

7. If the Department finds a project or activity to be inconsistent, then the Department shall notify the applicant in writing of the reasons for this finding. The applicant may request an informal discussion of the conflict under N.J.A.C. 7:15-3.1(g).

Administrative Correction to (b): Changed pollutants to pollution.

See: 22 N.J.R. 2001(b).

Amended by R.1993, d.59, effective February 1, 1993.

See: 24 N.J.R. 344(b), 25 N.J.R. 547(a).

In (a)1, deleted reference to DTW permittees under N.J.A.C. 7:15-4.1; in (c)6ii and (c)7, corrected subsection references.

7:15-3.3 (Reserved)

7:15-3.4 Water quality management plan amendment procedures

(a) The Department and the designated planning agencies shall propose amendments to the Statewide and areawide WQM Plans whenever such amendments are necessary or desirable. Amendments may be proposed for various reasons, such as to implement or comply with applicable State or Federal law; respond to new circumstances; improve the economic, social, or environmental impact of WQM plans; or resolve issues disclosed through the consistency review procedure.

(b) Procedures for amendment of the Statewide WQM Plan are as follows:

1. Water quality related provisions in present and future rules adopted by the Department shall be considered to be part of the Statewide WQM Plan. Such provisions may not be adopted, amended, or repealed through the WQM plan amendment process under (b)5 below.

2. Priority systems, intended use plans and project priority lists for wastewater facilities that are developed by the Department and accepted by the United States Environmental Protection Agency (USEPA) pursuant to USEPA regulations, or that otherwise are developed by the Department under N.J.A.C. 7:22, shall be considered to be part of the Statewide WQM Plan. Such priority systems and project priority lists shall be adopted or revised in accordance with USEPA regulations and N.J.A.C. 7:22, as appropriate, and shall not be adopted or revised through the WQM plan amendment process under (b)5 below.

3. Statewide Sludge Management Plans, District Sludge Management Plans and sludge management rules that are promulgated or approved by the Department pursuant to N.J.S.A. 13:1E-1 et seq. shall be considered to be part of the Statewide WQM Plan. Such plans and rules shall be promulgated, revised, updated or approved in accordance with N.J.S.A. 13:1E-1 et seq., and shall not be promulgated, revised, updated, or approved through the WQM plan amendment process under (b)5 below.

4. Lists of water quality limited segments, lists of segments where TMDLs will be developed, and project

priority lists for TMDL development which are developed by the Department under N.J.A.C. 7:15-6 shall be adopted as amendments to the Statewide WQM Plan. TMDLs developed in accordance with N.J.A.C. 7:15-7 shall be adopted as amendments to the relevant Areawide WQM Plan(s). However, such lists, and TMDLs shall be adopted or revised in accordance with N.J.A.C. 7:15-6 or 7:15-7, as appropriate, and shall not be adopted or revised through the WQM plan amendment process under (b)5 below. The Department may also publish a draft amendment as an Interested Party Review document or as a pre-proposal prior to formal proposal of the amendment.

5. Components of the Statewide WQM Plan other than (b)1 through 4 above may be amended by using the procedure specified in (g) below, except that the Commissioner shall render the final decision identified in (g)9 below.

(c) Areawide WQM plans for designated areas may be amended by designated planning agencies pursuant to their approved plan amendment procedures. The Department may amend the areawide WQM plan for any non-designated area, pursuant to the procedures under (g) below. Amendments or provisions thereof for any areawide WQM plan whose specific purpose or effect is to address projects or activities covered by (i) and (j) below, or that are either proposed, constructed, operated or conducted by the State or Federal government, or that are regulated by the Solid Waste Management Act (N.J.S.A. 13:1E-1 et seq.), shall be processed only by the Department, regardless of whether the areawide WQM Plan is for a designated area or a non-designated area. By the mutual consent of the Department and the designated planning agency, the Department may also process all other amendments to an areawide WQM plan for a designated area.

(d) Plan amendment procedures developed by the designated planning agencies shall be consistent with this section and approved by the Department. Such procedures shall include, but need not be limited to, provisions that:

1. Allow any interested person to submit to the designated planning agency written, documented petitions to amend the areawide WQM Plan;

2. Provide for review by the Department of all proposed amendments prior to public notice;

3. Allow the Department to identify governmental entities, sewerage agencies, and BRC-regulated sewer or water utilities that shall be requested to issue written statements of consent for proposed amendments, such parties being in addition to any governmental entities, sewerage agencies, and BRC-regulated sewer or water utilities identified by the designated planning agency;

4. Provide for publication of public notice of proposed amendments in the New Jersey Register and in a newspaper of general circulation in the designated area; and

5. Provide for adequate public comment periods and opportunities for public hearings before the designated planning agency decides whether to approve an amendment.

(e) Every designated planning agency shall, by December 1, 1989, submit for Department approval plan amendment procedures that have been revised for consistency with this section. Such procedures shall identify the newspaper in which public notices of plan amendments shall be published. All plan amendment procedures that the Department approved before October 2, 1989, but that are not revised and approved by the Department as being consistent with this section, shall become void on March 31, 1990. If a plan amendment procedure becomes void in this manner, the Department shall immediately provide to the designated planning agency a plan amendment procedure that is consistent with this section, and that shall be used by the designated planning agency until a plan amendment procedure is submitted by the designated planning agency and approved by the Department under this subsection.

(f) Within 15 days of approving an amendment, a designated planning agency shall submit to the ORP a copy of the amendment, together with background information for that amendment. WQM plan amendments approved by designated planning agencies are valid only upon the subsequent adoption of such amendments by the Governor or his designee.

(g) Except as provided in (h) below, the Department procedure for amendment of areawide WQM plans is as follows:

1. For amendments which are the Department's responsibility under (c) above, any interested person may petition the Department to amend the areawide WQM plan, or the Department may propose to amend the areawide WQM plan on the Department's own initiative. Requests for amendments shall be submitted in writing to the Office of Regulatory Policy, Department of Environmental Protection, PO Box 029, Trenton, New Jersey 08625-0029.

2. Requests for amendments shall include, but need not be limited to, a detailed description of the proposed amendment, including documentation substantiating the need for the amendment and other documentation as determined by the Department. Within 90 days of receiving such requests, the Department shall review such requests and shall either:

i. Disapprove the amendment request, and return it to the applicant; or

ii. Return the amendment request to the applicant for additional information or other necessary changes. If the applicant then submits a revised amendment request, the Department shall, within 90 days of receiving the revised amendment request, review such request and render a decision under (g)2i above, this subparagraph, or (g)2iii below; or

iii. Decide to proceed further with the amendment request.

3. The Department shall notify the applicant and the applicable designated planning agency, if any, in writing of its decision under (g)2 above. If the Department's decision is to proceed further with the amendment request under (g)2iii above, then this notification shall include the public notice that shall be given for the proposed amendment. The applicant shall request written statements of consent under (g)4 below, and shall give public notice by publication in a newspaper of general circulation at the applicant's expense. The Department shall maintain a list identifying the newspaper that shall be used for this purpose in each planning area. The public notice shall also be published in the New Jersey Register. In cases where such Department decisions include a requirement for a non-adversarial public hearing, the public notice shall provide at least 30 days notice of the hearing.

4. Requirements concerning written statements of consent for plan amendments are as follows:

i. As part of each notification of a decision under (g)2iii above, the Department may identify a list of governmental entities, sewerage agencies, and BRC-regulated sewer or water utilities that may be affected by, or otherwise have a substantial interest in, approval of the proposed amendment, and that shall be asked to issue written statements of consent for the proposed amendment. Within 15 days of receiving such notification, the applicant shall submit by certified mail (return receipt requested) a copy of the proposed amendment to these parties, with a request that they issue written statements of consent for the proposed amendment within 60 days of their receipt of the request.

ii. A written statement of consent shall include a statement that the party concurs with, or does not object to, the proposed amendment. Tentative, preliminary, or conditional statements shall not be considered to be statements of consent. A statement of consent by a governmental unit shall be in the form of a resolution by that unit's governing body. If the party objects in writing to the proposed amendment, the party shall state all reasons for objection in writing.

iii. The applicant shall promptly forward to the ORP a copy of all written statements of consent and other written comments received, and a copy of all requests for consent (with return receipts) sent to parties that did not provide written statements of consent or other written comments within 60 days of their receipt of such requests.

iv. Where a party identified under (g)4i above denies a request for a written statement of consent or does not issue a written statement of consent, the reasons therefor, if known on the basis of reasonably reliable information, shall be considered in making decisions under (g)8 and 9 below.

5. When the Department proposes to amend the area-wide plan on its own initiative, the Department shall give public notice by publication in a newspaper of general circulation in the planning area, shall send copies of the public notice to the applicable designated planning agency, if any, and may hold a public hearing or request written statements of consent as if the Department were an applicant under (g)3 and 4 above. The public notice shall also be published in the New Jersey Register.

6. Interested persons, including, but not limited to, those from whom written statements of consent are requested under (g)4i or 5 above, may submit written comments to the ORP within 30 days of the date of the public notice. Interested persons may request that the public comment period be extended up to 30 additional days, and such extensions may be granted to the extent they appear necessary. Requests for such extensions shall be submitted in writing to the ORP within 30 days of the date of the public notice.

7. Interested persons may also request that the Department hold a non-adversarial public hearing; such requests shall be submitted in writing to the ORP within 30 days of the date of the public notice. If there is significant interest, as determined by the Department, in holding a public hearing, then a public hearing will be held. A public notice providing at least 30 days notice of the hearing will be published in the New Jersey Register and in two newspapers of general circulation, and will be mailed to the applicable designated planning agency, if any, and to each party who was requested to issue a written statement of consent for the amendment. The public comment period will be extended until 15 days after the hearing. Except when the Department proposes to amend areawide WQM plans on its own initiative, the applicant shall, at the applicant's expense, mail the public notice, provide for publication of the public notice in two newspapers, secure a court stenographer, and provide three copies of a verbatim transcript of the hearing to the ORP.

8. If any data, information or arguments submitted during the public comment period or in response to a request for written statement of consent appear to raise substantial new questions concerning a proposed plan amendment, the Department may:

- i. Reopen or extend the public comment period for no more than 30 additional days to give interested persons an opportunity to comment on the information or arguments submitted;
- ii. Disapprove the proposed amendment and, where applicable, return it to the applicant;
- iii. Return the amendment request to the applicant for necessary, substantial changes. If the applicant then submits a revised amendment request, the Department shall review such request in the same manner as a revised amendment request submitted under (g)2ii above; or

iv. Prepare a new proposed plan amendment, appropriately modified, for proposal under this section.

9. Except where the Department has already disapproved or returned the proposed amendment under (g)8 above, the Governor or his designee shall render a final decision on the amendment. The Governor or his designee shall either:

- i. Adopt the amendment as proposed;
- ii. Adopt the proposed amendment with minor changes that do not effectively destroy the value of the public notice; or
- iii. Disapprove the proposed amendment and, where applicable, return it to the applicant.

10. The Department shall provide written notification of the decision of the Governor or his designee to the applicant where applicable. Notice of the final decision shall also be published in the New Jersey Register.

11. The Department shall retain the administrative record for WQM Plan amendments for the following periods of time:

- i. For each amendment adopted under (g)9 above, a period of not less than three years from the effective date of the amendment.
- ii. For each proposed amendment disapproved or returned under (g)2, 8, or 9 above, a period of not less than one year from the date of disapproval or return.

(h) For amendments identified in (h)3 below, the Department shall modify the plan amendment procedure specified in (g) above in the manner set forth in (h)1 and 2 below. Except as provided in (h)1 and 2 below, the entire procedure specified in (g) above remains applicable to such amendments.

1. In lieu of the consent requirements in (g)3 and 4 above, the Department shall identify a list of potentially affected or interested parties that shall receive notice of the proposed amendment, but that need not be asked to consent to the proposed amendment. Such parties shall include the applicable designated planning agency, if any. Within five days of receiving such a list, the applicant shall submit by certified mail (return receipt requested) to these parties a copy of the proposed amendment and a copy of the public notice that will be published pursuant to (g)3 above. The applicant shall promptly forward to the ORP a copy of all letters (with return receipts) sent to these parties under this paragraph. For sewers and pumping stations identified in (h)3ii below, written statements of consent are still required from owners or operators of affected DTW.

2. Instead of the 30 day period specified for these actions in (g)6 and 7 above, interested persons may take the following actions within 10 working days of the date of the public notice:

- i. Submit written comments on the proposed amendment to the ORP;

ii. Submit written requests to the ORP that the Department extend the public comment period up to 30 additional days; or

iii. Submit written requests to the ORP that the Department hold a non-adversarial public hearing.

3. The modifications set forth in (h)1 and 2 above shall be used only for amendments whose sole purpose is to address the following projects:

i. Schools, health care facilities, or correctional facilities, if such schools or facilities are publicly owned or operated; or

ii. New sewers or pumping stations to serve a project or activity that is partially within a future sewer service area depicted in an areawide WQM plan, if such sewers or pumping stations would convey wastewater from such project or activity to the existing DTW whose sewer service area is depicted in that WQM plan, and if a resolution of consent is received from the owner or operator of that DTW. If a project or activity is partially or entirely within two or more depicted sewer service areas, the new sewers or pumping stations may convey wastewater to one or more such existing DTW, provided that resolutions of consent are received from the owners or operators of the affected DTW in each of the sewer service areas. This subparagraph shall apply only to wastewater service area modifications of less than 10 acres.

iii. Notwithstanding (h)3ii above, the modifications set forth in (h)1 and 2 above shall not be used for sewers or pumping stations whose construction would violate N.J.A.C. 7:14A-12.21, or that would convey wastewater to DTW whose capacity must by statute, rule or other legal requirement be reserved for other projects or activities. The Department may require the applicant to provide proof from the owner or operator of DTW that would receive the conveyed flow that capacity is available for the applicant's project or activity. This paragraph applies whether treatment works approvals are sought for both construction and operation, or for construction only, of sewers or pumping stations.

(i) Effluent limitations, including, but not limited to, water quality based effluent limitations, and schedules of compliance established in accordance with N.J.A.C. 7:15-3.1 as NJPDES permit conditions under N.J.A.C. 7:14A-8.6 shall be considered to be part of the areawide WQM plans. NJPDES permit conditions shall be modified only through the procedures specified in the Department's New Jersey Pollutant Discharge Elimination System rules (N.J.A.C. 7:14A), in accordance with applicable Department rules, and shall not be modified through the WQM plan amendment process under (c) or (g) above. This subsection, however, shall not preclude the adoption of effluent limitations or schedules of compliance in areawide WQM plans under (g) above, prior to the establishment of such effluent limitations or compliance schedules as new or revised NJPDES permit conditions.

(j) (Reserved)

(k) Water quality management planning related documentation in present and future 201 Facilities Plans that are approved by the Department and USEPA after May 31, 1975 shall constitute amendments to areawide WQM plans. This documentation may include, but is not limited to: selected facilities alternative, future design capacity and flows, treatment levels, sewer service areas, septage management areas, sludge and septage management and disposal plans, environmental constraints mapping, identification of management agencies, and grant conditions. Itemized abstracts of the appropriate documentation shall be available at the Division of Water Resources. Water quality management planning related documentation in 201 Facilities Plans completed on or prior to May 31, 1975 may be adopted into areawide WQM plans on a case-by-case basis under (c) or (g) above.

(l) In preparing amendments to areawide WQM plans, the following policies shall be adhered to:

1. Existing regional DTW shall be used where such use is cost-effective, environmentally sound, and feasible from an engineering standpoint. Expansion or upgrading of existing regional DTW is generally preferable to construction of additional DTW that would produce additional direct discharges to surface water at new locations.

2. Where a sewer connection ban is in effect under N.J.A.C. 7:14A-12.21 on a DTW, the sewer service area for that DTW shall not be altered unless such alteration would, even in the absence of the sewer connection ban, be cost-effective, environmentally sound, and feasible from the engineering standpoint.

Public Notice: To designate the City of Asbury Park as the Wastewater Facilities Planning agency.

See: 17 N.J.R. 2690(a).

Public Notice: To eliminate Totowa Borough's West End Sewage Treatment Plant (STP) converting it to a pumping station.

See: 17 N.J.R. 2690(b).

Public Notice: To provide sewer service to the Eastampton Farms subdivision, Eastampton Township, Burlington County and to provide sewer service to the Cedarwood development in Harrison Township, Gloucester County.

See: 17 N.J.R. 2690(c).

Public Notice: The elimination of Totowa Borough's West End Sewage Treatment Plant for the expansion of Evesham Municipal Utility Authority's Sewage Treatment Plant.

See: 17 N.J.R. 2690(e).

Public Notice: Expand plant capacity of the Sussex County Municipal Utilities to 2.5 million gallons per day.

See: 18 N.J.R. 112(b).

Public Notice: Amendment to the Cape May County Water Quality Management Plan which implements the on-site water disposal systems program.

See: 18 N.J.R. 858(b).

Public Notice: Amendment to the Sussex County Water Quality Management Plan to provide for the construction and operation of a new wastewater treatment plant.

See: 18 N.J.R. 1715(a).

Public Notice: Amendment to the Mercer County Water Quality Management Plan entitled "An Amendment Concerning the Application of Wetlands Policy".

See: 18 N.J.R. 1842(b).

- Public Notice: The amendment to the Northeast Water Quality Management Plan was adopted.
See: 18 N.J.R. 1964(a).
- Public Notice: The amendment providing for the elimination of the existing Butler Bloomingdale Wastewater Treatment Plant was adopted.
See: 18 N.J.R. 1964(b).
- Public Notice: The amendment to increase the Passaic Valley Sewage Authority's Treatment Facility's permitted flow has been adopted.
See: 18 N.J.R. 1964(c).
- Public Notice: Amendment to the Northeast Water Quality Management Plan has been submitted for approval. This amendment is to allow 1.2 acres of wetlands encroachment for the development of Pension Office Park located in Bernards Township, Somerset County.
See: 18 N.J.R. 1964(d).
- Public Notice: Amendment to allow for the expansion of the Maple Shade Water Pollution Control Plant was adopted.
See: 18 N.J.R. 1964(e).
- Public Notice: An amendment to allow the filling of 35,300 square feet of wetlands for two road crossings and gravel driveway easements for the proposed Windsor Forest subdivision in Washington Township, Gloucester County has been adopted.
See: 18 N.J.R. 1964(f).
- Public Notice: Amendment allowing the expansion of the sewer service area of Warren County to include the Washington Valley Golf course.
See: 18 N.J.R. 1964(g).
- Public Notice: To inform the public that an amendment has been proposed for the WQM Plan.
See: 18 N.J.R. 1965(a).
- Public Notice: To expand the Township of Lower Municipal Authority's sewer service area.
See: 18 N.J.R. 2138(a).
- Public Notice: Allow for the expansion of the Cooper River Interceptor into Berlin Township and Berlin Borough.
See: 18 N.J.R. 2138(b).
- Public Notice: To expand the Verona Sewage Treatment Plant's sewer service area to accept a small portion of Caldwell and Essex Fells.
See: 19 N.J.R. 466(a).
- Public Notice: To provide for a Wastewater Management Plan identifying the utilization of individual subsurface systems for wastewater treatment within Upper Township.
See: 19 N.J.R. 465(e).
- Public Notice: To allow the expansion of its existing advanced wastewater treatment facility located in Bedminster Township, Somerset County.
See: 19 N.J.R. 569(c).
- Public Notice: To expand the sewer service area in Galloway Township to include Block 891, Lots 3.01, 3.02, 4, 5, 6 and 9, excluding environmentally sensitive areas from the proposed Hampton Inn development.
See: 19 N.J.R. 569(d).
- Public Notice: To incorporate West Milford's Wastewater Management Plan (1986) into the WQM Plan.
See: 19 N.J.R. 888(b).
- Public Notice: Permit the construction of a detention basin outlet structure in wetlands for the Washington Valley Golf Course development known as Fairway Estates-Fairway Mews in Washington Township, Warren County.
See: 19 N.J.R. 888(e).
- Public Notice: Allow for the expansion of a sewer service area in Burlington Township to include the proposed Neck Road development, Block 142, Lot 3.06. The project site will be served by an existing sewer main.
See: 19 N.J.R. 888(d).
- Public Notice: Provides for a Wastewater Management Plan for West Windsor Township.
See: 19 N.J.R. 1109(c).
- Public Notice: Addresses the expansion of the existing Chatham Glen Sewage Treatment Plant from .12 million gallons per day to .155 mgd to provide treatment for additional growth as part of a Mount Laurel settlement.
See: 19 N.J.R. 1109(b).
- Public Notice: Addresses the expansion of the Edgewater Sewage Treatment Plan from 3.0 million gallons per day (mgd) to 6.0 mgd to handle the expected growth of the Borough.
See: 19 N.J.R. 1109(a).
- Public Notice: Permit abandonment of the Bedens Brook, Bedens Brook Country Club, Sleepy Hollow and Burnt Hill treatment plants.
See: 19 N.J.R. 1109(d).
- Public Notice: To include a revised and updated version of Map 4-3, the Tri-County sewer service area map.
See: 19 N.J.R. 1238(a).
- Public Notice: To allow the filling of less than one acre of wetlands for two road crossings for the proposed Sturbridge Woods subdivision located in Voorhees Township, Camden County.
See: 19 N.J.R. 1238(b).
- Public Notice: To adopt "An Amendment Concerning the Application of Wetlands Policy (Section 4.5.1., Point Source Control: Functional Programs and Agencies)" which would provide for the filling of 4.01 acres of wetlands and a mitigation program at the site of Princeton South at Lawrenceville, Lawrence Township, Mercer County.
See: 19 N.J.R. 1239(a).
- Public Notice: To adopt "An Amendment Concerning the Application of Wetlands Policy for Horizon Center, Hamilton Township" which would provide for the filling of wetlands of Edges Brook for the construction of a roadway within the proposed development.
See: 19 N.J.R. 1239(b).
- Public Notice: Allow the new treatment plants to serve the Lakeland Parks Shopping Center, the Metropolitan Developers retail stores, Conway Corporation, and Brass Castle stores as well as a new Musconetcong Basin treatment plant and new Pohatcong Creek treatment plant.
See: 19 N.J.R. 1239(c).
- Public Notice: To adopt an amendment concerning the Application of Wetlands Policy for Willow Wood, Hamilton Township (Water Quality Management Plan Section 4.5.1).
See: 19 N.J.R. 1457(a).
- Public Notice: To expand the sewer service area of the Linpro Utilities Company in Plainsboro Township so that it may serve the Plainsboro-West Windsor Middle School on Grovers Mill Road also located in Plainsboro Township.
See: 19 N.J.R. 1457(b).
- Public Notice: Incorporate the New Hanover Wastewater Management Plan into the Tri-County Water Quality Management Plan.
See: 19 N.J.R. 1575(b).
- Public Notice: To allow a new industrial treatment facility known as Chatsworth Receiving Station (Ocean Spray Cranberries) located in Woodland Township, Burlington County.
See: 19 N.J.R. 1575(a).
- Public Notice: To allow the filling of 2.85 acres of wetlands for a road located in Bernards Township, Somerset County for the Cedars Development.
See: 19 N.J.R. 1574(b).
- Public Notice: Amendment to the Northeast Water Quality Management Plan.
See: 20 N.J.R. 1296(d).
- Public Notice: Amendment to the Lower Raritan/Middlesex County Water Quality Management Plan.
See: 20 N.J.R. 1297(c).
- Public Notice: Amendment to the Tri-County Water Quality Management Plan.
See: 20 N.J.R. 1297(d).
- Public Notice: Amendment to the Atlantic County Water Quality Management Plan.
See: 21 N.J.R. 1748(a).

Case Notes

Where Department of Environmental Protection failed to act within 60 days upon county's petition to amend water quality management plan, builder had continuing right to seek legal recourse so long as Department failed to act. *Toll Bros., Inc. v. State, Dept. of Environmental Protection*, 242 N.J.Super. 519, 577 A.2d 845 (A.D.1990).

Failure to timely act on application to amend does not require automatic approval. *Toll Bros., Inc. v. State, Dept. of Environmental Protection*, 242 N.J.Super. 519, 577 A.2d 845 (A.D.1990).

Interested party may bring action to compel Department of Environmental Protection to act. *Toll Bros., Inc. v. State, Dept. of Environmental Protection*, 242 N.J.Super. 519, 577 A.2d 845 (A.D.1990).

7:15-3.5 Water quality management plan review, revision, and certification

(a) The Department and the designated planning agencies shall periodically review Statewide and areawide WQM Plans in order to propose appropriate amendments under N.J.A.C. 7:15-3.4, and to prepare appropriate revisions under this section.

(b) The Department and the designated planning agencies shall prepare revisions to Statewide and areawide WQM Plans under this section whenever such revisions are necessary to:

1. Correct, clarify, or update erroneous, unclear, or outdated statements in Statewide and areawide WQM Plans regarding:

- i. Development and wastewater treatment facilities existing at the time of the most recently adopted area-wide WQM plan or amendment affecting the site; or

- ii. Proposed projects, provided that all other Department approvals were received, in full compliance with applicable regulations, at the time of the most recently adopted areawide WQM plan or amendment affecting the site;
2. Transfer or assign wastewater management plan responsibility under N.J.A.C. 7:15-5.13;
3. Revise schedules for submission of wastewater management plans under N.J.A.C. 7:15-5.23(g); or
4. Provide for the following substantive changes in Statewide and areawide WQM plans where the Department determines no significant individual or cumulative impacts will occur to environmentally sensitive areas or other natural resources (such as water supplies) due to the proposed revision (individually or in combination with past revisions in the area), that the changes are consistent with N.J.A.C. 7:15-3.6 and 3.7, and that certain directly affected municipal and county agencies and other interests as identified by the Department have been provided an opportunity to review and comment on the proposed revision:
- i. Any increase in flow (including both increased loadings and no increased loadings) from industrial treatment works where no change in service area or discharge type (for example, discharge to surface water or ground water) is proposed and the discharge is not to a waterbody segment for which a TMDL has been proposed or adopted under N.J.A.C. 7:15-7. The Department may process such revisions prior to or simultaneously with a NJPDES permit for the same change in flow;
- ii. The transfer of sewer service area from one domestic treatment works to another, provided that the approved sewer service areas in the areawide WQM plan are currently contiguous in the area to be transferred, neither domestic treatment works is subject to a sewer connection ban, the proposed revision includes only areas currently designated for sewer service, both the sending and receiving wastewater management planning agencies concur with the proposed revision, and no new or expanded treatment works other than sewer line extensions is proposed as part of the revision;
- iii. Any increase of 20,000 gpd or less in planned wastewater flow to an on-site NJPDES-permitted discharge to ground water for a school or public institution, using the same general type of treatment works (for example, direct discharge to ground water, spray irrigation);
- iv. Any change in the estimated wastewater flow (see N.J.A.C. 7:15-5.16(b)8) or design capacity (see N.J.A.C. 7:15-5.16(b)9) to a NJPDES-permitted discharge to ground water from less than 20,000 gpd to more than 20,000 gpd, provided (b)4v below is satisfied and the same general type of treatment works is proposed;
- v. Expansion of a future sewer service area to contiguous lots, where the expansion involves less than 100 acres, contributes less than 8,000 gallons per day of additional wastewater flow, and does not create a significantly new pattern of sewer development such that a significant potential or incentive is created for additional revisions or amendments to open new areas to sewer development.
- (c) The documents that are automatically adopted into the Statewide or areawide WQM Plans under N.J.A.C. 7:15-3.4(b)1 through 4, and 7:15-3.4(i) shall not be revised under this section.
- (d) The procedure for revision of Statewide and areawide WQM plans is as follows:
1. The Governor or his designee shall adopt revisions to areawide WQM plans and the Commissioner shall adopt revisions to the Statewide WQM Plan. Such revisions shall take effect immediately, unless the adoption notice specifies otherwise.
2. The Department shall, on an annual basis, make publicly available a list of adopted revisions to WQM plans. Under N.J.A.C. 7:15-3.4, interested persons may submit petitions to amend WQM plans to repeal or modify such revisions.
- (e) Designated planning agencies shall revise areawide WQM Plans in accordance with procedures established by such agencies and approved by the Department. All revisions to areawide WQM plans are valid only upon their adoption by the Governor or his designee.
- (f) The Governor or his designee shall certify adopted WQM Plans in accordance with United States Environmental Protection Agency regulations.

Administrative Correction to (b)3: Changed 5.24(g) to 5.23(g).

See: 22 N.J.R. 2001(b).

Amended by R.1997 d.108, effective May 5, 1997.

See: 28 N.J.R. 729(a), 28 N.J.R. 2779(a), 28 N.J.R. 3494(a), 28 N.J.R. 3858(a), 29 N.J.R. 2142(a).

Added (b)1i and ii; added (b)4; and in (c), amended N.J.A.C. references.

7:15-3.6 Coordination with Coastal Zone and Hackensack Meadowlands programs

(a) In accordance with N.J.A.C. 7:7E-1.2(h), the Department's Rules on Coastal Zone Management, N.J.A.C. 7:7E, including, but not limited to, provisions concerning the Hackensack Meadowlands Development Commission at N.J.A.C. 7:7E-1.5(a) and 7:7E-3.45, shall provide the basic policy direction for WQM planning in the New Jersey Coastal Zone defined at N.J.A.C. 7:7E-1.2(b), including, but not limited to, the Hackensack Meadowlands District described in N.J.S.A. 13:17-4.

- i. National recreation areas, wildlife refuges, and historical parks administered by the United States Department of the Interior;
 - ii. State and interstate parks, forests, wildlife management areas, natural areas, and recreation areas administered by the Department or the Palisades Interstate Park Commission; and
 - iii. County and municipal parks, reservations, preserves, and other conservation or recreation areas;
5. River areas designated under the New Jersey Wild and Scenic Rivers Act, N.J.S.A. 13:8-45 et seq., or the Federal Wild and Scenic Rivers Act, 16 U.S.C. §§ 1278 et seq.;
 6. Category One Waters, trout production waters, and trout maintenance waters designated in the Department's Surface Water Quality Standards, N.J.A.C. 7:9-4, based on the Department's maps of such waters; and
 7. Surface waters, as mapped on USGS quadrangle maps.

Amended by R.1993, d.59, effective February 1, 1993.
See: 24 N.J.R. 344(b), 25 N.J.R. 547(a).

Deleted (a)3iii, concerning 10-foot contour line specified in repealed N.J.A.C. 7:7E-8.19.

7:15-5.18 Future wastewater jurisdictions, service areas, and domestic treatment works

(a) In accordance with the provisions of this section, each wastewater management plan shall include a description of wastewater service areas and DTW necessary to meet anticipated wastewater management needs over a 20-year period. A wastewater management plan may also include such descriptions for shorter or longer periods.

1. Each wastewater management plan shall provide for cost-effective, environmentally sound wastewater management, including existing or new comprehensive regional DTW or regional management where appropriate. Upgrading or expansion of existing regional DTW is generally preferable to construction of additional DTW that would produce additional direct discharges to surface water at new locations.

2. On a case-by-case basis, the Department may require wastewater management planning agencies to examine specific wastewater management alternatives as part of the preparation of the wastewater management plan. The Department may require such examination to include analysis of critical economic, social, environmental, or institutional factors pertaining to such alternatives.

(b) Subject to the requirements, qualifications, and exceptions listed in (b)3 through 8 below, wastewater service areas and DTW shall, to the maximum extent practicable, be identified in such a manner as to provide adequate wastewater service for:

1. Land uses allowed in zoning ordinances that have been adopted and are in effect under N.J.S.A. 40:55D-62; or
2. Future land uses shown in municipal or county master plans that have been adopted and are in effect under N.J.S.A. 40:55D-28 or N.J.S.A. 40:27-2. If such master plans are used, wastewater service areas and DTW shall, to the maximum extent practicable, be identified in a manner consistent with any sewerage provisions in such master plans.
3. The wastewater management plan shall list all of the zoning ordinances, municipal master plans, or county master plans on which the wastewater management plan is based. If any zoning ordinance is used, the documentation for the wastewater management plan shall include a copy of the map of the districts in that ordinance, and of the regulations in that ordinance which specify the type, density, and intensity of land use allowed in each district. If any master plan is used, documentation for the wastewater management plan shall include a copy of the map of proposed future land uses contained in that master plan, a copy of any text in the master plan which is needed to interpret the map, and a copy of any provisions in the master plan that address sewerage and waste treatment.

4. Due regard shall be given to the degree of likelihood that land development allowed in zoning ordinances will occur in the 20-year period, and to any substantial differences between dates associated with future land uses shown in master plans and the dates on which the 20-year periods end.

5. If, for particular locations, a zoning variance under article 9 of the Municipal Land Use Law, N.J.S.A. 40:55D-1 et seq., allows land development that would generate more wastewater than would the development allowed in the zoning ordinance or shown in the master plan, then for some or all of those locations the wastewater management plan may be based on the zoning variance rather than on the zoning ordinance or the master plan.

6. If, for particular locations, preliminary or final subdivision or site plan approvals under article 6 of the Municipal Land Use Law, N.J.S.A. 40:55D-1 et seq., have allowed land development that would generate more wastewater than would the development allowed in the zoning ordinance or shown in the master plan, then for those locations the wastewater management plan shall be based on such approvals rather than on the zoning ordinance or the master plan.

7. Wastewater management plans relating to the New Jersey Coastal Zone, the Hackensack Meadowlands District, the Pinelands Area, or the Pinelands National Reserve are subject to the requirements of N.J.A.C. 7:15-3.6 or 3.7, as appropriate.

8. The wastewater management plan may be inconsistent with zoning ordinances or master plans for other compelling reasons, provided that the wastewater management plan specifically identifies such inconsistencies and sets forth such reasons with adequate documentation.

(c) Each wastewater management plan shall include maps of future wastewater service areas, and of specified categories of future DTW, that are necessary to meet anticipated wastewater management needs at the end of the 20-year period, and at the end of any shorter or longer period identified under (a) above. These maps shall depict the following:

1. The location, within or outside the wastewater management plan area, of each existing, expanded, or new DTW, if any, that would not be a sewer or a pumping station, but that would receive sewage that would arise within or be conveyed into or through the wastewater management plan area, if such DTW would require a NJPDES discharge permit and:

i. Directly discharge to surface waters, or onto the land surface (for example, spray irrigation or overland flow facilities); or

ii. Have a design capacity of 20,000 gallons per day or larger, and store or dispose of sewage by any means;

2. The location of each discharge to surface or ground water from each DTW mapped within the wastewater management plan area under (c)1 above;

3. The location of each existing, expanded, or new pumping station and major interceptor and trunk sewer, if any, that would convey sewage within the wastewater management plan area;

4. The sewer service area, within or outside the wastewater management plan area, for each DTW mapped within the wastewater management plan area under (c)1 above, distinguishing the separate area to be served by each DTW;

5. The sewer service area, within the wastewater management plan area, for each DTW mapped outside the wastewater management plan area under (c)1 above, distinguishing the separate area to be served by each DTW;

6. The area, if any, within the wastewater management plan area that would be served only by either or both of the following:

i. Individual subsurface sewage disposal systems for individual residences; or

ii. Other DTW that would have a design capacity of less than 20,000 gallons per day, and use either subsurface disposal systems or other sewage disposal systems that would have no direct discharge to surface water or onto the land surface; and

7. The area, if any, within the wastewater management plan area that would be served only by either or both of the following:

i. Individual subsurface sewage disposal systems for individual residences; or

ii. Other DTW that would have a design capacity of less than 2,000 gallons per day, and use either subsurface disposal systems or other sewage disposal systems that would have no direct discharge to surface water or onto the land surface.

(d) For each DTW mapped within the wastewater management plan area under (c)1 above, each wastewater management plan shall further identify the future DTW that are necessary to meet wastewater management needs by providing, in narrative, outline, or tabular form, the following information applicable to such DTW at the end of the 20-year period, and at the end of any shorter or longer period identified under (a) above:

1. Owner and, where known, name of the DTW;

2. Name of any other governmental unit or corporation, if any, to be responsible for operating the DTW;

3. Location of the DTW within municipality, county, and WQM planning area, and within any existing district;

4. Where known, NJPDES permit number for any discharges from the DTW;

5. Name of present or proposed NJPDES permittee and any co-permittee for any discharges from the DTW;

6. Name and present classification, under N.J.A.C. 7:9-4 and N.J.A.C. 7:9-6, of any surface and ground waters that would receive any discharges from the DTW;

7. Estimate of residential population to be served by the DTW within and outside the wastewater management plan area, disaggregated by municipality and including any major seasonal fluctuations; and

8. Estimated average flow of wastewater to be received by the DTW, in millions of gallons per day, disaggregated by municipality and expressed as total flow, as flow arising within and outside the wastewater management plan area, and as flow attributed to each of the following sources: residential, commercial, and industrial.

(e) For each DTW mapped outside the wastewater management plan area under (c)1 above, each wastewater management plan shall further identify the future DTW that are necessary to meet wastewater management needs by providing, in narrative, outline, or tabular form, the following information applicable to such DTW at the end of the 20-year period, and at the end of any shorter or longer period identified under (a) above:

1. Owner and, where known, name of the DTW;

ii. If sufficient data have been collected to enable the water quality model to include a reliable and quantitative consideration of nonpoint source contributions, the initial LAs may be based upon the anticipated nonpoint source loading after the imposition of controls based on Best Management Practices for which quanti-

fiable load reductions can be reliably projected, and that are scheduled and expected to be in place within five years of the adoption of the TMDL or an alternative schedule adopted in the TMDL, with appropriate monitoring to ensure that the loading reductions have been achieved;

iii. In either case under (d)2i and ii above, the impact of the LAs regarding the degradation of high quality waters, for any pollutant parameters, shall be considered.

3. For point source discharges, including point sources that do not require NJPDES permits or do not require the inclusion of effluent limitations within NJPDES permits and site remediation decisions, WLAs shall be consistent with the antidegradation requirements at N.J.A.C. 7:9B-1.5(d), the antibacksliding requirements at N.J.A.C. 7:14A-13.19, the results of a mixing zone analysis completed in accordance with N.J.A.C. 7:9B, and/or any applicable effluent standard. The preliminary wasteload and load allocations proposed through the TMDL process may be modified prior to final adoption of the TMDL/WLA/LA to account for pollutant trading among the various pollutant sources within the waterbodies addressed by the TMDL;

i. Unless the Department determines based on site specific information that an allocation is required, only those dischargers with confirmed presence of the pollutant parameter for which a TMDL is developed shall be considered for an allocation for that parameter;

ii. All dry weather discharges to each waterbody segment shall be considered for a WLA, except stormwater sources not considered as point sources in accordance with N.J.A.C. 7:15-6.3(a)7; and

iii. All pollutants discharged under a general permit with numeric limitations for the parameter of concern shall be considered as a part of the TMDL process and may receive an allocation.

4. At a minimum, the following general approaches shall be considered in the development of allocation options. Each option for the allocation of WLAs to individual point source inputs and of LAs for individual or aggregate nonpoint source inputs shall be addressed in the TMDL proposal prepared in accordance with N.J.A.C. 7:15-7.2. Options may be applied across all categories of pollutant sources or for specific categories of pollutant sources (such as, but not limited to, major domestic treatment works, minor domestic treatment works, similar industrial categories, stormwater discharges). The options shall be examined in general, and then examined in detail only where they are found to be reasonably applicable to the specific TMDL:

i. Allocation of an equal effluent concentration to each source, for each pollutant or pollutant parameter;

ii. Allocation of an equal percent removal to each source, for each pollutant or pollutant parameter;

iii. Allocation of an equal effluent mass loading to each source, for each pollutant or pollutant parameter; and

iv. Minimization of the total treatment expenditure for the entire waterbody segment. This process may

include trading of allocations among point source inputs and/or nonpoint source inputs of pollutants so long as the water quality standards shall be attained throughout the waterbodies addressed by the TMDL and at the edge of the regulatory mixing zone for any single point source discharge.

(e) The WLAs or site specific allocations for any pollutants or pollutant parameters discharged into an intermittent stream shall require that all water quality standards be achieved pursuant to N.J.A.C. 7:9B-1.5(c)3.

(f) The WLAs or site specific allocations for any pollutants or pollutant parameters discharged into or upstream of a lake, pond, impoundment, or reservoir, except for impoundments specifically constructed as a unit of a treatment works or storm water management basin, shall ensure compliance with the mixing zone rules at N.J.A.C. 7:9B-1.5(h).

(g) When a TMDL and the associated WLAs/LAs have been developed for a waterbody segment, a site specific allocation shall also be determined for each pollutant addressed by the TMDL that is discharged by each point source requiring a WLA and NJPDES permit. This site specific allocation shall ensure that the surface water quality standards shall be attained at the edge of the regulatory mixing zone as required by N.J.A.C. 7:9B-1.5(c)4. The Department shall compare the site specific allocation to the WLA developed in accordance with the TMDL procedure. The more stringent of the two allocations shall be used to evaluate the need for more stringent effluent limitations than currently contained in the NJPDES permit in accordance with N.J.A.C. 7:14A-13.

(h) Seasonal WLAs or site specific allocations may be developed in accordance with the following conditions:

1. Each seasonal WLA shall be derived from a seasonal TMDL;

2. Seasonal WLAs or site specific allocations may be developed for the following parameters and groups of parameters:

i. Parameters substantially affecting dissolved oxygen dynamics in the receiving stream;

ii. Nutrients, including phosphorus and nitrogen; and

iii. Ammonia-N limitations to protect against toxic effects in the receiving water.

3. A dissolved oxygen study may be required which addresses any effects or potential effects on designated water uses or actual adverse biological impacts (including their impacts on waterbody ecosystems and water supply systems) in the target waterbody segment and other waterbody segments (see N.J.A.C. 7:14A-2.12);

4. A nutrient study may be required which addresses any effects or potential effects on nutrient cycling and

potential or actual adverse biological impacts (including their impacts on waterbody ecosystems and water supply systems) in the target waterbody segment and other waterbody segments, during any seasons (that is, regarding immediate and delayed impacts) (see N.J.A.C. 7:14A-13.9);

5. Except as specified in (h)6 below, seasonal WLAs or site specific allocations may be developed for a maximum of two seasons in each year

6. Seasonal WLAs or site specific allocations may be developed for more than two seasons as necessary, when:

- i. The United States Geological Survey provides a reliable estimate of applicable stream design flows from a gauging station located in the vicinity of the discharge location or where sufficient data are available to establish a correlation between similar drainage basins; and
- ii. The permittee provides additional seasonal water quality studies.

(i) WLAs and LAs, as appropriate, for thermal discharges shall be developed based on the provisions of N.J.A.C. 7:9B-1.14(c)11 according to the following procedures and in accordance with 40 CFR 130.7(c)(2):

1. When a thermal TMDL has been established, including a seasonal thermal TMDL as appropriate, WLAs and LAs based on the TMDL shall be established so as to ensure that the thermal component of the discharges affected by the TMDL is controlled to the extent necessary to ensure that the TMDL shall be achieved; and

2. All thermal WLAs shall be developed so as to ensure that the surface water quality standards, including antidegradation policies, shall be achieved at the boundary of any established regulatory mixing zone (see N.J.A.C. 7:9B-1.5(h)).

(j) When a TMDL has not been established for a waterbody segment, the Department may establish a site specific allocation and water quality based effluent limit in accordance with N.J.A.C. 7:14A-13.6.

7:15-7.7 Margin of safety and reserve capacity

(a) A margin of safety shall be included in the TMDL (either as an internal factor of the TMDL modeling approach or as an explicit, separate factor, as appropriate) that accounts for the following:

1. The level of uncertainty in the available data and analysis, including:
 - i. The amount and quality of ambient water quality and hydrologic data;
 - ii. The amount and quality of point source input data;
 - iii. The amount and quality of nonpoint source input data;

- iv. The number of pollutant discharges;
 - v. The potential overlapping impacts of discharges;
 - vi. The availability of a complex TMDL and associated modeling; and
 - vii. The inclusion in the model of conservation assumptions or statistical treatments that satisfactorily address the need for a margin of safety to address the factors in (a)1i through vi above without the addition of a separate, explicit margin of safety.
2. The type of parameter for which limits are to be developed, including the persistence of the pollutant or the potential for the pollutant to bioaccumulate;
 3. The reliability of potential/existing treatment systems, including the control of nonpoint sources and unpermitted point sources;
 4. The identified and adopted water quality goals for the waterbody segment; and
 5. The presence of high quality waters.

(b) A reserve capacity (with a value of zero or greater) shall be included in the TMDL where appropriate to account for the potential for regional growth and/or new or expanded point or nonpoint source contributions, including remediation activities where such activities constitute a new contribution of pollutants to the waterbody segment, and also for anticipated flow reductions in the waterbody segment due to flow regulation, depletive or consumptive uses, and inter-watershed transfers of water or wastewater. Area-wide WQM plans shall be used as one source of information for determining a reserve capacity.

(c) A margin of safety and, where appropriate, a reserve capacity shall be assigned to each waterbody segment as an integral part of the TMDL process. The amount of the margin of safety and any reserve capacity and a description of the process for determining the margin of safety and any reserve capacity for the specific waterbody or waterbody segment or segments shall be specifically included in the TMDL.

SUBCHAPTER 8. DISCHARGES TO GROUND WATER OF LESS THAN 20,000 GALLONS PER DAY AND LESS THAN 2,000 GALLONS PER DAY

Source and Effective Date

R.2001 d.72, effective February 20, 2001 (operative March 20, 2001).
