UNIFORM CRIME REPORTS

State of New Jersey

1973

Honorable William F. Hyland
Attorney General
State of New Jersey

Colonel David B. Kelly
Superintendent
New Jersey State Police

Chief Carmine J. Perrapato
Garfield Police Department
President
New Jersey Association Chiefs of Police

Chief Joseph Nee
Clifton City Police Department
Chairman
Advisory Committee on Uniform Crime Reporting

Issued By: State of New Jersey, Division of State Police
Uniform Crime Reporting Unit
Box 68, West Trenton, New Jersey 08625

STATE OF NEW JERSEY
WILLIAM F. HYLAND
ATTORNEY GENERAL

To the Honorable Brendan T. Byrne, Governor of the State of New Jersey; the Honorable Frank J. Dodd, President of the Senate, and Honorable Members thereof; and the Honorable S. Howard Woodson, Speaker of the General Assembly, and Honorable Members thereof:

Pursuant to N. J. S. A. 52:17B-5.5, there is hereby respectfully submitted the seventh annual report on information gathered and collated under the New Jersey Uniform Crime Reporting System, inaugurated on January 1, 1967, which provides a comprehensive compilation and analysis of crime statistics for New Jersey.

As noted in past years, New Jersey's effort in this area predated the Report of the President's Commission on Law Enforcement and the Administration of Criminal Justice, which urged the creation of such state systems. FBI officials, in discussing this system with members of our State Police, have described it as a model of its kind.

It would, of course, be impossible to compile this Report without the cooperation of New Jersey's municipal, county, state and other law enforcement agencies, 594 of whom contributed to this effort in 1973. It is with appreciation to these dedicated public servants, and in the interests of more effective law enforcement for all the citizens of New Jersey, that this seventh annual Uniform Crime Report is

Respectfully Submitted,

A handwritten signature in cursive script that reads "William F. Hyland".

William F. Hyland
Attorney General of New Jersey

STATEWIDE CRIME SUMMARY

1973

OFFENSES

- There were 300,176 serious crimes (Index offenses) reported in the state during 1973, a 6 percent increase over 1972.
- The crime rate was established at 4,058.5 victims for every 100,000 permanent inhabitants of the state, a 6 percent increase over 1972.
- The number and rate of violent crimes increased 4 percent since 1972.
- Law enforcement agencies solved 16 percent of all the Index offenses reported in 1973, and juveniles (persons under 18) were involved in 33 percent of all the solved cases.
- The value of all reported stolen property in the state, amounted to \$116 million.
- Larceny of bicycles increased 35 percent over 1972 and amounted to a \$2.2 million loss to victims. Bicycle thefts accounted for 22 percent of all larcenies reported in 1973.
- Firearms were used in 46 percent of the murders and 17 percent of all atrocious assaults, the lowest firearm involvement recorded in the last 5 years.
- Robbery was the motive for 15 percent of all murders committed during 1973. A total of 291 persons were murdered for the purpose of robbery during the period 1969 through 1973.
- Daytime breaking and enterings of residences accounted for 51 percent of all resident breaking and enterings reported.
- Urban crime increased 2 percent and accounts for 62 percent of the total Index crimes reported in the state. Suburban crime increased 12 percent, with 32 percent of the state total. Rural crime accounted for 5 percent of the total crime reported in New Jersey, and increased 17 percent over 1972.

ARRESTS

- During 1973, there were 298,429 persons arrested for all criminal acts, an increase of 7 percent over 1972.
- Persons over 18 accounted for 80 percent of all violent crime arrests.
- Persons under 18 accounted for 55 percent of all property crime arrests and 36 percent of all arrests made during 1973.
- Persons under 18 accounted for 6 of every 10 arrests for breaking and entering and auto theft.
- Driving under the Influence arrests and narcotic drug law arrests increased 28 percent over 1972. Persons under 30 accounted for 95 percent of all narcotic arrests made.

POLICE KILLED AND ASSAULTED

- During 1973, there were 4 New Jersey police officers killed and 3,059 assaulted in the line of duty, a 12 percent increase over 1972.
- Almost 18 of every 100 municipal police officers were assaulted during 1973.

THE NEW JERSEY UNIFORM CRIME REPORTING SYSTEM

DEFINED

The New Jersey Uniform Crime Reporting System involves the uniform compilation, classification, and analysis of crime statistics reported by all police agencies of the state pursuant to guides and regulations prescribed by law.

The statute which established the Uniform Crime Reporting System (N.J.S.A. 52:17 B-5.1 et seq) empowers the Attorney General to collect, gather, assemble, and collate information which would be of assistance in the proper administration of criminal justice. The Attorney General and the New Jersey State Police (the agency designated by the Attorney General to establish the Uniform Crime Reporting System), in an attempt to achieve uniformity with the FBI reporting system and to establish a broad base for the collection of data involving anti-social behavior, and other relevant information with respect thereto, have defined the word "crime" to include acts which technically within our State are not considered crimes. In this reporting system the word "crime" includes some "disorderly persons offenses." It also includes in a category entitled "all other offenses" violations of municipal ordinances. References to the relevant tables which set forth the Class I and Class II offenses contained in this report clearly indicate what is covered.

PURPOSE

Effective law enforcement requires the coordination of law enforcement activities within and among political subdivisions. Special attention must often be devoted to a selective and concentrated effort both areawide, as well as in terms of a specific pattern and type of criminal behavior. Selective and coordinated enforcement becomes possible only when the type and volume of crime can be analyzed on the basis of accurate information comprehensively developed and systematically collated.

Information revealing the location, frequency, and nature of crime is essential to this purpose. It is for these reasons that New Jersey's Uniform Crime Reporting System was developed.

DEVELOPMENT

The New Jersey Uniform Crime Reporting Law was enacted on May 16, 1966 and became effective January 1, 1967. Responsibility for the establishment, direction, control and supervision of the Uniform Crime Reporting System was assigned to the Attorney General of the State. After passage of the law, the Attorney General, as provided by the statute, designated the New Jersey State Police as the agency to collect, gather, assemble and collate information from the law enforcement jurisdictions within the state.

Prior to the enactment of the law, and at the request of Attorney General Arthur J. Sills, the New Jersey State Police conducted research and study of crime reporting systems then operational throughout the

country. Study results established that adoption of a reporting program paralleling that of the federal system of Uniform Crime Reporting would be the soundest approach toward development of a state system. The obvious advantage found in the adoption of the federal system included the desirability of having compatible state and federal systems thereby allowing absorption of state crime data into the national level.

The Committee on Uniform Crime Reporting of the New Jersey State Chiefs of Police Association has served the program in an advisory capacity since 1966. The contributions made by this committee have proven invaluable and, indeed, insured the success of the program. This body continues to work closely with the Uniform Crime Reporting Unit of the New Jersey State Police to improve further the quality of reporting and to recommend additional program standards, policies and procedures.

During the development phase of the program a study of the federal and various state systems of crime reporting revealed the importance of a sound internal police records system, if accurate crime statistics were to be forthcoming. Upon recognition of this factor, the State Police revised completely their method of internal reporting in order to meet the requirements of the Federal System of Uniform Crime Reporting. This step not only hastened program development but also proved invaluable throughout the operational phase.

Education of contributors to the program in the areas of mechanics, methods and concepts must be a constant operational requirement, if continued system adherence and valid statistics are to be expected. This vital need is satisfied by the personal contact between the seven state troopers assigned as field representatives to the program, and the contributors to the system.

The difficult and important task of maintaining close liaison is obvious when it is realized that services now are extended by the New Jersey State Police Uniform Crime Reporting Unit, through its Field Representatives, to the 594 law enforcement agencies of the state. Although each contributor to the program is supplied with the "Uniform Crime Reporting Guide" describing system procedures and mechanics, personnel changes within reporting departments and program refinements make the educational phase a continuing one.

As an adjunct to the program, the New Jersey State Police has offered its revised method of internal reporting to those police departments who wish to adopt it. In all cases of report adoption and record up-dating, assistance is rendered by the Field Representative who provides the necessary guidance and instruction. The personal contact between the Field Representative and the contributor not only serves as a rapid means to resolve areas of report error, but also provides the opportunity to discuss other areas of mutual interest, thus providing an additional communication link between municipal, county and state law enforcement agencies.

PROGRAM EVALUATION

The scope of mandatory crime reporting in New Jersey extends far beyond the stated purpose of the initial program. The compilation and publication of an annual report, which identifies and offers analysis of the extent and nature of crime on a state, regional, county and municipal level, may be considered an end in itself. However, practical application of such data must be made before the program can be judged substantive.

Police executives throughout the state are making increased use of this data in administrative, planning and operational determinations for their respective jurisdictions. During 1973 the State Police Uniform Crime Reporting Unit rendered operational assistance to municipal police agencies by providing individual analysis of statistics as they related to specific crime problems and for use in identifying necessary police manpower and equipment needs. Program requirements have also increased police efficiency in the areas of reporting and record keeping. Examples of program application, as discussed here, aid police in their day to day operations and contribute toward the constant effort of upgrading the quality of police services in the community.

The State Law Enforcement Planning Agency, which was established in August of 1968 to conform with the provisions of the Omnibus Crime Control and Safe Streets Act of 1968, has the responsibility of improving law enforcement throughout the state. Since its inception, in all of its determinations as to application of allocated funds, this agency has used analyzed crime data obtained through the Uniform Crime Reporting program. The establishment of crime rates on regional, county and municipal levels with identification of specific crime problems allows the agency to construct priorities, formulate plans and implement these plans to the benefit of the state and all units of local government. This administrative application of such crime data illustrates the far reaching effect the program has on all efforts to combat crime in the state.

Since 1967, many states have studied the New Jersey system for adoption within their respective states. Several of these, presently have ongoing programs based on the New Jersey system and many more of the remaining states are in the process of implementing similar programs.

The element of compatibility of crime statistics between state and federal programs is vital, and evaluation must include consideration of the degree of that compatibility. The Uniform Crime Reporting Unit of the State Police has worked closely with the members of the Federal Bureau of Investigation who administer the National Uniform Crime Reporting Program. Invaluable aid and assistance has been given by the FBI which resulted in the New Jersey program being totally compatible with that of the national program. This compatibility allows absorption of state crime data into the national system without lengthy and costly conversion processes.

On January 1, 1969, the FBI, who have collected

National Uniform Crime Reports in the states and counties since 1930, eliminated the direct collection of National Uniform Crime Reports from the police of New Jersey. This procedure change followed a two-year evaluation of the New Jersey program by the FBI and resulted in an agreement wherein uniform crime reports for each municipality of the state are now being submitted to the national program by the State Police. This working relationship, which was coordinated through the Chiefs of Police Association, State Police and the FBI, is a direct result of the interest and cooperation of the law enforcement agencies of the state in the Uniform Crime Reporting program.

FACTORS RELATED TO CRIME

It has long been noted there are numerous factors, environmental and others, which have an important bearing on the scope and intensity of crime. As an adjunct to the statistical compilation and analysis of crime reported herein, special attention is devoted to certain of these factors.

To understand further the nature and scope of crime in various sections of the state, a section entitled "Profiles of Incorporated Municipalities in New Jersey" appears in this publication as it did in the first annual report of 1967. The profile information set forth in the areas of population, density rates, population growth, all relate to the year 1973, as do the urban, suburban, rural characterizations, given land areas and industrial populations.

Factors considered within profiles are those which are out of police control, but which may affect a community's crime rate and which may vary from community to community. The presence of these factors are noted in order that the resulting crime statistics may be reviewed in a more fair and equitable manner. The effect of these factors on a community's crime rate is not easily determined, but they are set forth for the purpose of alerting the reader to their existence in varying degrees in all New Jersey communities.

REFINEMENT OF THE SYSTEM

The collection of meaningful data to supplement that which is normally collected is a vital element of the system. This supplemental information regarding crime and the criminal enters the system by way of special surveys and samplings. Periodic collection of such information enables better identification of specific crime problems and those factors which contribute to them. Analysis of refined information and dissemination to contributors provides additional intelligence upon which more effective police action can be based.

Special statewide surveys taken in previous years have dealt with the important mobility factor of crime and the specific offense of robbery. The results of the mobility study served as an indicator of the effect the criminal mobility can have on the crime experience of the community and the contribution it makes toward police problems in the control of crime. Robbery analysis, based on that special survey, better identified the nature of the crime, its impact on society and the robbery perpetrator.

The collection of refined information relative to crime was continued in 1969 through a one month "Special Auto Theft Survey" conducted in August of that year. The auto theft problem, although not unique to New Jersey, has grown to major proportions and its continuing growth suggests serious consequences for the individual and the community.

A statewide arrest survey on the vital issue of "Drug Abuse and Crime in New Jersey" was conducted during the month of August, 1970. For the first time a meaningful correlation was established between these two major problems. Complete results and analyses are contained in the publication "Drug Abuse and Crime in New Jersey" released June, 1971.

In 1971 crime statistics by urban, suburban and rural classifications were collated and analyzed for the first time since the beginning of the program in 1967. These statistics were presented in the 1971 publication and will be continued in all future publications.

The Uniform Crime Reporting Program of New Jersey, in its eighth year of operation, is now recognized as an effective vehicle to increase the efficiency of police operations in every municipality of the state. The System was originally designed to fulfill the need for accurate crime statistics for use in police administration, planning and operations. In its current status it does answer these needs to a great degree, but has not yet reached full potential as an operational tool.

On July 15, 1970, the New Jersey State Police, Uniform Crime Reporting Unit, through the New Jersey Law Enforcement Planning Agency, was awarded a \$30,000 Discretionary Grant from the Law Enforcement Assistance Administration, U.S. Department of Justice. The funds are for the purpose of assisting in the expansion of the Uniform Crime Reporting Program.

Based on the current Uniform Crime Reports submitted by the police departments throughout the state, a monthly "feedback" report will be disseminated to each contributor to the program. This "feedback" report will present an accurate account of the status of crime in each municipality of the state. The report will contain information as to the type and time of criminal operations and crime targets, as well as the volume and trend of crime within each municipality. In addition to comparing the current month with the same month of last year, further analysis will be done for a current cumulative monthly total compared to the same period of last year. A trend for two prior years within the same crime categories will also be established.

On January 1, 1971, a six month Pilot Program involving sixty-eight municipalities with a population of 25,000 or more, was undertaken. Upon the success of this Pilot Program, the full operation involving all municipalities in New Jersey will commence.

COLLECTION OF CRIME DATA

As required by statute, all law enforcement agencies in the state submit crime reports to the program. During the year 1973, offense and related supplementary information, as well as arrest and disposition data, were

received from 461 full-time municipal police departments, 70 special part-time municipal police departments and the New Jersey State Police who provided the necessary information for the 37 municipalities without local police services.

In addition to the above agencies, arrest and disposition data were received for the state's 21 county prosecutors' and sheriffs' offices, two county police departments and eight county park police departments. In order to incorporate all New Jersey law enforcement under the system, the eight other state agencies with law enforcement responsibilities were included. Also included for the first time, are two college campus police departments reporting under a pilot program. This amounts to 594 enforcement agencies reporting.

In the interest of satisfying a national, as well as a state need for uniformity, completeness, and accuracy in crime statistics, every report submitted under the system is prepared in triplicate by the contributor. One copy is retained by the contributor and the remaining copies are submitted to the State Police Uniform Crime Reporting Unit which in turn forwards a copy to the Federal Bureau of Investigation for inclusion in the National Uniform Crime Reporting Program.

METHOD

Reported offenses are related to the municipality in which they occur, rather than to the agency which may investigate, arrest or otherwise in some manner, dispose of the case. The clearance, in every case, is attributed to the municipality in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense. Each contributing agency is responsible for compiling its own reports. The Uniform Crime Reporting Guide, which is supplied to all contributors, outlines reporting procedures in detail and is complete with examples and illustrations. Field Representatives provide additional instruction and clarification when required.

Municipal law enforcement agencies report the number of known offenses according to the following categories:

- (1) Homicide (Murder and Manslaughter)
- (2) Forcible Rape
- (3) Robbery
- (4) Assault
- (5) Breaking and Entering
- (6) Larceny-Theft
- (7) Auto Theft

This count is determined from a record of all criminal complaints received by the police from victims or other sources or discovered by the police during their operations. Complaints determined by police investigation to be unfounded are eliminated from this count. The number of "offenses known" in each crime category is reported without regard to whether anyone is arrested, stolen property is recovered, local prosecutive policy, or any other consideration. Municipal law enforcement agencies also report the total number of these crimes cleared by arrest. A separate category is made for crimes cleared by the arrest of persons under 18 years of age.

Certain other analytical data pertaining to specific crime categories are also reported, including, for example, total adult and juvenile arrests made during the month. Police killed or assaulted information is also collected by month.

Annual report forms contain data such as the number of persons arrested for all criminal offenses with respect to age, sex and race of the offender, as well as an accounting of persons formally charged, their bail data, and dispositions. A police employee report is also submitted on an annual basis.

In summary, the presentation of this report, "Crime in New Jersey," reflects the compilation of the seven serious "offenses known to police," arrests of persons under 18 years of age and 18 years of age and over, and the ultimate disposition of those persons charged. This data is then related to the State of New Jersey, by population groups, character, designated crime reporting regions, individual counties and municipalities.

VERIFICATION PROCESSES

An obvious concern in the collection of crime statistics from 594 enforcement agencies throughout the state is the uniformity of data received. Program aids such as guides and instructions do not necessarily guarantee the accuracy and correctness of the reports submitted by the contributors. Additional controls are therefore necessary.

Each report received by the Uniform Crime Reporting Unit is recorded and examined for mathematical accuracy and, possibly more important, for reasonableness as to interpretation of offense classifications. Fluctuations from levels established by previous reports submitted by the contributor become subject of inquiry as to reason for variations. Improper classification, changes in reporting procedures or actually change are identified in this manner. Errors of a minor nature are corrected by direct telephone contact with the contributors, while all other errors are resolved by a personal visit by a Field Representative to the reporting agency. These personal contacts are invaluable to the accuracy of the system. Field Representatives are engaged in a constant educational effort and, as such, provide a vital link between the program and the reporter.

CLASSIFICATION OF OFFENSES

Uniformity in reporting under the New Jersey system is based upon the proper classification of offenses by police. The adoption of the federal system of reporting included the utilization of the offense classifications of that system. Law enforcement in this state has made accurate application of those classifications in the reports submitted to the program.

In view of the need for compatibility with the federal system, "offenses" under the program are not distinguished by designation of "high misdemeanors," violations of the Disorderly Persons Act or municipal ordinances. The explanation of offense classifications may vary slightly with those employed at the federal level because the language used is familiar to law enforcement in this state. However, the major categories

of offense classification remain the same as those employed nationally.

OFFENSE CLASSIFICATIONS

- (1) Homicide
 - 1a. Murder—The unlawful killing of a human being with malice aforethought.
General rule—Any death due to a fight, argument, quarrel, assault or commission of a crime.
 - 1b. Manslaughter—The unlawful killing of a human being, by another, without malice aforethought.
General rule—The killing may result from the commission of an unlawful act or from a lawful act performed with gross negligence. Traffic deaths may be classified as such when due to gross negligence of someone other than the victim.
- (2) Forcible Rape
 - 2a. Rape by force—The carnal knowledge of a female forcibly against her will.
General rule—Forcible rape of a female, but excluding carnal abuse (Statutory Rape) or other sex offenses.
 - 2b. Assault to rape—Attempts—All assaults and attempts to rape.
- (3) Robbery—The felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. Includes all attempts.
General rule—Robbery differs from larceny in that it is aggravated by the element of force or the threat of force.
 - 3a. Armed Robbery—Any weapon—Any object so employed as to constitute force or the threat of force is to be considered a weapon. This includes firearms, knives, clubs, brass knuckles, blackjacks, broken bottles, acid, explosives, etc. Also cases involving possible pretended weapons or when the weapon is not seen by the victim, but the robber claims to have it with him, constitutes armed robbery due to instilling fear.
 - 3b. Strong Armed—No weapon—Includes muggings and similar offenses where no weapon is used, but strong arm tactics are employed to deprive the victim of his property. This is limited to hands, fists, feet, etc. As in armed robbery, all attempts are included.
- (4) Assaults—An assault is an attempt or offer, with unlawful force or violence, to do physical injury to another.
General rule—All assaults will be classified in the following categories, excluding assaults with intent to rob or rape.
 - 4a. Gun—All assaults and attempted assaults involving the use of any type of firearms. (Revolvers, automatic pistols, shotguns, zip guns, rifles, pellet guns, etc.)
 - 4b. Knife or cutting instrument—All assaults and attempted assaults involving the use of cut-

- ting or stabbing objects. (Knife, razor, hatchet, axe, cleaver, scissors, glass, broken bottle, dagger, ice pick, etc.)
- 4c. Other dangerous weapon— All assaults or attempted assaults when any other object or thing is used as a weapon. (Clubs, bricks, pick handles, bottles, explosives, acid, lye, poison, scalding water and cases of attempted drownings, burnings, etc.)
- 4d. Hands, fists, feet, etc. — Atrocious — Assaults which are of an atrocious nature when hands, fists, feet, etc. are used. To be classified as atrocious assault, the attack must result in serious personal injury.
- (5) Breaking and Entering—Unlawful entry or attempted forcible entry of any structure to commit a felony or larceny.
 General rule—Any unlawful entry or attempted forcible entry of any dwelling, house, attached structure, public building, shop, office, factory, storehouse, apartment, house trailer, warehouse, mill, barn, other building, ship or railroad car.
 Note: For Uniform Crime Reporting purposes, breaking, entering and larceny are classified only as breaking and entering, the larceny is excluded. Breaking and entering of a motor vehicle is classified as larceny.
- 5a. Forcible entry—All offenses where force of any kind is used to enter unlawfully a locked structure, with intent to steal or commit a felony. This includes entry by use of a master key, celluloid or other device that leaves no outward mark but is used to open a lock. Concealment inside a building, followed by the breaking out of the structure is also included.
- 5b. Unlawful entry—No force—Any unlawful entry without any evidence of forcible entry.
- 5c. Attempted forcible entry—When determined that forcible entry has been attempted.
- (6) Larceny-Theft (Except auto theft)—The unlawful taking of the property of another with intent to deprive him of ownership.
 General rule—All larcenies and thefts resulting from pocket-picking, purse snatching, shop lifting, larceny from auto, larcenies of auto parts and accessories, theft of bicycles, larcenies from buildings, and from coin operated machines. Any theft that is not a robbery or the result of breaking and entering is included. Embezzlement, larceny by bailee, frauds or bad check cases are excluded.
- (7) Auto Theft—The larceny or attempted larceny of a motor vehicle.
 General rule—Thefts and attempted thefts of a motor vehicle. This includes all vehicles which can be registered as a motor vehicle in this state. Excludes where there is a lawful access to the vehicle, such as a family situation or unauthorized use by others with lawful access to the vehicle. (Chauffeur, employees, etc.)
- (8) Other Assaults—Not atrocious—Assaults and attempted assaults which are not of an atrocious nature and are simple and minor in nature.
- (9) Arson—Willful or malicious burning with or without intent to defraud. Include attempts.
- (10) Forgery and Counterfeiting—Making, altering, uttering, or possessing or attempts to make, alter, utter or possess with intent to defraud. Anything false which is made to appear true.
- (11) Fraud—Fraudulent conversion of another's money or property by false pretenses. Includes bad checks, except forgery and counterfeiting.
- (12) Embezzlement—Misappropriation or misapplication of money or property in trust to one's care, custody or control.
- (13) Stolen Property—Buying, receiving, possessing—Buying, receiving and possessing stolen property and attempts.
- (14) Malicious Mischief—Willful or malicious destruction, injury, disfigurement or defacement of property without consent of the owner or persons having custody or control.
- (15) Weapon; Carrying, possessing and etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing and manufacturing of deadly weapons or silencers and attempts.
- (16) Prostitution and Commercialized Vice—Sex offenses of a commercialized nature and attempts. Such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes.
- (17) Sex Offenses—Except forcible rape, prostitution and commercialized vice—Statutory rape, offenses against chastity, common decency, morals, and the like. Also include attempts.
- (18) Narcotic Drug Law—Offenses relating to narcotic drugs, such as unlawful possession, sale or use. Does not include: Failing to register as user or federal offenses.
- (19) Gambling—Promoting, permitting, or engaging in gambling.
- (20) Offenses against Family and Children—Non support, neglect, desertion, or abuse of family and children.
- (21) Driving under the Influence—Driving or operating any motor vehicle while drunk or under the influence of liquor or narcotics.
- (22) Liquor Laws—State or local liquor law violations, except "drunkenness" and "driving under the influence." Excludes federal violations.
- (23) Drunkenness or Intoxication.
- (24) Disorderly Conduct—Breach of the peace. (Disorderly persons).
- (25) Failure to give Good Account—Vagabondage, begging, loitering, etc.

- (26) All other Offenses—All violations of state and local laws except classes 1-25.
- (27) Suspicion—Arrest for no specific offense and released without formal charges being placed.—Not reported in New Jersey.
- (28) Curfew and Loitering Laws (Juveniles)—Offenses relating to juveniles of local curfew or loitering ordinances, where such laws exist.
- (29) Runaways (Juveniles)—Limited to juveniles taken into protective custody under provisions of local statutes as runaways.

CRIME FACTORS

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of New Jersey and project a statewide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report *The Challenge of Crime In A Free Society*—(1967—Page 92)—“But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal

justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time.” Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

- Density and size of the community population and the metropolitan area of which it is a part.
- Composition of the population with reference particularly to age, sex and race.
- Economic status and mores of the population.
- Relative stability of population, including commuters, seasonal, and other transient types.
- Climate, including seasonal weather conditions.
- Educational, recreational, and religious characteristics.
- Effective strength of the police force.
- Standards governing appointments to the police force.
- Policies of the prosecuting officials and the courts.
- Attitude of the public toward law enforcement problems.
- The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

STATE, COUNTY AND MUNICIPAL PROFILES

The presentation of state, county and municipal profiles in this section is offered for the purpose of projecting, for the consideration of the reader, a group of recognizable factors which may affect the amount and type of crime that occurs from community to community. Selection of the areas of information to be related to individual municipalities was based on the immediacy and completeness of data available.

Population statistics presented here and throughout this publication, were obtained from the Division of Economic Development, Office of Business Economics. Character of municipalities by urban, suburban and rural classifications and square miles, were compiled by the Division of State and Regional Planning, Bureau of Statewide Planning.

The Covered Employment which was supplied by the

Division of Planning and Research, Office of Statistics Reports and Analysis, represents that employment in the community covered by the New Jersey Unemployment Compensation Law. Excluded generally are those persons who are self employed, agricultural labor and state, county and municipal employees.

Certain other socio-economic factors, present in varying degrees in all communities, may have an influence on resulting crime rates. Obvious difficulties in the identification, documentation and measurement of these factors, however, precluded their application in this report.

Those factors presented were listed to affirm their existence within the county and community and to provide a base for consideration in the evaluation of that community's crime experience.

PROFILE OF NEW JERSEY

New Jersey is situated between the major industrial markets of New York and Philadelphia and can be classified as the "Crossroads of the East." The geographic location of the state has been a major factor in its growth and development. The many miles of super-expressway facilities within the state connect New Jersey directly with the neighboring states of New York, Pennsylvania and Delaware. Additionally, New Jersey as a corridor state, accommodates large volumes of traffic from both the eastern and western part of the United States.

The state is politically comprised of 21 counties which contain 567 incorporated municipalities. Nationally, New Jersey, although 46th in size, ranks eighth in population and first as the most densely populated state in the country. In addition to this density of 985 persons per square mile, New Jersey still has many miles of rural area or sparsely settled communities. The areas of

density show a heavy concentration around the major urban centers and those areas most accessible for commuting.

Dramatic increases have occurred in specific counties and municipalities. The trend of this rapid growth in populations of the suburb and rural areas has resulted in the loss of some city populations. Much of the loss has occurred from urban re-development or renewal programs but to a great degree have been absorbed by the outlying suburbs or rural areas. An interesting note is the fact that the shift of the urban population to suburban or rural areas has caused a large number of these municipalities to be reclassified to an urban status.

The unique image New Jersey presents for consideration is not only the result of the many and varied factors within its own boundaries, but also the complex elements of the megalopolis of which it is a part.

NJSP Table 1

NEW JERSEY CRIME INDEX — 1973

In this section, tabulations presented in tables and charts indicate the extent, fluctuation and distribution of crime for the state as a whole, reporting regions, counties, character groups, population groups and individual municipalities. The Crime Index, consisting of seven serious offenses, is used as a measure. Offenses are counted as they become known to law enforcement agencies. Crime classifications used in the index are: murder, forcible rape, robbery, atrocious assault, breaking and entering, larceny and auto theft. In the past, larceny \$50 and over has been used as one of the Crime Index offenses. Effective January 1973, total larceny-theft is being used instead of the larceny \$50 and over category. Larceny-theft is primarily a crime of opportunity and in most instances the value of the property taken is incidental to the actual criminal act.

Although the total number of criminal acts that occur are unknown, those that are reported to police provide the first means of a count. All crimes do not readily come to the attention of police nor are all crimes of sufficient importance to be significant in an index, and further, not all important crimes occur with enough regularity to be meaningful in an index. With these considerations in mind, the above crimes were selected as a group to furnish some measure of the crime problem in New Jersey.

The volume of crime in a state, region, county or

municipality is subject to those crime influencing factors set forth elsewhere in this publication. Crime rates are constructed from estimates of current permanent population. The important transient population factor, although present in every community in varying degrees, cannot be measured in all instances and therefore is not included in the establishment of a crime rate. The existence of this factor, however, should be considered when reviewing the tabulations presented in this section.

The establishment of the base year New Jersey Crime Index for 1967 provided a foundation which allows year to year comparison of like data to be made. Specific areas of comparison presented in this publication are in respect to variances of offense volumes, rates, clearances and related information. Fluctuations in arrest volumes, rates and supplementary arrest information are also included in the tabulations shown.

CRIME AND POPULATION

Crime rates relate the incidence of crime to population. More specifically, a crime rate should be considered as a count of victims. The risk of victimization arises from crime-population computations and provides a numerical result for consideration. Crime influencing factors, which are complex in nature and exist in varying degrees in all areas, are not incorporated in the determination of a crime rate.

STATE OFFENSE DATA

EFFECTIVE JANUARY 1, 1973, ALL LARCENIES, REGARDLESS OF VALUE, ARE INCLUDED IN THE CRIME INDEX TOTALS. IN PRIOR YEARS ONLY LARCENIES \$50 AND OVER WERE CONSIDERED CRIME INDEX OFFENSES. ALL STATISTICS FOR 1973 AND PRIOR YEARS HAVE ADJUSTED TO INCLUDE ALL LARCENIES.

VOLUME

A total of 300,176 Crime Index offenses were reported to law enforcement agencies of New Jersey during the Calendar Year 1973, a 6 percent increase in crime volume over 1972. When comparing the five year period, 1969 through 1973, a 30 percent increase evolves.

The Crime Index offenses referred to here represent the most common problem to law enforcement and the municipality. They are serious crimes by their nature, volume or frequency of occurrence. Basically, they can be categorized as violent crimes, such as murder, forcible rape, robbery and atrocious assault, or as crimes of a nonviolent nature, such as breaking and entering, larceny and auto theft.

The violent crimes as a group, accounted for 10 percent of the total Crime Index reported for 1973, and since 1972, rose 4 percent. The five year period, 1969 through 1973, disclosed a 67 percent increase. Murder increased 13 percent, 1973 over 1972, forcible rape rose 11 percent, robbery decreased 2 percent and atrocious assault increased 13 percent.

The nonviolent or property type group recorded a 6 percent increase since 1972. This group represents 90 percent of the Crime Index total. Breaking and entering increased 4 percent since 1972, larceny increased 11 percent and auto theft decreased 3 percent. The five year period, 1969 through 1973, revealed that property crime increased 27 percent.

A review of the distribution of offenses within the Index discloses that larceny accounted for 46 percent of the total 1973 Index, and breaking and entering accounted for 31 percent. The largest involvement of a violent crime was in the offense of robbery, at 5 percent of the total Index.

RATE

Crime rates relate the incidence of crime to the resident population. Many other factors which may contribute to the volume and type of crime in a given jurisdiction are not incorporated here, but are shown in the profile section of this publication.

In 1973, the crime rate was established at 4,058.5 victims for every 100,000 permanent inhabitants. This represents a 6 percent increase over 1972 and a 28 percent increase since 1969.

The 1973 rate for the violent crime group was established at 389 victims for every 100,000 inhabitants, a 4 percent increase over 1972. Within this violent crime

group, robbery again recorded the greatest involvement of victims, 204 for every 100,000 residents. The non-violent crime rate increased 6 percent over 1972, and resulted in a property crime rate of 3,669.8 per 100,000 inhabitants. Larceny contributed the most victims to the overall crime rate, 1,864.0 per 100,000 residents.

CLEARANCES

For Uniform Crime Reporting purposes, a crime is cleared when police have identified the offender, have evidence to charge him and actually take him into custody. Solutions of crimes are also recorded in exceptional instances when some element beyond police control precludes formal charges against the offender, such as the victims refusal to prosecute or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of solving one crime.

The police of New Jersey cleared or solved 16 percent of all Index offenses reported to them in 1973, a 3 percent increase over 1972. The violent crime group recorded a 43 percent solution rate, while the nonviolent or property group revealed a 13 percent rate. Both groups recorded 3 percent increases for the period 1972 through 1973.

Considering individually the 1973 violent crime solution rate, it was determined that police were successful in solving 73 percent of the murders; 59 percent of the rapes; 22 percent of the robberies and 68 percent of the atrocious assaults. The murder, rape and robbery clearance rates reflected decreases over 1972, while solutions of atrocious assaults increased. The nonviolent crime solution rates were as follows: Breaking and entering 13 percent; larceny 14 percent and auto theft 9 percent. Auto theft clearances increased during the period 1972 through 1973, while breaking and entering and larceny solution rates remained the same.

The relatively high clearance rate for violent crimes as compared to nonviolent crimes is in part attributable to the volume difference between the two. Nonviolent crime volume is much greater than that of violent crime and police investigation of violent crime is usually more intense. The element of confrontation between victim and perpetrator, as well as witness identification of the perpetrator, also contributes to this higher rate of solution.

JUVENILE CLEARANCES

A means of measuring the degree of criminal involvement for those of the young age group is to identify the number of crimes in which they are the offenders. In 1973, 33 percent of all Crime Index offenses solved in New Jersey involved persons under 18 years of age, an increase over the 30 percent juvenile involvement in 1972. This 1973 increase in juvenile involvement is in

contrast to the decreases experienced during the period 1970 through 1972.

Violent crime solutions involved juveniles in 15 percent of the cases, no change over 1972. Nonviolent crime solutions involved juveniles in 39 percent of the instances, an increase over 1972.

The juvenile involvement in individual Index offenses during the Calendar Year 1973, reflected the following solution rates: Murder 8 percent; rape 14 percent; robbery 21 percent; atrocious assault 13 percent; breaking and entering 39 percent; larceny 39 percent and auto theft 42 percent.

STOLEN AND RECOVERED PROPERTY VALUE

The total value of property stolen in 1973, was reported at \$116 million, an increase over the \$103 million reported in 1972. This dollar value represents the proceeds of all robberies, breaking and enterings, larcenies and auto thefts reported by New Jersey police during 1973. Auto thefts reported during the year accounted for 44 percent of the total value of property stolen in 1973.

Police recovered 35 percent of the total value of property stolen in 1973, but the remaining unrecovered portion represents a loss of \$75 million to the victims. A little over 66 percent of the value of motor vehicles stolen was recovered.

MURDER

Murder is defined as the unlawful killing of a human being with malice aforethought. Any death due to a fight, argument, quarrel, assault or commission of a crime is included. This Index offense is scored by police on the basis of their investigation without regard to findings of a court or jury or the decision of a prosecutor. Traffic deaths, caused by the negligence of someone other than the victim, are not included here, but are counted under manslaughter. Attempts to kill and assaults to kill are scored as atrocious assaults and not as murder. Suicides, accidental deaths, and justifiable homicides are also excluded.

VOLUME AND RATE

There were 544 murders reported by the police of New Jersey in 1973, a 13 percent increase over 1972, and a 49 percent increase since 1969. Murder accounted for two-tenths of one percent of all Index offenses reported in 1973, and has remained the same since 1967. In 1973, there were 7.4 victims per 100,000 inhabitants, a 12 percent increase when compared to 1972.

MURDER ANALYSIS

In all cases of murder reported under the System, a supplementary report is submitted by the reporting law enforcement agency. Pertinent information including age, sex and race of the victim, weapon used to commit the offense, and circumstances or motive which led to the crime, is among the data collected. Place of occurrence, relationship of victim to perpetrator, and day of week are also included.

The supplementary data used in the analysis of reported murders is limited to the "known" facts of the case. It is understandable that unsolved murders, in most cases, prevent complete data availability for murder analysis.

The frequency of murder during 1973 was highest in the month of September, when 60 murders occurred. During November, 30 murders were recorded, the lowest monthly volume reported during 1973. Murder by day of week again disclosed Saturday to be the highest day, when 89 murders occurred.

In 1973, the male murder victims accounted for 73 percent of the total murder victims. Victim analysis by race disclosed that 56 percent were Negro and 44 percent were White. Analysis by age revealed that the 20-29 age group contained 31 percent of the total murder victims.

In the area of "known" perpetrators, the adult male-female ratio of involvement disclosed that adult males were identified as the perpetrators in 83 percent of all the murders solved, and the adult female in 11 percent of the murders. The remaining solved murder cases were perpetrated by juvenile males and females, 5 percent and less than 1 percent respectively.

During 1973, firearms were used in 46 percent of the murders reported in which the weapon was identified, the lowest firearm involvement in five years. Within the firearm category, handguns were the most predominant weapon used, a 78 percent involvement, down from the

87 percent recorded in 1972. Cutting or stabbing weapons represented a 27 percent involvement in murders. Personal weapons, such as hands, fists and feet were used in 9 percent of the cases, and the remaining 18 percent being attributed to the use of other weapons, such as clubs, hammers, poison, arson, etc. In the past five years this weapon category has increased 63 percent, while all other weapon involvement has decreased.

Analysis of murder by location discloses that 49 percent of the murders occurred in private residences, an increase when compared to 1972. In many cases police are powerless to prevent this type of murder, which is made apparent by the type of circumstance or motive involved. Most murders, 81 percent, were committed by relatives or other persons acquainted with the victim. Further analysis revealed that 21 percent of the murders were perpetrated by a member of the immediate family group, and more specifically, 14 percent of the murders involved spouse killing spouse. Although most murders to occur in residences, 27 percent of all the murders reported did occur on the highways or streets of our state, and 5 percent took place in bars.

The circumstances or motives for committing murder were derived from cases where this category of information is "known" and made available for analysis. "Felony" murders are defined under the program as those killings which are perpetrated during the commission of another crime. They are classified as robberies, sex crimes, gangland slayings, arson and other felonious activities. This type of circumstance or motive accounted for 33 percent of the murders where the motive was known. Within this "felony" group, robbery accounted for 47 percent of the murders, and 15 percent of all known murder circumstances, a decrease from 1972.

Altercations or quarrels between the victim and perpetrator, including lovers quarrels, money quarrels, drinking quarrels, etc., accounted for 61 percent of all known murder circumstances reported in 1973.

CLEARANCES

The police of New Jersey were successful in clearing or solving 73 percent of the murders reported in 1973, a 7 percent decrease from 1972. The high solution rate, as compared to other Index offenses, becomes evident when the circumstances of this heinous type crime are considered, and this high clearance rate is shared by police universally.

Those murders solved by arrest of persons under 18 years of age amounted to 8 percent of all the cases solved, no change over 1972.

FORCIBLE RAPE

Forcible Rape is defined as the carnal knowledge of a female forcibly and against her will. All assaults and attempts to rape are counted, but carnal abuse, rape without force (statutory rate) and other sex offenses are not included.

**MURDER VICTIMS
TYPE OF WEAPONS USED
1973**

VOLUME AND RATE

The police of New Jersey received reports of 1,384 rapes during 1973, numerically the volume increased by 139 over 1972. This volume increase reflects an 11 percent increase, 1972 to 1973. In the past five years rape has increased by 52 percent. Rape accounted for almost 1 percent of the total Crime Index and 5 percent of all violent crimes in 1973.

A crime rate equates the number of crimes per unit of population, and in its proper perspective, is a victim risk rate. In 1973, 19 out of every 100,000 persons in this state were reported forcible rape victims. The availability of the 1970 census population data allows for the calculation of a forcible rape rate based on the female population alone. For every 100,000 females in New Jersey, 37 were reported victims of this violent crime. The risk of becoming a victim of this crime has increased 50 percent since 1969.

ANALYSIS OF RAPE

The highest incidence of rape during the year was recorded for the month of September, with August the second highest monthly volume, 148 and 142 respectively.

Forcible rapes accounted for 73 percent of the total rape offenses reported, while the remaining 27 percent were attempts or assaults to rape. The victims of this violent crime, in many cases, are hesitant in reporting the offense to police due to the fear and/or embarrassment of the victims when the possibility of a court appearance confronts them, or the effect it may have on their reputation when the facts become known. Additionally, there is difficulty in establishing the act of force when there is the presence of a prior relationship between victim and perpetrator. Due to the usual clandestine nature of this offense, it occurs most often out of reach of police patrols. The offense of forcible rape, because of the above factors, is probably the most under-reported crime within the Crime Index. However, crime counts in this publication must be limited to the actual offenses established by police investigation.

CLEARANCES

During 1973, 59 percent of all forcible rapes reported were solved. Persons under 18 years of age accounted for 14 percent of all rape cases solved.

ROBBERY

Robbery is defined as the felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. The element of personal confrontation is always present in this crime. Under the program, all assaults or attempts to rob are included. Robberies are reported in two general categories—armed, when any object is used as a weapon; and strong arm, which includes muggings and similar offenses where no weapon is used, but where strong arm tactics are employed.

VOLUME AND RATE

During the calendar year 1973, there were 15,113 robberies reported by the police of the state. When compared to the 15,437 robbery offenses reported in 1972, a decrease of 2 percent evolves. This is the second consecutive year a decrease has been recorded. These reported robberies for 1973, make up 5 percent of the total Crime Index for New Jersey, and 53 percent of all violent crimes as a group.

The rate of robbery in 1973 decreased 2 percent from 1972, with 204 victims for every 100,000 persons in the state. Although significant, the decreases that have occurred in the past two years when calculated with the previous three year period, discloses a 54 percent increase in reported robbery offenses since 1969.

ANALYSIS OF ROBBERY

Supplementary information, which reveals the nature of robbery, is collected under the program in order to gain further insight regarding this violent crime. Identification of the most frequent "targets" for robbery is accomplished by classification of the type of location where the crime was perpetrated and whether or not the offender was armed.

The armed robber was responsible for 57 percent of all robberies committed during 1973, with the remaining percentage of offenses attributed to the unarmed confrontation of the victim by the perpetrator where tactics such as mugging were employed.

The month of December recorded the highest month for robbery offenses, when 1,441 were reported by police in the state. A total of 1,337 robberies occurred in July and 1,334 in November.

Street robberies accounted for 59 percent of all robbery offenses reported during 1973, no change over 1972. Robberies of business establishments other than gas stations, chain stores and banks, accounted for 13 percent of the total robberies reported. Robberies of persons in their home recorded an 11 percent involvement, down from the 12 percent recorded in 1972. Chain store robberies continue to increase, and disclosed a 5 percent involvement in total robberies reported. Robberies of gas stations continue to decrease, and recorded the lowest involvement since 1967, at less than 4 percent. Bank robberies also recorded the lowest frequency of occurrence since 1967, less than one-half of one percent involvement in total robberies reported.

The total value of property loss resulting from robberies reported during 1973 amounted to a little over \$6 million, averaging out to a loss of \$400 per victim. Street or highway robberies reflected the highest category for total property value, a loss of \$2.7 million. Bank robberies, the lowest rate of incidence, reflected the highest average loss, \$10,015.

The impact of this violent crime on the victim cannot be measured in terms of money or property value alone, as it has been stated previously in the murder section of this publication, robbery was the motive for 15 percent of all murders committed in 1973. Numerically, there were 63 persons murdered as a result of robbery in 1973, and in the past five years a total of 291 persons were murdered for the purpose of robbery.

TOTAL FOR NEW JERSEY	15,113	\$6,047,225	\$400	100.0

**ROBBERY
PERCENT DISTRIBUTION BY LOCATION
1973**

CLEARANCES

The police of New Jersey were successful in solving 22 percent of all robbery offenses reported to them in 1973. Persons under 18 years of age accounted for 21 percent of all the solved robbery cases, an increase from the 20 percent rate of 1972.

ATROCIOUS ASSAULT

Atrocious Assault, as defined under the New Jersey Uniform Crime Reporting System, is an attempt or offer, with unlawful force or violence, to do serious physical injury to another. Attempts are included since it is not necessary that any injury result when a gun, knife or other weapon is used, which would result in serious personal injury if the crime were successfully completed.

VOLUME AND RATE

A total of 11,705 atrocious assaults were reported to the police of the state in 1973, a 13 percent increase when compared to 1972. This crime against the person made up 4 percent of the Crime Index.

In 1973, 158 persons out of every 100,000 in New Jersey were victims of atrocious assaults. This figure represents an increase of 13 percent over 1972, and an 84 percent increase over the past five years.

WEAPON ANALYSIS IN ATROCIOUS ASSAULT

The use or attempted use of a dangerous weapon in an assault, or the serious injury inflicted by hands, fists or feet separates this Index offense from those assaults categorized as "simple" and not atrocious in nature. The victim of an actual assault of this type may suffer serious injury or permanent disability. All assaults to kill and attempts to kill are also included in this area.

Knives or other cutting instruments were determined to be the most frequently used weapons in atrocious assaults during 1973. These weapons accounted for 33 percent of the total atrocious assaults reported. Personal weapons, such as hands, fists and feet accounted for 29 percent of all atrocious assaults, and blunt objects or other dangerous types of weapons, a 22 percent involvement. Firearms were used as a weapon in 17 percent of all atrocious assaults reported in 1973; the lowest firearm involvement recorded in the past five years.

CLEARANCES

Solutions for atrocious assaults were made in 68 percent of all cases reported in 1973, an increase from the 67 percent reported in 1972. This relatively high clearance rate follows that of other crimes against the person. Offenses solved by the arrest of persons under 18 years of age accounted for 13 percent of the total cases solved, with the remaining 87 percent involving adults 18 years of age and over.

BREAKING AND ENTERING

Under this program, breaking and entering is defined as an unlawful entry or attempted forcible entry of any structure to commit a felony or larceny. Data collection for this offense is further categorized as to forcible entries, unlawful entries (where no force is used) and attempted forcible entries.

VOLUME AND RATE

A total of 91,739 breaking and enterings were reported by New Jersey law enforcement agencies during 1973, an increase of 4 percent over 1972. This offense contributes 31 percent to the overall offense counts for the year.

The 1973 crime rate for breaking and entering was 1,240 victims for each 100,000 inhabitants of the state. This victim rate increased 4 percent over 1972, and 33 percent since 1969.

ANALYSIS OF BREAKING AND ENTERING

The month of August reflected the highest month of offense frequency, with July recording the second highest volume for an individual month.

Forcible entry was evident in 79 percent of all reported breaking and enterings in 1973, while 11 percent were cases of unlawful entry where no force was used, and the remaining 10 percent were attempts to forcibly enter. There has been no significant change over the past five years.

In 60 out of every 100 offenses, a residence was the target of the perpetrator, the highest percentage ever recorded. The remaining 40 percent were targets of a nonresidential nature. Daytime breaking and enterings accounted for 51 percent of the "resident" crimes reported, when the time of occurrence could be determined. It was also determined that 88 percent of the nonresidential offenses occurred at night, when business volume is at a low.

During the year 1973, victims of breaking and enterings suffered an economic loss of almost \$37 million. The average dollar loss was reported at \$398 per offense. Breaking and enterings of residences accounted for \$23 million, with the remaining \$14 million loss attributed to nonresidences or commercial targets.

CLEARANCES

The volume of this offense presents the police with a serious enforcement problem which is made more difficult in some jurisdictions by the lack of sufficient personnel to act as a deterrent, or even to properly investigate and thus provide successful solutions to these crimes.

The police of New Jersey were successful in solving over 13 percent of all breaking and entering offenses reported during 1973, an increase when compared to 1972. Juveniles were involved in 39 percent of all such case solutions, the lowest juvenile involvement reported since 1967.

LARCENY-THEFT

EFFECTIVE JANUARY 1, 1973, ALL LARCENIES, REGARDLESS OF VALUE, ARE INCLUDED IN THE CRIME INDEX TOTALS. IN PRIOR YEARS ONLY LARCENIES \$50 AND OVER WERE CONSIDERED CRIME INDEX OFFENSES. ALL STATISTICS FOR 1973 AND PRIOR YEARS HAVE BEEN ADJUSTED TO INCLUDE ALL LARCENIES.

The definition of larceny-theft, as provided under this program, is the taking of the property of another with intent to deprive him of ownership. All larcenies and thefts resulting from pocket-picking, purse-snatching, shoplifting, larcenies from autos, thefts of auto parts and accessories, bicycle thefts, etc., are included here. Embezzlement, unlawful conversions, larceny by bailee, frauds or bad check cases are not included.

VOLUME AND RATE

There were 137,870 larcenies reported during the year 1973. This amount represents an increase of 11 percent over 1972, and a 27 percent increase since 1969. This offense made up 46 percent of the total Crime Index, an increase over the 44 percent recorded in 1972.

The larceny crime rate for 1973 increased to 1,864 offenses per 100,000 population, a percentage increase of 11 percent over 1972, and an increase of 26 percent since 1969.

ANALYSIS OF LARCENY-THEFT

As in the last six years, offense frequencies were highest in the summer months of June, July and August, with August the individual high month.

The following analyses considers all larcenies, regardless as to the value. All types of larcenies identified in this section will differ in volume, depending upon the opportunity for theft offered in a given area.

The identification of larceny by type has disclosed that larcenies from autos and larcenies of auto parts and accessories, as a group, represented 31 percent of the total larcenies reported in 1973. When auto theft is added to this "auto" group, it is noted that 28 percent of all offenses within the Crime Index involve motor vehicles.

When considering individual "types" of larceny, the greatest percentage was found to be in stolen bicycles, a 22 percent involvement, and the highest ever recorded. Larceny from buildings accounted for 20 percent of all larcenies reported. This type of larceny occurs out of the reach of police patrols, and is not affected by proper deployment of patrols as a deterring factor. Theft from autos, which is usually from inside the vehicle, accounted for 18 percent of the total larcenies reported.

Victims of larcenies suffered a total dollar loss of \$22 million. The average value of goods and property stolen from these victims was \$160.

Larceny from buildings recorded the highest dollar loss to its victims, a total of \$6.5 million, representing a \$243 average loss to each victim.

CLEARANCES

Larceny offenses solved by police are affected by the nature of the crime. The lack of witnesses and the volume of these crimes which are sometimes described as "sneak thievery" or "unobserved thefts," add to the difficulties encountered by law enforcement.

In 1973, 14 percent of the larcenies reported to police were solved. Those larceny offenses cleared by the arrest of persons under 18 years of age accounted for 39 percent of the total cases cleared.

AUTO THEFT

In Uniform Crime Reporting, auto theft includes all thefts and attempted thefts of a motor vehicle. This includes all vehicles which can be registered as a motor vehicle in this state. This definition excludes taking a motor vehicle for temporary use, such as a family situation, or unauthorized use by others having lawful access to the vehicle.

VOLUME AND RATE

In 1973, a total of 41,821 motor vehicles were reported stolen to the police of New Jersey, a decrease of 3 percent since 1972. Auto theft makes up 14 percent of the total Index offenses.

The rate for auto theft decreased from 586 in 1972 to 565 victims per 100,000 population in 1973. This represents a rate decrease of 3 percent.

ANALYSIS OF AUTO THEFT

The crime of auto theft has been documented primarily as a crime of opportunity. In most cases, it's the youthful offender who finds the automobile easily accessible for his immediate transportation needs and usually the vehicle is ready to drive away or the ignition is easily compromised. A prior study conducted under the Uniform Crime Reporting Program, disclosed that in 2,352 auto theft cases studied during the month of August 1969, 46 percent of the vehicles were left unlocked, and 17 percent of all the victims left the keys in the vehicle.

The highest incidence of auto theft during the year was recorded for the month of August, with May recording the second highest monthly volume, 4,089 and 3,785 respectively.

In 1973, stolen auto values reached \$51 million, and represented 44 percent of the value of all property stolen during the year. The average value of a stolen auto was \$1,227 at the time of the theft, and although police recovered 66 percent of the value of all stolen autos, the remaining unrecovered portion represents a loss of \$17 million to the victims. This loss figure does not take into account the monetary loss resulting from damage to the vehicle, property and persons which are a direct result of auto theft crimes.

The recovery of a vehicle does not clear or solve the offense, but the owner does benefit by the return of his vehicle. In 1973, 72 percent of the vehicles stolen were recovered by police. This relatively high rate of recovery can be attributed to the fact that most vehicles are

LARCENY (EXCEPT AUTO THEFT)

1973

CLASSIFICATION	NUMBER OF OFFENSES	PERCENT DISTRIBUTION	TOTAL VALUE	AVERAGE VALUE
Pocket-Picking	1,431	1.0	\$ 138,591	\$ 97
Purse Snatching	4,582	3.3	344,176	75
Shoplifting	9,687	7.0	425,860	44

NJSP Table 10

stolen for the purpose of transportation. However, in following the trend over the past six years, it was noted that the percentage of vehicles being recovered has diminished considerably from the 83 percent recovery rate reported in 1967.

As previously mentioned, the analysis of auto theft alone does not completely measure the special problem caused by the availability of the auto as a target for larceny of auto parts and accessories and larcenies from autos (from inside the vehicle). New Jersey, although 46th in physical size, is ranked about 8th nationally in total motor vehicles registration, add to this the hundreds of thousands of motor vehicles which annually enter New Jersey from other states, then a true picture of motor vehicle volumes in the state emerges. During 1973 a total of 84,859 offenses involving motor vehicles were reported to police, this represented a loss of \$57 million to the victims.

CLEARANCES

Law enforcement agencies of New Jersey were suc-

cessful in solving only 9 percent of all auto thefts reported to them during the year. This solution rate, the lowest of all Index offenses, reveals an increase over the 8 percent reported in 1972.

Many factors contribute to this low 9 percent solution or clearance rate. One is the high degree of mobility present in this offense, which is pointed out by the fact that 38 percent of the recovered vehicles were located in other jurisdictions. Another is the carelessness of the vehicle operator, when the perpetrator merely opens the door of a vehicle, with the keys already in the ignition, and drives it away. To a potential witness, this appears to be a normal act, thereby adding to the difficulties encountered in police detection and apprehension.

The involvement of the young age group in police solution of auto theft is greater than for any other Index crime. In 1973, 42 percent of the auto theft cases cleared involved a person under the age of 18. However, this degree of juvenile involvement is the lowest since 1967.

STATE ARREST DATA

1973

STATE ARREST DATA

Under the Uniform Crime Reporting Program, an arrest is counted each time a person is taken into custody, notified or cited. The number of charges placed against a person at the time of the arrest is not considered in the count. The same person may be arrested several times during the year for similar offenses, as in cases of drunkenness or other disorderly conduct charges, and is counted each time he is arrested.

Arrest practices and emphasis do vary from place to place and within a municipality from time to time. For example, the volume of police arrests for certain unlawful conduct such as drunkenness or loitering violations is particularly influenced by this irregularity in arrest practices. On the other hand, murder, robbery and other arrests for serious crimes are more likely the result of standard procedures. In either case, arrests are used as a measure of law enforcement activity, and within certain limitations it can gauge criminality.

When a person under 18 years of age commits an offense and the circumstances are such that if the offender were an adult an arrest would be made, then the arrest is counted. It must be remembered that arrest counts do not reflect the specific number of persons arrested since one person may be arrested several times during the year.

PERSONS ARRESTED

During 1973, law enforcement officers of the state reported a total of 298,429 arrests for all criminal acts, a 7 percent increase over 1972. When related to 1973 population estimates for New Jersey, there were 40 arrests for every 1,000 persons, up from the 38 per 1,000 rate reported in 1972.

Those persons arrested for serious Crime Index offenses during the year, made up 19 percent of the total arrest figure, the arrest of persons under 18 years of age accounted for 48 percent of the arrests of this type.

The juvenile arrest involvement was, as in prior years, greater in the nonviolent crime categories of breaking and entering, larceny and auto theft, where such juvenile arrests represented 55 percent of that group's arrest total. As in the past, 8 of every 10 persons arrested for violent crimes (murder, rape, robbery and atrocious assault) were adults.

ARREST TRENDS

Increases in arrest activity by police, were noted in many of the crime categories during the year. As stated previously, a total rise of 7 percent in arrests for all criminal acts was recorded for the period 1972 through 1973. Arrests for Index offenses increased 6 percent during the same period. Within the Index, arrests for violent crime rose 3 percent, and nonviolent crime arrests were up 7 percent.

Arrest increases recorded within individual Index offense categories were led by an 11 percent increase in arrests for atrocious assault, an 8 percent increase in breaking and entering arrests and an 8 percent increase

in larceny arrests. Decreases in arrests were recorded for rape and robbery.

A review of some other relatively high percent increases in individual arrest categories, which are specific in title, disclosed a 28 percent increase in driving under the influence arrests, and a 28 percent increase in narcotic drug law arrests. The latter has increased 161 percent since 1969.

ARREST ANALYSIS BY AGE

During 1973, adult arrests rose 6 percent, while juvenile arrests increased 8 percent. For the five year period 1969-1973, arrests for all criminal acts increased 31 percent. During this same period, adult arrests increased 30 percent, and juvenile arrests increased 34 percent.

Adult arrests for the violent crimes of murder, rape, robbery and atrocious assault, increased only 1 percent since 1972. Juvenile arrests for the same violent crimes increased by 10 percent. When comparing the last five year period it was noted that juvenile arrests for violent crimes were up 70 percent, while adult arrests were up 62 percent.

Adult arrests for the nonviolent crimes of breaking and entering, larceny and auto theft increased 4 percent, while juvenile arrests for the same group of nonviolent crimes increased 10 percent. The five year period 1969-1973 disclosed that adult arrests increased 36 percent, and juvenile arrests increased 22 percent for the nonviolent crime offense grouping.

The arrest involvement of young age groups for 1973 disclosed that 14 percent of all persons arrested were under the age of 15. Persons under the age of 18 accounted for 36 percent of all persons arrested, with persons under 21 years of age accounting for 52 percent of all arrests. As a further indication regarding the degree of serious crime involvement of juveniles, it was noted that 3 of every 10 persons arrested for robbery were under 18. Almost 6 of every 10 persons arrested for breaking and entering were in this young age group. This high juvenile involvement was also disclosed in auto theft arrests, over 6 of every 10, and larceny arrests, 5 of every 10 persons arrested were under the age of 18.

Persons under 21 years of age accounted for 61 percent of the total arrests for Narcotic Drug Law violations, an increase over the 58 percent involvement recorded in 1972. A further breakdown disclosed that 33 percent were in the age bracket 18 through 20 years of age, while 16 percent were 16 years of age or under. Additional analysis of the young persons 17 through 21 years of age, disclosed that these young persons in their last year of high school or of college age, contributed 45 percent to the total arrests for Narcotic Drug Law violations in 1973. A decrease from the 52 percent involvement recorded in 1972. As a part of the young persons involvement in drug offenses, it was interesting to note that 95 percent were under the age of 30.

A matter for serious concern is the criminal arrest involvement of the young age groups, however, the adults still record the highest involvement in the total

arrest picture. Arrest of those persons 18 years of age and over represented 64 percent of all arrests reported in 1973. Adult arrests for violent crimes comprised 78 percent of that group's total arrest figure, which includes arrests for murder, rape, robbery and atrocious assault.

ARREST ANALYSIS BY SEX

During 1973, analysis of arrests by sex revealed that 85 percent of all persons arrested were male, no change since 1971.

Although female arrests represent only 15 percent of the total arrest picture, since 1969 they have increased 49 percent, while male arrests have increased 29 percent for the same period. A review of the period 1972-1973, disclosed a 7 percent increase in male arrests, and only a 5 percent increase in female arrests.

The arrests for violent crimes disclosed that females accounted for 9 percent of the total arrests. This includes a 12 percent involvement in murder and a 13 percent involvement in atrocious assault arrests during 1973. In the nonviolent or property crime category, arrest of females accounted for 17 percent of the total arrests recorded. Within this nonviolent group, female arrests for larceny recorded the largest involvement at 26 percent.

Female arrests for Narcotic Drug Law violations accounted for only 14 percent of the 1973 arrest total for that offense, a decrease from the 15 percent involvement reported in 1972. Male arrests for the same offense increased 24 percent, and female arrests increased 16 percent when compared to 1972.

During 1973, other specific arrest categories were analyzed and it was learned that male arrests for Driving Under the Influence increased 28 percent, with female arrests up 21 percent, 1973 over 1972. Female arrests for weapons violations increased 26 percent, while male arrests increased 10 percent for the same period. Breaking and entering arrests disclosed that female arrests increased 20 percent, and male arrests for the same violation rose 7 percent during the year 1973.

ARREST ANALYSIS BY RACE

In 1973, an analysis by race of those persons arrested for all criminal acts during the year, disclosed that 68 percent were White, 31 percent were Negro and the remaining 1 percent were of other races. The arrest involvement by race for the Crime Index offenses revealed that 56 percent of all those arrested were White, 43 percent were Negro, the remaining 1 percent being of other races.

Arrests for violent crimes within the Index (murder, rape, robbery and atrocious assault) reflect that 61 percent were Negro, 38 percent White and the remaining 1 percent distributed among other races. Since 1971, the involvement of Whites in violent crimes has increased from 31 percent to the 38 percent recorded in 1973.

During 1973, arrests for nonviolent crimes of breaking and entering, larceny and auto theft, disclosed that by race, 62 percent were White, 37 percent Negro and the remaining 1 percent being distributed among other races.

PERSONS CHARGED

The disposition made of those persons arrested and formally charged in a court of jurisdiction is of great interest to the police administrator. Knowledge as to the quality of the police investigation, case preparation and presentation, may be gained from the subsequent dispositions of those cases which reach the court level.

It must be recognized that not all persons who are arrested are turned over to the courts for prosecution. There are various reasons for this: Failure of the victim to cooperate or appear at time of trial as victims of rape, is one reason for failure to prosecute effectively those persons arrested. Lack of sufficient evidence to support a charge and evidence obtained which discloses the arrested person did not commit the offense, are additional reasons for an arrested person not being brought to trial. For example: Almost 53 percent of all juveniles arrested were handled by the individual law enforcement agencies, without a formal charge against them or referring them to juvenile authorities. Police methods in handling juveniles differ throughout the state, but in this section all tables concerning juveniles refer to those who were arrested and turned over to juvenile authorities in connection with specific criminal offenses.

During 1973, 83 percent of all persons arrested for Crime Index offenses were turned over to the courts. The adults charged with Crime Index offenses were found guilty by the courts in 70 percent of all cases presented.

An analysis of individual Index offenses determined that 29 percent of the murder defendants were either acquitted or their cases dismissed at some prosecutive stage. Atrocious assault recorded the highest rate of acquittal or dismissal with a 56 percent rate. Forcible rape second, with 50 percent of the defendants being acquitted or their cases dismissed.

A review of all crime categories disclosed that convictions were high in the following offense categories:

Offenses involving alcoholic beverages recorded the highest conviction rates, with driving under the influence at 91 percent and drunkenness next at 89 percent. Persons charged for offenses against family and children, which includes desertion and nonsupport, were found guilty in 88 percent of the cases presented. Gambling convictions were reported at 84 percent.

Persons charged with Crime Index offenses and whose cases reached the court level, recorded 4 percent found guilty of a lesser crime and 28 percent being acquitted or dismissed. The highest percentage of persons found guilty on the original charge in 1973, as compared to those found guilty of a lesser offense, was in the larceny-theft category where 97 percent of all guilty defendants were convicted as charged. This was followed by robbery, where 89 percent of the defendants were found guilty of the original charge.

Disposition data for 1973 disclosed that acquittals or dismissals were greater in the violent crimes of murder, rape, robbery and atrocious assault, than in the non-violent crimes of breaking and entering, larceny and auto theft. Dismissal or acquittal for the violent crimes was reported at 49 percent for 1973. The dismissal or acquittal rate for those crimes of a nonviolent nature was 21 percent for the same period.

The above data discloses the results of cases after police have arrested and formally charged the adult offender. The remaining cases pending court action, or undecided at the year's end, are classified as pending and are carried from year to year until a disposition is furnished by a court of jurisdiction. For the year ending 1973, 66,839 cases remain pending according to information supplied police by the various courts of New Jersey.

A final review of all crime categories discloses that 28 percent of all adults tried by the courts were either acquitted or their cases were dismissed at some prosecutive level. Persons of young age groups who were referred to Juvenile Court represented 21 percent of the total persons formally charged in all crime categories.

**CRIME STATISTICS BY
GEOGRAPHIC REGION AND
COUNTY
1973**

CRIME STATISTICS BY GEOGRAPHIC REGION AND COUNTY

EFFECTIVE JANUARY 1, 1973, ALL LARCENIES, REGARDLESS OF VALUE, ARE INCLUDED IN THE CRIME INDEX TOTALS. IN PRIOR YEARS ONLY LARCENIES \$50 AND OVER WERE CONSIDERED CRIME INDEX OFFENSES. ALL STATISTICS FOR 1973 AND PRIOR YEARS HAVE BEEN ADJUSTED TO INCLUDE ALL LARCENIES.

The presentation of criminal statistics by geographic regions of New Jersey, and by counties within the respective regions, is made for the purpose of further analysis of crime within the state. The type and volume of crime will vary from place to place as do the influencing factors which contribute to a crime rate. Recognition of these variances, through identification, helps provide a more equitable base for consideration.

Geographic groupings by county, as shown in this section, were made using the following criteria: One, location in the state in relation to outside influence, (e.g. large urban centers); two, their general character, (e.g. urban or openness); three, the presence of major urban cores within individual counties. Employing these criteria, the state was divided into four regions.

The Northwest Region contains Sussex, Warren and Hunterdon Counties. The region is primarily a rural area because of its distance from the two major metropolitan centers of New York and Philadelphia, as well as the absence of any major core cities.

The Northeast Region contains the eight counties of Bergen, Morris, Passaic, Essex, Hudson, Union, Somerset and Middlesex. The character of this region is a suburban-urban mix. The most densely populated urban areas of the state and the nation with their complex problems are located within this region. The major urban cores are Newark, Jersey City and Paterson with surrounding suburban areas; but, of course, on the larger scale the region is oriented towards the New York metropolitan center. The industrial complex of the state is centered in this region as is 64 percent of the state's population.

The Southwest Region contains the four counties of Mercer, Burlington, Camden and Gloucester. The character of this area, is also a suburban-urban mix. The urban cores within the region are Trenton and Camden with surrounding suburban development, but the entire region is oriented towards the Philadelphia metropolitan center.

The Southeast Region contains the six counties of Monmouth, Ocean, Atlantic, Cape May, Cumberland and Salem. The general character of this region is rural except for the large resort area stretching along the Atlantic coast. The major center for this region is Atlantic City. The resident population of the resort counties within this region is dramatically supplemented during the summer season resulting in urban-like problems not normally associated with a "rural" classification.

NORTHWEST REGION

A total of 5,612 Crime Index offenses were reported to the police of the Northwest Region during 1973. When compared to 1972, this represents an 11 percent increase.

Only 5 percent of all the offenses were of the violent crime group, which includes murder, rape, robbery and atrocious assault. The remaining 95 percent were of a nonviolent nature, which includes breaking and entering, larceny and auto theft.

Percentagewise, the largest increase 1973 over 1972, was in robbery, up 87 percent. Volumewise, larceny recorded the highest increase. Both atrocious assault and rape recorded decreases during 1972.

During the month of August there were 548 Crime Index offenses reported, the highest volume month for the year. July recorded 546, the second highest volume for the year 1973.

In 1973, there were 2,382 victims of Index offenses for every 100,000 inhabitants of the region, representing a 5 percent increase over 1972. The 1973 crime rate is still the lowest reported for any of the four regions.

CLEARANCES

The police of the Northwest Region solved 21 percent of all Crime Index offenses reported to them in 1973. As with other regions of the state, the percentage of solutions for those crimes of a violent nature far exceeded that for those crimes of the nonviolent or property group.

NORTHEAST REGION

The police of the Northeast Region reported a total of 191,167 Crime Index offenses received by them from the inhabitants of this populous region during 1973. This figure represents an increase of 5 percent over 1972.

Within the Index offenses, volumes for those crimes of a violent nature, which includes murder, rape, robbery and atrocious assault, rose 11 percent during the year. The nonviolent crime group of breaking and entering, larceny and auto theft reflected an increase of 5 percent for the same period.

There were substantial increases in certain crime categories, 1973 over 1972. Atrocious assault increased 9 percent and larceny increased 11 percent. Some decreases were also reported for the same period. Auto theft decreased 5 percent and robbery offenses dropped 4 percent.

The months of August and July recorded the highest volumes during 1973—19,101 and 18,608 respectively.

The 1973 crime rate for the Northeast Region was reported at 4,066 victims for every 100,000 inhabitants. This rate represented a 5 percent increase over 1972.

CLEARANCES

In 1973, the solution rate for all Crime Index offenses reached 16 percent. This represents a 4 percent increase over the 15 percent rate reported in 1972.

SOUTHWEST REGION

The police of the Southwest Region reported 54,363 Crime Index offenses during the year 1973. When compared to 1972, this figure represents a 7 percent increase.

The violent crime group of murder, rape, robbery and atrocious assault represented 9 percent of all the Index offenses reported and reflected an increase of 21 percent over 1972. The remaining 91 percent of the Index offenses reported were of the nonviolent crime group, representing a 5 percent increase over 1972.

Significant percentage increases were noted in the offenses of rape, up 35 percent, atrocious assault, up 26 percent and murder increasing 22 percent during the year 1973.

The month of July recorded 5,313 Index of offenses reported, and August, a close second, recorded 5,258 for the year 1973.

Region crime volumes, when related to population, result in a rate of victimization at 4,183 persons for every 100,000 inhabitants of the region. The crime rate for this region increased 7 percent over 1972.

CLEARANCES

Police in the Southwest Region solved 15 percent of all Index offenses reported to them in 1973, a decrease of 4 percent when compared to 1972.

SOUTHEAST REGION

During the year 1973, a total of 49,034 Crime Index offenses were reported to the police of the Southeast Region. This total represents a 10 percent increase over 1972.

Violent crime accounted for 6 percent of all Index offenses reported, with 94 percent being classified as nonviolent or property type offenses. When comparing 1973 to 1972, violent crimes increased 3 percent, and nonviolent crime increased 11 percent.

A significant increase of 24 percent was noted in the atrocious assault category for 1973. Some other increases were noted for the period 1972-1973, with larceny up 14 percent and breaking and entering up 8 percent. Low volume percentage increases were found in the offenses of murder, up 26 percent and rape increased 12 percent. Robbery decreased 20 percent for the same period.

As would be expected in this resort oriented area, the crime volumes were highest during the summer months of August with 5,911 offenses and July with 5,504 offenses.

A crime rate of 4,229 victims for every 100,000 persons in the Southeast Region was reported for 1973, an increase of 10 percent over 1972.

CLEARANCES

Law enforcement agencies of the Southeast Region solved 17 percent of all Crime Index offenses reported to them during the year, a 4 percent increase over 1972.

URBAN-SUBURBAN-RURAL CRIME

EFFECTIVE JANUARY 1, 1973, ALL LARCENIES, REGARDLESS OF VALUE, ARE INCLUDED IN THE CRIME INDEX TOTALS. IN PRIOR YEARS ONLY LARCENIES \$50 AND OVER WERE CONSIDERED CRIME INDEX OFFENSES. ALL STATISTICS FOR 1973 AND PRIOR YEARS HAVE BEEN ADJUSTED TO INCLUDE ALL LARCENIES.

Crime statistics by urban, suburban and rural classifications are presented for the purpose of measuring crime trends for these specific groups, particularly since New Jersey is the most urbanized state in the country.

The character of municipalities by urban, suburban and rural classifications as established here and in the section entitled "State, County and Municipal Profiles", was compiled by the Division of State and Regional Planning, Bureau of Statewide Planning.

URBAN

An increase of 2 percent in the Crime Index and crime rate of urban communities was disclosed for the comparative period 1973 over 1972. The urban group accounted for 62 percent of the total crime reported in the state, a decrease from the 65 percent in 1972. Individually, 89 percent of the robberies, 79 percent of the

murders and 77 percent of the atrocious assaults reported in New Jersey during 1973, occurred in urban areas. However, all three offenses did disclose decreasing trends during 1973.

SUBURBAN

An increase of 12 percent in the Crime Index and rate was reported for the period 1972 through 1973. The Suburban group accounted for 32 percent of the total crime reported in New Jersey, an increase from the 31 percent recorded in 1972. Dramatic increases were noted in the offenses of murder, up 48 percent and atrocious assault, up 31 percent.

RURAL

Rural communities, as a group, disclosed the largest percentage increase of the three groups, with the Crime Index and rate increasing 17 percent in 1973. Still, rural communities accounted for only a little over 5 percent of the total Crime Index of the state, representing a small increase from the 4.9 percent recorded in 1972. The largest percentage increases were found in the offenses of rape, a 22 percent increase and breaking and entering, an increase of 20 percent.

OFFENSES BY POPULATION GROUPS

EFFECTIVE JANUARY 1, 1973, ALL LARCENIES, REGARDLESS OF VALUE, ARE INCLUDED IN THE CRIME INDEX TOTALS. IN PRIOR YEARS ONLY LARCENIES \$50 AND OVER WERE CONSIDERED CRIME INDEX OFFENSES. ALL STATISTICS FOR 1973 AND PRIOR YEARS HAVE BEEN ADJUSTED TO INCLUDE ALL LARCENIES.

The presentation of crime statistics by population groups was made for the purpose of projecting, for consideration, the relative crime experience of communities of varying populations. Although the individual

municipalities within the various groups may be geographically separated, their inclusion into a specific group was predicated by the similarity in population with the other municipalities within the group. Municipalities within the same group may differ widely when all factors are considered, but they do share the common bond of population size. The grouping of communities in this manner allows recognition of variances in the crime volumes, rates and clearances between the established groups.

Set forth below are the established municipal groupings as used in this section:

GROUP I

7 Municipalities over 100,000
Total population — 1,225,560

GROUP II

16 Municipalities 50,000 to 100,000
Total population — 995,320

GROUP III

42 Municipalities 25,000 to 50,000
Total population — 1,522,960

GROUP IV

62 Municipalities 15,000 to 25,000
Total population — 1,169,725

GROUP V

202 Municipalities 5,000 to 15,000
Total population — 1,900,355

GROUP VI

140 Municipalities 2,000 to 5,000
Total population — 470,320

GROUP VII

98 Municipalities under 2,000
Total population — 112,090

MUNICIPAL OFFENSE DATA

EFFECTIVE JANUARY 1, 1973, ALL LARCENIES, REGARDLESS OF VALUE, ARE INCLUDED IN THE CRIME INDEX TOTALS. IN PRIOR YEARS ONLY LARCENIES \$50 AND OVER WERE CONSIDERED CRIME INDEX OFFENSES. ALL STATISTICS FOR 1973 AND PRIOR YEARS HAVE BEEN ADJUSTED TO INCLUDE ALL LARCENIES.

The 1973 offense data provided in this section is shown as it relates to the incorporated New Jersey municipality in which the offense occurred and is based on the individual contribution of crime statistics by the respective police jurisdictions of the state.

The isolation of offenses by place of occurrence, as shown in the table, makes possible the projection of a more accurate statistical picture of the individual com-

munity's crime experience. Additionally, this approach has provided a sound base for offense computation and analysis by county, region, character, population group and state. This application has been made, in varying forms, in all of the preceding offense information shown.

The statistical tables which follow offer numerical counts of all offenses reported during 1973, also a "Crime Index Total" column, which is used to compute the crime rate of a municipality, has been included. A Crime Index consists of murder, rape, robbery, atrocious assault, breaking and entering, larceny and auto theft. A crime rate column has also been included. Crime rates relate the incidence of crime to the resident population. For comparative purposes, all crime rates are based on population units of 100,000, and are calculated by dividing the current population into the Crime Index.

POLICE EMPLOYEE DATA

The Uniform Crime Reporting Program of New Jersey incorporates the collection of pertinent data relating to the police of the state. Information regarding police employee strength, distributions, assaults against law enforcement officers and circumstances surrounding the killings of police officers are discussed in this section.

Individual listings of full-time municipal police departments of the state are shown in tables succeeding the narrative portion of this section.

The determination of police strength for any given area or municipality should be a subject for serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. Some of these factors, discussed elsewhere in this publication, relate to size, density of population, geographic location, character, and proximity to metropolitan areas. The tables and charts shown in this section relate to reported police employee strength and should not be interpreted as recommended strength for any given municipality. Such determinations should be made after objectively evaluating the individual need for police services based on the above factors.

TOTAL POLICE EMPLOYEES

During 1973, there were 26,735 persons employed full-time by all police agencies in New Jersey. This number represents a 5 percent increase over 1972. Male employees accounted for 88 percent of the total police employee strength in 1973.

In 1973, there were 5,636 civilian police employees in the state, representing an 8 percent increase when compared to 1972. Female employees accounted for 53 percent of the total civilian police employee strength in the state.

A total of 21,099 police officers were employed in the state during 1973, a 5 percent increase over 1972. Only 237 of the 21,099 police officers were females. In addition, the full-time police agencies in the state reported employing 3,365 part-time police officers during the year 1973.

MUNICIPAL POLICE EMPLOYEES

In 1973, the number of municipal police employees in New Jersey (including civilian personnel) increased to 18,041 from the 17,071 reported in 1972, an increase of 6 percent.

Individual county volumes for municipal police employees in 1973, disclosed an extensive range of variances when compared to 1972. Sussex County experienced the largest percentage increase, up 14 percent, while Cape May County revealed a decrease of less than 1 percent. Essex County reported the largest volume increase, an additional 270 police employees for 1973.

MUNICIPAL POLICE EMPLOYEE RATES

The number of municipal police employees (including civilian personnel) for every 1,000 inhabitants of New Jersey, was reported at 2.4 per 1,000 during the year 1973. A 4 percent increase over 1972, and a 20 percent increase since 1969; a relatively small increase when considering the rise in the criminal and noncriminal demands placed upon the police of New Jersey today.

During 1973, the populous Northeast Region recorded the highest rate, at 2.6 police employees per 1,000 inhabitants. Within this region, Essex and Hudson Counties were high with identical police employee rates, 3.5 per 1,000 population. The Southeast Region was second with 2.5 police employees per 1,000 inhabitants. The Southwest Region reported 2.0 police employees per 1,000 population during the year 1973. The rural Northwest Region recorded 1.0 employees per 1,000 population, the lowest of the four regions.

MUNICIPAL CIVILIAN EMPLOYEES

The personnel of each department differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. This current upward trend in employing civilians in police departments to perform clerical duties, is in line with the thinking of many police administrators who recommend the use of civilians in this capacity, thus freeing the sworn personnel for actual police related services.

In 1973, 11 percent of all police employees were civilians, a 6 percent increase over 1972. Within regions, the percentage of civilian municipal police employees varied from 18 percent in the Southwest Region to 9 percent in the Northeast Region.

MUNICIPAL POLICE OFFICERS

The number of full-time municipal police officers in New Jersey was recorded at 16,068, a 5 percent increase over the 15,311 reported in 1972.

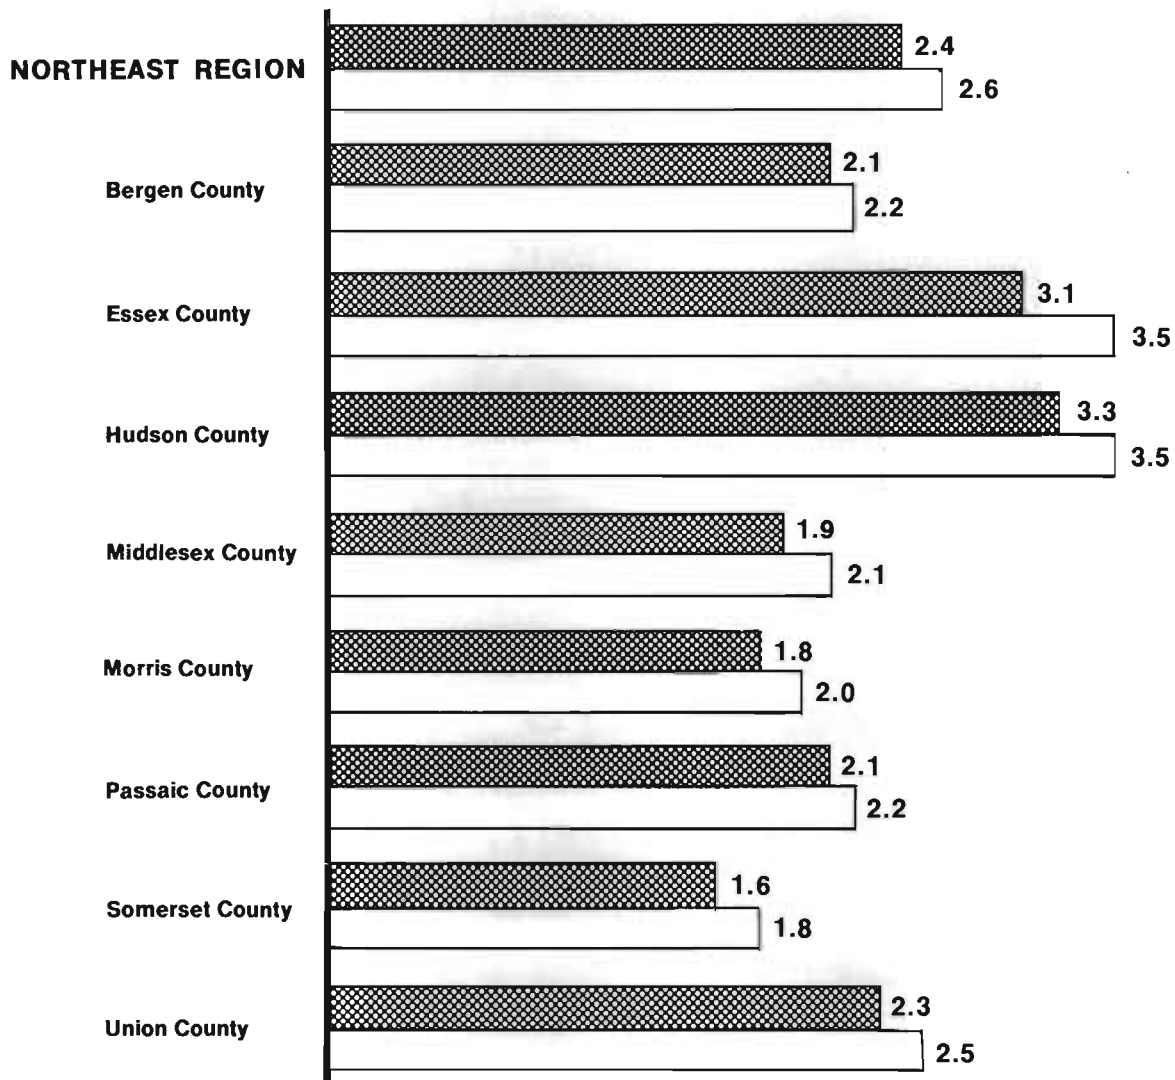

In 1973, the number of full-time municipal police officers for each 1,000 persons of the state was recorded at 2.2, a 5 percent increase over 1972. Since 1969, the police officer rate per 1,000 inhabitants has increased only 18 percent.

Regionally, the number of full-time municipal police officers ranged from 0.9 in the Northwest Region to the 2.4 per 1,000 in the Northeast Region. Individual county rates ranged from the 0.8 in Warren and Hunterdon Counties to the 3.5 per 1,000 permanent inhabitants for Cape May County.

The police employee rates per 1,000 population presented here should not be construed as being recommended ratios. The determination of police strength for any municipality or jurisdiction should be based on the numerous factors which create the need for police services. These factors, as crime, vary in type and degree from place to place. Some examples are seasonal populations, geographic location, density and composition of the population.

**AVERAGE NUMBER OF MUNICIPAL POLICE OFFICERS AND
POLICE EMPLOYEES PER 1,000 POPULATION BY REGION AND COUNTY**

EMPLOYEES PER 1,000 POPULATION BY REGION AND COUNTY (CONT'D)
1973**

COUNTY POLICE, SHERIFFS AND PROSECUTORS

The functions of county law enforcement officers vary widely throughout the state. The operation of one sheriff's department may be limited exclusively to civil areas and the administration of the county jail, or they may be actively involved in criminal matters throughout the county. County police departments are varied in their activities as well, in that some are responsible for enforcement throughout the county while others may have as their primary mission the policing of county parklands. The responsibilities of county prosecutor's officers include criminal investigations, trial preparation, court presentation and special probes. Because of the difference in the types of police service rendered, rates for county law enforcement agencies are not presented here.

The various county law enforcement agencies of the state employed a total of 3,755 full-time police employees during the year 1973. This figure represents a 6 percent increase over 1972.

The full-time civilian employees accounted for 24 percent of the total police employees reported by county law enforcement agencies during 1973. The remaining 76 percent were sworn personnel.

STATE POLICE

The New Jersey State Police is empowered to provide all phases of law enforcement throughout the state. It also renders police services, upon request, to all the law enforcement agencies in the state. No rates are used due to the variations in the nature and extent of the police services performed by the State Police.

The Division of State Police employed a total of 2,273 persons during the year 1973. Of these, 28 percent or 641 were civilians, with the remaining 1,632 being sworn personnel. The total number of State Police employees increased 2 percent. Included in this increase was a rise of 2 percent in civilian personnel, and a 3 percent increase in sworn personnel.

OTHER POLICE (State Agencies)

In 1973, there were eight state agencies (excluding State Police) with law enforcement responsibilities, who reported police employee data to the System. Together these agencies reported a total of 2,666 full-time police employees. Included in this total are 2,106 civilians and 560 sworn personnel.

No rates are computed here, due to the variations in the types of police services rendered and their statewide jurisdiction.

POLICE KILLED AND ASSAULTED

The killing or assault of a police officer has an effect on society which reaches far beyond the overt act. Such occurrences constitute an immediate threat to the well-being of the community and a serious breach of the internal security of the country. Today, a young man who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society he is

sworn to protect. This deplorable situation should be a subject of serious public concern for, in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers acting in the line of duty is clearly demonstrated by the following information.

POLICE KILLED

In 1973, four New Jersey police officers lost their lives as a result of some criminal action directed against them.

Analysis of the four officers killed in the line of duty revealed that one officer was slain during a motor vehicle stop. Another officer was killed while attempting to quell a disturbance between a husband and wife, he was shot with his own gun. A third officer was killed as a result of stopping a suspect vehicle wanted for a gas station robbery that had occurred earlier in the day. The fourth officer was shot from the roof of a building after he and other officers had arrested two subjects for assaulting them following a traffic stop. Apprehensions were made in all the above cases.

Weapon circumstances surrounding the slayings of the four police officers, identified handguns as the weapon in three killings, and a stabbing weapon was identified as the weapon in the fourth slaying.

During the last five years, there have been 16 police officers killed in the line of duty in New Jersey. Specifically, there were 4 killed in 1969; 3 in 1970; 4 in 1971; 1 in 1972 and 4 in 1973.

ASSAULTS ON POLICE OFFICERS

During 1973, there were 3,059 police officers assaulted in New Jersey. This figure represents police assaults reported by all police agencies of the state. When compared to 1972, a 12 percent increase is disclosed.

No police assault rates are computed for total police officers assaulted, because of the broad field of services performed by many state and county police agencies.

ASSAULTS ON MUNICIPAL POLICE OFFICERS

Municipal police officers of the state were the victims of 2,859 cases of assault during the year 1973, a 13 percent increase over such cases reported for the year 1972. Since 1969, assaults on municipal police officers have increased 52 percent.

While every police officer who is assaulted does not suffer personal injury, 38 percent of those assaulted during 1973 did sustain physical injury to one degree or another. The assaults resulting in physical injury to the officer are frequently followed by loss of duty time by the officer.

The 1973 rate of municipal police assaulted in the state was computed at 17.8 assaults for every 100 municipal police officers, a 7 percent increase over 1972. Since 1969, the police assault rate has increased 28 percent. Assault and injury rates are shown by population groups in table form for the purpose of projecting the comparative assault experience of police in communities of varying populations.

OTHER POLICE OFFICERS ASSAULTED

The following state and county law enforcement agencies are dealt with separately, and are not included when computing municipal assault rates. The services performed, in most cases by these agencies, vary greatly from the functions of municipal police agencies, thus requiring their separation.

County police officers, which includes county police, county park police, sheriff's and prosecutor's offices, reported a total of 140 sworn personnel assaulted during the year 1973. A total of 70 officers received some type of injury as a result of the attack on their person.

The New Jersey State Police reported a total of 53 troopers assaulted during the year 1973, of these, 14 received physical injury.

Other state agencies with police powers, reported a total of 7 sworn personnel being assaulted during the year; of these, 4 received physical injury.

ADDITIONAL ANALYSIS

The following analyses deals with weapons used against police officers, type of service being performed when assaulted, times of assaults and police assault cases solved.

WEAPONS USED

In 1973, personal weapons, such as hands, fists and feet were used in 87 percent of all assaults on police officers in the state, no change over 1972. Other dangerous weapons, such as clubs, bricks, jack handles, etc., were used in 8 percent of all cases of police assault. Knives reflected a 3 percent involvement, and firearms a 2 percent involvement. The five year period 1969-1973 has disclosed very little change in the weapon usage during that period.

TYPE OF ACTIVITY

The police services performed by law enforcement agencies vary widely in both criminal and noncriminal activities. The services performed are governed by the nature of the demands for this service. Analysis by the type of service being rendered when the police officer was assaulted, provides an indication as to the degree of jeopardy a police officer is placed when responding to a given situation.

During 1973, those police officers responding to disturbance calls, which includes family disputes and tavern disorders, again accounted for most of the police officer assault situations. Almost 32 percent of all police assault cases fell into this category. Police officers attempting to effect an arrest accounted for 19 percent of the assaults in 1973. The police officers assaulted who were engaged in the investigation of suspicious persons accounted for 12 percent of the total assaults. Officers assaulted while stopping a vehicle for a traffic violation contributed 11 percent to the total police assault problem. The police officers assaulted who were transporting prisoners disclosed a 10 percent involvement in the total police assault picture.

TIME OF POLICE ASSAULTS

The analysis of police officers assaulted by time of day disclosed very little change over 1972. The four hour period 8:00 p.m. to midnight accounted for 35 percent of the assaults on police officers in 1973. The assaults during this four hour period were divided evenly between the two hour periods of 8:00 p.m. to 10:00 p.m. and 10:00 p.m. to midnight. The six hour period 8:00 p.m. to 2:00 a.m. accounted for 50 percent of the police assault cases, with the eight hour period 8:00 p.m. to 4:00 a.m. accounting for 60 percent of the assaults on police in 1973. Additional time periods of assaults are shown in a chart following this section.

CLEARANCES AND ARRESTS

The police of New Jersey were successful in clearing by arrest, 95 percent of the assaults directed against them. Assaults against officers attempting to perform their duty would tend to indicate the disrespectful attitude of the perpetrators involved, even though almost immediate apprehension exists.

Although an assault upon a police officer is a high misdemeanor in New Jersey, police charged only 40 percent of the persons arrested with this serious crime. The remainder were charged under the less severe misdemeanor or nonindictable section of the law. A little over 8 percent were determined to be juveniles. Numerically, those arrested for the indictable offense numbered 1,168, those persons charged with the non-indictable offense reached 1,491 and the juveniles arrested for assaulting police officers totaled 237.

**1973 FULL TIME MUNICIPAL POLICE OFFICERS
ASSAULTED IN LINE OF DUTY BY POPULATION GROUP**

POPULATION GROUPS	TOTAL ASSAULTS	RATE OF ASSAULTS PER 100 OFFICERS	ASSAULTS WITH INJURY	RATE OF ASSAULTS PER 100 OFFICERS WITH INJURY
