Letter of Transmittal	I
Statements of Financial Condition—Municipalities—1946 (Municipalities in Alphabetical Sequence)	1–565
Statements of Financial Condition—Counties—1946	567–569
Tabulation Showing the Total Tax Levy for All Purposes; the Amount Outstanding at the End of the Current Year, the Second Year, and the Third Year; and the Accumulated Amount of Tax Title Liens Outstanding at the End of Each Year, 1931 to 1946, Inclusive	571
Tabulation of Cash Collections, 1941 to 1946, Inclusive	571
Statement of County Gross and Net Debt—December 31, 1946	572
Total of All Classes of Debt of the Municipalities of the State of New Jersey as of December 31, 1946	572
Statement of Municipally Operated Utilities for the Year 1946	573–576
Recapitulation of Totals of Municipal Budgets as Originally Approved by the Division of Local Government for the Years 1942 to 1947, Inclusive	577
Accumulated Totals for All Municipalities—Expenditures and Required Payments—Receipts and Revenues Realized	578–579
Total Gross Debt of Counties and Municipalities	581
Statutory Net Capital Debt	581
Tabulation of All Municipalities According to Population	588
Division of Local Government—Appropriations, Expenditures and Cash Income	589

To the Governor and Members of the Legislature:

Transmittal

I submit herewith the Ninth Annual Report of the Division of Local Government covering the fiscal year January 1 to December 31, 1946, pursuant to the provisions of Chapter 112, P. L. 1944, which requires "the Director to publish annually a report of comparative financial statistics of Local Government tabulated to show the costs of government, the costs of principal services, the amount of debt and other pertinent data."

Comparable 1938 to 1946

This report is prepared along the lines of those for preceding years, thus permitting comparable studies for a nine-year period. The files of the Division of Local Government are open for inspection to anyone desiring to make comparisons for prior years, although no printed reports are available for general distribution for any year prior to 1938.

Scope of Report, Etc.

I am endeavoring so far as possible in this letter of transmittal to follow an outline which will be generally applicable in succeeding periods. This outline in brief will cover Scope of Report, Special Comments, Definitions and Summary Statements.

SCOPE

Number of Municipalities

There are 586 local government units in the State of New Jersey which are subdivided into 21 counties, 52 cities, 23 towns, 253 boroughs and 237 townships.

Alphabetical Sequence

For convenience of analysis a separate page of this report is devoted to each of the municipalities which are listed in alphabetical sequence, counties appear in a separate section.

Municipal Fiscal Year

The fiscal year for all counties and municipalities is the calendar year. Population (1940 Census), net assessed valuations taxable and tax rates appear immediately under the name of the municipality.

Source Material of Report

The statistical data contained herein have been assembled from reports of audit wherever possible and in all other cases from financial statements prepared by the chief financial officer of the municipality. Wherever the financial audit has been used as a source of information, the letter "A" appears in the upper left-hand corner of the page. In order to complete this report without undue delay the financial statements have been utilized to some extent in this report but 73 per cent of the statements have been compiled from audit reports. However, the information appearing in the report will, it is believed, be found to be statistically correct.

Statements of Expenditures and Required Payments

In compliance with that part of the statute which requires a tabulation showing cost of government and the costs of principal services in comparable form, a statement of expenditures which reflects the budget results for the year, is used. These expenditures not only cover cash outlay, but also include amounts reserved for unpaid claims, amounts required for the payment of State, County, and Local School Taxes, and Deferred Charges which in a majority of instances represent non-cash items. Under the statute, all current expenditures must be cleared by budget action and actual costs of each governmental function may be determined from an end of the year statement reflecting the condition of all budget accounts. Standard budgets with uniform classifications, which are required under the budget act, lend themselves to comparable classifications of governmental costs.

Statement of Receipts and Revenues

As an offset to the expenditure statement, a statement of receipts and revenues which reflects the end of the year budget results on the income side of the budget is used. Actual receipts which are available to meet expenditures and required payments may be determined from the statement of revenues. This is based on cash receipts in all instances except in the case of surplus revenue which may in part offset deferred charges hereinafter referred to.

Reserve for Uncollected Taxes

It will be noted that the expenditure and required payment group shows a total captioned "Total All Expenditures and Required Payments" which figure excludes the "Reserve for Uncollected Taxes." This "Reserve for Uncollected Taxes" is not a cash requirement and while it is an integral part of the budget it should not be considered in determining cash requirements. This reserve is an amount added to

the required levy; and will, based upon the estimated collection of current taxes, provide the cash required for operations and required payments.

Significance of Unbalanced Totals

A comparison of the total expenditures and required payments with the total receipts and revenues realized indicates the extent to which receipts support expenditures. Under the cash basis of operations an excess of receipts means that there is a surplus which may be availed of to support budgets of subsequent years; and a deficiency of receipts means that the deficit must be provided for in the budget of the succeeding year. Any attempt to use balanced totals in this report would materially delay the completion thereof.

Capital Outlay

Immediately following the Statements Receipts and Revenues I have inserted a Statement of Capital Outlay, subdivided under several captions. This statement first appeared in the 1945 report and the transactions reported represent expenditures from bond funds. (Any capital outlays financed through the current budget—and these in the main are minor items of a capital nature—are classified under the respective head as an item of current expense.) I hope to be able to report on direct Capital Outlays in the Current or Operating division of accounts in 1947 and thus give a better over-all picture of Capital expenditures. It will be noted that a separate heading appears in the Operating section for "Capital Improvement Fund." This does not represent a direct outlay for Capital purposes, but is in the nature of a down-payment fund which can only be availed of through ordinance. The Capital Improvement Fund may be expended in the year in which the appropriation is made or may be accumulated and held for future capital purposes.

1946 Taxes Levied

An analysis of the several purposes for which taxes are levied will be found under the foregoing caption. It will be noted that taxes levied are broken down under the headings of Local School, County, State and Special District Taxes. These several items represent mandatory requirements. Attention is directed to Page X, "New Jersey Tax Billing and Collecting Procedure" which will give a general idea of the method of levying and collecting taxes under the New Jersey statutes.

The local purpose levy which is set forth as a separate item represents the amount required from general taxation to operate and main-

tain the municipality and provide for municipal debt service, and the sum total of the several items gives the total tax levy for all purposes.

The figures set forth under the caption "1946 Taxes Levied" are taken from what is known as the "Abstract of Ratables". This "Abstract of Ratables" is in effect the printed record of the several tax rolls or tax "duplicates" as they are defined in the New Jersey statutes.

Theoretically the total of "1946 Taxes Levied" should agree with the 1946 Levy appearing under "Current" taxes. Practically there will be variations due to new construction, fractional rates and also to the fact that taxes may be added during the year. Fractional rates should always produce a slight variation and where there are more than nominal changes they will undoubtedly be due to taxes added under what is known as "Chapter 397, P. L. 1941."

Again theoretically the figure shown under "expenditures" for "Required payments for Local School, County, State and special district taxes" should agree with the sub-total of similar items under "1946 Taxes Levied." Here again there may be variations as the County requirement may be changed by amounts added under the statute referred to in the preceding paragraph.

Earlier reports did not give due recognition to the "Local Purpose Levy" which figure represents the amount under the direct control of the municipality and to a greater or lesser degree determines the tax rate. The "Local Purpose Levy" as shown under "1946 Taxes Levied" will in few instances agree with the "Local Purpose Levy" appearing in the budget adopted at the beginning of the year. This is due to adjustments in other tax requirements, fractional rates, etc. The present set-up gives appropriate recognition to the one item directly controlled by the Municipality.

It will be noted that all tax rates are carried out two places in this report whereas the printed abstracts of the several counties carry these rates several places further. The New Jersey statutes call for a rate on the hundred dollars of valuation and it is established practice to carry no rate beyond two decimal places. For example, a rate of 4.7719 is carried as 4.78—always to the next cent on the hundred.

Current Taxes—1946 Collections

This figure represents 1946 cash collections from the 1946 tax levy. The current collection figure appears on both the Statement of Receipts and Revenues Realized and the Statement of Taxes.

Delinquent Taxes Including Liens

This represents 1946 cash collections on all prior years taxes including tax title liens which were unpaid at the beginning of the year

1946. In the statement entitled "Taxes" a distinction is made between prior years taxes and tax title liens, while in the Statement of Receipts and Revenues no such distinction is made. There may be slight variations between the figures shown under receipts and revenues and the sum total of the collections in 1946, and the liens redeemed by cash due to adjustments on account of technical differences.

Emergency Appropriations

During 1946 municipalities declared emergencies aggregating approximately $5,957,663.37 and thus created emergency appropriations for the foregoing amount of which $423,734.03 were financed by borrowings and the balance from funds on hand. These appropriations were for Water and Other Utilities, Garbage and Ashes, Fire Protection, Roads, Streets and Bridges, Police, Snow Removal, Health, Bonus Payments, Housing, etc.

Reference should be had to a subsequent section of the report for an outline of the procedure followed in making and liquidating emergency appropriations.

Emergency Borrowings

Emergency borrowings represent the receipts from temporary loans issued in the form of emergency notes to finance appropriations made necessary by some emergency which was unforeseen at the time of the preparation of the budget. Reference should be had to the definition relative to emergencies appearing elsewhere in this report.

County Taxes

The County tax represents the amount which a municipality is required to pay to the County for the support of the County government. Reference should be had to the methods of tax billing and collecting mentioned elsewhere in this report for the procedure in determining this requirement.

State Taxes

Reference should be had to a comment appearing elsewhere in this report for the method of determining and settling the amount of State taxes which it should be noted is not a general State tax.

Local School Levy

Under New Jersey statutes, the local school levy provides normally for the operation of the school district for the period July 1 to June 30. Thus in setting up the local school requirements which is levied in full in the 1946 tax levy as a 1946 cash requirement, there is a technical

difference, which has been found to work out equitably due to the fact that the required payments for school operations of the calendar year are substantially equivalent to those of the school fiscal year.

Special District Taxes

Reference should be had to a comment appearing under definitions covering this particular item.

Tax Collection Record

The tax collection record is one of the most important factors in determining a municipality's financial position. A great portion of the cost of government is supported by taxation and the extent to which a municipality is able to collect its taxes is indicative of its financial standing. There are several municipalities which collect 100% of the current levy within the year of levy. These are unusual cases and it will be noted by studying the table appearing herein that the average current collection is 92 + %.

It is obvious that where a municipality does not collect 100% of its current requirements, it must realize from delinquent taxes and other revenues an amount sufficient to produce all of the cash required for current operations—otherwise, there is a cash deficit. Rather than to attempt to define the various sources of municipal revenue at this point, I am referring the reader to a section under definitions where I have briefly defined various items of income.

Capital Debt

Under the caption of "Capital Debt," I have reported all school debt, self-liquidating debt and other capital debt together with the statutory deductions allowable therefor. The result is the statutory net debt figure. The average of the assessed valuations of real property for the three preceding years is set forth immediately below the net debt figure and the result is the percentage of net debt. Further comment will be found on these figures in another section of this report.

Current Debt

Current debt represents floating debt and is in almost every instance offset by current cash where a municipality is operating on a full cash basis.

Utilities

The expenditures and the required payments for all municipally owned utilities are set forth in a separate section and are offset by the receipts and revenues available for expenditures and required payments.

Foreclosed Property

Foreclosed property represents properties where the title in fee has been acquired by the municipality as a result of the foreclosure of tax title liens. As municipalities take steps to clean up delinquent taxes and liens, there is a corresponding increase in the foreclosed property asset figure. This asset value, now in the majority of cases represented by assessed values, is reduced by cash sales, and the cash becomes a revenue of the municipality, furthermore the sale of foreclosed property increases the taxable ratables as the parcels sold become taxable values. Further comment will be found in this report with respect to property acquired by deed or foreclosure.

Per Capita Figures

In two prior reports per capita figures for Municipal Functions, Debt Service, Gross Capital Debt, and Tax Levy appeared in a statement at the back of the report (page 583). In this report the figures are shown in the sheet setting forth the financial picture of the municipality. It is believed that this change will facilitate following the per capita figures and the pertinent source.

SPECIAL COMMENTS

Number Municipalities Under Cash Basis

Five hundred eighty-three municipalities and counties adopted cash basis budgets for 1947, three adopted non-cash basis budgets. The trend is indicated by the following:

	Cash Basis	Modified Cash Basis	Non-Cash Basis
1940	499	13	75
1941	539	10	38
1942	565	9	13
1943	578	3	7
1944	579	—	9
1945	579	—	9
1946	582	—	4

In this report for purposes of comparison, the statements of all municipalities are projected on a cash basis. The essential difference between the full cash basis municipalities and those that operate on a modified cash plan or on a non-cash basis is that the latter do not have an appropriation under the caption of "Reserve for Uncollected Taxes" in the Statement of Expenditures and Required Payments.

Second-Class Railroad Taxes

Under the New Jersey statutes, what was known as "Second-Class Railroad Taxes" was assessed at local rates and distributed by the State to the respective municipalities in which this property was located. A complete revision of the laws relating to railroad taxes was enacted in 1941 and as a result of this, municipalities in which there was second-class railroad property, namely, property used for railroad purposes located outside the 100 foot right of way, were to receive a tax based on the valuation of the so-called Class II property at the rate of $3.00 per hundred. This had a material effect on the figures appearing in tax levies of a number of municipalities.

The 1941 statutes further provided that a so-called franchise tax would be imposed based on the income of the railroad companies for the preceding fiscal period. This franchise tax would be paid to the State and in turn one-half would be distributed to the various municipalities entitled thereto, and the balance retained by the State for use in the manner prescribed by the statute.

The aforementioned legislation has been the subject of extended litigation. At the beginning of 1942 in order not to delay the preparation and completion of municipal budgets, legislation was secured permitting the railroad taxes to be a credit to be applied against the total tax levy after the budgetary requirements were determined upon. This did not affect the total requirement, but did have a bearing on the local tax rate in numerous municipalities. This procedure was followed for the year 1942 alone and in 1943 and subsequent years as a result of new legislation "tax on Class II railroad property and the municipality's share of the railroad franchise taxes" were deemed to be miscellaneous revenues of the municipality.

Special Assessments

There has been inquiry as to why figures dealing with special assessments for benefits have not been incorporated in this report. Under our present Bond Act, municipalities have little recourse to special assessments, and while there were extensive assessment projects undertaken by municipalities from 1925 to 1929, the number undertaken since that time has steadily decreased. The present Local Bond Act allows no deductions for benefit assessments, thus many improvements which were undertaken as local improvements due to the fact that the indebtedness could be created without affecting the debt limit of the municipality are not undertaken at all.

1933 High Point of Delinquency

A tabulation appears on Page 571 showing the percentage of delinquent taxes by years from 1930 to date. This table is based on

delinquencies after giving effect to collections, cancellations and transfers to tax title liens as reported by the several municipalities at the close of each fiscal period. These figures are unaudited. It is interesting to note that the percentage of delinquencies for the current year reached its high point in 1933 and in the succeeding three years dropped back to the 1930 level. Since 1936 the percent of delinquency has gone steadily downward. Regular tax sales, foreclosure proceedings and vigorous application of tax collection laws are largely responsible for the general improvement throughout the State. The decrease in tax title liens and the increase in foreclosed property indicate somewhat the extent to which foreclosures are being made.

Uncollected Taxes, Tax Title Liens, and Foreclosed Property

A summarized total of all delinquencies for the years 1941, 1942, 1943, 1944, 1945 and 1946 appears on Page 571. This table is of interest as it shows the change in the total amounts levied and uncollected. It will be noted that the foreclosed lien asset is continuously increasing, and that the "back-log" of delinquent taxes is reflecting a steady reduction, thus indicating not only better collections, but at the same time indicating a better enforcement policy.

The foreclosed property figure in the majority of cases represents the assessed valuations. Prior to 1946 it represented the accumulated liens against the property, covering not only taxes but assessment liens and utility liens. The method of reporting now calls for an asset value based on assessed valuations although not all municipalities have made this change.

Tabulation of Gross and Net Debt

Pursuant to that portion of the statute which requires comparative financial statistics tabulated to show the amount of debt, I am showing a statement setting forth the total gross debt of counties and municipalities for the years 1939 to 1946, inclusive, and a statement showing the statutory net debt of counties and municipalities for the years 1939 to 1946, inclusive. Comment appears elsewhere in this report dealing with indebtedness and the amount which may be incurred within existing statutes.

Statements of current or floating debt appear on the several pages dealing with the finances of municipalities. This statement incorporates all cash liabilities appearing on the current balance sheet, less current cash, thus giving the net floating debt. The total amount owing to the school district is used in this statement regardless of the fiscal period and as previously stated, there is a technical difference in the amount owing and the local school levy due to the fact that the school year is July 1 to June 30. Current debt in a municipality operating on a cash basis is bound to be nominal.

DEFINITIONS AND DESCRIPTIONS

Revenue Accounts

Revenue accounts are defined below in order to clarify their meaning to anyone not familiar with New Jersey municipal finance.

Surplus Revenue:—Represents free cash used to support the current budget after providing the amounts required to meet the cash liabilities at the end of the previous year and the amount of non-cash surplus permitted to be used to offset deferred charges which are required to be cleared by budget action. It does not represent the current cash balance at the close of the previous year except in very unusual cases.

Miscellaneous Revenues Realized:—Represents cash receipts from such sources as:

Licenses
Fees and Permits
Fines (Recorders, Magistrates, etc.)
Interest and Costs on Taxes
Interest and Costs on Assessments
Interest on Deposits
Franchise Tax
Gross Receipts Tax
Bus Receipts Tax
State (and other) Aid and all Sundry Receipts

Current Taxes

Represents the cash collection in the current year from the levy of the current year.

Delinquent Taxes Including Liens

This represents cash collections from all prior years' taxes including tax title liens which remain unpaid at the beginning of the year covered by the report.

Emergency Appropriations

The New Jersey statutes provide that emergency appropriations may be created by resolution for the purpose of meeting an emergent condition unforeseen, or for which adequate appropriation was not made in the current budget. These appropriations must be created by a resolution adopted by a two-thirds vote of all the members of the governing body, and where the amount exceeds three percent of the operating budget require the approval of the Director of Local Government. It is mandatory that all emergency appropriations be included in the budget of the next succeeding year. The expenditures

under emergency appropriations are subject to the same classification as to purpose as an original appropriation. Thus, in this report, emergency expenditures of 1946 are in no instance separately classified. A previous comment, however, illustrates the extent to which these are financed by emergency notes. All of these emergency appropriations are cleared by specific appropriation in the 1947 budget and will fall in the "Deferred Charge and Statutory Expenditure" group.

Emergency Borrowings

Emergency appropriations may or may not be supported by borrowings. If a municipality has sufficient current funds to support an emergency appropriation, recourse need not be had to the issuance of emergency notes. On the other hand, a municipality may, if it so elects, issue emergency notes to support an emergency appropriation. In either event, there must be an appropriation in the succeeding year's budget to clear the emergency.

Expenditures

The term expenditure includes not only cash disbursements, but in addition, amounts reserved to meet unpaid claims of the current fiscal year.

It will be noted from the foregoing that Amounts Reserved to Meet Unpaid Claims of a current fiscal year are added to the actual cash disbursements in this report. The unexpended balances of an appropriation (even though it may be uncommitted) is reserved under New Jersey statute regardless of the amount of the actual commitments against such reserve. The net result is that the amounts reserved at the end of a fiscal year are considerably in excess of the actual commitments of such fiscal year. It may be argued that this excess reserve produces an erroneous picture insofar as expenditures are concerned. However, few municipalities maintain complete requisition systems and it follows that reporting expenditures in excess of the actual disbursements makes for sound finance. In other words, the fact that a portion of the amount considered as an expenditure or charge remains unused at the end of a fiscal period strengthens the eventual financial position of the municipality.

Deferred Charges and Statutory Expenditures

This title includes amounts appropriated to cover over-expenditures, emergencies, judgments, or any items of a mandatory nature occurring in a prior period and required to be met in a current period. The major items incorporated in this classification are emergencies and cash deficits.

County Taxes

This is the amount required to be paid by the municipality to the County for its ratable share of the County tax levy as apportioned by the County Tax Board.

State Taxes

The only State tax is a 2.9 mill tax levied on the assessed valuations on each municipality which is required to be paid by the local taxing district to the County which in turn pays it to the State of New Jersey. This is known as the State School Tax, and 90% of the levy is returned to the County immediately after payment and in turn distributed to the respective school districts in the County on the basis of average days' attendance. The 10% retained by the State is held in a reserve fund to be distributed to needy school districts by the State Board of Education. The New Jersey corporation business tax acts of 1945 (Chapters 162 and 163, P. L. 1945) have a bearing on this 2.9 mill tax in 1946 and the actual levy for this tax approximated 2.1 mills. The tax will not appear in the year 1947 as a new method of aiding school districts eliminated this item.

Local School Taxes

Local school taxes represent the amount required for the support of local district schools which, in all except what are known as Article VI or so-called City districts, are governed by a corporation separate and distinct from the municipal corporation. The school year runs from July 1 to June 30, however, treating the local school levy as a required payment without adjustment creates no confusion insofar as this report is concerned, furthermore a number of school districts are now levying taxes on a calendar year as permitted by statute.

Local Purpose Taxes

Every municipal budget is balanced by what is known as a Local Purpose Tax. The Local Purpose levy appears under the heading of "1946 Tax Requirements" and a comment appears on Page IV of the report dealing with this item. This item loses some of its identity due to the fact that under a cash basis accounting procedure it is submerged in the financial set-up; however, this local purpose levy is that portion of the total levy which is under the jurisdiction of the local officials.

The Local Purpose Tax is of prime importance in the preparation of the municipal budget and this report has been prepared in such a manner that the item is given due prominence.

New Jersey Tax Billing and Collecting Procedure

A word of explanation is needed at this point relative to the method of tax billing and collecting in New Jersey. Property is assessed for

taxing purposes as of October 1 of the year preceding that for which the tax is levied. The municipal budget determines the tax requirements of *the municipality.* The local school budget determines the tax requirements of the local school district. The County budget fixes the amount due for County purposes and the County tax requirements of each individual municipality are determined by an apportionment of the County tax requirements by the County Tax Board. The State School Tax is apportioned by the State Comptroller to the several counties and the County Tax Board apportions this tax to the several taxing districts in accordance with the ratables.

The several requirements are added together and thus become the total tax levy of the municipality. The local collector submits a single bill for State, County, Local School and local requirements. Taxes are payable in four installments and the taxing district must make mandatory payments to the school district, to the County and to the State. What remains is available for municipal purposes. Thus, it is easy to see that failure to collect taxes may leave a municipality without funds with which to operate, however, from the taxpayers standpoint, the method is cleancut to the extent that he receives only a preliminary bill and a final bill and when he makes payment, he has satisfied all of the requirements of the State, County, Local School District and local municipality.

Foreclosed Property and Property Acquired by Deed

This asset is created through the foreclosure of tax title liens. When real estate taxes are unpaid the collector is charged with the duty of selling the same for non-payment and if there is no outside purchaser, the property is struck off to the municipality and the tax title lien is vested in the municipality. At any time after two years from the date of the tax sale the municipality may in accordance with law foreclose the right of redemption through the Court of Chancery and when such right to redeem is foreclosed the municipality acquires title in fee. This property then becomes municipal property subject to sale by the municipality. The property is withdrawn from the ratables when foreclosed and is not restored thereto until sold.

Prior to 1946 the asset figure was the accumulated municipal charges against the property. In 1946 the asset figure carried on the books of the municipality was changed to the last assessed valuation shown in the records. This change should theoretically reduce the asset value of foreclosed property, but will produce a figure which will be more in accord with sale prices in the majority of cases. (This change was not consummated in all municipalities but in general this above rule applies.)

The growth of the foreclosed property asset indicates that the disposition thereof is one of the important problems of the municipalities. The asset figure represents the taxes accrued and has no reference to actual values or assessed values. In some instances municipalities are able to dispose of foreclosed properties at a profit and in other instances at a loss. Attention is directed to the continued growth of this asset and to the fact that it is one of our major municipal problems.

While tax title liens, in the main, are created as a result of nonpayment of real estate taxes, liens may be created through the sale of delinquent special assessments, utility charges or special district taxes. Where the property is included in a tax sale and a tax title lien comes into existence, the power of foreclosure exists whether the lien results from a delinquent tax, a delinquent assessment or other delinquent charge. Regardless of the source of the delinquent charge the purchaser has the power to foreclose after the two-year period has elapsed on any municipal lien.

In some instances complete information relative to the activity in this account will be lacking due to the fact that the figures are taken from the financial statements of the municipalities direct rather than from the reports of audit.

Capital Debt

Under the caption of "Capital Debt" are set forth school debt, self-liquidating or utility debt, and other capital debt. Under the New Jersey statutes, the aforementioned figures represent indebtedness whether issued and outstanding or authorized but not issued.

Under deductions will be found school debt, self-liquidating debt, and other deductions. School debt, except in the case of City school districts, is the indebtedness of a separate corporation. (In the case of City districts, school debt is an obligation of the municipal corporation and the payment thereof is provided for by the municipality, whereas in other districts the payment is provided for by the school corporation.) The statutes in all cases permit deductions for school debt up to 6% of the average assessed valuations of real property of the three next preceding years. Thus, it will be noted that the full amount of school debt is deductible except in those cases where it exceeds the 6% average.

Self-liquidating or utility debt is deductible as a whole where the utility is entirely self-sustaining. In those cases where the utility is not self-sustaining, the operating deficit is capitalized at 5% and becomes a charge against the debt limit of the municipality.

The deductions for capital debt come about mainly through sinking funds or funds in hand applicable to the gross debt, and amounts owing by other governmental agencies. It follows that indebtedness which is

authorized for the purpose of funding or refunding already existing debt may appear as a deduction. The debt limit in New Jersey is 7% of the average of assessed valuations of real property including improvements for municipalities and 4% for counties.

It will be noted from the reports that the percentage of debt is in excess of the 7% limit in a number of cases. This has come about through the funding of floating debt, the incurring of debt through an order of a superior governmental authority and in some instances through the change in the method of computing net debt as provided for in the 1935 Bond Act revision (under the previous statute, utility debt was deductible regardless of whether or not the utility was self-sustaining and special assessment debt was also deductible. Thus, with the passage of a statute eliminating such deductions, a number of municipalities were automatically over the debt limit.) A municipality with indebtedness over the limit may incur new debt only within the limitations of the statute. In brief, these are the order of a superior governmental authority such as an order of the Board of Health to construct a sewer, capital debt for emergency purposes such as fire, flood or other disaster, the refunding of floating debt with the consent of the State Funding Commission, and the incurring of general debt based on the amount of debt retired in a prior year. The latter is a limited power provided by statute to take care of cases where certain capital expenditures should be incurred which do not fall in any of the exempted classifications.

Capital Outlay

A statement of Capital Outlay appears in this report. This statement which is broken down under the following captions: Beaches and Boardwalks, Building and Equipment, Parks and Playgrounds; Sewers; Streets, Roads and Bridges, Water Supply and Other Purposes represents amounts paid in cash from capital funds in 1946. In the main, these capital funds are derived from the proceeds of the sale of Bonds or Bond Anticipation Notes and the amounts reported represent actual cash disbursements; no attempt has been made to record capital commitments.

No attempt has been made to report on Capital Outlay in the Current Division of accounts although it is a recognized fact that capital expenditures may occur in the Current Division. The amount of such Capital Outlay will be nominal in the average case. Provision is being made for a separate classification under the heading of Capital Outlay in 1947 budgets. Thus, it will eventually be possible to present a clear picture of capital expenditure.

Utility Operations

Every municipally operated utility or enterprise must maintain a separate set of accounts. If the utility is entirely self-sustaining and if there is a surplus, such surplus may be used to reduce current taxation. If the utility operates at a deficit, general taxation must provide the necessary funds to meet such operating deficit. The use of surplus to reduce the current tax levy is permissible while the budgeting of deficits in the current tax levy is mandatory. As stated elsewhere in this report, the extent to which the utility is self-liquidating determines the amount of the capital debt which is deductible in any debt statement. (In addition, it may determine the amount of new utility debt which may be incurred.) Statements appear on Pages 573 to 576, inclusive.

Every utility must make a budget, which is separate and distinct from the general operating budget of the municipality. The figures shown under expenditures and required payments represent cash disbursements together with appropriation reserves. The receipts represent cash only.

Special District Taxes

The New Jersey statutes provide for the levy of special district taxes under certain conditions. In the main, these have to do with fire and light districts in townships. In addition, there are a limited number of sewer, garbage, and other special districts. No attempt has been made to report on these districts. Tests made some years ago indicated that the over-all costs of operating these several districts were nominal compared with other municipal requirements and while the required payments to the special districts appear in the report, no detail as to operating expenditures is shown. In the case of fire districts, no reports are filed with the Division, thus it is impossible to present detail covering the costs of fire district operations and the other districts are limited in number and the amount of money required. A district tax levy represents a special levy imposed upon a portion of a municipality (usually a township) for the rendering of a certain service. The balance of the municipality is not liable for this tax. Furthermore, the municipality is not liable for the obligations of the district.

"Cash Deficits"

While the term "Cash Deficit" does not appear in this report except in the comparative statement of budgets appearing on Page 577, under the New Jersey Cash Basis Act a municipality which does not collect sufficient *cash* within a given year to meet all expenditures and required payments, including amounts owing to the State, County, and Local School District, finishes the year with a cash deficit. This cash deficit must be included in the budget of the next succeeding year, which

requirement serves to keep a budget in balance, not only from a mathematical standpoint but from a cash standpoint. It will be noted that municipalities have incurred collective deficits running as high as $8,000,000.00, although the cash deficit for the year 1947 was only $48,000.00.

Cash Basis of Operations

Under New Jersey statutes, cash basis refers to a plan of budgetary operation whereby the collection rate of the preceding year is applied to the total tax requirement and the levy overlaid to an extent which will produce sufficient cash from current collections to balance the budget (and requirements). The overlay is represented by a "Reserve for Uncollected Taxes." However, the "Reserve" appearing on the appropriation side of the budget may be offset in whole or in part by a revenue from delinquent taxes.

The cash basis in its simplest terms is the determination of the amounts of cash revenues available for expenditure from other than a new tax levy and the amount of the new levy needed to produce the additional cash required in order to meet the obligations of the fiscal year; the amounts of cash receipts from the new tax levy and all other available revenues being determined on the basis of actual experience during the next preceding fiscal year.

From the above, it follows that if the municipality's obligations for the new fiscal year amount to $100.00 and if there are available on the basis of the next preceding fiscal year, revenues of $40.00 to be received in cash from sources other than a new tax levy, it would be necessary to receive in cash during the fiscal year the sum of $60.00 from the new tax levy and if 80 cents of each dollar of tax levied in the next preceding year was collected in cash during such year, then $75.00 of new taxes must be levied in order to produce the required $60.00 referred to above.

The objectives of the cash basis are twofold: 1st, to provide sufficient cash to meet all current obligations of the municipality in cash as and when they are payable; and 2nd, to reduce the interest cost of bonds issued to meet the cost of capital expenditures by reason of improved credit position.

Reserve for Uncollected Taxes

The reserve for uncollected taxes is in effect a balancing figure in every municipal and county budget which will, based upon the estimated collection of the current levy, provide the cash required for the operations of the municipality, debt service, and mandatory payments to the State and County. While the reserve is computed as an overlay on the current tax levy, it only represents an actual overlay to the

extent that the revenues from delinquent taxes and liens fail to produce sufficient cash to offset the reserve for uncollected taxes. In other words, there is a distinction between the "Reserve for Uncollected Taxes" and a "Reserve for Uncollectible Taxes." The former represents the amount required to balance the budget from a mathematical standpoint, while the latter represents an amount required to be raised currently to meet a loss in taxes due to non-collection. In those cases where the reserve for uncollected taxes is in excess of the anticipated receipts from delinquent taxes, the budget is actually subject to an overlay, but in those cases where this reserve is less than the estimated receipts from delinquent taxes, the result is the reverse.

SUMMARY COMPARATIVE STATEMENTS

ANALYSIS OF EXPENDITURES AND REQUIRED PAYMENTS OF COUNTIES—IN DETAIL

The method of presenting the expenditures of the twenty-one counties together with receipts and realized revenues was changed to a tabulated sheet in the 1944 report. In the year 1943 an individual sheet was set up for each county. It is believed that the tabulated sheet, which is being continued for the year 1946, will be of more interest than an individual sheet for each of the twenty-one counties as it permits a quick comparison and also produces a summary of the several counties.

Tabulation Showing the Total Tax Levy for All Purposes; the Amount Outstanding at the End of the Current Year, the Second Year, and the Third Year; and the Accumulated Amount of Tax Title Liens Outstanding at the End of Each Year, 1931 to 1946, Inclusive

The aforementioned tabulation which will be found on Page 571 is based on delinquencies after giving effect to collections, cancellations, and transfers to tax title liens. Comment appears on Page IX regarding the high point of delinquency and related matters.

TABULATION OF CASH COLLECTIONS, 1941-1946, INCLUSIVE

A supplemental statement has been incorporated on Page 571 showing the percentage of cash collections of the current levy for the years 1941 to 1946, inclusive. This statement is of interest as it reflects the variation between delinquencies and cash receipts. It is interesting to observe that the variation due to transfers to liens, abatements, cancellations, etc., does not run over 4% and has not dropped below 0.98%.

Total Gross Debt of Counties and Municipalities

The total gross debt of counties and municipalities with the percentage that such gross debt bears to the total net valuation taxable appears on Page 581. This information is in comparative form for the years 1941 to 1946, inclusive.

Statutory Net Capital Debt

A statement showing the statutory net capital debt of the counties and municipalities for the years 1941 to 1946, inclusive, appears on Page 581. Comments on method of computing net debt will be found on Page XV.

Recapitulation of Totals of Municipal Budgets as Originally Approved by the Division of Local Government for the Years 1942 to 1947, Inclusive

This statement appears on Page 577, and is being inserted in the report with the idea that it will be of interest to students of municipal finance as it presents in comparative form summarized budget totals. No attempt has been made to compare these figures with the results of a year's operations.

Accumulated Totals—Expenditures and Required Payments Receipts and Revenues Realized

A tabulation of expenditures and required payments and the receipts and revenues showing the accumulated totals for the 565 local units (excluding the 21 counties) for the years 1942, 1943, 1944, 1945 and 1946 appears on Pages 578-579. The accumulated figures are set up in comparative form for the five years and represent the collective totals for the several individual items of all municipalities.

Tabulation of All Municipalities According to Population

A tabulation will be found starting on Page 583 setting forth the population of all municipalities by population groups. Using this and the population figures appearing at the top of the page setting forth the details pertaining to each municipality will enable anyone to review the finances of municipalities of comparable population.

SUMMARY

One Page Devoted to Each Municipality

In summary, an attempt has been made to present a comprehensive picture of the current financial position of each municipality and in so doing, I have assembled pertinent information on a single page excepting data on municipally owned utilities, which appears in the latter part of the report. I have endeavored to comply with the statutory requirements and present a report of comparative financial statistics of local government and at the same time present the material in such a way that anyone not familiar with municipal finance may interpret and analyze the several statements. The 1946 budget results as reflected by the statement of revenue and expenditures shows the costs of various governmental functions, singly and in total. These figures have been set up in conformity with established schedules in general use through the United States and while the larger units may be susceptible to further breakdown, uniform classifications have been established throughout this report.

Current debt is analyzed and compared with current cash, and capital debt is broken down into three principal classes. The net debt is shown in relation to the average assessed valuations. Statements showing the tax collection records of the local unit and statements showing the results of publicly owned and operated utilities are included to complete the general analysis.

I have included on Page 589 a tabulation of the earnings of the Division as shown by the cash receipts turned over to the State Treasurer covering the fiscal years 1917 to 1946-47. Information is set forth indicating the ratio of income to expenditures. I would further point out that the cash receipts for the year ending June 30, 1947, totaled $75,185.06. While the Division was not created as a revenue-producing agency, I feel that the amount of revenue which has been produced is substantial. Over a period of twenty-nine years, the average annual net cost of the Division to the State is $39,060.67.

I feel that this report would be incomplete without a word of commendation for Frank E. Maimona, Principal Statistical Clerk, who has handled all of the detail contained in this report. Likewise, other members of the staff who have assisted in the work are entitled to special mention.

Respectfully submitted,

WALTER R. DARBY,
Director of Local Government.
