To explore the data for your hospital, select the name from the drop down list at the left.

Delivery Hospitalizations

3,343

Method of Delivery	Percent
Cesarean	30.63%
Vaginal	69.37%

NTSV Cesarean Rate

25.4%

The Healthy People 2020 goal is that all hospitals have NTSV cesarean rates under 23.9%.

■ Significantly Higher in comparison to statewide rate
 ■ Significantly Lower in comparison to statewide rate
 ■ No significant difference from state

Laceration Rates (vaginal birth only)

Complication Category	Statewide Rate / 1,000 Delivery Hospitalizations	Risk-Adjusted Rate / 1,000 Delivery Hospitalizations
High Vaginal Laceration	28.5	21.6
3rd/4th Degree Perineal Laceration	21.4	23.9

Post-admission Infection Rates

Complication Category	Statewide Rate / 1,000 Delivery Hospitalizations	Risk-Adjusted Rate / 1,000 Delivery Hospitalizations
Post-admission Infections - All Hospitalizations	6.6	13.4
Post-admission Infections - Cesarean	10.7	17.6
Post-admission Infections - Vaginal	4.3	10.7

Severe Maternal Morbidity with Transfusion Rates

Complication Category	Statewide Rate / 1,000 Delivery Hospitalizations	Risk-Adjusted Rate / 1,000 Delivery Hospitalizations
SMM with Transfusion-All Hospitalizations	18.2	9.7
SMM with Transfusion-Cesarean	32.9	25.8
SMM with Transfusion-Vaginal	10.0	2.8

Postpartum Hemorrhage Rates

Complication Category	Statewide Rate / 1,000 Delivery Hospitalizations	Risk-Adjusted Rate / 1,000 Delivery Hospitalizations
Postpartum Hemorrhage-All Hospitalizations	50.1	40.9
Postpartum Hemorrhage-Cesarean	67.7	11.1
Postpartum Hemorrhage-Vaginal	40.3	52.0
