(a) For the purpose of contributory insurance, all compulsory enrollees, including veterans, under age 60 at the time their enrollment application is filed, shall be required to participate in the contributory insurance program for one year (12 calendar months) from the date of enrollment, or the effective date of insurance premium deduction, whichever is later. Proof of insurability shall be required for all compulsory and optional enrollees, age 60 or older, in order to qualify for noncontributory and contributory insurance coverage.

(b) Optional enrollees under age 60 may qualify for noncontributory and contributory insurance coverage only if they were actively at work performing all of the duties that the position requires at the time they made application for enrollment, and such application was filed within one year from the date they first became eligible for enrollment in the system. If an application for an optional enrollee is not received within one year after he became eligible for enroll-

17:2-3.2 Computation of insurance benefits

(a) Any member who is reported on a 10-months basis and who has not resigned or been discharged, shall be covered by his or her insurance benefits for the month or months he or she is on his regular seasonal layoff.

1. The death benefit shall be based upon the base salary upon which contributions to the annuity savings fund were made that are attributable to the 12 months or 26 biweekly pay periods immediately preceding his or her death.

2. The salary, in the month or biweekly pay period in which no salary was paid, shall be counted as zero.

(b) Full salary credit will be given for the month or biweekly pay period in which a member dies, if he was paid salary to date of death and the salary paid was sufficient to permit a full normal month's or biweekly pension and insurance contribution deduction, provided such deduction was made by the employer.

(c) If a member dies during the first year following his date of enrollment, the contributory insurance benefit shall be $1\frac{1}{2}$ times the member's annual base salary on which he contributed or would have contributed immediately prior to his death. The noncontributory insurance benefit shall be $1\frac{1}{2}$ times the actual base salary upon which contributions to the annuity savings fund were due from the date of enrollment to the date of death.

(d) For a member dying after the first year following his or her date of compulsory enrollment, both the noncontributory and contributory insurance benefit shall be determined upon the base salary upon which contributions to the annuity savings fund were made, that are attributable to the 12 months or 26 biweekly pay periods preceding death.

(e) If a member has contributed pension contributions for less than a year but his enrollment has been in effect for more than a year, only those wages upon which pension contributions were based can be used as salary to determine the value of the noncontributory insurance benefit, whereas the contributory insurance benefit will be based on the member's annual salary on which he last contributed.

(f) Where a post-audit of insurance claim payments indicates the pension contributions reported by an employer were incorrect and resulted in the overpayment of an insurance claim to a member's designated beneficiary or estate, the employer will be billed for the value of the overpayment of the insurance benefits. Where post-audits establish the insurance benefits were underpaid, an additional check would be sent to the beneficiary for the value of the underpayment.

(g) Refunds of a deceased member's pension contributions will be made to the member's designated beneficiary or the employer after written confirmation is received from the employer setting forth the reason for the refund of pension contributions to either the beneficiary or to the employer.

(h) Members who prove their insurability for the group life insurance benefits shall have their insurance benefit calculated on the basis of the basis of salary they received or salary upon which pension contributions were based during their last year (10 and 12 months) of service prior to death, regardless of their effective date of insurance coverage.

(i) In computing the salary upon which pension contributions were based during a member's last year of service, in the case of a 12-month State employee reported on a biweekly basis, a total of 26 biweekly pays will be used, including any retroactive salary payments made within the prescribed period. The total salary will be adjusted by multiplying the total by the factors supplied by the actuary; such adjustment will compensate for State biweekly payroll schedules.

(j) In computing (i) above in the case of State employees reported on a 10-month basis, the total biweekly pays will include those pay periods in the third quarter of each year in which a member does not receive salary. The adjustment as specified in (i) shall not be made.

(k) If a member was reported on a biweekly basis or any combination of 10 and 12-month contract years, the last year's salary prior to death or retirement shall be determined on a proportional basis. The biweekly pay periods for which no contributions were made shall be counted as zero.

2. Such conduct as evidences reckless indifference to safety; or,
3. Intoxication, operating as the proximate cause of injury.

17:2-6.6 Retirement credit

(a) A member shall receive credit toward retirement for any month or biweekly pay period in which a full normal deduction is received by the system.

(b) A member who appeals the suspension or termination of his or her employment and is awarded back pay for all or a portion of his or her employment for the period of such suspension or termination shall receive retirement credit for the period covered by the award, regardless of the amount of the back pay awarded, provided a full normal pension contribution is received from the member or deducted from the value of the award. The amount of the pension contribution will be determined by the provisions of the award. If the member receives full back pay, including normal salary increases, then the contribution will be computed on the base salaries that the employee would have earned for the reinstated suspended or terminated period. When the settlement is less than the full back pay, the pension contribution will be based upon the salary that the member was receiving for pension purposes prior to the suspension or termination of employment. In the event that the amount of back payment is insufficient to deduct the value of the normal pension contributions due, such contribution shall be paid by the member.

(c) It is the responsibility of the certifying officer to provide a letter attesting to the base salary or salaries to be used to compute pension contributions and to provide a copy of the resolution or legal document that details the terms of the settlement.
