

## Important Notice of Caution To All Retail Licensees

For the first time, three columns of figures appear alongside of each listing in the Minimum Resale Price Publication. Because of the new 1942 Federal Tax Increase, it is deemed necessary to clearly set forth the exact tax increase affecting each individual item.

The last column, indicated by an arrow  $\blacktriangledown$  at the top of each page, contains the Minimum Resale Prices which are the combination of the base bottle price and the Federal Tax Increase. Prices shown in the last column are the prices enforced and protected by the Department of Alcoholic Beverage Control pursuant to Fair Trade Regulations No. 30.

You will note that in applying the Federal Tax to bottle prices, fractions up to and including one-half cent are absorbed by the retailer. Fractions over one-half cent are computed to the next highest cent and added to the whole tax of the bottle price.

BE CAUTIONED that in case lot purchases, the Minimum Resale Price shall be the sum of the single bottle price multiplied by the number of units per case and against which the permissible discount has been applied, plus the Federal Tax Increase for each individual bottle.
