

Future of Work Accelerator

ACCELERATING IDEAS THAT SUPPORT WORKERS!

The Future of Work Accelerator is a 9-month program that will support innovations that advance New Jersey's workers' health and safety, improve access to benefits, strengthen training opportunities, and bolster worker voice.

Through the Accelerator, participants will receive custom coaching, curated connections to national experts, introductions to funders and peers, and the opportunity to pilot worker-centric programs and practices in New Jersey.

The Accelerator is open to startups, entrepreneurs, non-profits, public sector institutions and employees, unions, and grassroots organizations from across the globe that are interested in promoting innovative solutions. See a list of themes that the Accelerator will address, below.

Perhaps you've developed a digital job coach that helps workers identify the best post-pandemic career opportunities, or a training program that teaches workers at risk of automation how to code, or an idea to build traction around universal basic income. Whether the innovation is technology-based or not, the Accelerator can help take it to the next level.
