243 feet in length, 542 in depth, and has ten acres of floor space. It contains the executive offices, reception rooms, medical library, chapel, amusement hall and forty wards, which, when crowded to their full capacity, will accommodate 1,200 patients.

In 1901 the dormitory building was completed. It is situated 1,200 feet in the rear of the main building, accommodates 600 patients, and is constructed on the day room and dormitory plan. On the fourth floor of the building are well-equipped pathological and chemical laboratories, five splendidly-lighted rooms on the top floor of the northeast tower being devoted to this work. The laboratories have been well equipped with many of the latest and best instruments for the prosecution of scientific, clinical and research work, and have proved to be a highly important adjunct to the purely psychiatric work of the hospital.

A cottage for nurses was built in 1906. This is a three-story brick building, trimmed with sandstone, and is situated in front and to the south of the main group of buildings. It is within easy access of the female wards, and affords sleeping quarters for forty female nurses, who formerly, after working daily fifteen hours with the insane, were compelled to spend their nights in the wards, in close proximity to noisy and disturbed patients. In addition to furnishing accommodation for the night, the cottage has a recep-

tion room and library, where the nurses may spend their time when off duty.

In order to give the hospital a better mail service, the United States government, on March 23, 1908, established a new post office in the main building of the hospital, and named it Greystone Park. The mail matter of the institution was formerly handled at Morris Plains post office, which is one and one-half miles from the building.

The Legislature of 1911 appropriated \$15,000 for the erection of a new fire house. This fire house provides stabling quarters for two horses and sleeping room for twenty male employes who are always to be members of the fire department.

The same Legislature appropriated \$40,000 for the erection of a male nurses' home. This building accommodates seventy-six men nurses.

A cold storage plant has been added to the institution which produces five tons of ice per day and also provides a room for the storage of hospital food supplies.

The Legislature of 1911 made an appropriation of \$15,000 for a dynamo and building, and there was also appropriated \$10,000 for a building for the segregation of tubercular patients. The same Legislature also appropriated \$8,000 for screening the windows of the main building and dormitory building.

The Legislature of 1912 appropriated \$69,000 for new buildings and alterations.

A Training School for Nurses was established in 1894 and it has proved to be of great advantage to the hospital in the humane care and treatment of the insane. A graded three-years' course is given to the nurses and consists of lectures and practical demonstrations given by the medical staff in anatomy, physiology, materia medica and therapeutics, chemistry and toxicology, obstetrics and gynecology, genito-urinary diseases, practice of medicine, minor surgery, practical bedside nursing and bandaging. The course is compulsory upon all who are employed as attendants, and since the establishment of the school, 226 persons have been granted diplomas.

Further provision for the scientific treatment of patients has been made by the equipment of rooms, both in the male and in the female departments, with complete hydrotherapeutic apparatus and by the

installation of electrotherapeutic appliances, and a powerful static machine in a room in the main building, convenient to both male and female departments.

A room has also been set apart and fully equipped with instruments and appliances for the examination and treatment of patients suffering from diseased conditions of the eye, ear, nose and throat.

The medical library contains over 1,300 volumes of carefully-selected text books and reference works on medical and other scientific subjects, together with well-bound volumes of the annual reports of every hospital for the insane in the United States, Canada, South American States and many of the countries in Europe.

Among the many improvements added in recent years is a new system of keeping case records. The complete record of each patient from the time he enters the hospital until he is discharged is kept in a separate envelope, filed vertically in steel cabinets especially constructed for the purpose. The files are thoroughly cross-indexed, which permits of needful information being rapidly and easily obtained in any given case.

Additional protection from fire has been provided by equipping the hospital with the Kirker-Bender type of fire escape.

Fire drills are held at regular intervals so that the patients may become familiar with the location of the fire escapes and accustom themselves to their use so as to enable them in the event of fire to go through this means out of danger in an orderly and expeditious manner.

The hospital has equipped Dental Rooms with the latest and most modern appliances, thus enabling the Resident Dentist to do scientific work for the patients needing dental attention.

The Legislature of 1912 appropriated \$15,000 for a storehouse in which all supplies are kept, and \$8,000 was also appropriated for the construction of an industrial building which is equipped with apparatus and supplies of the manufacture of a great variety of hospital utilities.

The normal capacity of the institution is 1,600 patients. In 1914 there were 2,500 patients under care and treatment, being 900 over the normal capacity and increasing annually by about 100. Owing to this condition the percentage of recoveries must of necessity be small and the proper classification of the different psychoses is impossible.

**STATE NORMAL AND MODEL SCHOOLS**  
at Trenton.

These schools are located at the junction of Perry street and Clinton avenue. There are two buildings, the school building on the west side of Clinton avenue, and the boarding halls and dormitories, situated on the east side of the avenue. These schools were established in 1855 by an act of the Legislature. The purpose of the Normal School was defined to be "the training and education of its pupils in such branches of knowledge, and such methods of teaching and governing, as will qualify them for teachers of our common schools." The Model School was designed to be a place where "the pupils of the Normal School shall have opportunity to observe and practice the modes of instruction and discipline inculcated in the Normal School.

The Normal School offers to graduates of approved four year high schools the following courses: a two year general course; a two year kindergarten course; a two year domestic science course; a two year commercial course; a two year manual training course; a four year high school teachers' course, equivalent to a teachers' college course; an industrial arts teachers' course given in conjunction with the Trenton School of Industrial Arts. Special courses are offered in voice training, piano and violin, and electives in advanced work in a number of other branches.

The Model School begins with the kindergarten and includes a full secondary or high school curriculum. It offers three courses: the classical, Latin scientific and English.

The buildings are equipped with laboratories, gymnasium, and the modern appliances necessary to good work.

The following figures show the first cost to the State and the present valuation of the Normal School property. The first cost to the State has been supplemented from time to time by the contributions of private individuals, and by balances from the Boarding Hall receipts after meeting the annual expenses of the Hall. It includes also an industrial arts course in co-operation with the Trenton School of Industrial Arts.

### THE NEW JERSEY STATE NORMAL SCHOOL

at Montclair, Essex County.

The increasing demand for professionally trained teachers, and the inability of the State Normal School, at Trenton, to meet it, led to the passage of a resolution by the Legislature of 1902 directing the State Board of Education to investigate as to the need of increased normal school accommodations and how best to provide them, should the board find the present accommodations inadequate.

In its study of the question the board discovered that there were 7,561 teachers in the public schools of the State, and that of this number 2,224 were graduates of normal schools, 457 were college graduates, and 1,663 graduates of city training schools, leaving 3,217 teachers, or nearly one-half of the entire number, who had not had any special training. Of the graduates of normal schools employed, nearly forty per cent. came from other States, notwithstanding the fact that the New Jersey State Normal School, at Trenton, was working to its full capacity.

In its report to the Legislature in 1903 the board recommended that a normal school be erected in the northern part of the State. In 1904 the Legislature appropriated \$25,000 for the purchase of a site. The board, after inspecting numerous sites, finally purchased a plot in the northern part of Montclair, in Essex County, at a cost of \$25,000. The plot contains twenty-five acres and is 400 feet above sea level, giving an uninterrupted view of Newark and surrounding towns and of the bridges and skyscrapers of New York City. The plot is large enough to accommodate the school building and dormitories, should it be found necessary in the future to provide them, and also to

give a large campus and sufficient ground for illustrating methods of teaching agriculture, which will in the near future be as important a subject in the curriculum of a well organized normal school as illustrating the methods of teaching chemistry or literature is at present. Within a radius of ten miles from the site selected there is a population of more than one million.

In 1906 the Legislature appropriated \$275,000 for the erection and furnishing of the building. The plans were prepared by State Architect George E. Poole and Assistant Architect Francis H. Bent, of the Department of Charities and Corrections. The mission style of architecture was adopted, and the material is brick covered with pure white stucco, the roof being red tile. The building is 334 feet long and 133 feet deep, the centre and wings projecting. In front is an esplanade 260 feet long and 44 feet wide, protected by a concrete wall from which steps descend to the lawn.

In the basement are the manual training and domestic science rooms, four rooms for observation classes, locker and dressing rooms, showers, recreation and lunch rooms.

On the main floor are the board room, the principal's offices, a library 32x60 feet, the study hall and gymnasium, each 57x76 feet, two large lecture rooms and eight class rooms. The study hall and gymnasium have ceilings twenty-five feet high, giving ample space for gallery and running track, respectively.

On the second floor is the drawing room, 32x60 feet, with high ceiling and north light, three lecture rooms, large laboratories for chemistry, physics, botany and zoology, and dark rooms for photography. Teachers' rooms are provided on each floor.

The finish is in hard pine, except the study hall, which is in white and gold. The study hall will also be used as the auditorium. The walls of the laboratories are of white tile and the floors of cement. The walls of the gymnasium are of cream-colored brick.

The heating and ventilating plant is in a separate structure, located some distance from the main building. The cost of the buildings, exclusive of furniture and grading, will be less than \$250,000.

The school was formally opened on Monday, September 28, 1908. Addresses were made by Governor

Fort, President Hays, of the State Board of Education, Edward Russ, chairman of the Building Committee, and others.

The regular sessions of the school began September 15, 1908, with an attendance of 187 pupils.

A class of 45 teachers was graduated in June, 1910, and 145 teachers were graduated in June, 1911. The membership of the school for the year ending June 30, 1911, was 443. The demand for graduates of the school far exceeds the supply, and all graduates are now employed in teaching.

The Principal is Dr. Charles S. Chapin, formerly Principal of the Rhode Island State Normal School.

The school may be reached in three ways:

1. By Erie Railroad—Greenwood Lake Division. The Montclair Heights station adjoins the grounds of the Normal School.

2. By D. L. and W. Railroad to Montclair station, thence by Valley Road trolley to the grounds.

3. By Bloomfield Avenue trolley with transfer at Valley Road to Valley Road trolley.

Passengers by the Pennsylvania Railroad to Newark can take Bloomfield Avenue trolley at Newark station.

Passengers by the Central Railroad of New Jersey to Newark can take Bloomfield Avenue trolley at corner of Market and Broad Streets, Newark.

### **THE NEW JERSEY STATE NORMAL SCHOOL**

at Newark.

The new State School building is centrally located between Broad street and Belleville avenue, at the intersection of Fourth avenue, and occupies, including its spacious grounds, an entire city block. The architecture of the building is dignified as well as picturesque and is enhanced by the sunken garden, masses of bloom and hedges. The interior has been greatly admired for the beauty of its color scheme, its fine appointments and educational features. The building is equipped with an auditorium, gymnasium, laboratories, manual training shops, sewing rooms, art rooms and spacious, well-ventilated class rooms for normal work. Special features are the demonstration rooms with raised seats, lecture rooms, conference rooms, a fine library, study halls and a splendidly

equipped kitchen and dining room. The building also has a modern system of heating, lighting and ventilating and excellent sanitary conditions.

This new building opened its doors under State control September 16th, 1913, with an enrollment of 450 students and a waiting list. It may be of interest to note that the school is so centrally located that only two students requested boarding places in the city of Newark. The trolley and railroad facilities are such that they can readily come and return to their homes. A dozen prominent high schools are within forty minutes of the school.

A large practice school is connected with the Normal where students are trained under actual school conditions and the aim is to graduate an efficient corps of teachers for the public schools of the State.

The Principal of the new State School is W. Spader Willis, who for fourteen years was Principal of the City Normal School at Newark.

### THE STATE HOME FOR BOYS.

"The New Jersey State Reform School" was established by act of the Legislature approved April 6th, 1865. A farm of 490 acres was purchased for the purpose near Jamesburg, Middlesex county.

The first boy was received July 6th, 1867. Its first Superintendent was Rev. Luther H. Sheldon, who was in office from April 10th, 1867, till April 1st, 1874, and was succeeded by James H. Eastman, who was Superintendent from April 1st, 1874, till September 15th, 1884. Upon his withdrawal Ira Otterson was made acting Superintendent, and on December 10th, 1884, he was elected Superintendent. In 1902 Mr. Otterson was succeeded by John Wildes who, March 1, 1904, gave way to John C. Kalleen. In 1900 the name of The Reform School was changed to the State Home for Boys.

Since founding the school, beside the Administration building, there have been erected on the campus eight family buildings (two of them double buildings), capable of accommodating fifty boys each, a chapel, hospital, store and cook house, industrial building, electric light, heat and power, generating station and farm buildings, conservatory, up-to-date cow barn, piggery, all of brick, many of the buildings con-

structed with bricks manufactured by the boys on the place.

Besides domestic and farm labor, all boys are instructed in the rudiments of an English school education, and many receive instruction in shorthand and typewriting and in the different mechanical branches and band music.

In 1900 there was erected by boys' labor, under regular instructors, a building 40 by 100 feet, two stories high, in which are established schools for trade teaching. In 1910, in this building, a complete outfit of machinery consisting of a planer, mortiser, universal and band saw, and others necessary to make it complete was supplied. While in the past, so far as the accommodations would permit, a number of boys have received instruction in mechanical trades, and with the accommodations furnished in the new building, a greater number of boys receive a more thorough knowledge in lines of skilled handicraft, which will the better prepare them to become good citizens.

During 1910 the cow and dairy barn have been remodeled and rebuilt, and the Legislature of 1910 appropriated \$40,000 with which to erect a central school building. The Legislature of 1912 appropriated \$40,000 for the erection of a double cottage.

### STATE HOME FOR GIRLS.

This institution is located on the line of the Trenton Branch of the Philadelphia and Reading Railroad, in the City of Trenton, near the Trenton State Hospital, and is located on a farm of about 79 acres of land. A substantial building was erected at a cost of \$23,334, and other improvements since made bring the value of the place, with furniture, &c., up to \$186,622. The value of the land is \$16,700. Previous to the erection of the new building, the school was at "Pine Grove," in the Sixth Ward of the city of Trenton. This place had been leased so as to afford room for persons sentenced under the act of April 4th, 1871, and a subsequent act. The Legislature of 1900 appropriated \$30,000 for the erection of an additional building. In 1900 and 1901 about \$31,000 was spent for improvements and the Legislature of 1905 appropriated \$36,000 for the erection of a new cottage and about \$9,000 for various other improvements. On February 11th, 1910, a new administration building, named the "Fort Cottage," was formally

opened. It is the counterpart of Washington's headquarters at Morristown, N. J., and had served as New Jersey headquarters at the Jamestown, Virginia, Exposition. It is most elaborately furnished with everything suggestive of the colonial period. A new cottage costing \$25,000 was erected in 1911 and 1912 to house twenty-five little girls. The Legislature of 1912 appropriated \$16,700 for the erection of an infirmary and barn.

The institution is for girls between the ages of ten and nineteen years who may be committed to it by the courts.

### THE STATE PRISON.

The New Jersey State Prison, situated on the block enclosed by Federal, Third, Cass and Second streets, in the city of Trenton, is one of the finest institutions of its kind in the country. Its erection was authorized by an act of the Legislature passed February 13th, 1832, and it was completed in the year 1836, having 150 cells, at a cost of \$179,657.11. It was built of red sand-stone, from the Ewing quarries, and the style of its architecture is Egyptian, having four Egyptian columns in front of the main entrance, on Third street. It consists of a main building, used as a residence for the Keeper and as reception rooms and offices. From time to time the prison has been enlarged, and although there is not sufficient room to afford separate confinement for each prisoner, as required by law, the provisions of the act are carried out as far as possible. The rules and regulations now in force have brought the internal affairs of the institution, as to cleanliness, discipline, victualing, &c., to a much higher standard than was ever before reached, and a visit thereto will convince the visitor that the management is as perfect as can be.

Previous to the year 1793 there was no State Prison, and prisoners were confined in the county jails. On March 1st, 1797, Jonathan Deane was appointed by an act of the Legislature as an agent to purchase a lot of land from Peter Hunt, situate at Lambertton, containing six and a half acres, and to erect suitable buildings thereon. This was done at an expense of £9,842 0s. 3d., and what is now the State Arsenal, at Second and Cass streets, is the result. Solitary confinement was not practiced previous to 1836, in which year the old prison was vacated and the present one occupied.

On March 4th, 1847, \$5,000 was appropriated to build an additional wing to the original building. On March 25th, 1852, \$15,000 was granted for the erection of a new wing for hospital purposes. On March 22d, 1860, the sum of \$17,000 was voted for the purpose of building an additional wing for cells, and on February 16th, 1861, a further sum of \$2,243.01 was appropriated to complete the same. On April 16th, 1868, \$6,000 was appropriated for the building of an additional wing to provide room for female convicts. An act passed April 2d, 1869, provided for the appointment of commissioners to extend the grounds of the prison to the wall of the State Arsenal, to build an additional wing and workshops, and made an appropriation of \$50,000 for that purpose, and in the same month \$9,734 was appropriated for the purpose of completing the wing of the female department. On April 4th, 1871, the sum of \$75,000 was appropriated for the purpose of completing the new or east wing, and on April 4th, 1872, a further sum of \$28,700 was appropriated for the completion of the same. March 3d, 1874, \$12,000 was voted for the construction of gas works for the supply of illuminating gas for the prison. On March 8th, 1877, the sum of \$100,000 was appropriated for the enlargement of the prison and the purchase of a burial ground for deceased convicts. The north wing was remodeled out of this last appropriation and a burial ground purchased. The Legislature of 1895 appropriated \$150,000 for the enlargement and improvement of the prison. The Legislature of 1899 appropriated \$14,000 for alterations in the women's wing of the prison. In 1905 \$250,000 was appropriated for the erection of a new wing, and it was finished in 1907. The addition, which is at the northeast corner of the institution, is one of the most complete in the United States. There are five tiers, each having seventy cells. The interior is wholly of steel and concrete. The cells are separated from the outer walls by a passageway for the keepers and the entire section of each tier is completely enclosed in a cage of steel. Thirty-five cells are controlled by a combination locking device, although any one cell door or a series of doors can be thrown open by a lever system from the end of the corridor where the locking device is located. Between the cell sections there is a narrow utility court from which the ventilation is controlled and where the sanitary parts can be reached without any necessity for going into the cells. Each cell has a steel cot, porce-

lain washstand and sanitary arrangement and is lighted by electricity. Special attention has been given to ventilation. A death house was also built on the prison grounds in 1907 to comply with the law regarding the electrocution of persons condemned to death.

### **THE NEW JERSEY HOME FOR DISABLED SOLDIERS.**

This institution is located in Kearny, Hudson county. It originated in the mind of Governor Marcus L. Ward just before the close of the Civil War. His petition to the Legislatures of 1863-64 resulted in the passage of an act on April 12th, 1864, appointing himself, ex-Governors Daniel Haines, William A. Newell and Charles S. Olden, and Edwin A. Stevens and Rynear H. Veghte as commissioners to examine into and report on the subject. On February 1, 1865, they made their report to Governor Parker and the Legislature appropriated \$50,000 for the desired purpose. Grounds were purchased in the city of Newark and in March, 1866, the same commissioners were appointed managers of the Home. The board appointed Colonel A. N. Dougherty, Commandant; Rev. Samuel T. Moore, Superintendent and Chaplain, and Dr. A. M. Mills, Surgeon, of the Home. It was opened for reception on July 4th, 1866. For twenty-two years the Home remained in Newark, when a new site was selected in Kearny. This comprises about sixteen acres and \$225,000 was appropriated for the buildings, furnishings, &c. On October 4th, 1888, the old home was vacated and the new home occupied. The New Jersey Home is the parent of similar institutions throughout the country. In order to gain admission to the Home the applicant must have served in the army, navy or marine service and been honorably discharged therefrom. He must have lived in the State for at least two years next preceding date of application, or have served in a New Jersey organization, and must be unable to earn a living for himself by manual labor. Since 1888 various additions have been made.

### **NEW JERSEY HOME FOR DISABLED SOLDIERS. SAILORS OR MARINES AND THEIR WIVES.**

Vineland.

This Home was organized in 1898, the sum of \$5,000 having been appropriated for the purpose. A plot of ground,

comprising 20 acres, and a building containing about 75 rooms and basement, situated in the town of Vineland, were purchased for a Home, and in 1899 an additional appropriation of \$21,500 was made to pay for the property. In the same year the sum of \$20,000 was appropriated for altering, repairing and furnishing the buildings. In 1900 a special appropriation of \$13,000 was made for new floors, porches, laundry machinery, engine and boiler and furniture. The Home was opened in December, 1899, for the admission of inmates and the first were admitted January 2d. 1900. In 1901 the sum of \$7,700 was appropriated for an elevator, alterations and appliances, making the cost of building and land \$67,200. In 1903 nine acres of additional land was purchased at a cost of \$2,000 and the same year an act was passed by the Legislature providing for the care and maintenance of widows of veterans, and the sum of \$28,000 was appropriated for the construction and furnishing of buildings necessary to carry out the provisions of the act. An additional sum of \$2,500 was appropriated for extra work and the building was completed and ready for occupancy in July, 1904. Since then two new wings, each eighty feet long and containing some 120 rooms, have been added, and a separate boiler house in the rear of the main buildings erected. A new heating and lighting plant has been installed, and other marked improvements for the care and comforts of the inmates completed. In 1912 the Legislature appropriated \$30,000 for a new hospital.

#### SCHOOL FOR THE DEAF.

This institution, which is located at Trenton, is a part of the public school system of the State, and is open to deaf residents of the State between the ages of six and twenty-one years. The pupils are instructed in the branches of common-school education, and are also trained in some handicraft. Speech is taught to all who can acquire it, and with such success that in some classes it becomes the principal means of communication.

The industrial department is larger and better equipped than in most schools of this kind. From the printing office is issued monthly a paper, the Silent Worker, which, in point of mechanical execution and of quality of contents, ranks as the best issued from any institution in the country. All the work on this paper is performed by pupils of the school.

The wood-working department, under the charge of a graduate of a technical school of high rank, has a course in which theory and practice are united in an unusual degree.

A course of kindergarten work, especially adapted to the deaf child, has been worked out in the school, and has been followed by some of the best schools of the kind in this country.

A building for hospital purposes, designed in accordance with the best modern practice and ample to meet any possible need, was opened in 1899.

The attendance of pupils has risen from 125 in June, 1896, until at the present time it is about 170.

The school possesses a well chosen library, which at present contains about 4,000 volumes, and is rapidly growing.

#### HOME FOR THE CARE AND TRAINING OF FEEBLE-MINDED WOMEN.

##### Vineland.

This institution was established by virtue of the act of March 27th, 1888, the late S. Olin Garrison, who drafted the original law, being its first superintendent. On November 7th, of the same year, he was succeeded by Mary J. Dunlap, M.D., and then by Dr. Madeleine A. Hallowell. Upon organization of the first board of managers, the late Hon. Alexander G. Catell, of Camden county, was chosen President, a place he acceptably filled until his death. He was succeeded by the Hon. Benjamin F. Lee, of Mercer county, Clerk of the Supreme Court, who occupied the position until his death in 1909. Mrs. Emily E. H. Williamson, of Union county, was secretary of the board from its organization until her death in 1909. The first treasurer was the Hon. Belmont Perry, of Gloucester county, he being succeeded by ex-Senator Philip P. Baker, of Cumberland county; the late Senator Barton F. Thorn, of Burlington county, and George B. Thorn, Esq., of Burlington county, the present incumbent. Harry H. Pond was elected President in 1909.

As its official title suggests, this institution has for its object the care and training of feeble minded women. Its location in a peculiarly healthful and fertile portion of the State, the plan and scope of the buildings, as well as their equipment and the employment of modern ad-

ministrative methods, make the Home a subject for favorable comparison with any similar institution in the country. The property consists of about 50 acres.

The most conspicuous building of the Home is that devoted to purposes of administration and instruction, including dormitories and a gymnasium. There is also a laundry, a power-house, with heating apparatus, and pump for raising the sewage of the home into the Vineland system. Fire escapes and a water tower give protection to the State's wards. All the buildings are lighted with gas or electricity.

In 1912 the Legislature appropriated \$60,000 for a new dormitory, &c.

### **TRAINING SCHOOL FOR FEEBLE-MINDED CHILDREN.**

#### **Vineland.**

This public institution is an outgrowth of a private one, which Prof. S. Olin Garrison established in Millville, Cumberland county, on September 1st, 1887. It was opened at Vineland, on March 1st, 1888, with an enrollment of ten pupils. Adjacent properties were soon acquired and a handsome building, costing about \$18,000, was erected in 1890-91. There are fourteen cottages, besides a hospital, large barns, shops and manual training rooms, located on a farm of 260 acres. The school has a fine assembly hall, seating over 600, and also containing seven school rooms, drill room and a gymnasium. The Department of Research has a well equipped laboratory, where studies as to the cause and prevention of feeble-mindedness are carried on.

The plan and scope of training and education by the school, require fourteen teachers in English, Kindergarten, Music, Physical Culture and Manual Trades departments, thereby indicating the special and comprehensive fields of instruction. There is also a custodial department for the idiotic.

The property is worth over \$250,000, real and personal, with a debt of only \$21,000. Besides very good property acquisitions at low cost, at least \$150,000 have been donated to the school since its organization, to aid in the current expenses, in improvements and new buildings.

**STATE VILLAGE FOR EPILEPTICS.**

(Henry M. Weeks Hospital.)

Skillman, Somerset County.

This village is located in Montgomery township, Somerset county, at Skillman Station, on the line of the Philadelphia and Reading Railroad. The location is one of the most beautiful and healthful in the State, and is admirably adapted for the purposes of this kind of an institution. The managers have secured four adjoining farms containing in all about seven hundred and eighty acres.

The four farm houses are now being used, one for the Administration building, one for residence of the Superintendent, one for patients and one for employes.

In 1834 Dr. John W. Ward, Superintendent of the State Hospital at Trenton, realizing the necessity of separating the epileptics from the insane, went before a legislative committee and strongly urged the appropriation of \$50,000 to erect a building upon the grounds of that institution for the proper care of the epileptics. The late Prof. S. Olin Garrison, Principal of the New Jersey Training School for Feeble-Minded Children, at Vineland, early recognized the necessity of separate provision for the epileptics in that institution, and was indefatigable in his efforts to establish the present village.

For a number of years the subject was agitated, and in 1895, in accordance with a resolution passed by the Legislature, the Governor appointed a commission to investigate the number and condition of epileptics in the State. The report of the commission was presented to the Legislature of 1896 and a bill was introduced for the establishment of a colony on a plan recommended by the commission. The bill failing to become a law, the New Jersey State Medical Society, by resolution at their annual meeting in 1896, endorsed the necessity of such legislation. In 1897 the President, Dr. Thomas J. Smith, of Bridgeton, most ably presented the necessity of providing for the epileptics, and urged that the State authorities be importuned most earnestly to revive the movement initiated the year before to establish an industrial epileptic colony in our State. The Society reaffirmed its position, and appointed a committee to urge the matter further.

Through the combined efforts of those interested and with the zealous co-operation of Senator Stokes, of Cumberland, who had charge of the legislation, an act was passed by the Legislature of 1898, and promptly signed by Acting Governor Voorhees, making the necessary provisions for the establishment of the institution. The sum of \$15,000 was appropriated for the purchase of a site and to pay for the equipment and maintenance of the village. The "Maplewood Farm," containing about 187 acres, was purchased for \$11,500, and the village was opened for the reception of male patients November 1st, of the same year.

The Legislature of 1900 appropriated \$30,000 for the erection of two cottages for patients, and \$16,000 for the purchase of two farms adjoining the property. Additional appropriations were made each year from 1901 to 1911, aggregating \$900,000, for extensions and improvements. All epileptics of either sex, over five years of age, and not insane or idiotic are admitted.

In 1912 the Legislature appropriated \$78,000 for new buildings.

### NEW JERSEY REFORMATORY.

#### Rahway.

In 1895 the Legislature passed an act, approved by Governor Werts on March 28 of that year, providing for the appointment of a commission to consist of six persons, who were charged with the duty of building an intermediate reformatory institution for first male offenders. The commission was authorized to set apart the property known as the Edgar farm, located in Union and Middlesex Counties, and then belonging to the State Sinking Fund.

If it were found necessary they were authorized to purchase adjoining property for the completion of the site at a cost not to exceed ten thousand dollars, but this authority was not used.

The institution, when completed, was designed to accommodate not less than one thousand inmates, and the sum of one hundred thousand dollars was appropriated to begin the work.

The site now comprises about 115 acres. That which is not occupied by the buildings or enclosed within a stockade surrounding the same, furnishes occupation to the inmates, and is devoted to the pur-

pose of tillage, to supply farm products and sustain the animals used by the institution.

The original Commissioners were Patrick Farrelly, George S. Mott, David M. Chambers, William A. Ure, John T. Daly and Thomas M. Gopsill.

According to the plans originally adopted the building, when completed, was to have four wings, capable of accommodating 1,024 inmates. The first wing and centre were completed in the year 1901, and inmates were then first received.

First male offenders only are admitted between the ages of sixteen and thirty years.

The criminal courts of the State are empowered in their discretion to commit offenders to the Reformatory instead of State Prison. The original commission was replaced by the present Board of Commissioners, consisting of nine persons, including the Governor, and no more than four to be of the same political party.

The reformatory and grounds are located about one and a half miles south of the City of Rahway. The buildings now erected comprise the guard-room building, northeast and southeast wings, the domestic building and "Tie-to" building, connecting it with the guard-room building, the industrial building, new tuberculous pavilion, independent water system with filtering plant, two trades' school buildings and wall, power house, hospital for contagious diseases, barn, hennery, piggery, shelter station and cold storage warehouse.

The "Tie-to" building, the hospital, the pavilion, barn, hennery, piggery, shelter station and cold storage warehouse were constructed entirely by the inmates and without cost to the State, except for material.

The construction of a sewage disposal system contracted for by the former Board of Managers, has been completed recently by inmate labor.

The inmates are detailed to different trade classes, and do all the work required for betterments and repairs. They enjoy daily educational advantages and are regularly drilled in military tactics.

**STATE TUBERCULOUS SANITARIUM.**

Glen Gardner.

This Sanitarium, which was completed in 1907, is located at Glen Gardner, near High Bridge, Hunterdon county. The site is on the slope of a mountain nearly 1,000 feet above the level of the sea, where the State has acquired about 600 acres. The slope has been cut away and leveled for a considerable space, and here the buildings were constructed. On a clear day the view from this point is one of the most magnificent in this picturesque section of North New Jersey. It looks away over a rolling country of wooded hills and cultivated farm lands to the mountains on the other side of the valley, which run at its foot. Away in the distance like a thin ribbon of silver is the South Branch river, and in whatever direction the eye turns some new and charming scene is encountered. The structure consists of a service building, administration building and east and west wards. The service building is the source of supplies for the institution. It is 84x110 feet, three stories, including basement, in which is the boiler room, engine room and electric light plant. A cold storage is located in the basement. On the second floor is the main dining hall, which is 84x48 feet, the service room, bakery, kitchen, storeroom, butcher shop and cold storage. The third floor is fitted up with rooms for the doctors, employees' rooms, ironing, drying and linen rooms, coat rooms, sterilizing room, &c. All the buildings are built of field stone, stuccoed on the outside and finished with white plaster on the interior. The ward building is 32x150 feet and the administration building 52x120 feet. The buildings are so constructed that additions may be made from time to time as the necessity of the case demands. About 175 patients can be comfortably accommodated in the ward buildings. The water supply is derived from a large reservoir which is kept supplied from the springs. The system of sewerage is among the most sanitary in existence. The total cost of the Sanitarium represents an outlay of about \$300,000.

The first impetus for caring for the State's consumptive poor was given in an address delivered in 1900 before the State Medical Society by Dr. Halsey, then president. A bill was drawn up by a committee of the

society, and was passed by the Legislature in 1902, when a Board of Managers was appointed by Governor Murphy. Of this Board, Dr. Charles J. Kipp of Newark was elected president, and for whom the mountain on which the State Sanitarium was built was named. The Legislature appropriated \$50,000 to carry the bill into effect. The Sanitarium is intended as a model institution, largely educational in character, which would give a practical demonstration of up-to-date methods of treating cases of tuberculosis and point the way for other institutions of a similar type, at the same time extending the direct benefits of its system to as large a number of cases as its necessarily limited facilities would enable it to care for. The institution handles about six hundred cases annually. Its purpose is to arrest the disease in its incipient stage and discharge the patient in such condition that, with the aid of the instruction he receives while at the institution, he may be reasonably certain of being able to effect his own cure. This instruction will prove valuable not only to himself, but to the public in general, as it becomes disseminated through his agency and that of the other patients who undergo treatment and go out again in the world at large. As a rule, the cases selected will be such as can be treated with reasonable expectancy of a cure. In 1912 the Legislature appropriated \$89,500 for new buildings.

#### **BORDENTOWN INDUSTRIAL SCHOOL.**

The Manual Training and Industrial School for Colored Youth located at Bordentown, N. J., is a State institution maintained by appropriations from the State and under the supervision of the State Board of Education.

The school was established to meet the educational needs of the colored people of New Jersey and seeks more and more to fit its students to go out and do intelligently the work to which they are called.

The Literary Department as far as is practicable is adjusted to the needs of the Industrial Training, and an effort is made to throw around the student a home atmosphere.

The school occupies a conspicuous site on the banks of the Delaware River, comprising 225 acres of good farm land. The physical equipment of the school

consists of an administration building, a girls' dormitory, a boys' dormitory and infirmary, a laundry and carpenter shop, a printing office and a group of farm buildings.

Approximately one hundred students are enrolled, this number exhausting the facilities for accommodation.

Tuition is free and a nominal charge is made for board, washing, medical attendance and registration.

In 1912 the Legislature appropriated \$20,000 for a new dormitory.

#### STATE REFORMATORY FOR WOMEN.

The Reformatory is located on a farm of 346 acres one and one-half miles from Clinton, Hunterdon county. There are three houses on the farm.

Number one has been enlarged so as to accommodate 25 people—22 women besides the superintendent, nurse and housekeeper. Number two is for the farmer, and the third is a small house for emergency needs. The barns have also been put in order.

Miss May Caughey, the superintendent, took up her residence at the Reformatory the middle of November, 1912.

The Legislature of 1912 appropriated \$20,000 for the alterations necessary to establish the Reformatory.

The Reformatory was dedicated on May 26th, 1913.

## PARTY PLATFORMS.

---

### DEMOCRATIC.

(Adopted at the State Convention held at Trenton, September 29th, 1914, and presided over by Governor James F. Fielder.)

The Democratic State Convention, composed of delegates chosen by the Democratic voters at open primaries, as provided by the Geran Election Law, hereby adopts the following party platform and pledges the support of its candidates for Senate and General Assembly to each of its articles:

1. We tender our tribute of whole-hearted praise and felicitation to the great New Jersey Democrat, Woodrow Wilson, who is now the leader of the Nation at Washington. His has been the opportunity and the duty to deal with national problems as difficult and as delicate as have ever confronted any leader or statesman. That he has met and performed the great tasks laid upon him, with courage, wisdom and patriotism of the highest order, is, we believe, conceded by Americans without regard to party, as well as by thoughtful observers throughout the world. In view of the unspeakable horrors that now afflict the nations of Europe, we should have, each day while the awful conflict lasts, a new impulse of thankfulness for the firm and patient guidance that has saved our Country from the curse of armed conflict with any people.

In domestic affairs, as well as in foreign policy, we may also point with pride to the aims and achievements of the Democratic Administration at Washington. The steps taken and under way by the Federal Department of Justice for the suppression of private monopolies and the establishment of fair trade and commerce conditions throughout the country are certain to result in practical benefit to the American consumer.

2. To the Democratic members of both Houses of Congress, from this State, who have followed President Wilson's leadership, we also tender praise and congratulations. The laws for the reform of an unjust tariff system, for the destruction of the Money Trust and for the conservation of the great natural resources of the country may be mentioned as among some of the great constructive accomplishments of the Democratic Legislature at Washington. We trust that the citizenship of his home State will register their approval of President Wilson's administration by voting to send to Washington, at the coming Congressional elections, men pledged to support the President, and to continue the

great program of constructive reforms upon which the nation has entered.

3. We congratulate Governor James F. Fielder upon the success of his administration as the Chief Executive of the State. We believe that the people have recognized in his administration a freedom from the control of selfish and unworthy private interests, and a devotion to the welfare of the citizenship of the State, generally. Under his leadership, laws have been enacted to effect the long-delayed reform of the jury system of the State; the State revenues have been increased by a just revision of the taxes upon the estates of deceased persons; the unjust Hillery Maximum Tax Act has been repealed; a business-like system of checks and balances has been created to govern the disbursement of State funds; county and municipal revenues have been enhanced by reasonable taxes upon banking corporations; the employment of child labor in factories and mercantile establishments has been regulated and restricted; elections in commissioned governed municipalities have been simplified and rendered less expensive by the abolition of primaries and the establishment of preferential voting; the business of collection agencies as well as that of lending money on personal property and salary warrants has been regulated so as to destroy abuses long complained of; health and pure food laws have been extended; the prison laws have been amended and improved and many other progressive legislative reforms have been inaugurated.

4. We commend the record of the last Legislature in the direction of reducing the volume of legislation and believe that a further improvement in the direction of fewer as well as clearer and better laws should be effected in the next Legislature. In this connection we point to the enactment by the last Legislature of a law creating an inexpensive Legislative Reference Bureau in connection with the State Library, as well as a provision for an expert bill-drafting advisor in the Attorney-General's Department.

5. We take pride in the condition of State finances under the present administration. Appropriations have been prudently curtailed while meeting all public needs, and a system of examination and audit has been established in the State Comptroller's office that has eliminated waste and extravagance in the spending of public funds. At the same time the State revenues have increased and are at present more than adequate for the needs of a government economically administered. We, therefore, denounce the deliberate misrepresentations circulated for political effect regarding the condition of State finances. To the unthinking and uninformed, it has been made to appear not only that the State has been prodigal in its expenditures, but that a State tax is imminent, when the very reverse of these conditions is the truth.

6. The Geran primary and election law has successfully

stood the test of repeated trials. It affords all citizens equal opportunity to aspire to public office; it insures clean registration, fair primaries and honest elections; it has completely met the desire of the people for relief from controlled conventions and in consequence the machines and the bosses have always opposed it. Each year since its enactment the Republican party has criticised its provisions and has promised, if entrusted with legislative power, to alter and amend its salutary requirements. We fear an alliance between that party and the political machines and bosses, and we do not desire to trust the enemies of this law with the power to alter it. It shall be our duty to maintain its provisions inviolate.

7. We renew the declaration, endorsed by all political parties in the State, for the re-enactment of a law providing for a simple and practical system of preferential voting at primary elections.

8. We favor the maintenance of laws to promote the most humane and reformatory influences in the treatment of persons convicted of crime. The plans already undertaken by the State for the employment of prisoners in useful and productive industry on the State Farm, in road building camps and in the manufacture of articles for use in State institutions, should be extended as rapidly as possible, to the end that the prison contract labor system shall be completely discontinued and desirable economies effected in the conduct of the whole penal system, while incidentally promoting the physical and moral welfare of the convict.

9. The educational requirements of all sections of the State should be met with adequate school facilities. We recognize the necessity for additional normal schools in the northern and southern parts of the State and our representatives in the Legislature will use their best efforts to provide such further school accommodations.

10. Complaint by various school districts that the school building code is oppressive and compels the construction of unnecessarily expensive school houses, was recognized at the last legislative session by the appointment of a committee to inquire into the subject. This committee will report at the next session when the matter will receive careful consideration and such changes will be made in the building laws as may be found necessary, so that justice may be done the complaining school districts and the safety and health of the school children may be conserved.

11. We recognize the great commercial value to the State of the proposed ship canal connecting New York bay with deep water in the Delaware river at Bordentown, and we believe that this project has derived increased value from recent naval happenings in the European war. Its strategic importance to the United States in the event of hostilities with a foreign nation cannot be overestimated. We, therefore, favor the taking of all practicable steps to promote

the establishment of this great addition to the resources of New Jersey. We urge the members of the Senate of the United States and the House of Representatives to use their best efforts to secure this desired improvement.

12. The State is beginning more and more to realize the great economic value of the fish and game industry. With our pound fisheries catching more than thirty million pounds each year, New Jersey is feeding America. The stocking of streams and rivers with all kinds of valuable fish, and the farms and forests with pheasants, quail and many other varieties of game, contributes to the support and comfort of thousands of homes.

We believe that the fish and game industry and interests should be protected by careful and judicious legislation. The present fish and game laws are a piece of patchwork, many of which were passed years ago and have since been amended and modified so that it is impossible for anyone except a lawyer to determine what is legal or illegal. These laws should be re-codified, brought together in one general act, and the work of re-codification entrusted to the supervision of practical and expert men whose object should be to preserve our fish and game, and at the same time allow our citizens the largest liberty and license consistent with the wise course of preservation.

13. Agriculture is the fundamental industry of the world. New Jersey is especially proud of its splendid, fertile farms, and we pledge our hearty support to the advancement of every agricultural interest. We desire to compliment the State Agricultural College at New Brunswick and the Experiment Station connected therewith for the stimulus, due to encouragement and liberal appropriations by the Democratic Legislature, which they have given to scientific and intensive farming throughout the State. We deplore the great difference in many cases between the price which our farmers receive for their produce and the price paid by the consumer, and we will heartily co-operate with every person and in every movement to eliminate this difference, so that the farmer shall receive a just price for his products and the consumer not be robbed by having to pay an exorbitant price therefor. We commend the establishment by municipalities of public markets, thereby bringing the farmer and consumer closer together to the great benefit of both.

Good roads go hand in hand with agriculture. They are the best investment which a county or State can make for the prosperity and advancement of its people. As a State, we feel proud of our good roads. We pledge ourselves to a systematic method of repair, maintenance and extension of our good road system with all possible economy and rapidity.

14. We commend the action of the Democratic Legislature of 1914 in its adoption by concurrent resolution of three proposed amendments to the Constitution of the State, by which provision will be made for the election of Assembly-

men by districts; for an easier method of amending the Constitution and for insuring complete home rule to the municipalities of the State, and we pledge ourselves to the re-enactment of these proposed amendments in order that they may be submitted to the people for adoption as part of the fundamental law of this State. By providing for Assembly districts, each portion of the larger counties will be secured by representation from its own locality. We urge the proposed amendments as in line with the best thought of the day, and we also commend the proposed amendment providing for home rule in the municipalities in this State.

15. We are in favor of the submission to the people of the proposed constitutional amendment granting equal suffrage to all citizens of the State.

16. The Democratic party has given to the people legislation of the character of the Full Crew Bill, Eight-Hour-a-Day Law, and other laws favorable to the workingman. We commend these laws and the Democratic Legislatures that have enacted them and pledge ourselves to preserve them intact and such further laws as may be required to better the condition of our working people.

#### REPUBLICAN.

(Adopted at the State Convention held at Trenton on September 29th, 1914, and presided over by Senator William T. Read of Camden county.)

The Republican State Convention held this twenty-ninth day of September, 1914, according to law, respectfully submits to the voters of the State of New Jersey the following platform for their consideration:

This convention is mainly composed of candidates for the Senate and General Assembly, and we consider our platform to be a promise to the people of New Jersey. If the people accept it by electing us to office, we shall consider it as an offer and acceptance according to the law of contracts, which means a binding obligation upon ourselves to fulfill all of our promises.

We condemn the record of the Democratic party in our State because it has failed to keep its platform contracts with the people. In 1913 out of twenty-three pledges they fulfilled six, doubtfully provided for three others, and absolutely failed in fourteen. In 1914 out of sixteen pledges they performed three, partially fulfilled two and utterly failed in eleven. During these years the Republican party introduced legislation to fulfill all their pledges, but because of Democratic majorities were unsuccessful in having many of them enacted into laws. We feel that this record entitles us to have our offer accepted.

New Jersey is in a serious financial condition. When the Republican party took over the management of the State in 1894 the treasury was empty. From 1894 to 1910 the various Republican administrations so conducted the affairs of the State that they spent less than their income and on October 31st, 1910, there was a balance in the State treasury of over \$2,100,000, with uncompleted contracts of \$500,000, leaving a free balance of \$1,600,000. Since 1910 the Democratic party has been in power in the State, and on October 31st, 1913, the State treasury showed a balance of \$1,600,000, with uncompleted contracts of \$1,300,000, leaving a free balance of but \$300,000.

In the Democratic platform of 1910 the Republican party was criticised because the expenses of the State had grown from \$2,000,000 under the last Democratic Legislature to \$5,000,000 in 1910, under sixteen successive Republican Legislatures, an increase of less than \$200,000 a year, while the population during that time increased from 1,500,000 to 2,500,000.

Since 1910 the Democratic party has been in control of the State of New Jersey and the expenditures of the State have grown from \$5,000,000 to \$8,000,000 or about \$750,000 a year, while the population has increased but 300,000 in all that time. In the year 1913 under Democratic administration the State spent \$700,000 more than its income, while the appropriations exceeded by \$457,000 the amount there was in sight in the treasury.

The Democratic administration in national affairs, representing a minority of the voters of this country, have kept Congress in almost continuous session and has enacted important legislation without due deliberation and debate, under a caucus rule more dictatorial than was ever exercised in the history of national legislation. It passed a tariff bill that aided the foreign producer at the expense of the American manufacturer and threw thousands of American workmen out of employment, impairing the prosperity experienced under Republican rule. It has levied taxes upon languishing business to make up the deficit caused by relieving importers from the payment of customs duties. It has passed extravagant appropriations in spite of the reduced earning capacity of the people, appropriations which would have been still greater but for the patriotic opposition of the Republican Senators; proposes to levy a war tax of \$100,000,000 upon every man, woman and child in the land at a time when the nation is at peace with all the world. Its low tariff has not, as promised, in any way reduced the cost of living while imposing this additional tax burden. It has violated its platform pledges on the toll questions; it has lowered the standard and efficiency of our diplomatic service; it has denied the constitutional right of petition and of free speech by accusing citizens who appealed to their representatives of being guilty of a conspiracy to in-

fluence public opinion. It has interfered in the internal affairs of Mexico without affording protection to the lives and property of American citizens and without establishing peace and order in Mexico itself. It has gerrymandered the regional bank districts under the new Banking and Currency Act without regard to contiguity of territory or the convenience of trade and commerce. It failed to provide for a merchant marine which is now sorely needed for the trade, not only of this nation but the world, and it has left this great nation, with its magnificent resources helpless, when it should be independent in this crisis of a foreign war. It has turned the balance of trade against us, made us debtors instead of creditors of Europe; caused a drain upon our gold reserves; strained our credit to pay our debts abroad that was needed to stimulate our industries at home. It has persecuted instead of regulating business. It has made Congress the subservient mouthpiece of a single individual with more power than an autocrat, contrary to the principles of representative government, and setting a dangerous precedent in the event of an incompetent or arbitrary chief magistrate. It has added confusion to the laws regulating business; held enterprise in check because of ill-defined policies; discouraged individual initiative until the wheels of industry have slowed down. Labor has lost its wage and the American workman is driven to idleness, at a time when we should be the workshop of the world. Democratic policies promise no relief.

In both State and national affairs the Democratic party has increased the burden of taxation; has decreased the resources of income and has increased the expenses of government. It has increased the number of office holders and increased the salaries of other office holders, and has made no endeavor to economize and its administration has not tended toward efficiency in government.

Our first and paramount promise to you, therefore, is that if we are elected to office we shall endeavor to curtail expenses; increase revenue from the natural resources of our State without adding to the burden of taxation; decrease exorbitant salaries and not increase the number of office holders, so that economy and efficiency in State affairs shall be a fact and not a theory.

For two years past our Democratic opponents have unequivocally promised a reduction in unnecessary offices and boards by consolidation in the interests of economy and efficiency. A commission appointed for that purpose, which last year was Democratic in its majority, has presented detailed reports accompanied by actual legislative bills to carry out carefully considered recommendations. While the Legislature has been Democratic in both branches, not one important measure of this series has been adopted, nor any alternatives suggested. On the other hand, Republican members of both Senate and House have consistently voted to carry out the major part of these recommendations. We

promise again to put forth our best efforts to bring about such consolidation in the interests of economy and efficiency in order to place the government of the State on a more business-like basis and thus reduce expenses rather than impose unnecessary tax burdens on the public to make up existing deficits.

We believe in the use of plain, unmistakable language in the preparation of our laws and condemn the use of words and phrases that render such acts unenforceable, as has been the case in some of those passed by recent Democratic Legislatures, where the judges of our courts have been compelled to denounce as "absurd" the language of certain statutes wherein the Democratic Legislature denounces as criminal in one act what it tried to compel by another.

We call the attention of the citizens of New Jersey to the raid upon Civil Service and efficient government made by the Democratic party of the State in the last few years. When entrusted with the administration of the State we promise to remedy this evil so that we may have the maximum of efficiency with the minimum of expense.

The laboring class has been greatly aided in their life and health by the Labor Bureau created under a Republican administration in 1904, by which more light and air, better fire protection and other safeguards against personal injury have been given to the workingman. We promise to continue our protection of the laboring class by laws which will at the same time have regard to the business man so that he may bear no undue burden.

The Democratic party has promised to reduce the cost of living, but so far has been noticeably unsuccessful. We promise to give this matter intelligent study so that scientific laws may be enacted covering this question. The increased expenses of the people is felt mostly in the necessities of life in order to exist, and we promise to help the people in decreasing their living expenses through the enactment of laws allowing the creation of public markets.

The cost of food is often made greater because of the failure of crops, due to uncontrollable weather conditions. It may be possible to reduce the cost of production by more intelligent farming, and we promise to assist the farmer by agricultural experiment stations so that he may thereby learn how to get the greatest production from his ground with the least amount of expenditure, and we further promise to encourage the establishment, if practicable, of irrigation systems in the rural districts of the State whereby the farmer may not have his crops endangered by dry seasons with the result that the value of his crops will be greatly increased.

One of the great and alarming items of expense in New Jersey is due to the care of our State wards, the criminal, the insane, the feeble-minded and the epileptic, to care for whom our State expends about \$3,000,000 or over one-third of its yearly revenue. We promise to study this problem

so that by the use of modern methods and modern institutions this immense amount of expense to the State should be greatly reduced.

We re-affirm our pledges made last year in regard to election laws, State Normal Schools, equalization of tax assessments and grade crossings.

We favor the submission to the people of the woman suffrage and home rule amendments to the Constitution; also the more flexible method of amending the Constitution, and permitting excess condemnation of land for public improvement.

The highways of New Jersey are a model for the other states of the Union, but through Democratic extravagance in other affairs, these roads have been neglected and run down. We promise to care for our good roads, which are not only a source of pleasure but are the arteries of our produce farms.

The right of local self government in matters of education is unnecessarily denied under our present laws. Promises of last year to remedy this grievance were not fulfilled. While we realize the necessity of a State system of education to promote uniformity, we pledge ourselves to restore to the local school authorities such proper powers as they have been denied.

We re-affirm our policy of State control of watersheds, so that the potable water supply may be free from corporate ownership and adopted to the best use of all the people of the State.

We agree to encourage the development of the waterways of our State and its various water facilities, so that commerce in this direction may be improved and perhaps an additional source of revenue derived by the development of these natural resources.

We oppose the policy of the Democratic administration in playing politics with the banking interests of the country and commend the patriotism and liberality of the bankers of New Jersey, both State and national, in caring for and protecting the business interests of our State when the unfortunate European war resulted in unusual demands upon them. They have freely loaned their funds at the usual and customary rates of interest and oftentimes at a much less rate than in other sections of the country.

In recent years doctrinaires, visionaries and demagogues have exhorted the people by many promises which have proven vain and useless. We feel that the time has arrived to stop this impracticable agitation. If our state is to continue to advance along successful lines it must be done by deep study and efficient management, being gradually built up from year to year, step by step, with constructive and needful legislation. The Republican' party, through its candidates, will be returned to power so that New Jersey may throw off the burden of mismanagement and impending bankruptcy to enter upon a new era of happiness and pros-

perity, so that in its financial affairs and in its care for the need of all its citizens it will stand as pioneer of humanity among the states of the Union just as it stood as a pioneer among the thirteen Colonies to protest and revolt against the unjust and unfair taxation in the spirit of '76.

### PROGRESSIVE.

(Adopted at the State Convention held at Trenton, on September 29th, 1914, and presided over by John A. H. Hopkins, Morristown.)

"We, the Progressive party of New Jersey, in convention assembled, re-affirm the Progressive national platform of 1912, and the New Jersey State platform of 1913; therefore,

"We oppose the vicious caucus rule, the corrupt use of money, the domination of party by individuals or cliques, placing party interests above public welfare, trading special interests for party support, intimidation of individuals by political influence, and corrupt use of patronage for political advantage, as practiced by the Democratic and Republican parties, and as being absolutely inconsistent with the principles of the Progressive party.

"We stand for the initiative, the referendum and the recall, women's suffrage, land value tax, local option, home rule for municipalities, commission government, non-partisanship in municipal affairs, co-operation with civic movements for the public benefit, establishment of labor bureaus, and agricultural and vocational training in public schools, as being representative of the great principles on which the Progressive party was founded, and as tending to eliminate our present political and industrial slavery, and to establish the 'rule of the people, by the people, and for the people.'

"We favor a sufficient appropriation to render the present widows' pension law effective so that worthy applicants may get immediate action and may not be kept waiting several years before their cases are acted upon.

"We favor a thorough investigation of the means and methods by which the food supply of the State is moved from producer to consumer and pledge our candidates to legislation that will make it easier for the producer to dispose of his produce and cheaper for the consumer to supply his wants.

"We favor action by the Governor and Legislature to insure prompt and speedy trials, and that laws be enacted whereby the judge shall be required to render decision within a stated reasonable period.

"We are in favor of a law fixing the standard of quality of gas supplied by public service gas corporations of this State."

## SYNOPSIS OF SCHOOL LAW.

---

The State Board of Education consists of eight members, not more than one of whom shall reside in the same county, and not more than four of whom shall belong to the same political party. It has control of the State Normal Schools, the School for the Deaf and the Manual Training and Industrial School for Colored Youth. It confirms the appointment of the county superintendents of schools, decides appeals from the decisions of the Commissioner of Education, and makes rules for the granting of teachers' certificates and for carrying into effect the school laws of the State. It appoints an inspector of school buildings and an inspector of accounts.

The Commissioner of Education is appointed by the Governor and confirmed by the Senate. He appoints the county superintendents of schools, decides controversies that arise under the school law; may withhold the State school moneys from any district for neglect or refusal to comply with the provisions of the school law, and has general supervision of the public schools. There are four assistant commissioners; one acts as inspector of secondary schools, another as inspector of elementary schools, another as inspector of industrial education, and another to hear controversies and disputes arising under the school law.

There is a superintendent of schools for each county, appointed by the Commissioner of Education and confirmed by the State Board of Education. The County Superintendent apportions the school moneys among the districts in his county, has general supervision of the schools and, in connection with the local Board of Education, prescribes the course of study to be pursued in the district.

Each municipality in the State constitutes a school district, unless by a vote of the people two or more municipalities decide to unite and form one district. There are two classes of school districts, cities forming one class and all other municipalities the other, but a district in either class may, by a vote of the people, be transferred to the other class. The members of the Board of Education in a city school district are appointed by the Mayor.

In order to be eligible to membership in the Board of Education, a person must be a citizen of the United States and must have been a resident of the district for at least three years immediately preceding his or her election or appointment and must be able to read and write. A city school district may have a city superintendent, but until one is appointed the County Superintendent has supervision of the schools.

In each city school district there is a Board of School Estimate, consisting of the Mayor, two members of the body having the power to make appropriations for city purposes, and two members of the Board of Education. The Board of Education presents its estimate of the amount of local appropriation needed, and the Board of School Estimate certifies to the body in the city having power to make appropriations, the amount to be raised for school purposes. The amount so certified must be raised.

In districts other than cities the Boards of Education consist of nine members each, elected by the people on the third Tuesday in March. The term of office begins the first Monday in April. The qualifications for membership are the same as in city school districts. The special district school tax is voted either at the annual meeting or at a special school meeting called by the Board of Education. Bonds for school houses are authorized by the legal voters. School bonds cannot be sold at private sale except to the Trustees of the School Fund or Sinking Fund Commissioners unless said Trustees or Commissioners have refused to buy them. Bonds cannot be delivered to any purchaser other than the Trustees of the School Fund except upon payment of full purchase price. Women may vote at district meetings on all questions except the election of members of the Board of Education, which is prohibited by the Constitution. Truant officers and janitors cannot be discharged or their compensation decreased except for cause and after a hearing.

Funds for the support of schools come from the following sources: First, from the income of the State School Fund. The principal of this fund is derived almost entirely from the sale and rental of lands under water belonging to the State. The principal cannot be used for any purpose, and the income can be used only for the support of public schools.

This income amounts to \$200,000 per annum. Second, from State appropriation made by the Legislature to reduce the State school tax. Third, from State school tax, an amount which when added to the State appropriation will make a sum equal to two and three-fourths mills on each dollar of the taxable property in the State. Fourth, the railroad tax received by the State in excess of one-half of one per cent. of the value of the railroad property. Fifth, interest of surplus revenue, and Sixth, local school tax.

The \$200,000 from the school fund is apportioned among the counties by the State Superintendent on the basis of the total days' attendance of pupils in the public schools. The State appropriation is apportioned among the counties by the State Comptroller on the basis of the ratables. Ninety per cent. of the State school tax paid by each county is returned to it, and the 10 per cent. received from all the counties forms the reserve fund, which is apportioned among the counties in the discretion of the State Board of Education. The railroad tax is apportioned on the ratables.

The County Superintendent apportions to each district \$600 for the Superintendent or Supervising Principal, if there be one; \$500 for each teacher in a special class for sub-normal children; \$400 for each Assistant Superintendent, and for each permanent teacher employed in a high school having a full four-years' course of study; \$300 for each permanent teacher employed in a high school having a full three-years' course of study; \$200 for each permanent teacher employed in any kindergarten, primary or grammar grade or in a high school having less than three years' course of study; \$80 for each temporary teacher employed more than four months; \$80 for each evening school teacher; \$25 for each high school pupil for whom a tuition fee is paid to another district; \$5 for each pupil below the high school grade for whom such tuition fee is paid, and 75 per cent of the cost of transportation of pupils to schools in other districts. The balance of the State school moneys received by the county is apportioned on the basis of the total number of days' attendance of the pupils.

The custodian of municipal funds is the custodian of school moneys, unless the Board of Education appoints the collector as custodian. In either case, the compensation of the custodian must be fixed by the Board of Education and

paid from school funds. If there are two or more municipalities in the district, the Board of Education may appoint its own custodian.

Each collector must pay to the county collector the amount of State school tax due from his taxing district not later than December twenty-second. If the tax is not paid by that date the County Superintendent must withhold the amount of reserve fund apportioned to the district and divide it the following year among all the districts in the county. The county collector must pay the State school tax to the State Treasurer not later than January twentieth.

If a district provides a course in manual training, and such course is approved by the State Board of Education, the State will give to such district each year a sum equal to that raised in the district for manual training, provided the amount raised is not less than \$250 or more than \$5,000.

Every district must provide free text-books and supplies for all pupils and must also provide a flag for each school house, which flag must be displayed every day the school is in session. The selection of a text-book requires the vote of a majority of the whole number of members of the Board of Education. A Board of Education must employ medical inspectors and attendance officers.

Every school which raises \$20 to establish a school library may receive a like amount from the State. After the first payment, the State will give \$10 each year that the school raises the same amount. Library moneys may be used for library books, reference books, apparatus, or educational works of art.

All plans for school houses must be submitted to the State Board of Education for suggestion and criticism. Every school house hereafter erected must comply with the following requirements: First, light must be admitted to the class rooms only from the left and rear. Second, the total light area must equal 20 per cent. of floor space. Third, there must be 18 square feet of floor space and not less than 200 cubic feet of air space for each pupil. Fourth, all rooms must have a proper system of ventilation which will supply 30 cubic feet of fresh air per minute for each pupil. Fifth, all ceilings must be at least 12 feet in height and all stairs

must be at least 4 feet wide, with intermediate landings, enclosed in brick walls or by partitions of slow-burning construction, and without open wall holes. Sixth, a school house having eight rooms must have two flights of stairs, each four feet in width, or one flight not less than six feet in width, one having from eight to sixteen rooms, two flights of stairs not less than five feet in width, and one having sixteen or more rooms, four flights of stairs not less than four feet in width, or two flights not less than six feet in width. Seventh, all ceilings must be either metal, wood or plaster on metal laths and painted white or some light tint.

A person cannot be legally employed as a teacher unless he holds a teacher's certificate in full force and effect at the time he begins teaching. Before beginning to teach he must show his certificate to the Superintendent of Schools. A Board of Education may adopt rules governing the employment of teachers. In the absence of rules, the contract must be in writing in triplicate, one copy filed with the Board of Education, one with the County Superintendent, and one with the teacher. The employment, promotion or dismissal of a teacher requires the vote of a majority of the whole number of members of the Board of Education. After three years' continuous service a teacher cannot be removed except upon charges and after a hearing.

All persons appointed as teachers, principals or superintendents, who have not taught in this State prior to January 1st, 1908, are members of the Teachers' Retirement Fund by virtue of such appointment.

The State Board of Examiners consists of the Commissioner of Education, the Principals of the Normal Schools and a County Superintendent and a City Superintendent appointed by the State Board of Education. This Board issues certificates valid in all parts of this State and in any school or grade.

All kindergarten teachers must hold special kindergarten certificates. Special certificates may be issued for kindergarten, physical training, manual training, music, drawing, modern languages, commercial branches, cooking, sewing, agriculture and penmanship. All applicants for certificates must file testimonials of good moral character, and, in case of previous experience, of success as teachers.

Graduates of the Normal Schools receive State certificates. Graduates of normal schools in other States may have their diplomas endorsed, provided the course of study pursued is equivalent to the course in the New Jersey Normal Schools, and the State in which they were issued grants reciprocal privileges to graduates of the New Jersey Normal Schools.

All children between the ages of 5 and 20 are entitled to attend the public schools in the districts in which they reside. If a kindergarten has been established, children 4 years of age may attend. A Board of Education must provide suitable school facilities for all the children desiring to attend school. The Board of Education may provide for the education of pupils in the higher grades by payment of tuition fees to adjoining districts. If a child lives remote from any school in the district, the Board may transport such child to school or pay for its tuition in another district. A Board of Education may close a school and transport all the children to another school. Children who have never attended any school can be admitted to a public school only during the ten days immediately following the opening of the school in the fall and during the first five days in January and April, except by the vote of a majority of all the members of the Board of Education.

All children between the ages of 7 and 16 must attend either a public or private school every day such school is in session, unless they are taught at home or are physically or mentally unfit to attend. Children between 14 and 16 years of age who have completed five yearly grades may be granted certificates permitting them to go to work. The parent of a child who does not attend school may be proceeded against before a magistrate as a disorderly person. If the parent is unable to control the child, such child may be proceeded against as a disorderly person.

Corporal punishment in all public and private schools is absolutely prohibited.

## BIOGRAPHIES

## GOVERNOR OF NEW JERSEY.

## JAMES FAIRMAN FIELDER.

Governor Fielder was born in Jersey City, February 26th, 1867. His ancestors on his mother's side were Hollanders and on his father's side, English. They were among the earliest settlers in the State of New Jersey. The families of both father and mother of Governor Fielder have been well known in the religious and political history of the State. His mother was Eleanor A. Brinkerhoff, a sister of former Senator William Brinkerhoff. His father was George B. Fielder, Register of Hudson county and member of the Forty-third Congress. His paternal grandfather was a leading citizen of Jersey City and was a member of Assembly from the county of Hudson in 1871, and his maternal grandfather was for many years a county judge of Hudson county. The Brinkerhoffs were pioneers in the establishment of the Dutch Reformed Church in the State, and took a very prominent part in establishing and erecting the old Bergen Dutch Reformed Church which now stands near Bergen Square in Jersey City, one of the oldest churches in the State. The Governor is a member of St. John's Episcopal Church in Jersey City.

Governor Fielder attended the public schools and high school of his home city, and later finished at the Selleck School at Norwalk, Conn. He attended Columbia University Law School, from which he graduated in 1887 with the degree of LL.B. After his graduation he served his apprenticeship in the office of his uncle, ex-Senator Brinkerhoff, and was admitted to the bar in 1888. He was a member of the House of Assembly from Hudson county in 1903 and 1904, and in 1907 was elected to the Senate. In 1910 he was re-elected by the largest majority of votes ever given to

a State Senator from his county. On June 4th, 1895, Governor Fielder married Mabel Cholwell Miller, of Norwalk, Conn.

In his younger days Governor Fielder was a member of the Democratic County Committee of Hudson county, and since his entry into politics he has progressed step by step. He occupied positions of prominence on the most important committees of the House of Assembly during his terms in that body, as well as in the Senate. He was elected President of the Senate by his colleagues in January, 1913, and when Governor Wilson became President of the United States he became Acting Governor by virtue of the constitution. The election of Governor Fielder as President of the Senate was more significant than other elections to this important office, because at that time Governor Wilson had been elected President of the United States, and it was known that the member of the Senate elected as president of that body would be the Governor of the State to succeed Governor Wilson. His Democratic colleagues in the Senate cast their votes unanimously for Governor Fielder, and his election met with the universal approval of his party. President Wilson himself was so well pleased with the selection of his successor that in his message to the Legislature, delivered prior to his departure from the State to take up his duties as President, he expressed his satisfaction as follows:

"May I not in closing express the satisfaction I feel in the knowledge that when I lay down the duties of Governor I shall leave them in the hands of Senator Fielder, a man of proved character, capacity, fidelity, and devotion to the public service, a man of the type to which the people of this State desire their public men to conform."

Governor Wilson resigned his office as Governor on the 1st of March, and in turning over to Senator Fielder the great seal of the State in the presence of the House of Assembly and Senate assembled in joint session, he again paid a glowing tribute to the qualifications of Governor Fielder.

Governor Fielder served as Acting Governor from March 1st to October 28th, 1913, when he resigned as Senator from Hudson county, thus creating a vacancy in the office of Governor, and was succeeded by Leon

R. Taylor, of Monmouth county, Speaker of the House of Assembly.

James Fairman Fielder was nominated as a candidate for Governor at the primary election held on September 23d, 1913, by a majority of 45,299, over Frank S. Katzenbach. At the regular State election held on November 4th, he was elected Governor over Edward Casper Stokes, Republican, and a former Governor, by a plurality of 32,886. He was inaugurated on January 20th, 1914, for a term of three years. His salary is \$10,000 per annum.

Fielder, Dem., 173,148; Stokes, Rep., 140,298; Colby, Prog., 41,132; Reilly, Soc., 13,977; Mason, Pro., 3,427; Butterworth, Soc.-Lab., 2,460; Dwyer, Ind., 875. Fielder's plurality, 32,886.

## UNITED STATES SENATORS.

## JAMES E. MARTINE, Plainfield.

Senator Martine, who, on March 4, 1911, succeeded John Kean as one of the United States Senators from New Jersey, has the distinction of being the first member of the Upper Chamber of Congress from an eastern state, who obtained his election as a result of a direct vote of the people.

Mr. Martine was elected United States Senator in a joint session of the Legislature on January 23, 1911, following an exciting and notable campaign resulting from the demand that the Legislature acquiesce in the choice made in the direct primaries on September 13, 1910. Under the direct primary law, Mr. Martine submitted himself as an aspirant for the Democratic nomination for United States Senator. He received 47,458 votes, or four times as many as his opponent.

Senator Martine was born in New York City, August 25, 1850. Subsequently his parents moved to Plainfield, where his father, Daniel W. Martine, purchased a farm of 160 acres, surrounding a house which is now 175 years old and in which the Martine family live. Senator Martine's father died when the former was still in his teens and since that time he has been actively engaged in directing the affairs of the Martine estate. For thirty years Senator Martine was engaged in practical farming on the acres left by his father. In recent years, he has combined farming with real estate operations. Of the original farm, 100 acres have been developed into fine residential property under the personal supervision of the Senator and is now intersected by numerous streets along which are beautiful houses, more than fifty of which were constructed under his direction.

Senator Martine has been active in public life of New Jersey for more than forty years. Several times he has been a candidate for Representative in Congress and for Legislative office in New Jersey, but in each instance he has accepted the nomination for of-

fice at the urgent request of the Democrats of his district and not as a self-seeker for political honor. He would never accept an appointive office. His term will expire in 1917.

#### WILLIAM HUGHES, Paterson.

Senator Hughes succeeded Senator Frank O. Briggs in the United States Senate on March 4, 1913. Mr. Hughes was chosen for Senator at the Democratic primary election held on September 24, 1912, the vote being as follows: Hughes, 62,532; Smith, 33,490; McDermott, 5,291; Wescott, 3,859. The Legislature ratified the selection.

Senator Hughes was born in Ireland, April 3, 1872. He came to this country at an early age, received a common school education, worked in the silk mills of Paterson, studied typewriting and stenography at a business college in that city and became a law student in the office of William M. Rysdyk, of the same city. He enlisted in Company A, Second Regiment, N. G. N. J., in 1898, and served five months at Sea Girt and Jacksonville, Fla., during the Spanish-American war. At Sea Girt he was detailed as stenographer to Governor Voorhees and at Jacksonville to Major-General Fitzhugh Lee. When the regiment was mustered out of service he entered the law office of William Nelson, Paterson, and subsequently that of Attorney-General John W. Griggs, and in June, 1900, was admitted to the bar. He has always been closely identified with organized labor and was counsel in several important cases. He was a member of Congress eight years and was appointed Judge of Passaic county in 1912.

He resigned the office of Representative in Congress in September, 1912, and the judgeship a short time before he took his seat in the United States Senate.

### THIRD DISTRICT.

Middlesex, Monmouth and Ocean Counties.

(Population, census of 1910, 230,478.)

#### THOMAS J. SCULLY.

(Dem., South Amboy.)

Mr. Scully was born in South Amboy, N. J., September 19, 1868, and is in the towing and transportation business. He received his education in the schools of his native town and at Seton Hall College, from which he was graduated with honors. His father, John Scully, established the towing business when the Congressman was only six years old. When he left college young Scully was taken into the business by his father, and from that time dates the remarkable growth of the Scully Towing and Transportation Company, which is far in excess of anything of its kind on this hemisphere. Fifty odd ocean-going tugs and barges, bearing the sign of this company, transport over a million tons of freight a year. They poke into all the quarters of the world.

John Scully started his towing business in 1874, practically as a local enterprise. He towed all the freight from the Pennsylvania terminal at South Amboy, up to New York harbor, and in due time also got the terminal business of the Lehigh Valley at

Perth Amboy. His enterprise thrived as the railroad business thrived, and, indeed, it thrived only too well, for the Pennsylvania Railroad Company, seeing its success, decided to go into the towing business itself. Its own fleet of tugs steamed up the bay, took the lighters, and left the Scully tugs to lie at their docks or seek other fields. The Lehigh Valley followed suit.

It was while the Scully tugs were seeking other fields that Thomas stepped from college to the towing office. While his father is still in the business, the son is now the actual head of the towing and transportation company, and he is the man who has raised the business from a local to a world-wide one. The company employs from 500 to 600 men, pays the best wages in New York harbor and surrounding waters and has never had any kind of trouble with the hands.

Mr. Scully served three years in the South Amboy Board of Education and in 1908 he was appointed Mayor to fill a vacancy caused by the resignation of Dr. Ambrose Treganowan. In 1909 he was elected Mayor for a full term of office. He established a new sewerage system, improved the water accommodations and the public docks, and reorganized the fire and police departments.

Mr. Scully was a delegate to the Democratic National Conventions of 1908 and 1912, and Presidential Elector in the former year. In 1910 he defeated Benjamin F. Howell, Republican, for Congress, by a plurality of 4,497. He was re-elected to Congress in 1912 by a plurality of 6,233 over Benjamin F. S. Brown, Republican, and again in 1914 by a plurality of 2,035 over Havens, Republican.

Vredenburg, who came to New Netherlands from The Hague in May, 1658, in the ship *Gilded Beaver*.

Peter Vredenburg, father of the present Judge, was a prominent jurist in both State and nation. He served two terms as an Associate Justice of the New Jersey Supreme Court, being first appointed by Governor Price, in 1855, and again by Governor Olden in 1862. Many of his decisions are regarded as being among the ablest reported.

Judge Vredenburg was born August 19th, 1840; was graduated at Rutgers College in 1859; studied law in the office of the late Governor Joseph D. Bedle; was admitted to practice as an attorney in June, 1862, and as a counselor in June, 1865. He is one of three sons, all of whom were lawyers.

After his admission, young Vredenburg began the practice of his profession at Freehold, his native town, and has continued to carry on the law business there ever since, with the exception of about a year, 1864, when he was located at Eatontown, to continue the business of his brother, Major Peter Vredenburg, Jr., who was absent

in the military service, and who was killed September 19th, 1864, at the battle of Winchester, Va., at the head of his regiment.

In 1865 Mr. Vredenburgh formed a law partnership with Philip J. Ryall, which continued for about five years, until Mr. Ryall's falling health compelled his retirement from practice. In the exciting general election of 1884, Mr. Vredenburgh was nominated by the Republicans of Monmouth county for State Senator, and was only defeated by the retirement of the regular Democratic candidate a few days before the election and the fusion of the Democrats and Prohibitionists, and by a very narrow majority.

Then he entered the employ of the Public Improvement Commission of Troy, N. Y., and his work since that time has had chiefly to do with municipal improvements. He was superintendent of construction of sewers and pavements at Troy and later became Assistant City Engineer of Peoria, Ill., where he remained for two years. He declined the position of City Engineer of Peoria to return to Troy to take up a consulting practice. He conducted much important work in that capacity, and in 1893 he was appointed City Engineer of Troy. He remained in that position until he accepted the position in Newark in 1895.

Besides his municipal work, Mr. Sherrerd has been connected with many large undertakings. He is consulting engineer to the New Jersey State Water-Supply Commission, which has supervision of all the water supplies of the State; he is also one of the consulting engineers for the Passaic Valley Sewerage Commission. He has been a special consulting engineer in connection with various large projects and undertakings, one of which necessitated his going to Brazil. Mr. Sherrerd has been connected with most of the water litigation in his locality during the last fifteen years.

Mr. Sherrerd is past president of the American Water Works Association, the American Society of Municipal Improvements, and the Rensselaer Polytechnic Institute General Alumni. He is past director

of the Board of Directors of the American Society of Civil Engineers, and is a member of the New England Water Works Association, the American Society for the Testing of Materials, the New Jersey Sanitary Association, the Engineers' Club, and the Theta Delta Chi Club of New York City, the Essex Club, the North End Club and the Union Club of Newark.

**CHARLES H. FOLWELL**, Secretary, Mount Holly.

Mr. Folwell was born in Washington, D. C., on October 30, 1871, and has lived practically all of his life at Mount Holly, where he owns and edits *The New Jersey Mirror*. His education was obtained at the local schools, the Lawrenceville School and Greylock Institute of South Williamstown, Mass.

**State Superintendent of Weights and Measures.**

**WILLIAM L. WALDRON**, Trenton.

Mr. Waldron was born in Trenton on December 7th, 1868. He received his early education in St. Mary's Parochial School, the same city. He was obliged to become a bread-winner when but thirteen years old, because of the circumstances of his widowed mother and her other six younger children. Later he attended night school, becoming enrolled as a student in the commercial department of the Stewart Business College. He passed with high honors.

Mr. Waldron's first position was as errand boy for the Trenton Co-Operative Society, which managed a large grocery and meat market. He was promoted a year later to a clerkship and, finally, when the company decided to establish a branch store, Mr. Waldron was the choice for manager. He made such a success of the venture that, a couple of years later the society concluded to open a second branch store. Mr. Waldron was again the unanimous choice of the directors for the management of the newer place.

Twelve years ago, Mr. Waldron decided to go into business for himself. He developed a business corner that had for years been regarded as a hoodoo into one of the most prosperous in Trenton. He sold out this

business when Governor Wilson unexpectedly named him to the superintendency of weights and measures August 23, 1911. Governor Wilson's attention is said to have been attracted to Mr. Waldron because of his splendid run for city commissioner in that year. He not only figured among the ten highest men at the primary but also came within a couple of hundred votes of being elected a commissioner. This was regarded as a remarkable tribute to the personal popularity of a man who had never before figured in public life, who had done little or no campaigning, and who was the only one of the ten candidates on election day that had never been previously able to attract public attention through the occupancy of a public office. His term of office is five years and salary \$2,500. His term will expire in 1916.

**Secretary and Engineer of the Riparian Commission.**

JOHN C. PAYNE, Jersey City.

Mr. Payne, who was born in England, February 16th, 1852, commenced his professional career as a student in the office of the firm of Bacot, Post & Camp, civil engineers, in 1868, and after spending some time in that office left to take a special engineering course in the old Hasbrouck Institute on Grand street, near Washington, in Jersey City, of which Washington Hasbrouck was the principal. Upon concluding his studies he went back into the employ of Bacot, Post & Camp, and was assigned to various positions, one being the charge of construction of the New Jersey and New York Railroad, from Hillsdale to New City; he was also engaged in the construction of the New York Elevated Railroad in Battery Park, New York. In 1877 he formed a partnership with Mr. John V. Bacot, and also became associated with the Riparian Commission as the Assistant Engineer; the duties of that position were such as to allow him to engage in the general practice of civil engineering, and this he did up to the year 1897, when he was appointed Secretary and Engineer of the Riparian Commission and retired from general practice excepting in an advisory capacity, and the filling of such appointments as came to him,

among which was the appointment by Governor Edward C. Stokes as a member of a Commission, of which ex-Governor Franklin Murphy and ex-Governor Foster M. Voorhees were members, to investigate and report on the whole subject of franchises granted by municipalities to public utilities corporations. He was also appointed by the court, together with ex-Governor George T. Werts and Colonel John J. Toffey, to appraise the value and damages to the terminal lands on the Hudson river of the Delaware, Lackawanna and Western Railroad Company, taken for and affected by the construction of the Hudson tunnels of the Manhattan and Hudson River Railroad. He was appointed by Hon Charles J. Parker, Judge of the Supreme Court, a member of the Martin Act Commission, to adjust and levy the immense arrearage of taxes which had accumulated in Jersey City by reason of the failure of the citizens to pay and the inadequacy of the laws to enforce collection of the same.

In 1907 the Riparian Commission made public recognition in its annual report to the Governor, of the connection of Mr. Payne with the work of the Riparian Commission, in the following language:

"The board desires to officially express its recognition of the fidelity and professional skill exercised by its Secretary and Engineer in the work of the Commission.

"Mr. John C. Payne has been associated with the work of the Riparian Commission for thirty years. He associated himself in 1877 with the Hon. Robert C. Bacot, the first engineer of the Commission, appointed in 1864, and when Mr. Bacot, by reason of declining years, retired in 1897 with honor and the respect of the Commission and State, Mr. Payne succeeded him as Secretary and Engineer, and has continued as such until the present time; and the board takes pleasure in testifying to Mr. Payne's fidelity to the work of the Commission and to the interests of the State committed to its care."

**State Board of Assessors.****FOR THE ASSESSMENT AND TAXATION OF RAILROAD AND CANAL PROPERTY.**

Charles E. Hendrickson, Jr., President; George L. Record, Isaac Barber, Frederic A. Gentieu. Irvine E. Maguire, Secretary; George William Barnard, Assistant Secretary; Louis Focht, Engineer.

This department of the State Government was created under an act of the Legislature, entitled "An act for the taxation of railroad and canal property," approved April 10th, 1884.

The work of the Board was increased during the same year by the passage of another act, entitled "An act to provide for the imposition of State taxes upon certain corporations, and for the collection thereof," approved April 18th, 1884.

By an act of the Legislature of 1900 (taking effect January 1st, 1901), this Board is further charged with the assessment and apportionment of the municipal franchise tax to be paid by persons, copartnerships, associations or corporations using or occupying public streets, highways, roads or other public places.

The report of the Board for the year 1914 shows that 133 railroad and canal companies within the State are subject to taxation. These companies represent more than 2,400 miles of railroads and 175 miles of canals.

The following table is a summary of the valuation and assessment of railroad and canal property for the year 1914, subject to review by the Board, which review is now in progress:

## First Annual Message of James F. Fielder, Governor of New Jersey.

STATE OF NEW JERSEY,  
EXECUTIVE DEPARTMENT,  
TRENTON, January 12th, 1915.

*Gentlemen of the Senate and General Assembly:*

But few differences of importance can be discovered in the platforms adopted by our two great political parties at their recent conventions, and, therefore, in fulfilling pledges it should not be found difficult for party representatives to work in harmony. Members of both parties must realize that the election is over, and that they are now units of a legislative body, whose aim should be to secure by co-operation the best results from its session, and it should make no difference in action that one party did or did not make a specific promise upon any particular subject. The honest desire to live up to his oath of office is the sole motive which should actuate each member. I, therefore, look to the members of both parties to redeem their party promises, and I ask that each shall aid and not hinder the other in so doing. You may be sure of my assistance in all legislation for the good of our people.

The few subjects to which I propose to direct your attention nearly all come under the head of unfinished business, and are mainly of a financial nature. The first relates to the reorganization or consolidation of State boards and commissions with a view to economy and a higher degree of efficiency in operation. A special investigation of this subject was hardly necessary to convince anyone who has had experience with our State government that commissions and departments have increased beyond necessity and reason, and the mere calling attention by Governor Wilson in his message of 1912 to the wasteful manner in which the government was being conducted should have been sufficient to produce a remedy. A commission recommended by that message to study the subject has presented two reports, and as its investigations are not yet concluded, a further report may be expected at this session. The commission has performed its duties in a businesslike manner, and the conclusions already reached and recommendations made are of great interest and value, furnishing the ground work or foundation plan for the rearrangement and simplification of many of our methods of government, and in many cases the detail for the structure which should be erected thereon. Believing that these recommendations should be enacted into law, I urged such action in two messages to the Legislature at its last session. Failure to act did not convince me I was wrong, and recent

events have confirmed my opinion that our citizens want this legislation. I am not so certain as the commission appears to be that their reorganization plans will result in a large reduction in State expenses, but I do believe some saving will follow, and that they will greatly promote efficiency, and while the total amount expended may not be materially less, better results will surely be secured for every dollar spent. With the facts squarely before us, it is our duty to act with decision and promptness.

The annual report of the State Board of Equalization of Taxes, recently filed with me, shows an increase of over seventy-five million dollars in the total valuation of property for taxation, exclusive of the stocks of banks and trust companies and railroad property, and that, notwithstanding this increase in valuation, the average tax rate of our municipalities is twenty-seven points higher than last year. I know that the great majority of our citizens are willing to bear their just share of the fair cost of government, but they rightfully object to excessive expenses and inequality in assessment. The attention of Legislatures has frequently been called to high and increasing tax burdens, and I venture to refer to the subject again and to reiterate my opinion that the difficulty is largely due to the unwise and improper method of selecting assessors and to the fact that in many instances the compensation they receive is insufficient to secure the services of competent men. The choice of assessors by election usually brings them and their office into politics. We shall never obtain relief unless we clean up the source of the trouble, and I renew my recommendations that assessors be no longer elected, but be appointed under Civil Service rules for assessment districts; that they be paid proper salaries; that their assessments be made under uniform rules to be prepared by some higher tax authority; that their tax lists be open to inspection before confirmation, and that some appellate board be given power to hear appeals from the valuation proposed, after which the tax lists may be finally made up and filed. I commend this highly important matter to your most careful thought, with the earnest hope that a satisfactory solution of the problem will be reached before you adjourn. I warn you that in your attempt to provide this remedy you will encounter the active opposition of nearly every tax assessor, because he will exert all his influence to prevent the loss of his office.

I have been strongly opposed to legislation which compels municipal expenditure for higher salaries or for any other purpose without requiring the consent of municipal governing bodies. I am not satisfied with legislation of this character, even when it provides that the act shall remain inoperative until accepted by popular vote, unless in the first instance it gives the right and imposes the duty upon governing bodies of approving the proposed expenditure. Those charged

with the administration of municipal affairs should know best how the taxpayers' money should be expended, and the responsibility for deciding should be placed upon them before referring it to the people for their approval. I am also opposed to legislation basing appropriations or expenditures upon a percentage of city or county ratables, because of the variable and uncertain amounts to be raised thereby, and in the interest of economy and publicity I recommend that the maximum amount be definitely stated in figures. At the last session I requested that several bills be recalled from my hands, and I vetoed others which did not meet these views, and I shall follow the same course at this session.

The law has compelled me to call special elections in two Congressional districts because of vacancies occurring therein, in neither of which any real necessity existed for filling the vacancy. A special election entails great expense, and it is impossible to arouse the interest of the voters when the election is of no particular consequence. In neither of the cases to which I have referred would I have ordered an election had it been left to my judgment, and I therefore suggest to you the advisability of amending this law so as to give the Governor discretion in ordering such elections. The discretion might be limited by requiring him to order the election upon the request of the chairman of the State Committee of a political party.

The increase in population of our country has been steady, but there has been a decrease in the production of cattle (other than milch cows), sheep and hogs, and the recent scourge of mouth and hoof disease should attract our attention to the serious consequences likely to follow the destruction of large numbers of our dairy and meat-producing animals. The direct money loss to the owners of the cattle destroyed is large, but it would seem that consumers of milk and meat must also suffer through higher prices likely to follow the decrease in supply, and it occurs to me that something might be done to encourage our farmers to make breeding and raising of cattle and other live stock more important and profitable. The records show that for the past three years over forty-seven thousand head of dairy cows have been imported into this State, which must have cost an average of seventy-five dollars per head. Had we met this demand by raising our own cattle at an average cost of fifty dollars to raise heifers to two years of age, the saving would be nearly one million two hundred thousand dollars, or four hundred thousand dollars a year. It would seem profitable to our milk producers to give more attention to breeding their own herds and thus secure a stock of established constitutional vigor and maximum milk production, and the shortage in meat animals could be met by raising more live stock on the farm. If farmers were to raise and slaughter meat for home consumption, then, instead

of selling their calves at ten cents per pound and purchasing their supplies from the local butcher at thirty cents per pound, the high cost of living might be materially reduced. There is still much pasture and range land in this State, and there are few farms where the surplus farm produce would not fatten from two to a dozen beef cattle yearly. More grain and other feed could be raised to support more live stock, and perhaps more intensive farming is necessary to do this. When farmers are selling their milk at a price which nets them but little profit, it is not impossible that by fattening cattle and by raising sheep and hogs they could increase the returns from their farms, and materially reduce the cost of living to themselves and others, and it is sure that the raising of their own live stock would contribute largely to the reduction, if not complete elimination, of bovine tuberculosis and other animal diseases in our State. I request that you give consideration to the thought I have endeavored to present to you, with the idea that if legislation is necessary to stimulate this industry, it may be devised. Perhaps by giving the Live Stock Commission the same powers with regard to other animals that it now has for breeding horses, a profitable advance might be made through the standardization of all live stock, or perhaps the State Agricultural College and Experiment Station and the Bureau of Animal Industry might be given wider powers, enabling them to assist the farmers in solving the problem I present.

Among the subjects of legislation which will probably be brought to your attention is the abandonment of the Morris Canal. It is not my purpose at this time to express any opinion upon the various plans suggested, but there is one feature which has appeared in bills presented to the Legislature to which I desire to refer, and that is with regard to the disposition of the money the State should receive for its interest in the canal property. I consider it improper to provide in any abandonment bill how such money should be expended, for the reason that it includes two subjects in one bill, and makes the determination of the one dependent upon the other. The vice of this kind of legislation has been condemned by our Constitution, which provides that "to avoid improper influences which may result from intermingling in one and the same act such things as have no proper relation to each other, every law shall embrace but one object." The expenditure of all money should receive the careful attention of the Legislature, and especially of its Appropriation Committee, and should not be bound up with any other subject of legislation, and at a time when we are called upon to exercise retrenchment in State expenditures, special care should be taken not to place upon the State burdens which will require large appropriations in future years for construction or maintenance. The Appropriation Committee, through its investigations and special knowledge

of the needs of the State; of its departments and of its institutions, is particularly qualified to recommend the wisest means to which State funds should be devoted. For instance, the need of a Normal School in South Jersey, the enlargement of our insane asylums, and other State institutions, or the establishment of new ones, the relocation of the State Reformatory and the removal of our State Prison, the building of new roads, the purchase of toll bridges, the development of forest reserves and water rights, measures of protection for ocean-front owners from ravages by the elements, may be the most pressing and important objects for State financial assistance. Any of these I have mentioned, and perhaps others, may be of paramount importance, but the fact cannot be properly or safely determined in consideration of or debate upon a canal abandonment bill, and, therefore, should be left to a separate and special consideration.

Recent serious damage to and destruction of our woodlands and forests by fires will cause prudent men to hesitate to invest in or continue the attempt to preserve such properties. The fires of last fall were more numerous and caused more damage than for many a preceding year, notwithstanding the State's attempt to guard against them. It is significant that during the first weeks of the hunting season the larger number and most disastrous fires occurred. For a long time prior to and during these weeks the vegetation was parched and dry because of a prolonged period of drought. It is fair to assume that many fires were started through neglect or carelessness of hunters, and it has been stated that in some cases gunners deliberately started them to drive game from the woods. Beside the vast timber loss, the cranberry farming interests suffered seriously. The State Forestry Commission has advised the exclusion of deer and rabbits from the protection of the game laws as one way to avoid the danger from fires during the usual dry season, but I am not willing to recommend so drastic a plan, because, while I feel that with proper care and caution by hunters many of the fires could have been avoided, the particularly dry condition of the underbrush and dead leaves in the woods and forests last fall contributed to the danger. I do believe, however, that this State should adopt the plan, which in other States seems to have worked well, of giving the Governor power to suspend the hunting season when in times of drought the condition of the forests and fields enhance the possibility of fires until rainfall makes it safe for them to be entered.

Complaint has been made that under the so-called Chancellor-Sheriff jury law of 1913 it has at times been found impossible to secure a full grand jury membership, because the law provides for drawing no more than twenty-four names by the sheriff and jury commissioners. It frequently happens that of the number so drawn some are absent from the State and cannot be summoned; others are ill, and

others are ineligible. Further, it is the intention of the act that no jury commissioner shall be of the same political party as the sheriff of his county, but jury commissioners are appointed for one year, and there is no direct provision for vacating the office upon the election of a sheriff belonging to the same party. The Chancellor can only carry out the spirit of the act in this particular by removing the commissioner before the expiration of the term for which he was appointed. The act in question was adopted by the people at a referendum election, and ought not be altered in any respect unless the amendment will serve to preserve its character and increase its efficiency to accomplish the purpose for which it was enacted. I therefore recommend that the law be amended so as to provide for drawing more than the number of names finally required for grand jurors, and that the presiding justice at the drawing be empowered to strike from the list those unable or ineligible to serve, and also that the term of every jury commissioner shall automatically expire upon the assumption of office of a sheriff belonging to the same political party as the commissioner.

In my inaugural message I directed attention to the volume of useless legislative bills introduced and to the unnecessarily large number of laws enacted annually, and I commended the proposition to place a time on the presentation of bills, and to permit a reasonable period to elapse between their introduction and consideration. The favorable reception of this plan by the Legislature of nineteen hundred and fourteen resulted in a book of laws two hundred pages less than of the preceding year, containing one hundred and fifteen fewer laws than were enacted at the regular and special sessions of nineteen hundred and thirteen. This record can surely be equalled and possibly excelled by adopting the same rules with regard to the introduction and consideration of bills, and, also, by a strict attention to your duties, the session can be shortened. Nothing will please our people more than a short, business-like session. This is quite possible, because the Legislatures of the last three or four years have disposed of practically all matters for the public good which have been awaiting action, and the few which you may feel require consideration can be disposed of in a short time, giving them the thoughtful, deliberate attention to which they are entitled.

JAMES F. FIELDER,  
*Governor.*
