#### About This Form

- See how much money's coming in (your income), how much money's going out (your expenses), and just exactly where your money's going.
- Keep track of your planned budget and the money you actually earn and spend.
- We've added some of the most common income and expense areas to the budgeting worksheet, but feel free to edit, delete, and add additional categories to the chart in order to

suit your unique financial picture!

- Simply add in your income and expenses and get an automatic and quick overview of your bottom line.
