Community Conversations

NJ Dept. of Health / YMCA

I am a senior citizen living on Long Beach Island year-round. After many unsuccessful attempts to reach the NJ Hotline regarding getting an appointment, we tried a different approach.

My son arranged for me to receive my vaccinations at the [REDACTED] Community Center operated by [REDACTED] Township Health Department. They had a precise, well-organized schedule. The vaccination was accomplished in a professional, friendly and courteous manner.

The [REDACTED] reached out to my husband, as a Korean War veteran, to participate in their vaccination program at the [REDACTED] facility in Ocean County. He was happy to get his shots from them. He found it to be an organized program. He received his first and second shots with no delay at the time scheduled.

These vaccinations have protected us from the Corona virus and we appreciate the many hours and planning that have gone into this massive program.

Thank you all.
