SIGNIFICANT LEGISLATION

CHAPTER 250, P.L. 2007

Effective Date: January 4, 2008.

Description:

This law prohibits the investment of New Jersey public employee retirement system funds in any foreign company that has an equity tie to the government of Iran, or its instrumentalities, and is engaged in business operations with entities in the defense sector or nuclear sector of Iran, or engaged in business operations with entities involved in the natural gas or petroleum sectors of Iran, or with that government. It does not apply to the activities of any foreign company providing humanitarian aid to the Iranian people through either a governmental or non-governmental organization.

This law requires the State Investment Council and the Director of the Division of Investment to divest any investments held in violation of the prohibition after consulting with an independent research firm that specializes in global security risk for portfolio determinations selected by the State Treasurer. Periodic progress reports by the division are required.

This act would be void if: 1) the Congress or the President of the United States declares that the government of Iran has ceased to acquire or develop weapons of mass destruction and to support international terrorism; or 2) the United States revokes all sanctions imposed against the government of Iran.

The law also provides that State Investment Council members, and State officers and employees involved therewith, would be indemnified and held harmless by the State of New Jersey from all liabilities and losses that these individuals may sustain or cause by reason of any decision to restrict or eliminate investments pursuant to this act.

MEMBERSHIP

- As of June 30, 2008, the active membership of the System totaled 3,141, which includes inactive membership of 203.
- During fiscal year 2008, there were 2,517 retirees and beneficiaries receiving annual pensions totaling \$119,912,575. (*This includes cost-of-living increases paid under the provisions of the Pension Adjustment Act.*)
- Beneficiaries of deceased active and retired members received lump sum death benefits in the amount of \$1,525,502.
- The System's assets totaled \$2,295,264,617 at the close of the fiscal year 2008.

Independent Auditors' Report

The Board of Trustees
State of New Jersey
State Police Retirement System:

We have audited the accompanying statements of fiduciary net assets of the State of New Jersey State Police Retirement System (the System) as of June 30, 2008 and 2007, and the related statements of changes in fiduciary net assets for the years then ended. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the State of New Jersey State Police Retirement System as of June 30, 2008 and 2007, and the changes in its financial position for the years then ended in conformity with U.S. generally accepted accounting principles.

As discussed in note 1 to the financial statements, the System adopted Governmental Accounting Standards Board (GASB) Statement No. 50, *Pension Disclosures* in 2008.

Management's Discussion and Analysis and the supplementary information included in the schedule of funding progress and schedule of employer contributions (schedules 1 and 2) are not a required part of the basic financial statements but are supplementary information required by U.S. generally accepted accounting principles. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audits were conducted for the purpose of forming an opinion on the financial statements that collectively comprise the System's basic financial statements. The 2008 schedule of changes in fiduciary net assets by fund (schedule 3) is presented for purposes of additional analysis and is not a required part of the basic financial statements of the System. Such information has been subjected to the auditing procedures applied in the audit of the 2008 basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the 2008 basic financial statements taken as a whole.

Management's Discussion and Analysis

June 30, 2008 and 2007

Our discussion and analysis of the financial performance of the State Police Retirement System (the System) provides an overview of the System's financial activities for the fiscal years ended June 30, 2008 and 2007. Please read it in conjunction with the basic financial statements and financial statement footnotes, which follow this discussion.

Financial Highlights

2008 – 2007

- Net assets held in trust for pension benefits decreased by \$101,462,924 as a result of fiscal year 2008's operations from \$2,069,260,914 to \$1,967,797,990.
- Additions for the year are \$20,703,275, which are comprised of member and employer pension contributions of \$54,813,028 and an investment loss of \$34,109,753.
- Deductions for the year are \$122,166,199, which are comprised of benefit and refund payments of \$121,634,216 and administrative expenses of \$531,983.

2007 – 2006

- Net assets held in trust for pension benefits increased by \$227,056,885 as a result of fiscal year 2007's operations from \$1,842,204,029 to \$2,069,260,914.
- Additions for the year are \$338,677,758, which are comprised of member and employer pension contributions of \$47,146,319 and investment income of \$291,531,439.
- Deductions for the year are \$111,620,873, which are comprised of benefit and refund payments of \$111,089,743 and administrative expenses of \$531,130.

The Statements of Fiduciary Net Assets and the Statements of Changes in Fiduciary Net Assets

This annual report consists of two financial statements: *The Statements of Fiduciary Net Assets* and *The Statements of Changes in Fiduciary Net Assets*. These financial statements report information about the System and about its activities to help you assess whether the System, as a whole, has improved or declined as a result of the year's activities. The financial statements were prepared using the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized in the period they are earned, and expenses are recorded in the year they are incurred, regardless of when cash is received or paid.

The Statements of Fiduciary Net Assets show the balances in all of the assets and liabilities of the System at the end of the fiscal year. The difference between assets and liabilities represents the System's fiduciary net assets. Over time, increases or decreases in the System's fiduciary net assets provide one indication of whether the financial health of the System is improving or declining. *The Statements of Changes in Fiduciary Net Assets* show the results of financial operations for the year. The statements provide an explanation for the change in the System's fiduciary net assets since the prior year. These two financial statements should be reviewed along with the information contained in the financial statement footnotes, including the required supplementary schedules, to determine whether the System is becoming financially stronger or weaker.

Financial Analysis

Summary of Fiduciary Net Assets

2008 – 2007

	2008	2007	Increase
Assets	\$ 2,295,264,617	2,535,802,779	(240,538,162)
Liabilities	327,466,627	466,541,865	(139,075,238)
Net assets	\$ 1,967,797,990	2,069,260,914	(101,462,924)

The System's assets primarily consist of investments, securities lending collateral, accrued investment income and members' loans receivable. Between fiscal years 2007 and 2008, total assets decreased by \$240.5 million or 9.5% due to a decrease in the fair value of investments and the securities lending collateral.

Liabilities primarily consist of retirement benefits payable to retirees and beneficiaries, securities lending collateral and rebates payable and, classified under accounts payable and accrued expenses, liabilities of SPRS for unclaimed member accounts and checks issued to members that have not been negotiated by the members but remain due and payable. Total liabilities decreased by a net \$139.1 million or 29.8% due to a decrease in the securities lending collateral and rebates payable of \$146.7 million and an increase of \$7.6 million in retirement benefits payable due to full accrual of the July 1, 2008 payroll.

Net assets held in trust for pension benefits decreased by \$101.5 million or 4.9%.

2007 – 2006

	2007	2006	Increase
Assets	\$ 2,535,802,779	2,201,718,455	334,084,324
Liabilities	466,541,865	359,514,426	107,027,439
Net assets	\$ 2,069,260,914	1,842,204,029	227,056,885

The System's assets consist of cash, securities lending collateral, investments, contributions due from members, accrued investment income, and members' loans receivable. Between fiscal years 2006 and 2007, total assets increased by \$334.1 million or 15.2% due to an increase in the fair value of investments and securities lending collateral.

Liabilities consist of pension and death benefit payments owed to members and beneficiaries, non-contributory group insurance premiums owed to the System's insurance provider, securities lending collateral and rebates payable, and other payables. Total liabilities increased by \$107.0 million or 29.8% primarily due to an increase in retirement benefits payable to retirees and beneficiaries and also an increase in securities lending collateral and rebates payable.

Net assets held in trust for pension benefits increased by \$227.1 million or 12.3%.

Totals	<u>\$ 20,703,275</u>	<u>338,677,758</u>	<u>(317,974,483)</u>

Additions consist of member and employer contributions and earnings from investment activities. Member contributions increased by \$0.4 million or 2.5% due to an increase in membership.

There was an increase in employer contributions by \$7.2 million or 24.7%. The State made a contribution of \$34.9 million in fiscal year 2008. The amount contributed in fiscal year 2008 is equal to approximately 45% of the actuarially determined amount.

Net investment income decreased by \$325.6 million or 111.7% due to a decrease in the net appreciation in fair value of investments.

The total investment return for all pension funds was estimated to be 2.66% loss compared to 17.1% gain in the prior year.

2007 – 2006

	<u>2007</u>	<u>2006</u>	<u>Increase</u>
Member contributions	\$ 17,861,043	16,917,317	943,726

Totals	<u>\$ 338,677,758</u>	<u>203,699,531</u>	<u>134,978,227</u>

Additions consist of member and employer contributions and earnings from investment activities. Member contributions increased by \$0.9 million or 5.6% due to increases in member salaries. There was an increase in employer contributions by \$16.3 million or 125.0%. The State made a contribution of \$29.0 million in fiscal year 2007, the first significant contribution to the system since fiscal year 1997. The amount contributed in fiscal year 2007 is equal to approximately 57.5% of the actuarially determined amount.

Net investment income increased by \$117.8 million or 67.8% due to an increase in the net appreciation in fair value of investments.

The total investment return for all pension funds was estimated to be 17.1% compared to 9.7% in the prior year.

**STATE OF NEW JERSEY
STATE POLICE RETIREMENT SYSTEM**

Notes to Financial Statements

June 30, 2008 and 2007

(1) Description of the System

The State of New Jersey State Police Retirement System (the System; SPRS) is a single-employer contributory defined benefit plan which was established as of July 1, 1965, under the provisions of N.J.S.A. 53:5A. The System is included along with other state-administered pension trust and agency funds in the basic financial statements of the State of New Jersey.

The System's designated purpose is to provide retirement, death and disability benefits to its members. Membership in the System is mandatory for all uniformed officers and troopers of the Division of State Police of the State of New Jersey. The System's Board of Trustees is primarily responsible for its administration.

According to State of New Jersey Administrative Code, all obligations of the System will be assumed by the State of New Jersey should the System terminate.

In 2008, the System adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 50, "*Pension Disclosures*."

Vesting and Benefit Provisions

The vesting and benefit provisions are set by N.J.S.A. 53:5A. The SPRS provides retirement as well as death and disability benefits. All benefits vest after ten years of service (as defined). Retirement benefits are available after 20 years of service (as defined) at any age with mandatory retirement at age 55. The retirement benefit is based upon final compensation, which is defined as salary (as defined) plus maintenance allowance (as defined) during the last 12 months prior to retirement, and is a life annuity equal to the greater of the following: (a) 50% of final compensation; (b) for members retiring due to mandatory retirement, 50% of final compensation, plus 2% for each year of service in excess of 20 years to a maximum of 60% of final compensation; or (c) for members retiring with 25 or more years of service, 65% of final compensation, plus 1% for each year of service in excess of 25 years, to a maximum of 70% of final compensation. Members may elect deferred retirement after ten years of service in which case benefits in the form of life annuity would begin at age 55 equal to 2% of final compensation for each year of service up to 20 years.

Members are always fully vested for their own contributions.

Significant Legislation

Chapter 92, P.L. 2007 implemented certain recommendations contained in the December 1, 2006 report of the Joint Legislative Committee on Public Employee Benefits Reform. Effective January 1, 2008, the new pension loan interest rate became 4.69% per year, and an \$8.00 processing fee per loan was charged. The legislation also removed language from existing law that permits the State Treasurer to reduce employer pension contributions needed to fund the system when excess assets are available.

Notes to Financial Statements

June 30, 2008 and 2007

Membership and Contributing Employers

Membership in the System consisted of the following at June 30, 2007 and 2006, the dates of the most recent actuarial valuations:

	2007	2006
Retirees and beneficiaries receiving benefits currently and terminated employees entitled to benefits but not yet receiving them	2,426	2,338
Active members:		
Vested	1,795	1,774
Nonvested	1,204	1,219
Total active members	2,999	2,993
Total	5,425	5,331

The State of New Jersey is the only contributing employer of this System.

(2) Summary of Significant Accounting Policies

Measurement Focus and Basis of Accounting

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. The System is accounted for using an economic resources measurement focus.

The accrual basis of accounting is used for measuring financial position and changes in fiduciary net assets of the System. Under this method, revenues are recorded in the accounting period in which they are earned, and deductions are recorded at the time the liabilities are incurred. The financial statements of the System conform to the provisions of Governmental Accounting Standards Board (GASB) Statement No. 25, “*Financial Reporting for Defined Benefit Plans and Note Disclosures for Defined Contributions Plans.*” Employer contributions are recognized when payable to the System. Benefits and refunds are recognized when due and payable in accordance with the terms of the System.

Investments

The Division of Investment, Department of the Treasury, State of New Jersey (Division of Investment) manages and invests certain assets of seven of the defined benefit plans (PERS, TPAF, JRS, PFRS, CPFPPF, SPRS and POPF). The Division of Investment separately reports the assets, liabilities and net assets of the underlying investment portfolio of the seven defined benefit plans in its Pension Fund report. The Division of Investment accounts included in the Pension Fund report are: Common Fund A, Common Fund B, Common Fund D, Common Fund E, Police and Firemen’s Mortgage Program accounts and other investments owned directly by the seven defined benefit pension plans. Common Fund A invests primarily in domestic equity securities. Common Fund B invests primarily in domestic fixed income securities. Common Fund D invests primarily in foreign equity and fixed income securities. Common Fund E invests primarily in alternative investments which includes private equity, real assets and absolute return strategy

STATE OF NEW JERSEY

investments. The Police and Firemen's Retirement System includes a mortgage loan program administered by the New Jersey Housing and Mortgage Finance Agency that provides participants with mortgages from the program at rates which are fixed by formula. The law establishing the program provides that the System may not sell the mortgages, and no independent market exists for them.

Investments are reported at fair value as follows:

- U.S. Government and Agency, Foreign and Corporate obligations – prices quoted by a major dealer in such securities.
- Common Stock and Equity Funds, Foreign Equity Securities, Forward Foreign Exchange Contracts – closing prices as reported on the primary market or exchange on which they trade.
- Money Market Instruments – amortized cost which approximates fair value.
- Cash Management Fund – closing bid price on the last day of trading during the period as determined by the Transfer Agent.
- Alternative investments (private equity, real estate, commodity, and absolute return strategy funds) – estimated fair value provided by the general partner and/or investment manager and reviewed by management. The inputs into the determinations of fair value (particularly for private equity and real estate) require significant management judgment or estimation. Because by their very nature, alternative investments are not always readily marketable, their estimated value is subject to uncertainty and therefore may differ significantly from the value that would be used if a ready market for such investments existed. The development of fair value is further complicated by (1) the current lack of liquidity in the financial system and (2) the extreme levels of volatility in the market for public equity in general and for debt securities linked to these asset classes. For these reasons, the realized value received upon the sale of these investments in the open market might be different from the fair value reported in the financial statements.

Investment transactions are accounted for on a trade or investment date basis. Gains and losses from investment transactions are determined by the average cost method. Interest and dividend income is recorded on the accrual basis, with dividends accruing on the ex dividend date.

The net asset value of Common Funds A, B, D and E (Common Funds) is determined as of the close of the last day of business of each month. Purchases and redemptions of participants' units are transacted each month within fifteen days subsequent to that time and at such net asset value.

Dividends and interest earned per unit are calculated monthly and distributed quarterly for Common Fund A and B. Dividends and interest earned per unit are calculated monthly for Common Fund D, and the income earned on Common Fund D units is reinvested. Income earned per unit is calculated monthly for Common Fund E, and the income earned on Common Fund E units is reinvested.

Securities Lending

The State Investment Council policies permit Common Funds A, B and D and several of the direct pension plan portfolios to participate in securities lending programs, whereby securities are loaned to brokers or other borrowers and, in return, the pension funds have rights to the collateral received. All of the securities held in Common Funds A, B and D, and certain securities held directly by the pension plans, are eligible for the securities lending program. Collateral received may consist of cash, letters of credit, or government securities having a market value equal to or exceeding 102% (U.S. dollar denominated) or 105% (non-U.S. dollar denominated) of the value of the loaned securities at the time the loan is made. For Common Funds A and B, in the event that the market value of the collateral falls below 101% of the market value of all the outstanding loaned securities to an individual borrower, additional collateral shall be transferred by the borrower to the respective funds no later than the close of the next business day so that the market value of such additional collateral, when added to the market value of the other collateral, shall equal 102% of the market value of the loaned securities. For Common Fund D, in the event that the market value of the collateral falls below the collateral requirement of either 102% or 105% (depending on whether the securities are denominated in U.S. dollars or a foreign currency, respectively) of the market value of the outstanding loaned securities to an individual borrower, additional collateral shall be transferred in an amount that will increase the aggregate of the borrower's collateral to meet the collateral requirements. The securities lending contracts do not allow the Common Funds to pledge or sell any collateral securities unless the borrower defaults. As of June 30, 2008 and 2007, the Common Funds have no aggregate credit risk exposure to brokers because the collateral amount held by the Common Funds exceeded the market value of the securities on loan.

The contracts with the Common Funds' securities lending agent require them to indemnify the Common Funds if the brokers or other borrowers fail to return the securities or fail to pay the Common Funds for income distributions on the securities while they are on loan. The Common Fund D securities lending agent also indemnifies the Common Funds for any loss of principal or interest on the invested collateral. For any losses on the investment collateral in Common Funds A or B or other pension plan portfolios, the lending fee paid to the lending agent shall be reduced by 25% of the amount of such loss, up to an amount not to exceed 75% of the previous six months' securities lending fees. The securities loans can be terminated by notification by either the borrower or the Common Funds. The term to maturity of the securities loans is generally matched with the term to maturity of the investment (or, in the case of floating rate notes, to the next interest rate reset date) of the cash collateral.

Derivatives

The Division of Investment, from time to time, utilizes forward foreign currency contracts, a derivative security, as a means to hedge against the currency risk in the Common Funds' foreign stock and fixed income portfolios. A derivative security is an investment whose payoff depends upon the value of other assets such as bond and stock prices, a market index, or commodity prices. Derivative transactions involve, to varying degrees, credit risk and market risk. Credit risk is the possibility that a loss may occur because a party to a transaction fails to perform according to terms. Market risk is the possibility that a change in market prices or currency rates will cause the value of a financial instrument to decrease or become more costly to settle.

Forward foreign currency contracts are agreements to buy or sell a specific amount of a foreign currency at a specified delivery or maturity date for an agreed upon price. Forward foreign currency contracts are used to hedge against the currency risk in the Common Funds' foreign stock and fixed income portfolios.

There were no foreign forward currency contracts at June 30, 2007. The fair value of foreign forward currency contracts held directly by the Common Funds as of June 30, 2008 was as follows:

Forward currency receivable	\$	1,353,214,830
Forward currency payable		1,358,471,309
Net unrealized loss		5,256,479

The Common Funds utilize covered call and put options in an effort to add value to or reduce the risk level in the portfolio. Options are agreements that give the owner of the option the right, but not obligation, to buy (in the case of a call option) or to sell (in the case of a put option) a specific amount of an asset for a specific price (called the strike price) on or before a specified expiration date. The Common Funds enter into covered calls when they write (or sell) call options on underlying stocks held by the Common Funds or stock indices. The Common Funds enter into covered put options when they purchase put options on underlying stocks held by the Common Funds or stock indices. The purchaser of put options pays a premium at the outset of the agreement and stands to gain from an unfavorable change (i.e., a decrease) in the price of the instrument underlying the option. The writer of call options receives a premium at the outset of the agreement and bears the risk of an unfavorable change (i.e., an increase) in the price of the instrument underlying the option. The Common Funds had written call options on 5,661,100 shares with a fair value of \$895,504 at June 30, 2008. The Common Funds owned 880,000 put option contracts on the S&P 500 index with a fair value of \$72,334,000 at June 30, 2008.

Certain alternative investment funds and partnerships may use derivative instruments to hedge against market risk and to enhance investment returns. At any point during the year, the Common Funds may have additional exposure to derivatives primarily through limited liability vehicles such as limited partnerships and commingled investment funds.

Notes to Financial Statements

June 30, 2008 and 2007

The Common Funds recognize the fair value of all derivative instruments as either an asset or liability on the financial statements with the offsetting gains or losses recognized in earnings.

Members' Loans

Members who have at least three years of service in the System may borrow up to 50% of their accumulated member contributions. Repayment of loan balances is deducted from payroll checks and bears an interest rate of 4%. Members who retire with an outstanding loan have the option of paying the loan in full prior to receiving any benefits or continuing their monthly loan payment schedule into retirement.

Under the Internal Revenue Service regulations effective January 1, 2004, the Division changed its pension loan repayment policy: Members who take multiple loans must repay the outstanding balance of the original loan, and all subsequent loans taken before the original loan is completely paid off, within a period not to exceed 5 years from the issuance of the first loan taken after January 1, 2004. Failure to repay the loan within the five-year period will result in the unpaid balance being declared a taxable distribution.

Chapter 92, P.L. 2007 eliminated the 4% fixed rate of interest for loans from the defined benefit plans and provided that the rate of interest will be set by the State Treasurer at a commercially reasonable rate as required by the Internal Revenue Code and permitted that an administrative processing fee may be charged for such loans. As such, effective January 1, 2008, the new pension loan interest rate became 4.69% per year, and an \$8.00 processing fee per loan was charged.

Administrative Expenses

The System is administered by the State of New Jersey Division of Pensions and Benefits. Administrative expenses are paid by the System to the State of New Jersey, Department of the Treasury, and are included in the accompanying financial statements.

Funded Status and Funding Progress

The required supplementary information regarding the funded status and funding progress is based on actuarial valuations which involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. These amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the probability of future events.

The required schedule of funding progress presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

STATE POLICE RETIREMENT SYSTEM**

Notes to Financial Statements

June 30, 2008 and 2007

Actuarial calculations reflect a long-term perspective and are based on the benefits provided under State statutes in effect at the time of each valuation and also consider the pattern of the sharing of costs between the employer and members at that point in time. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations on the pattern of cost sharing between the employer and members in the future.

Actuarial Methods and Assumptions

In the June 30, 2007 and 2006 actuarial valuations, the projected unit credit was used as actuarial cost method, and the five year average of market value was used as the asset valuation method for the System. The actuarial assumptions included (a) 8.25% for investment rate of return and (b) 5.45% for projected salary increases.

Actuarial valuation date	June 30, 2007	June 30, 2006

New Jersey state statute provides for a State Investment Council (Council) and a Director. Investment authority is vested in the Director of the Division of Investment and the role of the Council is to formulate investment policies. The Council issues regulations which establish guidelines for permissible investments which include domestic and international equities and exchange traded funds, covered call and put options, equity futures contracts, obligations of the U.S. Treasury, government agencies, corporations, finance companies and banks, obligations of international corporations, governments and agencies, interest rate swap transactions, fixed income exchange traded funds, U.S. Treasury futures contracts, New Jersey State and Municipal general obligations, public authority revenue obligations, collateralized notes and mortgages, commercial paper, certificates of deposit, repurchase agreements, bankers acceptances, guaranteed income contracts, funding agreements, money market funds, private equity, real estate, other real assets and absolute return strategy funds and the State of New Jersey Cash Management Fund (CMF). The CMF is a short-term cash fund and is open to state and certain non-state participants.

Notes to Financial Statements

June 30, 2008 and 2007

The pension funds' investment in the Cash Management Fund is not evidenced by securities that exist in physical or book entry form held by the pension funds.

The System's investments are subject to various risks. Among these risks are custodial credit risk, credit risk, concentration of credit risk, interest rate risk, and foreign currency risk. Each one of these risks is discussed in more detail below.

Custodial credit risk, as it relates to investments, is the risk that in the event of the failure of the counterparty to a transaction, the pension funds will not be able to recover the value of investment or collateral securities that are in the possession of the third party. The pension funds' investment securities are not exposed to custodial credit risk as they are held in segregated trust accounts in the name of the pension funds with the custodians.

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The credit risk of a debt instrument is evaluated by nationally recognized statistical rating agencies such as Moody's Investors Service, Inc. (Moody's), Standard & Poor's Corporation (S&P), and Fitch Ratings (Fitch). Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. There are no restrictions in the amount that can be invested in United States Treasury and Government agency obligations. Council regulations require minimum credit ratings for certain categories of fixed income obligations held directly by the pension funds and limit the amount that can be invested in any one issuer or issue.

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment. The pension funds invest in global markets. Effective August 20, 2007, the market value of international preferred and common stocks and issues convertible into common stocks, when combined with the market value of international government and agency obligations, cannot exceed 30% of the market value of the pension funds; previously, this limitation was 22%. Effective September 5, 2006, the market value of emerging market securities cannot exceed more than 1.5 times the percentage derived by dividing the total market capitalization of companies included in the Morgan Stanley Capital International (MSCI) Emerging Market Index by the total market capitalization of the companies included in the MSCI All-Country World Ex-United States Index of the total market value of the assets held by Common Fund D. Prior to September 5, 2006, not more than 5% of the value of the assets held by Common Fund D can be invested in companies incorporated in emerging market countries. Not more than 10% of the market

value of the emerging market securities can be invested in the common and preferred stock of any one corporation; the total amount of stock purchased of any one corporation cannot exceed 5% of its stock classes eligible to vote. Council regulations permit the pension funds to enter into foreign exchange contracts for the purpose of hedging the international portfolio. The pension funds held forward contracts totaling approximately \$1.4 billion (with a \$5.3 million net exposure) at June 30, 2008. The pension funds did not have a forward contract exposure at June 30, 2007.

The pension funds had the following foreign currency exposure (expressed in U.S. dollars and in thousands) at June 30, 2008 and 2007:

The pension funds' interests in alternative investments may contain elements of credit, currency and market risk. Such risks include, but are not limited to, limited liquidity, absence of regulatory oversight, dependence upon key individuals, emphasis on speculative investments (both derivatives and non-marketable investments), and nondisclosure of portfolio composition. Effective September 5, 2006, Council regulations require that not more than 18% of the market value of the Pension Fund can be invested in alternative investments, with the individual categories of real estate, real assets, private equity and absolute return strategy investments limited to 7%. On August 18, 2008 the overall limitation was revised to 28%. Not more than 5% of the market value of Common Fund E, plus outstanding commitments, may be committed to any one partnership or investment, without the prior written approval of the Council. The investments in Common Fund E cannot comprise more than 20% of any one investment manager's total assets.

(4) Securities Lending Collateral

The System's share in the securities lending program is 2.47% and 2.51% of the total market value of the collateral as of June 30, 2008 and 2007, respectively.

The securities lending collateral is subject to various risks. Among these risks are credit risk, concentration of credit risk, and interest rate risk. Agreements with the lending agents require minimum credit ratings for certain categories of fixed income obligations and limit the amount that can be invested in any one issuer or issue. These limits are consistent with Council regulations and internal policies for funds managed by the Division of Investment. These limits for the period July 1, 2006 through September 4, 2006 were as follows:

<u>Category</u>	<u>Minimum rating</u>		<u>Limitation of issuer's outstanding debt</u>	<u>Limitation of issue</u>	<u>Other limitations</u>
	<u>Moody's</u>	<u>S&P</u>			
Certificates of deposit/ Banker's acceptances (rating applies to international)	Aa3/P-1	—	—	—	Uncollateralized certificates of deposit and banker's acceptances cannot exceed 10% of issuer's primary capital; dollar limits by issuer

June 30, 2008 and 2007

The collateral for repurchase agreements is limited to obligations of the U.S. Government or certain U.S. Government agencies, collateralized notes and mortgages and corporate obligations meeting certain minimum rating criteria.

Total exposure to any individual issuer is limited, except for U.S. Treasury and Government agency obligations. For money market funds, the total amount of shares or units purchased or acquired of any money market fund shall not exceed 5% of the shares or units outstanding of said money market fund. For Collateralized notes and mortgages, not more than 2% and 5% of the assets of the collateral portfolio shall be invested in the obligations of any one issuer and issue, respectively. For Guaranteed income contracts and funding agreements, the total investment in any one issuer shall be limited to 2.5% of the collateral portfolio. The Division of Investment sets individual issuer limits for Commercial paper and Certificate of deposits. For Corporate obligations, U.S. finance company debt, Bank debentures and Bankers acceptances, exposure to any one issuer shall be limited to the following percentages of the collateral portfolio in accordance with the issuer's rating from Moody's: Aaa (4%), Aa (3%), A (2%), and Baa (1%).

For securities exposed to credit risk in the collateral portfolio, the following tables disclose aggregate market value, by major credit quality rating category at June 30, 2008 and 2007. In those cases where an issuer and/or security have both a long-term and short-term rating, the short-term rating is presented.

June 30, 2008 and 2007

(5) Contributions

The contribution policy is set by N.J.S.A. 53:5A-34 and requires contributions by active members and the State of New Jersey. Plan member and employer contributions may be amended by State of New Jersey legislation. Members contribute at a uniform rate of 7.5% of base salary. Employers are required to contribute at an actuarially determined rate. The annual employer contributions include funding for basic retirement allowances, cost-of-living adjustments and non-contributory death benefits.

The State made a contribution of \$34.92 million, excluding the State's contribution of non-contributory group insurance (NCGI) of \$1.53 million and others of \$0.06 million for fiscal year 2008. The State made a contribution of \$28.98 million, excluding the State's contribution of NCGI of \$0.29 million and others of \$0.02 million for fiscal year 2007. The amounts contributed in fiscal years 2008 and 2007 are equal to 45.04% and 51.29% of the actuarially determined amounts, respectively.

(6) Funds

SPRS maintains the following legally required funds as follows:

Members' Annuity Savings Fund (2008 – \$169,942,630; 2007 – \$163,513,046)

The Members' Annuity Savings Fund (ASF) is credited with all contributions made by active members of the System. Member withdrawals are paid out of this Fund.

Contingent Reserve Fund (2008 – \$1,220,150,489; 2007 – \$1,362,223,843)

The Contingent Reserve Fund is credited with the contributions of the State of New Jersey. Interest earnings, after crediting the Retirement Reserve Fund, as required, are credited to this account. Additionally, payments for life insurance premiums and administrative expenses are made from this Fund.

Retirement Reserve Fund (2008 – \$577,704,871; 2007 – \$543,524,025)

The Retirement Reserve Fund is the account from which retirement benefits including cost-of-living adjustments are paid. Upon retirement of a member, accumulated contributions are transferred to the Retirement Reserve Fund from the ASF. Any additional reserves needed to fund the balance of the retirement benefit are transferred from the Contingent Reserve Fund. Annually, interest as determined by the State Treasurer (8.25% for fiscal years 2008 and 2007) is credited to the Retirement Reserve Fund.

Non-Contributory Group Insurance Premium Fund (2008 – \$0; 2007 – \$0)

The Non-Contributory Group Insurance Premium Fund represents the accumulation of employer group insurance contributions in excess of premiums disbursed to the insurance carrier since the inception of the non-contributory death benefit program plus reserves held by the insurance carrier. Members are eligible by statute for the non-contributory group insurance plan in the first year of membership.

(7) Income Tax Status

Based on a May 2007 declaration of an outside tax council retained by the Attorney General of the State of New Jersey, the System complies with the qualification requirements of Section 401(a) of the Internal Revenue Code.

(8) Subsequent Events

Subsequent to the June 30, 2008 fiscal year end, global financial markets suffered significant declines in value attributable to significant strains on many of the world's largest financial institutions. These difficulties, which were caused by a combination of liquidity constraints and continued write downs of mortgage-related assets, have resulted in a global economic downturn that has negatively impacted the value of most financial assets.

The investment assets of the Pension Funds have also incurred a considerable decline in value since June 30, 2008 due to these unfavorable market conditions. As of December 31, 2008 the fair value of the portfolio declined by approximately 17.9% due to these factors. Readers of this financial statement should check the New Jersey Division of Investment's website for more current information about the fair value of the pension funds' portfolio.

Notes to schedule:

- (1) Employer contributions exclude contributions received primarily from the Police and Firemen's Retirement System of New Jersey for certain members who transferred their eligible prior service credit to the State Police Retirement System.

In accordance with Chapter 115, P.L. 1997, available excess valuation assets were used to cover, in full or in part, the employer pension contributions from year 1997 to 2004.

- (2) In accordance with the provisions of the Appropriation Act for fiscal years 2005 through 2007, the State statutory required contributions have been reduced.
- (3) Differences between the amounts in the employer contribution column in this schedule and the amounts recorded in the financial statements and footnotes are attributed to timing differences between the 2007 actuarial valuations and the actual amounts received in fiscal year 2008. Employer contributions per this schedule represent anticipated contribution amounts determined at the time the actuarial valuations were prepared and finalized prior to the end of fiscal year 2008. The financial statements and footnotes reflect the actual amounts received in 2008.
