

Sofía

My family and I were very affected by this since my husband, who is the only one who gives the income at home, tested positive for Covid-19 and was at home for 15 days. Economically, it affected us a lot but after he gave it too it gave my baby, who was only 6 months old, in those days and my 5-year-old boy didn't, but my taste and smell went away and we got a fever. We took it easy and my husband had check-ups every two days with a primary doctor and well, we hope that all this happens and that the people who are going through this do not get discouraged and keep fighting that this will soon pass.
