

reading the slot machine meters for gaming vouchers and coupons, or if the slot machine commingles gaming voucher and coupon data on a single meter, a casino licensee may, for a period ending on December 31, 2009, and with the prior approval of the Commission, obtain the required gaming voucher and coupon data from its gaming voucher system and coupon acceptance system, as described in its approved internal control procedures.

(q) The computer system approved pursuant to (o) above shall provide a report to the accounting department for comparison of meter information to the Slot Win Sheet and the calculation of slot machine statistics.

(r) Whenever there is a variance of more than two percent and more than \$100.00 between the value of cash, gaming vouchers, or coupons removed from a bill changer's slot cash storage box and the corresponding cash box meter reading and, if applicable, the value coupon meter, the value non-cashable coupon meter and the value voucher-in meter reading as recorded on a report generated by a computer system pursuant to (o) and (q) above, or whenever there is a variance of more than \$50.00 between the value of gaming vouchers or coupons removed from a bill changer's slot cash storage box and the corresponding value as recorded on a report generated by the gaming voucher system and coupon acceptance system pursuant to (p) above, the casino accounting department shall perform the following procedures:

1. If such a variance exists in the value of cash, confirm the variance by comparing the number of bills removed from the slot cash storage box to the bill meter readings. Such comparison shall be made by using, as applicable, the reports generated pursuant to (q) or (p) above and shall compare the meter readings to the total number of bills and value of cash removed from the slot cash storage boxes.

2. If such a variance exists in the value of either gaming vouchers or coupons, confirm the variance by comparing the number of gaming vouchers or coupons removed from the slot cash storage box to the readings recorded by the computer system or generated by the gaming voucher system and coupon acceptance system in accordance with the requirements of (o) or (p) above, as applicable. Such comparison shall be made by using a report generated pursuant to (q) or (p) above, which shall compare the meter readings or gaming voucher and coupon data to the total number and value of gaming vouchers and coupons removed from the slot cash storage boxes.

3. The casino licensee shall be required to have its slot department, in cooperation with its casino accounting department, investigate the cause of each variance identified pursuant to (r)1 and (2) above and prepare and file an incident report documenting such variance with the casino controller, the director of surveillance, Commission and Division. The casino licensee shall report the actual cause of the variance unless such cause cannot be definitively determined after a diligent investigation, in which case the prob-

able cause of the variance shall be reported. The incident report shall be a report of all bill changers with reportable variances and shall be filed within three weeks from the completion of the weekly slot cash storage box pickup, provided, however, that the Commission may direct a shorter time frame for the filing of the report, if an expedited filing is considered necessary to protect the integrity of casino operations. The incident report shall include, at a minimum, the following for each bill changer with a reportable variance as well as the specified cumulative data:

- i. The date of the meter reading;
- ii. The date the report was filed;
- iii. The amount of the variance, by denomination, with the exception of gaming vouchers, which shall be by total value;
- iv. The asset number of the bill changer involved;
- v. The amount of the variance by currency, gaming vouchers, and/or coupons;
- vi. An indication as to the cause of the variance pursuant to r(1) and (r)2 above, with any documentation attached to support the given explanation (for example, Unsecured Currency/Coupon/Voucher Report);
- vii. An indication as to whether the bill meters, numerical voucher in meter, numerical non-cashable coupon meter or numerical coupon meter compared in accordance with the requirements of (r)1 or 2 above confirmed the variance, if applicable;
- viii. The manufacturer and model number of the slot machine to which the bill changer is attached or embedded;
- ix. The manufacturer of the bill changer involved;
- x. The total number of reported variances by manufacturer and model number of the slot machine;
- xi. The total number of reported variances by manufacturer of the bill changer;
- xii. The total number of reported variances compared to the total number of slot cash storage boxes counted; and
- xiii. The signature and license number of the preparer.

(s) Unless otherwise authorized by the Commission, a casino licensee shall be required to conduct an appropriate investigation and take any necessary corrective action, including any remedial action required by the Commission, if 10 percent or more of the bill changers counted during the week have reported variances pursuant to (r) above for a period of three consecutive weeks.

(t) Notwithstanding anything in this chapter to the contrary, nothing shall preclude the Commission from requiring a

casino licensee to read slot machine meters manually as a condition of prototype approval, as a remedial measure in the event of a malfunction, or as it may otherwise deem necessary to insure the integrity of gaming and the accurate reporting of gross revenue.
