Aviation Department - Traffic Statistics

JoJo Quayson

Juan Clar

Daniel Gafurson

Notes1: The section entitled Air Transport Association Carriers is included to give a comparison between Port Authority Airport traffic growth and aggregate growth as measured by the majority of the U.S. carrier industry.

Note2: The page 2 Access Mode: residents report excludes passengers arriving by hotel courtesy vehicles, helicopters, and the miscellaneous "other" category. The airline OAG summary uses schedules effective for the week in the middle of the month being summarized."Flights (daily) refers to the daily-each-way average flights which can be thought of as 1 directional departing or arriving flights.

Our airports served 98.2 million passengers YTD October - 3.1% higher than passenger traffic for the same period last year. Following a record-setting summer months and a good September, October set a new peak with 9.9 million passengers traveling through our facilities, a 3.4% increase over October of last year. Domestic traffic was up 2.5% this month, putting YTD in the black by 1.5%. International traffic continued to roar with a 5.2% increase for the month. This increase is due to relatively high load factors, seat capacity expansion and a rapidly appreciating U.S. dollar. The region's cargo increased 1.5% in October as international tonnage expanded 2% marking an eighth consecutive month of growth. Domestic cargo tonnage increased 0.7%. This month's cargo continued a positive trend largely because our international cargo accounts for almost 70% of the total.
