FREDERICK H. MADDEN
Acting Superintendent

Dear Reader:

New Jersey continues to rank as one of the safest states in the nation. There were 677 fatal crashes and 740 fatalities in 2001, the third lowest total since we started keeping records. The New Jersey State Police is committed in its effort, through enforcement and education of the motoring public, to reduce the number of people killed in motor vehicle accidents.

Our efforts in reducing motor vehicle deaths on our roadways must continue, as highway fatalities are still a leading cause of death in New Jersey and the nation. The nationwide death toll of 42,116 people represents an average of more than 115 deaths per day.

On the following pages you will find statistics of the fatal motor vehicle accident records compiled by the Fatal Accident Investigation Unit of the Division of State Police for 2001. This report constitutes a detailed look at the causes and results of fatal accidents throughout the state during 2001. Hopefully, the continued efforts and cooperation of the public, federal, state, and local agencies will help us maintain our traffic safety record in the years ahead.

Sincerely,

A handwritten signature in black ink that reads "Frederick H. Madden".

Acting Superintendent

Of this total, 590 were tested for alcohol and 150 were not tested. Of the 590 tested, 183 were positive for alcohol in varying degrees and 378 were negative. This indicates that 31.0% of the fatalities tested were positive for alcohol and 64.1% were negative. Twenty three drivers, three passengers, three pedestrians, and two pedalcyclist tested positive for drugs.

Note: One deceased driver tested positive for both alcohol and drugs and is counted in both totals.
Surviving: There were a total of 691 surviving drivers of which 200 were tested. Of those, 53 were positive and 135 were negative, indicating 26.5% had consumed an alcoholic beverage. Of the 53 imbibing drivers, 31 or 58.5% had an alcohol level of .10% or higher. Twelve surviving drivers tested positive for drugs.
- 2.) **Passengers:** There were a total of 168 passengers killed of which 103 were tested. Of those tested, 25 were positive and 75 negative, indicating 24.3% had consumed an alcoholic beverage. Three passengers tested positive for drugs.

The number of fatal accident victims with blood alcohol readings above .10% decreased from 153 in 2000 to 130 in 2001, a decrease of 15.0%. Deceased drivers with alcohol involvement showed a 14.3% decrease when compared to 2000. Of those drivers tested in each category, deceased drivers showed a decrease of 16.0% in the .10% and over category. Surviving drivers showed no change in the .10% and over category.
