HOW CAN WE HELP?

Our expert team provides solutions dedicated to elevating your research initiatives with professionalism and expertise [Contact us >](#)

NEED SAMPLES?

Explore our collection of [Cell Lines](#), [Stem Cells](#), and [DNA & RNA](#), and an extensive range of other high-quality products in our [Online Catalog](#)

RESEARCH

From the [Camden Cancer Research Center](#) to the [Camden Opioid Research Initiative](#), we are investigating how our DNA impacts health. [Learn more >](#)

SERVICES

Coriell Laboratories offers customized solutions for biobanking, stem cells, R&D, and assay development, among other services. [Learn more >](#)

DEEP LEARNING AS AN IMPROVED METHOD TO IDENTIFY BLOOD STEM CELL TYPES

The stem cells responsible for our blood supply play a crucial role in medicine, but distinguishing between the various types has long been a challenge. In a paper published in *Stem Cell Research & Therapy*, Coriell scientists detail how deep learning can be used to greatly hasten the process.

Camden Cancer Research Center

Connecting scientists and empowering collaborative research to develop the next generation of cancer treatments

Core Facilities

Leverage our expertise and state-of-the-art facilities to accelerate your biomedical research initiatives

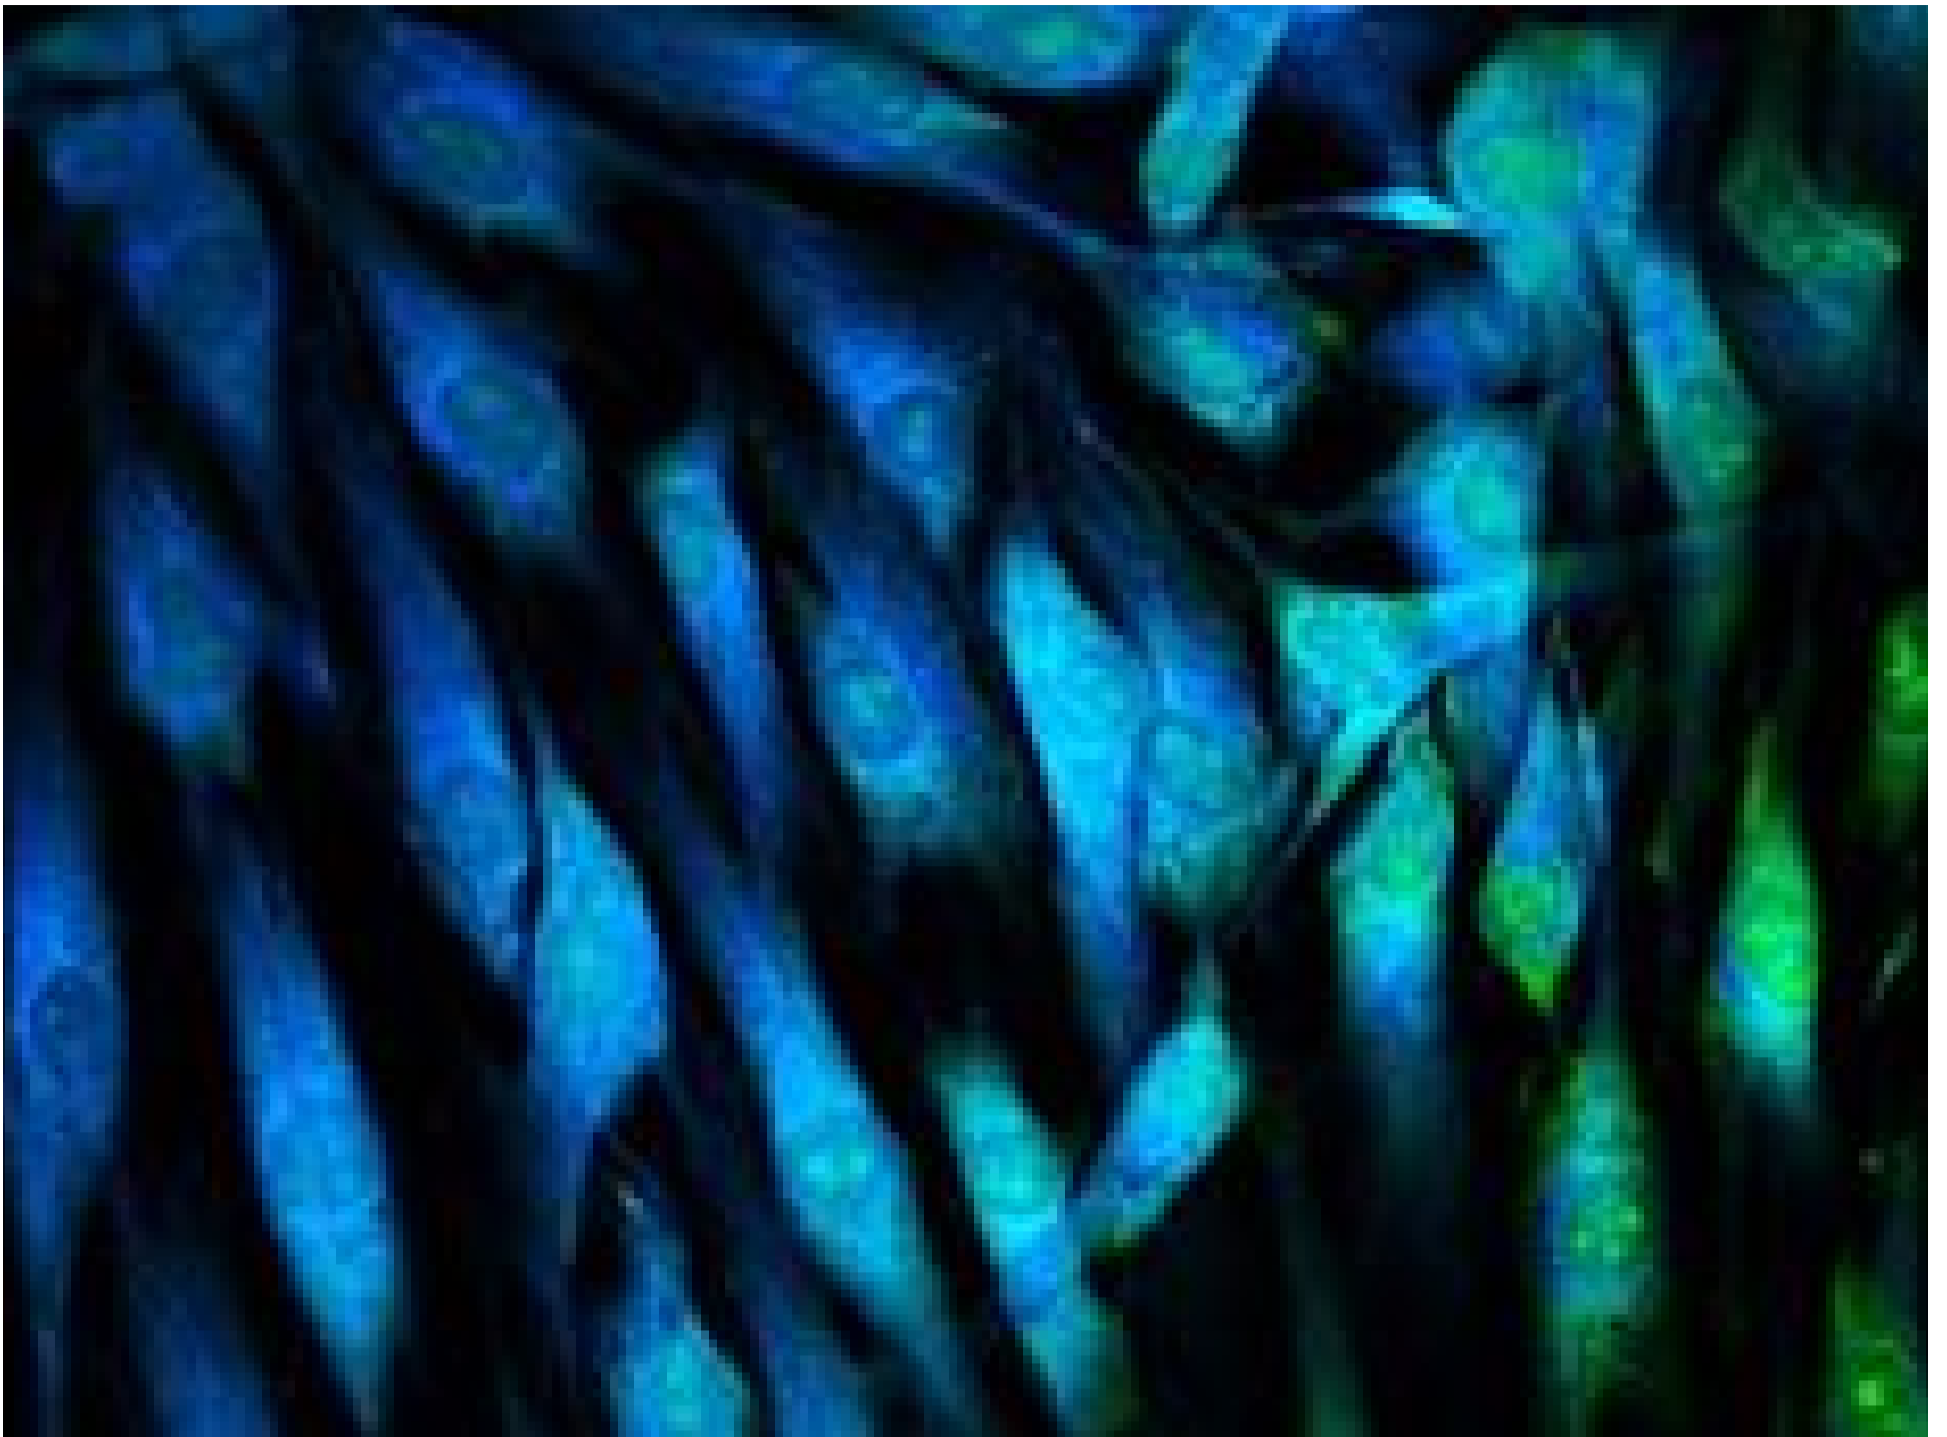

SNP Search

This is a dynamic query of 1000 Genomes Project whole genome sequencing data

How Can We Help?

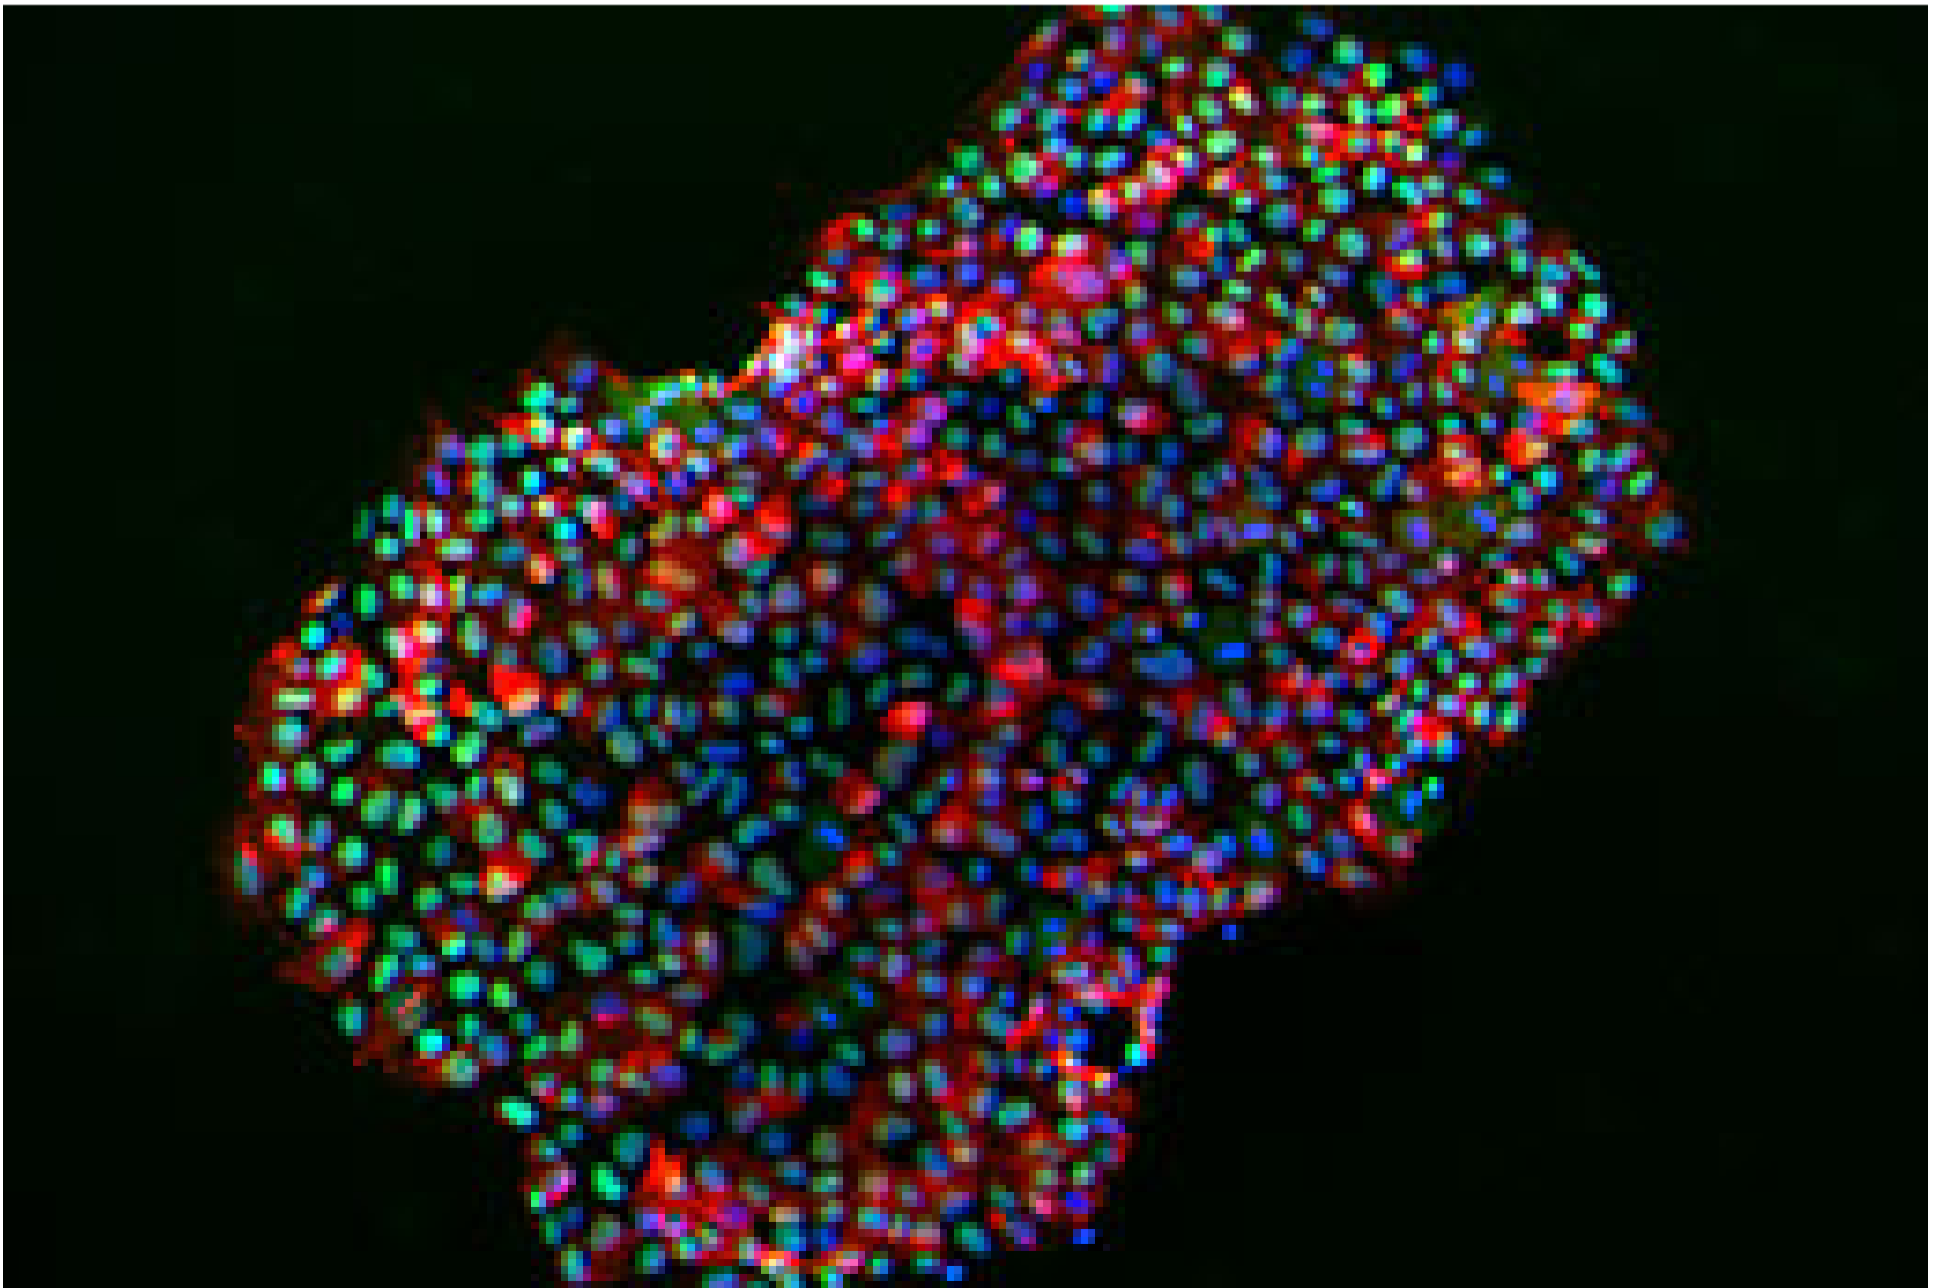

Click here to send us a message, and we'll work together to find a solution.

FEATURED PRODUCTS AND SERVICES

Cell Lines

Gold standard practices in cell line establishment, cell characterization and cryopreservation

Stem Cells

iPSCs are valuable for their potential for disease pathology research and highly targeted therapies

DNA & RNA

High-quality biomaterials from our Molecular Biology Laboratory

Our mission is to prevent and cure disease through biomedical research.
