Case Notes

New Jersey Department of Environmental Protection (NJDEP) had a sufficient factual basis to grant permits to fill approximately 7.69 acres of wetlands in connection with the Xanadu Redevelopment project, its determination that mitigation of traffic and air quality problems must be addressed in stages due to the nature of the project was not an arbitrary and capricious resolution, and development of the surrounding wetlands did not violate N.J.A.C. 7:7E-3.27(c)1 because there was little, if any, possible water dependent use for the property and no prudent or feasible alternative to developing the project on a non-wetlands site. However, the NJDEP process of reviewing future submissions for compliance with conditions contained in the approval failed to provide an adequate opportunity for public comment; therefore, the NJDEP was required to develop a system that ensures the opportunity for such comment. In re Stream Encroachment Permit, 402 N.J. Super. 587, 955 A.2d 964, 2008 N.J. Super. LEXIS 201 (App.Div. 2008).

Trial court properly reversed a township land use board's denial of a developer's application for a major subdivision development and ordered conditional subdivision approval subject to the issuance of necessary storm water and sewer disposal treatment permits and approval by the New Jersey Department of Environmental Protection (DEP), as those issues were under the jurisdiction of the DEP and, if the requisite permit was ultimately granted by the DEP, the interests of the township and its citizens would be protected. *Dowel Assocs. v. Harmony Twp. Land Use Bd.*, 403 N.J. Super. 1, 956 A.2d 349, 2008 N.J. Super. LEXIS 194 (App.Div. 2008).
