REPORT

OF THE

STATE BOARD OF EDUCATION.

To the Honorable the Senate and General Assembly of the State of New Jersey :

The annual report of the State Board of Education is hereby presented for the school year ending August 31st, 1891, as required by law.

The report of the Department of Public Instruction, with the accompanying tables, transmitted herewith, gives full statistics of the work of the public schools for the past year.

The State Comptroller reported to the Board at a meeting held April 14th, 1891, the following apportionment of the State school tax among the counties for the year 1891-92:

Atlantic, \$24,203.37; Bergen, \$53,078.37; Burlington, \$75,120.17; Camden, \$86,421.78; Cape May, \$13,630.20; Cumberland, \$45,381.94; Essex, \$457,968.86; Gloucester, \$45,813.68; Hudson, \$384,535.98; Hunterdon, \$63,366.45; Mercer, \$123,460.50; Middlesex, \$77,027.38; Monmouth, \$120,695.56; Morris, \$67,284.25; Ocean, \$13,665.08; Passaic, \$118,653.52; Salem, \$47,001.93; Somerset, \$52,629.28; Sussex, \$30,789.51; Union, \$93,983.34; Warren, \$57,848.85.

The reserve fund, being ten per cent. of the amount of the State school tax, was apportioned among the counties as follows:

Atlantic, \$8,920.34; Bergen, \$5,307.84; Burlington, \$7,512.02; Camden, \$12,482.18; Cape May, \$1,363.02; Cumberland, \$8,128.19; Essex, \$43,404.82; Gloucester, \$4,581.37; Hudson, \$38,453.60; Hunterdon, \$766.64; Mercer, \$10,876.05; Middlesex, \$7,702.74; Monmouth, \$5,719.56; Morris, \$6,728.42; Ocean, \$8,976.51; Passaic, \$11,865.35; Salem, \$1,250.19; Sussex, \$6,033.95; Union, \$9,398.33; Warren, \$5,784.88.

The total amount expended for all school purposes was \$3,985,612.81. Of this amount, \$2,801,446.44 was expended for the current expenses of the schools, and \$996,898.65 for building and repairing school-houses. The balance, amounting to the sum of \$187,267.72, was the amount paid from the school fund for the following purposes: Office

expenses of the Department of Public Instruction, State Normal School, Farnum Preparatory School, School for Deaf-Mutes, School Libraries, Teachers' Institutes, expenses of this Board and expenses of the care of the school fund.

The total value of the school property in the State is \$9,098.576.

During the year the Board appointed the following County Superintendents:

Bergen, John Terhune, re-appointed; Essex, Merritt H. C. Vail, vice Charles M. Davis; Hudson, George C. Houghton, re-appointed; Hunterdon, Edward M. Heath, re-appointed; Passaic, Alexander Elliott, Jr., vice J. C. Cruikshank; Salem, Robert Gwynne, Jr., re-appointed.

LEON ABBETT,
President.

STATE OF NEW JERSEY,
DEPARTMENT OF PUBLIC INSTRUCTION,
TRENTON, September 1st, 1892. }

To the State Board of Education:

GENTLEMEN—In compliance with the direction of your honorable body, I herewith present the report of the Department of Public Instruction, with the statistical tables and the reports of the County and City Superintendents, for the school year ending August 31st, 1891.

J. BROGNARD BETTS.

ANNUAL REPORT.

The statistics exhibiting the working of our public school system, as submitted by the County and City Superintendents, show a very gratifying advance over last year, both in the permanent improvements made to the buildings and grounds and in the practical work of the school-room.

Thirty-two new buildings have been erected, or are in process of construction, and forty-nine have been enlarged or repaired. The total value of the school property in the State has increased over four hundred and fifty thousand dollars during the year. The amount expended for the permanent improvement of the school property was about nine hundred thousand dollars, of which amount one hundred and sixty thousand was raised by the sale of district school bonds. Some of the buildings for which appropriations were made were not completed at the time the reports were rendered, and therefore were not included in the valuation of the school property by the Superintendents. This, together with the decreased value of some of the school-houses, accounts for the difference between the amount expended during the year and the increase in the valuations.

There was a marked decrease in the number of male teachers employed last year; this decrease, however, is in the rural schools, where small salaries are paid. The total number of teachers was one hundred and fifty-two greater than last year. There is a gradual increase from year to year in the average salaries of primary teachers. School officers recognize the importance of the work of the lower grades, and the opinion formerly held by so many Trustees, that "anyone is good enough to teach the small children," is rapidly becoming a tradition. The gradual elevation of the standard of examinations is giving us a corps of teachers better equipped for the work of the school-room, and that, together with the influence of the State Reading Circle, leads to the hope that the day of the "school-keeper," has passed, never to return.

Manual training is looked upon with more favor each year as its meaning and the results attained by its use are more clearly understood. The very liberal provision made by the State for its introduction into the schools should induce all the larger districts to avail themselves of the law on this subject.

In the following table is given a summary of the more important statistics, compiled from the reports of school officers, and a comparison is made with similar statistics for the preceding year :

SUMMARY OF STATISTICS—Continued.

	1889-90.	1890-91.	Increase or decrease.
VALUATION OF SCHOOL PROPERTY.			
Number of buildings valued at \$100 or less.....	20	15	5 decrease.
Number valued between \$100 and \$500.....	214	198	16 decrease.
Number valued between \$500 and \$1,000.....	500	473	22 decrease.
Number valued between \$1,000 and \$5,000.....	576	599	23 increase.
Number valued between \$5,000 and \$10,000.....	105	126	21 increase.
Number valued between \$10,000 and \$20,000.....	87	83	4 decrease.
Number valued between \$20,000 and \$40,000.....	84	83	1 decrease.
Number valued above \$40,000.....	35	33	3 increase.
Average value.....	\$5,324 00	\$5,524 00	\$200 00 increase.
ATTENDANCE.			
Total school census between five and eighteen years of age.....	410,512	430,340	19,828 increase.
Total enrollment in the public schools.....	231,072	237,500	3,428 increase.
Number attending the public schools ten months.....	9,499	10,631	1,132 increase.
Number attending between eight and ten months.....	73,301	79,552	6,251 increase.
Number attending between six and eight months.....	44,866	44,060	806 decrease.
Number attending between four and six months.....	36,467	35,323	1,144 decrease.
Number attending less than four months.....	69,939	67,934	2,005 decrease.
Average attendance upon the public schools.....	133,286	146,763	13,477 increase.
Number of children the public schools will seat.....	223,946	227,402	3,476 increase.
Number attending private schools.....	47,279	54,865	7,586 increase.
Number attending no school.....	129,161	137,975	8,814 increase.
PERCENTAGE OF ATTENDANCE.			
Percentage attending ten months.....	.040	.045	.005 increase.
Percentage attending between eight and ten months.....	.313	.335	.022 increase.
Percentage attending between six and eight months.....	.192	.185	.007 decrease.
Percentage attending between four and six months.....	.156	.149	.007 decrease.
Percentage attending less than four months.....	.299	.286	.013 decrease.
Percentage of average attendance.....	.569	.617	.048 increase.
Percentage attending public schools.....	.575	.552	.023 decrease.
Percentage attending private schools.....	.116	.123	.012 increase.
Percentage attending no school.....	.309	.320	.011 increase.
Percentage of census the schools will accommodate.....	.545	.521	.024 decrease.
SCHOOL TERMS.			
Number of districts that maintained school less than six months.....	8	6	2 decrease.
Number that maintained school six months but less than nine months.....	42	49	7 increase.
Number that maintained school nine months or more....	1,333	1,331	2 decrease.
Average time the schools have been kept open.....	{ 9 months, 12 days.	{ 9 months, 10 days. }	2 days decrease.
DISTRICT SCHOOL CENSUS.			
Number of districts with less than forty-five children.....	214	243	29 increase.
Number having between forty-five and eighty children...	643	630	13 decrease.
Number having between eighty and one hundred and twenty children.....	222	209	13 decrease.
Number having between one hundred and twenty and two hundred children.....	121	126	5 increase.
Number having between two hundred and five hundred children.....	107	105	2 decrease.
Number having more than five hundred children.....	76	73	3 decrease.
Average number in the districts, excluding the cities.....	129	129
Average number in the districts, including the cities.....	297	310	13 increase.

SCHOOL REVENUES.

The school law provides that there shall be raised by State school tax a sum equal to \$5 for each child in the State between the ages of five and eighteen years. The amount received from this source for the year ending August 31st, last, was \$1,995,260. In addition to this there is annually appropriated from the income of the State school fund \$100,000, and these two amounts, with the moneys received from the interest of the surplus revenue fund, the township tax for school purposes and the local taxes raised for teachers' salaries and fuel, constitute the moneys available for the current expenses of the schools, and amounted to the sum of \$2,862,746.44. In addition to this, \$836,198.65 was raised by tax for building and repairing school-houses. As shown in the preceding table, there is a large increase in the amount of local school taxes ordered raised.

In Table IV. is shown the number of districts, by counties, that raised special taxes. The total number that raised local taxes for current expenses was 293, or about 21 per cent. of the school districts of the State. The number that raised local taxes for building or repairing purposes was 464, or about 33 per cent. Eight hundred and fifty-five districts, or nearly 62 per cent., failed to raise any district tax. In Hudson county all the districts, with one exception, raised local tax; the same is true of Union county. More than three-fourths of the districts in Bergen, Cape May and Essex counties and more than half of the districts in the counties of Camden, Gloucester and Passaic raised local taxes.

SCHOOL-HOUSES.

The constant improvement in the condition of the school-houses in the State is very marked, and great credit is due to the people for their liberality in providing the necessary means to put the school-houses in thorough order. The number of "poor" and "very poor" buildings is decreasing year by year; those that remain are in the sparsely-settled parts of the State, and where the people have not been in a financial condition to warrant the raising of a tax for a new building. The people in nearly all of these districts are willing to tax themselves for this purpose; but the failure of crops, &c., has made it impossible. In some of these districts steps are now being taken toward the building of modern houses. The number of buildings reported as "very poor" is 54, and the number as "poor" 86. The number of new buildings erected was 32, and the number enlarged, or that received substantial improvement, was 49. The total number of school-houses in the State is 1,669, an increase over last year of six. With the exception of 49 all the school-houses are

owned by the districts. The total value of the school property is \$9,098,576, an increase over last year of \$468,783.

In the following table is shown, by counties, the number of school-houses in the State having one room each, the number having two rooms and the number having more than two rooms :

COUNTIES.	One room.	Two rooms.	More than two rooms.
Atlantic.....	32	10	9
Bergen.....	33	18	3
Burlington.....	95	13	16
Camden.....	51	9	21
Cape May.....	20	8	3
Cumberland.....	50	19	18
Essex.....	11	13	69
Gloucester.....	49	18	5
Hudson.....	2	7	39
Hunterdon.....	92	7	11
Mercer.....	72	1	7
Middlesex.....	61	12	12
Monmouth.....	88	25	13
Morris.....	73	23	13
Ocean.....	42	7	6
Passaic.....	35	2	24
Salem.....	54	14	8
Somerset.....	62	6	4
Sussex.....	91	4	5
Union.....	8	4	27
Warren.....	82	4	9
Total.....	1,123	224	322

Twelve hundred and forty-one of the school-houses are constructed of wood, three hundred and forty-six of brick and eighty-two of stone. The majority of the stone houses are one-room buildings, in the northern part of the State. Only three hundred and twenty-one buildings are provided with any means of ventilation in addition to doors and windows. In Tables VII. and IX. full statistics concerning the condition of the school-houses are given by counties; in Tables VIII. and X. similar statistics are given for the cities.

SCHOOL FURNITURE AND APPARATUS.

The old-style desks and seats are gradually disappearing from our school buildings, but the number reported as still retaining old-style furniture—one hundred and eighty-one—is entirely too large. The importance of proper desks cannot be over-estimated, and it is hoped that the school officers in these districts will soon see the necessity of providing the children with new desks. Essex, Gloucester, Hudson,

Middlesex, Somerset and Union counties report all their schools as supplied with suitable desks.

It is impossible for the teachers to do satisfactory work without the use of dictionaries, gazetteers, globes, &c. The State provides a means, through the provisions of the law relating to school libraries, by which the districts can obtain these necessary aids with very little expense to the people, and it is to be regretted that more districts do not avail themselves of this means of providing the schools with proper reference books and apparatus. In Tables XI. and XII. will be found, for the counties and cities respectively, full statistics covering these items.

ACCOMMODATIONS.

The seating capacity of our school-houses is still very inadequate; in fact the number of children increases more rapidly than school accommodations are provided. Experience has shown that where there are sufficient desks about 60 per cent. of the children will attend the public schools. The seating capacity last year for the entire State was 52 per cent. If the accommodations were equally distributed throughout the State the lack of room would not be serious, but in some of the counties less than 40 per cent. of the school children can be accommodated. The rural districts, with very rare exceptions, provide for all the children that are likely to attend the schools, but the cities and large towns are in many cases sadly deficient in this respect. The seating capacity of the entire State has increased 2.4 per cent., while the school census has increased 4.8 per cent. during the year.

In the following table is shown the percentage of the census that the schools in the several counties have accommodated for the last three years:

Counties.	1890-91.	1889-90.	1888-89.
Sussex.....	.973	.958	.960
Salem.....	.894	.850	.834
Cape May.....	.885	.857	.913
Ocean.....	.874	.834	.877
Warren.....	.872	.872	.843
Atlantic.....	.862	.994	.765
Gloucester.....	.851	.813	.816
Monmouth.....	.832	.903	.844
Hunterdon.....	.830	.847	.819
Cumberland.....	.820	.782	.796
Burlington.....	.765	.791	.765
Somerset.....	.690	.707	.697
Morris.....	.661	.697	.712
Bergen.....	.652	.565	.643

Counties.	1890-91.	1889-90.	1888-89.
Middlesex.....	.600	.569	.531
Camden.....	.545	.571	.410
Mercer.....	.506	.486	.498
Union....	.491	.502	.493
Passaic.....	.478	.474	.467
Essex.....	.442	.446	.457
Hudson.....	.271	.292	.285

From the above it appears that the strictly rural counties are providing about the same percentage of accommodations from year to year, and that the counties which contain cities are those which have not kept pace in building school-houses with the increase in the number of their school children. Below is given the percentage of accommodations provided by the cities for the last three years :

Cities.	1890-91.	1889-90.	1888-89.
Salem.....	.906	.830	.827
Montclair.....	.829	.692	.659
Atlantic City.....	.809	.632	.625
Bloomfield.....	.788	.640	.668
Woodbury.....	.733	.719	.613
Millville.....	.698	.875	.806
Long Branch.....	.692	.847	.725
Lambertville.....	.634	.653	.654
Plainfield.....	.622	.613	.609
Phillipsburg.....	.612	.608	.565
Rahway.....	.603	.614	.660
Princeton.....	.593	.593	.572
East Orange.....	.592	.640	.664
Bridgeton.....	.577	.607	.639
Burlington.....	.574	.546	.537
Passaic.....	.510	.593	.478
Bordentown.....	.502	.512	.508
Camden.....	.486	.497	.309
New Brunswick.....	.482	.414	.490
Perth Amboy.....	.479	.461	.283
Bayonne.....	.466	.504	.500
Paterson.....	.447	.452	.434
Trenton.....	.440	.429	.425
Dover.....	.439	.395	.580
Morristown.....	.401	.414	.439
Newark.....	.398	.407	.423
Gloucester City.....	.377	.385	.404
Elizabeth.....	.372	.360	.331
Orange.....	.347	.340	.295
Hoboken.....	.287	.312	.332
Jersey City.....	.234	.236	.256

In fourteen of the cities it appears that accommodations are provided for less than half the school census. The lack of sufficient seating capacity is met in some of the cities by providing for half-day sessions in the primary grades. The following table shows the percentage of the census the schools in the cities will accommodate, the percentage enrolled in the public schools, the percentage attending private schools and the percentage attending no school during the year:

CITIES.	Percentage of the school census the schools will accommodate.	Percentage of the school census enrolled in the public schools.	Percentage of the school census attending private schools.	Percentage of the school census attending no school.
Atlantic City.....	.809	.644	.096	.260
Bayonne.....	.466	.605	.023	.367
Bloomfield.....	.788	.567	.104	.329
Bordentown.....	.502	.445	.281	.274
Bridgeton.....	.577	.613	.055	.332
Burlington.....	.574	.625	.050	.325
Camden.....	.486	.606	.082	.312
Dover.....	.439	.710	.100	.190
East Orange.....	.592	.670	.176	.154
Elizabeth.....	.372	.486	.233	.281
Gloucester City.....	.377	.513	.169	.318
Hoboken.....	.257	.377	.456	.137
Jersey City.....	.234	.298	.093	.609
Lambertville.....	.634	.507	.240	.253
Long Branch.....	.692	.649	.025	.326
Millville.....	.698	.723	.041	.236
Montclair.....	.829	.745	.137	.118
Morristown.....	.401	.440	.326	.234
Newark.....	.398	.448	.173	.379
New Brunswick.....	.482	.457	.288	.255
Orange.....	.347	.343	.308	.344
Passaic.....	.510	.616	.162	.222
Paterson.....	.447	.570	.116	.314
Perth Amboy.....	.479	.538	.206	.256
Phillipsburg.....	.612	.605	.142	.253
Plainfield.....	.622	.592	.192	.216
Princeton.....	.593	.546	.175	.279
Rahway.....	.603	.624	.055	.321
Salem.....	.906	.731	.090	.179
Trenton.....	.440	.479	.157	.364
Woodbury.....	.733	.778	.114	.108

The above shows that in Atlantic City, Bloomfield, Bordentown, Lambertville, Long Branch, Montclair, New Brunswick, Plainfield, Princeton and Salem the seating capacity of the schools is in excess of the enrollment, also that in Bayonne, Camden, Dover, Elizabeth, Hoboken, Jersey City, Newark, Passaic, Paterson and Perth Amboy the enrollment is so very much in excess of the seating capacity as to seriously overcrowd some of the rooms. This overcrowding is mostly in the lower grades. No teacher should be compelled to take charge of more than sixty pupils, but if we place the maximum at eighty we still find a large number of rooms overcrowded. The number of

rooms in the cities having more than eighty pupils each is shown below:

CITIES.	Number of rooms having from 80 to 90 children.	Number of rooms having from 90 to 100 children.	Number of rooms having from 100 to 110 children.	Number of rooms having from 110 to 120 children.	Number of rooms having over 120 children.
Bayonne.....		1			
Burlington.....	3				
Camden.....	2			1	
Dover.....	1				
Elizabeth.....	1	2			1
Gloucester City.....	1				
Hoboken.....	1				2
Jersey City.....	3	1	1		4
Newark.....	1				
Passaic.....	3				4
Paterson.....	3				
Perth Amboy.....	1				
Total.....	18	4	2	1	11

In the districts outside of the cities the following report an enrollment of over eighty pupils each :

Counties.	Number of district.	Average number enrolled in a single room.
Bergen.....	42	87
Burlington.....	35	88
Camden.....	15	85
Hudson.....	8	95
Hudson.....	11	82
Middlesex.....	31	82
Monmouth.....	80 $\frac{1}{2}$	85
Morris.....	9	90
Morris.....	37	85
Union.....	10	94

SCHOOL CENSUS.

The school census has increased 19,828, or 4.8 per cent. Some of the rural counties report a decrease in the census. In the following table is shown the percentage of increase or decrease in the several counties for the last three years :

SCHOOL REPORT.

Counties.	Increase.			Decrease.		
	1890-91.	1889-90.	1888-89.	1890-91.	1889-90.	1888-89.

Sussex001	.006	.01
Union046	.01	.017
Warren002003014

Nine counties report a decrease in the number of children. The large decrease in Burlington was caused by the action of the Legislature of last Winter in setting Little Egg Harbor township from this county to Ocean. Hunterdon, Morris, Somerset and Sussex are steadily decreasing. The decrease reported by Cape May and Gloucester can only be accounted for by carelessness on the part of the census-takers. The figures for Camden county are quite remarkable. In 1888-89 an *increase* of 6.7 per cent. was reported; the following year a *decrease* was reported of only one-tenth of 1 per cent. less than the increase reported the preceding year, and this year there is an increase of double the amount of that of two years ago. Below similar statistics are given for the cities:

Cities.	Increase.			Decrease.

The above shows an increase in the census in all the cities of the State, with the exception of Burlington, New Brunswick, Paterson, Phillipsburg and Princeton. The last named reports the same number of children as the previous year. The percentage of increase ranges from a half of 1 per cent. in Trenton to 16½ per cent. in Camden.

SCHOOL DISTRICTS.

The total number of school districts in the State is 1,386, an increase of three over last year. The number of districts reporting a census of less than 45 children each is 243, an increase of 29; the number having from 45 to 80 each is 630, a decrease of 13; the

number having from 80 to 120 each is 209, a decrease of thirteen; the number having from 120 to 200 each is 126, an increase of 5; the number having from 200 to 500 each is 105, a decrease of 2, and the number having over 500 each is 73, a decrease of 3. Nearly two-thirds of the districts have less than 80 children each. It is impossible, on account of the large area of most of these districts to consolidate and make numerically strong districts. In many of them the census is constantly decreasing, and every year the number reported as having less than 45 children is larger than the previous year. As these districts receive from the State only \$275 each, it is almost impossible for them to maintain their schools in a satisfactory condition without local tax. Some of them are able to raise such a tax and their schools do not suffer. In others, however, the people are not in a condition to stand any extra burden and are compelled to depend entirely on the State tax. It is hoped that in the near future some action may be taken which will provide the children with school-houses as conveniently situated as at present, and at the same time allow such an apportionment of the State school moneys as will give to these districts sufficient funds to enable them to maintain their schools the time required by law. In Table III. the districts are grouped according to size for the several counties. In the same table is given the number of visits made to the schools by the County Superintendents. The total number of visits in the State was 5,267, an average of three and eight-tenths visits for each district.

ATTENDANCE OF PUPILS.

Two hundred and thirty-seven thousand five hundred children were enrolled in the public schools last year. Of this number, 10,631 attended over ten months; 79,552 between eight and ten months; 44,060 between six and eight months; 35,323 between four and six months, and 67,934 less than four months. The average daily attendance was 146,763. The percentage of the census enrolled in the public schools was 55.2, a decrease of 2.3 per cent. The percentage of the enrollment attending over eight months was 38, an increase of 2.7 per cent. The percentage of average attendance was 61.7, an increase of 4.8 per cent. Fifty-four thousand eight hundred and sixty-five children between the ages of 5 and 18 years attended private schools, an increase of 7,586. One hundred and thirty-seven thousand nine hundred and seventy-five children, or 32 per cent. of the entire number, are reported as not having attended school during the year, an increase of 1.1 per cent. A large proportion of those not attending school are under 7 years of age, and considered by their parents as too young, or they are over 16 years of age and have been compelled to leave school in order to support themselves. Of the remainder a large number would be in the schools if they could be

accommodated, but there are many who could and should attend school at least a portion of the year. The law provides for truant officers, but makes no provision for their payment except in cities, and it should be amended in this respect in order that the rural districts may be enabled to enforce the law and compel the attendance of the children. In Tables I. and II. will be found the record of attendance for the counties and cities respectively. Tables V. and VI. show the percentage of attendance.

THE SCHOOL TERM.

The law requires that the schools shall be kept open nine months, and provides that the districts which fail to comply with the law in this regard shall, unless for good cause shown, be deprived of the State school moneys. The average time the schools were kept open was 9.2 months. The average in Hudson county was 10.2 months; in Bergen, 10.1 months; in Mercer, 10 months; in Essex, Hunterdon, Somerset and Union, 9.9 months; in Passaic, 9.8 months; in Morris, 9.7 months; in Camden and Warren, 9.6 months; in Gloucester, Monmouth, Salem and Sussex, 9.5 months; in Burlington and Cumberland, 9.2 months; in Middlesex 9 months; in Atlantic, 8.8 months; in Ocean, 8.7 months, and in Cape May, 8.6 months. In Table IV. will be found, by counties, the number of districts that maintained school less than six months, between six and nine months and over nine months. Those that kept their schools open less than six months were either new districts or districts in which new school-houses were being erected and not completed in time to enable the Trustees to open the schools early in the year. All the cities maintained school ten months or more, except Atlantic City, where the schools were closed at the end of nine and a half months.

REGULARITY AND PUNCTUALITY OF PUPILS.

The percentage of absenteeism per day for each room was 16.6 per cent. There is a steady improvement in this respect, but the percentage is still too great. Union county has the best record, the percentage being less than 3 per cent. Salem stands next, with a percentage of less than 7 per cent. The other counties reporting an average percentage of absenteeism per room of less than 10 per cent. are Hudson, Passaic and Middlesex. Below are given the statistics for the several counties.

COUNTIES.	Average enrollment in each room.	Average daily attendance.	Average number of cases of tardiness per day for each room.	Average percentage of absenteeism.
Atlantic.....	40	35	.54	.125
Bergen.....	38	33	.98	.132
Burlington.....	32	26	1.30	.187
Camden.....	39	33	.87	.154
Cape May.....	35	29	1.09	.171
Cumberland.....	37	33	1.10	.108
Essex.....	39	33	.60	.154
Gloucester.....	32	28	1.50	.122

Union.....	37	36	1.10	.027
Warren.....	38	35	.61	.079
Total.....	36	30	.97	.166

As regards punctuality in attendance, Morris and Middlesex make the best showing, there being only about one case of tardiness for every second day. In the following table similar statistics are given for the cities. It will be observed that the average percentage of absenteeism for the cities is slightly larger than that for the entire State, and also that the average number of cases of tardiness per day is slightly less. New Brunswick heads the list, there being only about one case of tardiness per month for each room :

COST OF EDUCATION.

The average cost per child of maintaining the schools has been calculated on the total school census, on the total enrollment and on the average daily attendance. The cost per child, based on the total school census, was \$6.85, an increase of 28 cents; based on the total enrollment, the average cost was \$12.41, an increase of 89 cents, and based on the average attendance, \$20.09, a decrease of 14 cents. The cost per child, calculated on the total census, was lowest in Hudson, being \$4.62, and highest in Bergen, \$8.91. Calculated on the total enrollment and average attendance, Ocean county is the lowest, the figures, respectively, being \$7.60 and \$14.08. Essex county is the highest in both, reporting an average cost in the former of \$16.68 and in the latter of \$23.92. Below are given the figures for the several counties:

COUNTIES.	Per capita expense on total school census.	Per capita expense on enrolled attendance.	Per capita expense on average attendance.
Atlantic.....	\$3 00	\$10 54	\$14 36
Bergen.....	8 91	11 39	21 98

In Table XIX. will be found a classified statement of the expenses incurred in the cities in maintaining their schools.

TEACHERS AND SALARIES.

The total number of teachers employed was 4,617. Of this number, 760 were men and 3,857 were women. The increase in the number of teachers is 152, or about 3.4 per cent.

It is very difficult to show by statistics the efficiency of the work performed by the teachers. The tables given below, however, showing the number of teachers making use of text-books to an undue extent in hearing recitations, the average number of studies pursued in the schools and the average number of recitations heard daily, will enable us to form an approximate idea of the character of the work being done. It appears that in the entire State 513 teachers make too free a use of text-books during recitations. This

is an increase over last year of forty-three, which is due largely to a more rigid marking on the part of the Superintendents.

COUNTIES.	Number of teachers too closely confined to text-books in hearing recitations.	Number of teachers not too closely confined to text-books in hearing recitations.	Average number of studies pursued in the schools.	Average number of recitations heard daily.

Warren.....	3 71			30

There was a decrease in the salaries paid to male teachers in Burlington, Cape May, Gloucester, Mercer, Ocean and Somerset counties, and in the salaries of female teachers in Atlantic, Essex, Middlesex, Ocean and Warren counties. In the cities, as shown below, there was a decrease in the salaries paid male teachers in Atlantic City, Burlington, Long Branch, Perth Amboy, Phillipsburg and Plainfield, and in the salaries paid female teachers in Elizabeth, Lambertville, New Brunswick, Perth Amboy, Phillipsburg, Rahway and Woodbury. This decrease is more apparent than real. In very few cases have the salaries of teachers been reduced, but the employment of new teachers for the primary schools at lower salaries reduces the average.

Essex county paid the highest average salaries to both male and female teachers—\$146.93 and \$55.27 respectively; Ocean county paid the lowest average to both male and female teachers—\$43.25 and \$32.68. Among the cities, Montclair paid the highest average salary to male teachers—\$183.33—and Plainfield the highest to females—\$77.50. The lowest to males was \$57.50, in Plainfield, and to females \$34, in Princeton. In Tables I. and II. will be found the average monthly salaries for the counties and cities.

TEACHERS' CERTIFICATES.

The State Board of Examiners issued during the year thirty-four first grade State certificates, twenty-four second grade and fourteen third grade. Of the thirty-five first grade certificates issued, fifteen were to teachers who passed the required examination, and twenty were issued under the rule of the Board to Principals of graded schools who had an experience of ten years as Principals. Of the

thirty-eight second and third grade certificates issued, ten were renewals of certificates previously issued to graduates of our State Normal School.

The County Superintendents issued 1,738 certificates. One hundred and thirty-three were of the first grade, 355 of the second grade and 1,250 of the third grade. Full statistics for each county are given in Table XX.

In the following table is presented the grades of certificates held by the teachers in the several counties :

COUNTIES.	STATE CERTIFICATES.			COUNTY CERTIFICATES.			CITY CERTIFICATES.			Special certificates.
	First grade.	Second grade.	Third grade.	First grade.	Second grade.	Third grade.	First grade.	Second grade.	Third grade.

The average time the teachers remain in the same school is five years and one month, an increase over last year of two months. The counties in which this average is exceeded are Camden, Cumberland, Essex, Hudson, Mercer, Middlesex, Salem, Union and Warren. About 28 per cent. of the teachers have been in their present positions one year or less, about 34 per cent. between one and five years, about 18 per cent. between five and ten years, about 8 per cent. between ten and fifteen years, about 6 per cent. between fifteen and twenty years, about 3 per cent. between twenty and twenty-five years and about 2 per cent. over twenty-five years.

For the cities alone the record is still better, the average ranging from three years and four months in Dover to fifteen years and three months in Gloucester City. The average for all the cities is eight years. Bayonne, Bridgeton, Burlington, Elizabeth, Gloucester City, Hoboken, Jersey City, Lambertville, Newark, New Brunswick, Orange, Phillipsburg, Princeton, Rahway and Trenton exceed this average and Bordentown just equals it. The number of teachers in

the cities who have been in their present schools one year or less is about 15 per cent. of the total number; between one and five years, about 30 per cent.; between five and ten years, about 24 per cent.; between ten and fifteen years, about 13 per cent.; between fifteen and twenty years, about 10 per cent.; between twenty and twenty-five years, about 5 per cent., and over twenty-five years, about 3 per cent.

Total.....	594	1,475	1,145	622	377	193	154	8

It appears from the above that the average experience of our teachers is eight years. This average is exceeded in the counties of Bergen, Burlington, Camden, Cape May, Cumberland, Essex, Hudson, Hunterdon, Mercer, Salem and Union. Thirteen per cent. of the teachers have an experience of one year or less ; 32 per cent. an experience between one and five years ; 25 per cent. between five and ten years ; 14 per cent. between ten and fifteen years ; 8 per cent. between fifteen and twenty years ; 4 per cent. between twenty and twenty-five years, and 4 per cent. over twenty-five years. In the cities the average is nine years and eight months. Bloomfield, Bordentown, Bridgeton, East Orange, Elizabeth, Gloucester City, Hoboken, Jersey City, Lambertville, Montclair, Newark, New Brunswick, Princeton, Rahway, Salem and Trenton exceed this average and Camden equals it. The range is from six years and nine months in Morristown and Passaic, to sixteen years and three months in Princeton.

Ten per cent. of the teachers in the cities have an experience of one year or less; 28 per cent. an experience between one and five years; 24 per cent. between five and ten years; 16 per cent. between ten and fifteen years; 11 per cent. between fifteen and twenty years; 6 per cent. between twenty and twenty-five years and 5 per cent. over twenty-five years.

DISTRICT SCHOOL LIBRARIES.

The following schools have established or added to their free school libraries during the year:

Atlantic county, first application, Nos. 30 and 48 (Middle Road, Lake Road and Union Road Schools); third application, No. 3; fourth application, Nos. 20 and 47; fifth application, No. 19; sixth application, Nos. 1 (Texas Avenue School) and 48 (Central School); eighth application, Nos. 1 (New Jersey Avenue and Indiana Avenue Schools), 17 and 38; ninth application, No. 18; tenth application,

No. 48 (Main Road School); eleventh application, No. 1 (Pennsylvania Avenue School); twelfth application, No. 16; thirteenth application, No. 15.

Bergen county, first application, Nos. 52 and 59; second application, Nos. 11, 16, 17, 18, 20 and 44; third application, Nos. 1, 22, 23 and 39 (School No. 1); fourth application, No. 61; fifth application, Nos. 25, 33 and 57; sixth application, No. 21 $\frac{1}{2}$; eighth application, No. 39 (School No. 1); ninth application, No. 12; eleventh application, No. 40; twelfth application, No. 45; eighteenth application, No. 37.

Burlington county, first application, No. 6; second application, Nos. 32 and 112; third application, No. 22; fourth application, No. 82; fifth application, No. 52.

Camden county, first application, Nos. 1 (Linden School), 3 (Delair School) and 4 (School No. 5); second application, Nos. 1 (Cooper Grammar, E. T. Evered, Liberty, Ferry Avenue, J. W. Mickle, Mt. Vernon, Kaighn Avenue, I. S. Mulford, Richard Felter, Central, E. A. Stevens, Broadway and Northeast Schools), 3 (Pensauken and Sordentown Schools), 15 and 20; third application, No. 7; fourth application, Nos. 1 (George Genge School), 8 and 13; ninth application, No. 26; thirteenth application, No. 21.

Cape May county, second application, No. 14; third application, Nos. 1 and 29; fourth application, No. 27; seventh application, No. 26.

Cumberland county, first application, No. 58; second application, Nos. 18, 22 (School No. 1) and 39; fifth application, No. 13.

Essex county, first application, Nos. 16 and 43 (Normal and Roseville Avenue Schools); second application, Nos. 4 (School No. 3), 43 (South Tenth Street and Eighteenth Avenue Schools) and 44 (School No. 5); third application, Nos. 4 (School No. 2) and 43 (Wickliffe Street School); fourth application, Nos. 14, 42 and 43 (Hamburg Place, Camden Street and Summer Avenue Schools); fifth application, No. 41; sixth application, Nos. 6, 7 (Center Primary School), 28 and 43; (Miller Street and Burnet Street Schools); Seventh application, No. 43 (Walnut Street School); eighth application, Nos. 26 and 43 (Oliver Street School); ninth application, No. 44 (School No. 3); tenth application, Nos. 7 (Berkeley and Brookside Schools) and 43 (Webster Street School); eleventh application, Nos. 43 (Central Avenue School) and 44 (School No. 2); twelfth application, Nos. 27 and 44 (School No. 1); thirteenth application, Nos. 4 (School No. 1) and 20; fourteenth application, No. 7 (Center Grammar School).

Gloucester county, first application, No. 24; second application, Nos. 43 (School No. 2); third application, Nos. 28 and 58; fourth application, No. 45; seventh application, Nos. 31, 43 (School No. 1) and 54; eighth application, No. 16.

Hudson county, first application, No. 16; second application, Nos. 13 (Schools Nos. 2, 3, 4, 6 and 11, Female) and 15 (School No. 3); fifth application, Nos. 6 and 13 (School No. 20); sixth applica-

tion, No. 13 (Schools Nos. 8 and 11, Male); eighth application, No. 13 (School No. 12); tenth application, No. 13 (School No. 14); twelfth application, No. 13 (School No. 7).

Hunterdon county, first application, Nos. 19, 50, 77 and 109; second application, Nos. 28, 54 and 56; third application, No. 74; fourth application, Nos. 12, 43, 98 and 108 (School No. 1); fifth application, No. 9; seventh application, No. 13; twelfth application, No. 67.

Mercer county, first application, Nos. 19 (Market Street and Charles Skelton Schools) and 49; second application, Nos. 10 and 39 (School No. 1); third application, No. 44; fourth application, Nos. 3, 19 (High School) and 30; eighth application, No. 52.

Middlesex county, first application, No. 49; second application, Nos. 42, 66, 70, 75 and 77; fourth application, No. 55; fifth application, Nos. 24, 37 and 76; ninth application, No. 38; eleventh application, No. 39.

Monmouth county, first application, No. 63; second application, Nos. 60, 87, 90 $\frac{1}{2}$ (Schools Nos. 1, 2 and 3); third application, Nos. 7 (School No. 2) and 72; fourth application, Nos. 25 and 51; fifth application, Nos. 7 (School No. 1), 48, 75 (School No. 2) and 85 (School No. 2); sixth application, No. 85 (High School); eighth application, No. 38; eleventh application, No. 75 (School No. 1); twelfth application, No. 49.

Morris county, second application, Nos. 37 and 64; third application, No. 108; fourth application, Nos. 66, 95 (School No. 2) and 97; fifth application, No. 95 (School No. 1); sixth application, Nos. 1 and 87; seventh application, Nos. 44 and 74; eleventh application, No. 79; twentieth application, No. 82.

Ocean county, second application, Nos. 1 and 14; fifth application, No. 23.

Passaic county, first application, Nos. 11 and 37; second application, No. 1; fourth application, Nos. 23 and 35 (School No. 11); fifth application, No. 3; seventh application, Nos. 2 and 35 (High School); tenth application, No. 35 (School No. 10).

Salem county, first application, Nos. 1 (East Ward Intermediate, East Ward Primary and West Ward Primary Schools), 48, 57 and 64; second application, No. 21; third application, No. 26 (School No. 1).

Somerset county, first application, Nos. 36 and 54; second application, Nos. 16, 62 and 69; third application, Nos. 1, 25 and 44; fifth application, Nos. 7, 22 and 28 (Schools Nos. 1 and 2); seventh application, No. 12; ninth application, No. 11; eleventh application, No. 36; twelfth application, No. 38.

Sussex county, first application, No. 40; second application, Nos. 28 and 100; fourth application, No. 43; sixth application, No. 116.

Union county, first application, No. 5 (School No. 6); second application, No. 5 (School No. 5); fifth application, Nos. 5 (Battin

High School and School No. 3) and 29; sixth application, No. 5 (School No. 4); seventh application, No. 15; ninth application, Nos. 4 and 5 (School No. 2); tenth application, No. 5 (School No. 1); eleventh application, Nos. 14 and 27; fifteenth application, No. 18.

Warren county, first application No. 36; fourth application, No. 73; fifth application, No. 86; seventh application, Nos. 32 and 50.

The number of first applications made during the year was thirty-six, a decrease of four; of second applications sixty-six, an increase of twenty-seven; of third applications twenty-two, a decrease of eleven; of fourth applications thirty-one, an increase of eight; of fifth applications thirty, an increase of thirteen; of sixth applications fifteen, a decrease of three; of seventh applications fourteen, the same as last year; of eighth applications eleven, a decrease of three; of ninth applications eight, a decrease of one; of tenth applications seven, the same as last year; of eleventh applications ten, a decrease of one; of twelfth applications eight, an increase of three; of thirteenth applications four, an increase of two; of fourteenth applications one, a decrease of two; of fifteenth applications one, an increase of one; of seventeenth applications none, a decrease of one; of eighteenth applications one, an increase of one; of nineteenth applications none, a decrease of one; of twentieth applications one, an increase of one. The total number for the year was two hundred and sixty-six, an increase of thirty-one.

One thousand and ten schools have established school libraries, an increase of thirty-six; three hundred and thirty-five have made the first application, a decrease of twenty-nine; two hundred and twenty-eight have made the second application, an increase of thirty-nine; one hundred and twenty-one have made the third application, a decrease of five; eighty-seven have made the fourth application, an increase of seven; seventy have made the fifth application, an increase of eight; forty-four have made the sixth application, an increase of nine; thirty-four have made the seventh application, a decrease of two; twenty-six have made the eighth application, an increase of one; eighteen have made the ninth application, an increase of one; ten have made the tenth application, a decrease of three; fourteen have made the eleventh application, an increase of one; eleven have made the twelfth application, an increase of six; four have made the thirteenth application, an increase of two; four have made the fourteenth application, an increase of one; one has made the fifteenth application, an increase of one; one has made the sixteenth application, the same as last year; one has made the eighteenth application, an increase of one; one has made the twentieth application, an increase of one. The total number of payments made is three thousand two hundred and seventy-eight, an increase of two hundred and fifty-three.

EVENING SCHOOLS.

Ten cities maintained evening schools; Paterson has been added to the list, and Elizabeth and Plainfield have been dropped. The total number of evenings the schools were maintained decreased thirty-three; the total number of pupils enrolled increased six thousand two hundred and seventy-nine; the average enrollment increased one thousand and thirty-nine; the number of teachers increased eighty-nine; the average weekly salary paid the teachers decreased \$2.84 and the total amount expended increased \$5,955.89.

The statistics for the cities maintaining evening schools are given below :

CITIES.	Number of evenings the schools have been kept open.	Number enrolled.	Average evening attendance.	Number of teachers.	Average salary per week to teachers.	Total appropriation for evening schools.

AGES OF SCHOOL CHILDREN.

In Tables XIII., XIV., XV. and XVI. are given the number of children in the counties and cities respectively, according to ages, and the percentage of ages on the total school census. In Tables XVII. and XVIII. the ages of the children enrolled in the city schools and the percentage of each age are given.

Nearly 33 per cent. of the children under six years of age were enrolled in the schools of the cities; 59 per cent. of those between six and seven; 56 per cent. of those between seven and eight; 51 per cent. of those between eight and nine; 61 per cent. of those between nine and ten; 62 per cent. of those between ten and eleven; 63 per cent. of those between eleven and twelve; 57 per cent. of those between twelve and thirteen; 50 per cent. of those between thirteen and fourteen; 34 per cent. of those between fourteen and fifteen; 20 per cent. of those between fifteen and sixteen; 11 per cent. of those between sixteen and seventeen and 6 per cent. of those between seventeen and eighteen.

APPORTIONMENT OF RESERVE FUND.

The State Board of Education apportioned the reserve fund, which is 10 per centum of the total amount of the State school tax, among the counties as follows :

REPORT OF SUPERINTENDENT.

43

APPORTIONMENT OF RESERVE FUND FOR THE YEAR 1891-92.

INDUSTRIAL AND MANUAL TRAINING.

Under the law providing for industrial or technical schools, under boards of trustees separate and distinct from the public school boards, schools have been established in Hoboken and Newark, the former in 1888 and the latter in 1885. In the appendix to this report will be found full reports concerning the management and progress of these schools.

In addition to the law referred to above is an act which provides for the maintaining a course of manual training in the public schools, and grants aid from the State school fund for that purpose. Under the provisions of this law, manual training has been added to the course of study in the following schools: Montclair, Morristown, Orange, Paterson and Vineland in 1888; in the town of Union in 1889, and in Garfield, Passaic, South Orange and Weehawken in 1890. Reports of the manual training departments of these schools will be found in the appendix.

DISTRICT INDEBTEDNESS.

The amount of funded debt of the school districts in the State September 1st, 1890, was \$1,142,112.16. During the year debts to the amount of \$160,700 were incurred and \$99,249.16 paid off, leaving the amount of debt August 31st, 1891, \$1,203,563; a net increase during the year of \$61,450.80. In the following table is shown the debts of the several districts in the State. This does not include the cities, as the bonds issued in municipalities are general city bonds, and not special school bonds, and it is, therefore, impossible to ascertain, with any degree of accuracy, what portion of the city bonds were issued for school purposes.

APPENDIX.

REPORTS OF COUNTY SUPERINTENDENTS.

ATLANTIC COUNTY.

S. R. MORSE, SUPERINTENDENT.

To E. O. Chapman, State Superintendent :

I have the honor to present my fourteenth annual report of the progress and condition of the public schools of Atlantic county for the year ending August 31st, 1891.

SCHOOL CENSUS.

There has been some increase in the number of children in the county during the past year. My last report records 6,826, while this year there are 6,938, an increase of 112. Last year there were 5,012 enrolled on the registers and this year 5,269, an increase of only 257, while the general average of attendance shows an increase of 764 over last year, which I consider a good showing.

The average time the schools have been kept open has increased from 8.89 to 8.95. Quite a number of students over 18 years of age have been in attendance who are not included in the above report.

FINANCIAL.

There was received last year from the State and other sources, for teachers' salaries and fuel, \$51,516.38, this year, \$56,312.23, an increase of \$4,795.85; for building, repairing, &c., last year, \$10,920.10, this year, \$21,495.84, an increase of \$10,575.74, which is almost double, and shows a grand total this year of \$77,808.07, against \$62,940.48 of last year. Of this amount, \$71,178.30 was expended, leaving a balance of only \$6,629.77, of which Atlantic City has about one-half.

SCHOOL-HOUSES.

The valuation of school property has increased from \$170,950 to \$191,300, an increase of \$20,350.

SALARIES.

The average salary per month for male teachers has been \$66.26, an increase of \$7.26, while that of the female teachers has been \$42.78, a decrease of 88 cents per month, caused by employing assistants in some of our small schools at a small salary.

TEACHERS.

There have been employed during the year 25 male and 80 female teachers, a total of 105 teachers.

NEW SCHOOL-HOUSES AND REPAIRS.

District No. 1, Atlantic City, has voted \$20,000, with only one vote in opposition, to build 12 new rooms, 4 each on the Texas avenue, Indiana avenue and New Jersey avenue school buildings, which have been completed, and all occupied excepting two.

No. 48, Hammonton, has voted to build an eight-room brick house, to cost \$18,000, which when completed will be one of the best buildings in South Jersey.

No. 12, Absecon, has done what I have been trying to accomplish for the past fourteen years, voted to build a new school-house of two rooms. The work has been commenced, and the good people of Absecon, as well as Hammonton, are to be congratulated.

There are still a few districts in which new buildings are needed, and I hope in the next report some of these will be added to the list.

REPAIRS.

Numbers 3, 4, 5, 8, 11, 15, 16 have made some needed repairs, No. 28 having new seats put into a newly-painted room. Thus, the most of the buildings are in good condition.

NEW BUILDINGS NEEDED.

New buildings are sadly needed in No. 14, South Absecon; No. 24, Estellville; No. 27, Head of River, and No. 40, Carmantown. I

trust it will not be long before these districts will have buildings suitable for the children.

TEXT-BOOKS.

I continue to urge the adoption of free text-books. Two more districts, 17 and 20, have been added to the honor-roll by voting free books, and they will never go back to the old method, which is so expensive and unsatisfactory. There are a few more who should come over to the right side.

TEACHERS' EXAMINATIONS.

I have held four quarterly examinations during the year, assisted by W. B. Matthews, of Hammonton, and H. C. Krebs, of Egg Harbor City. There have been 102 applicants for certificates during the year, and 65 certificates granted. Of this number 14 have been granted to males, and 51 to females. There have been 8 first grades, 18 second grades and 39 third grades granted. There have been 37 applicants rejected, 7 males and 30 females. The following received first grades :

	General Average.
Bessie B. Warwick	82 $\frac{5}{16}$
Charles W. Ingersoll	82 $\frac{1}{16}$
Louise Pinchon	79 $\frac{1}{16}$
Elijah D. Riley	89 $\frac{1}{16}$
Helen G. Smith	81 $\frac{7}{16}$
Charles B. Boyer	90 $\frac{4}{16}$
Albert Conover	82 $\frac{9}{16}$
Medora Risley	83 $\frac{5}{16}$

ARBOR DAY AND NATIONAL DAY.

As last year, Arbor and National exercises were observed on the same day. I find that this plan works well. Reports are made to me from each school concerning the programme of the day.

NORMAL CLASS OR TRAINING SCHOOL.

I have formed a class for teachers and those intending to become teachers. My aim is to make this of so much importance and interest that all teachers in our county will feel that they must attend. The best methods will be taken up, discussed and explained. Much good is expected to come from this.

TEACHERS' INSTITUTE.

The Union Teachers' Institute of Camden, Gloucester, Salem and Atlantic counties was held in the Opera House, Atlantic City, October 29th, 30th and 31st. It was a grand success from every standpoint. All agreed it was the best we ever had. The instructors were Mrs. M. E. Monroe, of Philadelphia; Dr. Edward Brooks, of Philadelphia; Prof. Woodhull, of New York City; Prof. Russel, of Boston, on music; Prof. Frye, of Boston, on geography; Principal Green, of the State Normal School, and our ever-welcome friend, Prof. Austin Apgar, of the State Normal School, and Miss Linda Lister, of Egg Harbor City, on drawing.

There was not a poor thing given to the institute—everything was good.

All of the teachers seemed to enjoy the work, and I know that a great deal of good has resulted from it in my county.

VISITS.

I have made during the year 307 school visits, which is more than usual, and has taken the greater part of my time while the schools have been in session. I have found on the whole good work being done. No notice of my visit is given to the teacher. I wish to find the schools just as they are in their every-day dress. All good teachers are glad to have me visit them.

COURSE OF STUDY.

Commencement.

The plans of the course of study have for the past year been carried out as before, with the same good results in our schools.

Everything seems to be working harmoniously. Each year the attendance at school increases, as well as the number of graduates.

There were 55 graduates in the Class of 1891, 1 from Leeds Point, 2 from Port Republic, 3 from Somers Point, 5 from Oceanville, 4 from Absecon, 2 from South Absecon, 2 from Pleasantville, 5 from Smith's Landing, 1 from each place following: Bargaintown, Linwood, Scullville, Estellville and Buena, 2 from Steelmanville, 3 from Mays Landing, 4 from Elwood, 8 from Egg Harbor City and 9 from Hammonton.

Among our graduates are children of all classes. There is no jealousy—but honest rivalry.

The following is the letter of instructions sent to each teacher, which will explain our method of conducting the annual county examination :

THIRTEENTH ANNUAL EXAMINATION

OF THE

PUBLIC SCHOOLS OF ATLANTIC COUNTY, N. J.

INSTRUCTIONS TO TEACHERS AND PUPILS.

TO BE READ TO THE PUPILS.

The teacher is to open the envelopes, as marked on them, in the presence of the pupils. Use the questions as marked on the envelopes and as numbered on the questions. Copy only a few of the questions on the board at a time. No pupil is to leave the room till he has finished all the questions written on the board.

The teacher will see that the pupils have no help.

No two pupils of the same grade are to sit near each other during the examination.

All books, papers or other means of help are to be removed.

Number and leave a space between each question. You can use both sides of the paper. Have your work neatly done, for it will be placed on exhibition.

The teacher should take up the papers as soon as the work is done. See that the blanks at the head of the papers are filled in.

The teacher will make out the Fourth and Primary questions.

Let each pupil have some work to do. When any pupil gets through with his examination let him go on with his lessons. Have the higher grades use pen and ink.

In all mathematical questions the work as well as the result should be given on the paper returned.

The Advanced Course and First Grade pupils are to take all the First Grade questions, except those branches in which they have a standing, (80 or more,) unless otherwise stated. The teacher is to mark all the grades below the First.

Write the name and age of each pupil now attending the school in the blanks and the averages, if any, of all in the Second, Third, Fourth and Primary Grades, and indicate by a plus mark what subjects the other pupils have taken and return the blanks to the County Superintendent at the close of the examination. Be sure to mark each average: First, Second, Third or Fourth in the average blank.

After you have marked the papers and copied the averages, send all the work, except Fourth and Primary Grades, to the County Superintendent. Put all of the papers of the same study in the First and Advanced Grades together, but in all other grades put the papers of each pupil by themselves.

Each pupil will copy and sign the following certificate on the last paper of his work: "I have had no help from any source in answering the questions, neither have I given any. The teacher will please certify that the pupils have had no help in answering the questions, as far as he knows."

Certificates will be given the same as last year. Primary certificates will be sent to the teachers to use as they think best, if so desired. The papers

must be delivered to the County Superintendent, at Atlantic City; W. B. Matthews, Hammonton; H. C. Krebs, Egg Harbor City; Rodman Corson, Absecon; D. T. Steelman, Smith's Landing; or E. D. Risley, Mays Landing, not later than April 24th, 1891.

If sent by mail the postage must be fully prepaid. The Advanced Course pupils will take their examination at the same time, unless by agreement they are to take it later. The questions will be found in one of the envelopes marked Advanced Grade.

S. R. MORSE,
County Superintendent.

In conclusion, I wish to express my thanks to the people of my county for the uniform courtesy and support they have always given to me in my work. Especially to the school officers and teachers. I feel grateful for their cordial support. There has been nothing during the past year to hinder the good work, or to render it otherwise than pleasant. The amount of work is continually increasing, but with a good system I am able to manage it.

It will be seen that I have made more visits the past year than ever before. Our course of study has become so well understood and appreciated that everything works pleasantly and profitably. The class of graduates of '91 is the largest we have had, and it seems now that the next will be much larger. I feel, with all the work it makes for me, in preparing, printing and sending out the questions, circulars and examination papers, examining them after their return, copying the averages of the pupils and sending out the different grades of certificates, &c., that it pays many fold. The system has created such an interest in the schools that all can see the great benefits of our graded course.

NORMAL CLASS.

I am making arrangements for forming a Normal Class for the benefit of teachers and graduates. I hope Atlantic county, in the matter of educational interests, will soon rank second to none in the State, but stand abreast of all. Much good is expected from this training class, if it is continued.

BERGEN COUNTY.

JOHN TERHUNE, SUPERINTENDENT.

Hon. E. O. Chapman, State Superintendent.

SIR—I respectfully submit the following as my sixth annual report; and I trust that the increased liberality of the taxpayers of Bergen county will receive the same concurrent recognition from my superior that I have accorded to them. Trustees and teachers have been unusually active and attentive to the grave trusts and responsibilities committed to them, and are also deserving of commendation for their uplifting influence, from which has resulted the improved conditions, in general, of the educational interests and advantages in the county.

The resources for 1891-92, as far as can be quoted at this time, are as follows :

State school tax.....	\$53,078 87	
\$100,000 appropriation.....	2,928 78	
Interest of surplus revenue.....	1,795 08	
	<hr/>	\$57,802 23
District tax for teachers' salaries.....	\$42,842 00	
District tax for other purposes.....	59,123 10	
District tax for manual training.....	3,700 00	
State appropriation for manual training.....	3,700 00	
	<hr/>	109,365 10
Balances due the districts.....		33,691 77
		<hr/>
Total to date.....		\$200,859 10

Bonding districts for new buildings and revenues from tuition will augment this sum during the year.

The expenditures for the past year were as follows :

For teachers' salaries.....	\$88,654 21
For fuel.....	3,758 70
For building repairs, debt and interest.....	37,694 39
For incidentals.....	18,370 98

\$148,478 28

OTHER COMPARISONS.

		Inc.	Dec.
Valuation of school property.....	\$359,500	\$26,000	
School census.....	12,423	400	
Average time the schools were open.....	10.14		.03
Total enrollment.....	7,950	280	
Number attending 10 months or more...	625	188	
Number attending 8 months but less than 10.....	2,602	157	
Number attending 6 months but less than 8.....	1,563		2
Number attending 4 months but less than 6.....	1,138	106	
Number attending less than 4 months...	2,022		169
Average attendance.....	5,040	467	
Number attending private schools.....	1,134		48
Number attending no school.....	3,142	124	
Seating capacity.....	8,101	572	
Number of male teachers employed.....	42		2
Number of female teachers employed....	107	7	
Average salary per month to males.....	\$88 65	\$5 61	
Average salary per month to females....	\$45 75	\$1 23	
Number of visitors present at Arbor Day exercises.....	1,564		316
Number of trees planted on Arbor Day..	124		45
Number of districts having beautiful flags.....	37	17	
Number of instruments: Pianos, 15; organs, 26.....	41	5	
Number of pupils successful at the annual examination.....	397	39	

SCHOOL-HOUSES.

Edgewater, District No. 1, voted to bond in the sum of \$6,000, for a second building in the southern part of its territory.

Schraalenburgh, District No. 11, also bonded for \$5,000, to erect the second building at Bergenfield.

This method of erecting two buildings in the same district, under

the control of one Board of Trustees, is more economical and permits of better gradation than could be attained by a division of the districts. But one Principal is necessary and the other departments can grade alike and a class promoted from each will unite in one grade for the Principal. The small children not being obliged to walk long distances reduces the irregularity in attendance at this age to a minimum. I encourage this arrangement in preference to division, also for the reason that small districts are to receive not less than \$375, and this gives to such a per capita far in excess of that received by the larger districts, which is unjust to the latter.

District No. 33½ issued bonds for \$6,500, to raise the building one story and to add a large extension.

District No. 35½ issued bonds for \$2,250, for an addition containing two rooms.

District No. 42 issued bonds for \$3,500, for an annex and other improvements.

Districts 35, 22 and 52 have new furniture; and 14 and 61 have made alterations, the last having changed the system of heating.

As regards the "condition of houses," I have not a single one that can be classified under a lower head than "good." I have a few that are inadequate, and provision should be made for increasing the number of teachers; yet, I feel confident that before the present year terminates this criticism will have been removed in every case. I keep this subject constantly before the Trustees, and with the aid of the press the review lessons are made so frequent that defective memories cannot be offered as legitimate excuses.

A law should be enacted limiting the enrollment in rural schools with one teacher, and the number should not exceed sixty. Forfeiture of State moneys should be the penalty for refusal to comply within a reasonable time.

The following circular proved very beneficial:

DEPARTMENT OF PUBLIC INSTRUCTION.
OFFICE OF SUPERINTENDENT, BERGEN COUNTY,
HACKENSACK, N. J., August 11th, 1890.

To Health Inspectors and Trustees:

The law enacted at the last session of the Legislature and numbered as Chapter CCLV., making it the duty of the Township Boards of Health to appoint, at their organization meeting, the Township Physician as Health Inspector, and naming among his duties the inspection of public schools, is in my estimation one of the most important bills that has received the approval of the Governor.

I am informed that the origin of this worthy supplement to the laws of New Jersey must be credited to our distinguished Bergen county physician, Dr. Clendinen, a practical scholar who understands that healthy minds require healthy bodies; and whose observations have probably induced him to labor for the introduction and passage of such a law as would secure the needed hygienic protection due the school generation.

The County Superintendents are certainly very much indebted to the

Doctor for his conception of the idea, and to our legislators and Executive for furnishing them with so many able coadjutors on this important subject; and I trust that the officers of this county, in which the bill had its nativity, will see that its intentions and provisions are rigidly enforced. In case any Boards of Trustees neglect or refuse to carry out the directions and recommendations toward the correction of any existing sanitary imperfections that the Inspector may consider detrimental, then the power delegated to this office for the condemnation of school-houses will cheerfully co-operate and support him in every instance.

When I see so many teachers and pupils with defective vision and nervous disorders, and know that a large percentage of these troubles has been acquired during school age, through improperly lighted, heated and ventilated school-rooms, I take the liberty of asking that special examinations and inquiries be made at your official visits as to the arrangement of seats for receiving the light from the proper direction, the system or method of ventilation, the distribution of heat, and that you insist upon having one or more thermometers in each room.

All necessary information pertaining to school sanitation can be found in Dr. Ezra M. Hunt's work on "Principles of Hygiene," published by the American Book Company, 806 and 808 Broadway, N. Y.; and Circular No. 4, 1880, of the Bureau of Education, Washington, D. C., on rural school architecture, with illustrations. A letter to the Commissioner of Education requesting this circular is all that is required. All school officers should be familiar with these publications.

Very respectfully,
JNO. TERHUNE,
County Superintendent.

I appealed to the Inspectors of three townships to visit certain schools and report opinions upon questions specified. They cheerfully complied and tersely condemned the existing evils.

With these weapons I attacked the respective officers in each district, and the consequence is that the children in those schools are comfortably seated at new desks.

Dr. Clendinen, of Ridgefield township, visited the schools under his jurisdiction periodically, and has instigated many reforms. The custom of drinking water dipped from a pail with a cup, he pronounced contaminating and ordered it abolished. He said that for the communication of contagious diseases, no better opportunity was offered than by this mouth-washing system, and advised vessels with faucets substituted.

Drainage and light received his personal inspection, and he did not hesitate to point out anything observed that needed sanitary correction.

SCHOOL LIBRARIES.

Districts 52 and 59 are new applicants for the State appropriation, while additions have been made in Nos, 1, 11, 12, 16, 18, 20, 21½, 22, 23, 25, 33, 37, 39 in both schools, 40, 42, 44, 45, 57 and 61.

No improvement has been made in rendering reports. They are in

a majority of cases very incomplete or not furnished at all. New teachers do not know at the beginning of the year what information is desired, and hence no preparation is made to furnish anything. A copy of the report blank, or a special circular containing the "Act" with directions as to what records to keep, should be tacked on the inside of the door of every library case. These libraries are a valuable auxiliary to the cause of education and ought to receive more systematic attention.

TEACHERS' ASSOCIATIONS.

Seven sessions of the Association were held. At the first two meetings, in addition to instructions given by County Principals and the Superintendent, Miss E. A. Palmer, of the New York College for Training Teachers, gave a lesson in Form Study and Drawing; and Prof. D. H. Farley, of the Normal School, in Bookkeeping and Penmanship. Afterwards, the following programme was carried out with the exception of the one called for June 6th, which was abandoned on account of the teachers' examination falling on that date:

BERGEN COUNTY TEACHERS' ASSOCIATION.

SESSIONS FOR 1891,

ASSEMBLY ROOMS, UNION STREET SCHOOL, HACKENSACK,

9:30 A. M. to 1 P. M.,

On the following Saturdays: January 10th, February 7th, March 7th,
April 4th, May 2d, June 6th.

EXECUTIVE COMMITTEE.

Jno. Terhune, *Chairman*; George Kintner, Chas. O. Dewey, Ph.D.; Maggie Vreeland, Irene M. Bates.

PHILOSOPHY OF ARITHMETIC.

Nelson Haas, A.M. (*)

Jno. Terhune, Co. Supt. (†)

I. Utility of Mathematics. Induction and Deduction. Grube Method Modified. (*)

II. Factoring. Fractions. (†)

III. Percentage and its Applications, not including the element of time. (*)

IV. Applications of Percentage, including the element of time. (*)

V. Ratio and Proportion. (†)

VI. Series and Evolution. (*)

PRINCIPLES OF THEORY AND PRACTICE.

Chas. O. Dewey, Ph.D.

I. Why we must Study and Apply the Principles of Human Development.

II. Training the Senses. The New Education. Manual Training.

III. Principles to guide in outlining a Course of Study.

- IV. The Representative Faculty. Attention. Memory. Habit.
- V. The Philosophy of Discipline.
- VI. The Method of Teaching Morals.

FORM STUDY AND DRAWING.

Mrs. M. E. Van Wagonen, Supervisor of Drawing, Public Schools, Kingston, N. Y., and Prof. H. P. Smith, formerly Supervisor of Drawing, Brooklyn, N. Y.

- I. Form Study. How to Teach.
- II. Construction of Geometrical Figures.
- III. Working Drawings. How to Develop Surface.
- IV. Free Hand Perspective.
- V. Decorative Design.
- VI. Historic Ornament.

Trustees are cordially invited to attend these meetings. Their presence would encourage the Association and stimulate the cause of Education. Let your District be represented at every assemblage.

IDA KIRBY, *Secretary*.

JNO. TERHUNE, *President*.

The average attendance for the year was eighty. Adding to this number those attending the Saturday lectures at the School of Pedagogy in New York City, we find that over seventy per cent. are interested in their chosen profession.

At the meeting of January 10th, I suggested the idea of securing State aid toward establishing a library of professional books for the use of the teachers. This was unanimously adopted and a committee appointed to present a suitable bill to the Legislature. Chapter LXIX., approved March 8th, with which you are familiar, is the result. I quickly raised \$105 by subscription, and on April 24th, sent you a proper application for the State aid, and am anxiously awaiting its arrival.

ARBOR DAY.

Much attention was given in preparing for the observance of this day. A pamphlet containing seventeen pages of beautiful literature, embellished with seven handsome illustrations of trees and flowers with appropriate quotations under each, was published.

The most interesting feature of the programme consisted of responses for the United States, New Jersey, Bergen county and sixteen short sermons and poems about "The Beauties of Nature," contributed by resident ministers and friends in each township. The above was interspersed with recitations, essays, patriotic songs, concert selections for primary grades, and descriptions of "The Curious and the Wonderful in Nature" by a class of ten pupils. The press universally commented upon it as being a unique arrangement throughout, and a gem of exercises for the occasion.

A summary of the reports informs me that sixty-nine of the

seventy-four schools observed the day. The programme was carried out in full in 27 districts; nearly so in 22; and partly in 20. Five schools were closed on account of sickness and death. In some sections of the county scarcely a family was exempt from la grippe, and in numerous instances several members were prostrated. This interfered very much with the attendance as well as the execution of the programme.

Thirty-one addresses were delivered, eleven of which were by resident ministers and the rest by Trustees, teachers and friends. Thirty-seven essays on subjects in keeping with the occasion were read by the pupils. One thousand five hundred and sixty-four visitors were present, and 124 trees were planted, viz., 96 maple, 9 elm, 4 spruce, 4 pine, 3 dogwood, 2 lilac, 2 hemlock, 1 ash, 1 allspice, 1 pear and 1 willow.

Trees were dedicated as follows: County Superintendent, 12; Gen. Sherman, 11; Longfellow and Lincoln, each 5; Whittier and Washington, each 4; Gov. Abbett, 3; Supt. Chapman, Admiral Porter, Gen. Grant, H. B. Crosby, Andrew Jackson and Audubon, each 2; and the remainder to Presidents, ex-Governors, Poets, Generals, Statesmen, Trustees, &c. The number of trees reported as growing on school property is 1,354, and flower-beds are quite universal.

An extra edition of the Arbor Day pamphlet had been printed and distributed among the teachers to be sold in their respective districts at ten cents each, for the benefit of the pedagogical library fund; 1,671 copies were disposed of, which after deducting \$70 for printing and \$2.05 for expressage, left \$95.05 for that purpose. Thus many who were unable to attend had an opportunity to read the exercises at home.

ANNUAL EXAMINATIONS.

Questions and directions in conformity with the outline of subjects for the annual examinations, as printed in my report of 1889, were mailed to the teachers on Friday evening, May 22d, and the following week was devoted to answering them.

The reports from the Township Boards entitled 397 pupils to rewards in the different grades, to wit: 2, post grade diplomas of the first grade; 28, first grade diplomas; 34, post grade diplomas of the second grade; 78, second grade diplomas; 120, post certificates of the third grade; 135, certificates of merit.

I am perfectly satisfied with the gradation of the subjects and see no opening for improvement.

If I were sure that a uniform class record of recitations could be kept by all teachers, I would allow a general average to be made up from the three following: Average class record, average attendance and final examination average.

This method, I believe, would have a tendency to improve the attendance, which in turn would insure a greater number of recitations. The present system of granting credentials upon a final examination alone, as a basis for judging the pupil's knowledge of the various branches, makes it possible for an irregular pupil to succeed while one seldom absent may fail.

MISCELLANEOUS.

The four regular meetings of the Board of Examiners for the examination of candidates for teachers' certificates were held according to law, with the results given in my statistical report.

The examination of candidates for free scholarships at the State Agricultural College, was held at the Court House on the date designated by law. Two applicants were present and their records were duly forwarded to you.

A competitive examination to fill a vacancy from this Congressional district, in the United States Naval Academy at Annapolis, was held at Paterson, under the direction of Congressman Cadmus. The honor was again awarded to District No. 32 of Bergen county. This famous school was represented in the contest by two pupils from its graduating class. Kenneth M. Bennett carried off the prize, while Eugene Bogert, the other member, stood third on the list. This school, over which Prof. Haas has presided the past twenty years, has recently been placed on the "Approved List" by the State Normal.

The Township Boards of Trustees were visited in August. Accounts were examined and other information given. The annual report for the District Clerks is not sufficiently classified to contain receipts and expenditures. At present the Clerks are compelled to resort to several interlineations, in order to make their accounts understood, and this practice causes the report to have a mutilated appearance.

No institute was held this year, owing to a misunderstanding. My usual week arranged for at a meeting of the County Superintendents, September 4th, 1890, was by mistake given to Middlesex. It was not lamented, however, as they are not considered profitable by many Trustees. The closing of the schools for this purpose, together with the frequent holidays, all of which occur during that period of the year when the larger pupils in rural districts can be spared from service at home, is openly criticised and condemned.

The appropriation is insufficient and might more profitably be donated to each county, for the accumulation of a professional library. This library with a progressive County Association, the attendance at which should be compulsory, in connection with a State Association, does seem to make an institute a superfluity, and an unnecessary

encroachment upon the limited number of school days. This is the view that many take of it.

In conclusion, I wish to express my high appreciation of the present management of our State Normal School. During the past year, I placed twenty graduates in the county that had just finished the course. Many of these had no experience other than that received in the training class. Some of these young teachers were placed in charge of rural schools, enrolling from fifty to ninety pupils and they were carefully watched from every standpoint. They classified and disciplined to the entire satisfaction of all concerned, and with but one exception all were unanimously re-engaged. Such universal success was not anticipated, and must be attributed to the careful preparation in the science and art of education received at Trenton. They have been very regular attendants at the Teachers' Association, and manifested much interest in its welfare. Sixteen more of them have been added for the coming year to the corps in Bergen.

BURLINGTON COUNTY.

EDGAR HAAS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

SIR—Herewith I most respectfully submit my sixteenth annual report of the condition of the public schools of Burlington county, for the year ending August 31st, 1891.

The finances for the coming year are as follows :

Amount of interest from the surplus revenue.....	\$4,363 92
Amount of interest from the surplus revenue for the Batsto portion of Pleasant Mills district of Atlantic county, containing 21 children.....	6 02

Amount of interest from the surplus revenue for Little Egg Harbor township of Ocean county, containing 516 children.....	147 89
Amount from State appropriation of \$100,000.....	3,703 91
Amount of State appropriation of \$100,000 for Little Egg Harbor township of Ocean county, containing 516 children.....	125 70
Amount apportioned out of the reserve fund, by the State Board of Education.....	7,512 02
Amount apportioned out of the reserve fund, by the State Board of Education, for Little Egg Harbor township of Ocean county, containing 516 children.....	254 92
Amount reserved by the county, being ninety per cent. of the State school tax.....	67,608 15
Amount reserved by the county out of the ninety per cent. of the State school tax, for Little Egg Harbor township of Ocean county, containing 516 children..	2,167 60
Total amount apportioned among all the districts of the county, including those of Little Egg Harbor township of Ocean county, containing 516 children.....	83,188 00
Total amount apportioned among all the districts of Little Egg Harbor township of Ocean county, containing 516 children.....	2,696 11
Amount apportioned to each child from the surplus revenue.....	.28661
Amount apportioned to each child from the State appropriation of \$100,000.....	.243598
Amount apportioned to each child from the reserve fund of ten per cent. of the State school tax.....	.49405
Total amount apportioned to each child in those districts that have more than 73 children	\$5.086358
Amount of district school tax voted to be used for the payment of teachers' salaries.....	4,025 00
Amount of district school tax voted to be used for building, purchasing, hiring, repairing or furnishing public school-houses	12,422 79
Balance in the hands of the Township Collectors, to be used for building and repairing public school-houses, &c.....	6,766 96
Balance in the hands of the Township Collectors, exclusive of moneys for building and repairing purposes.....	13,671 74
Total amount for teachers' salaries, fuel and incidentals...	100,884 74
Total amount for building and repairing public school-houses, &c.....	19,189 75
Total amount for all school purposes, including the \$2,696.11 apportioned to Little Egg Harbor township of Ocean county.....	120,074 49

Number of districts that must receive \$275.....	16
Number of districts that must receive \$375.....	48
Number of children in the county, including the 516 of Little Egg Harbor township of Ocean county, accord- ing to the school census of 1890, upon which the apportionment above was made.....	15,205

For the year ending August 31st, 1891, we have—

The average monthly salary for male teachers.....	\$56 59
The average monthly salary for female teachers.....	39 95
The value of public school property in the county.....	252,300 00
The school census for the year ending August 31st, 1891,	14,666
The number of children enrolled in the school register....	9,877
Average number of children in attendance upon school during the year.....	5,186
Estimated number of children attending private school...	1,370
Estimated number of children who attended no school....	2,306
Number of children the school-houses of the county will seat.....	11,224
Number of male teachers in the county.....	43
Number of female teachers in the county.....	152
Average number of months the schools were kept open during the year	9.2
Number of school visits made by the County Superin- tendent during the year.....	385
Number of meetings of the Teachers' Association held during the year.....	10
Number of students sent to the State College.....	1

From the statement above it is seen that the average time for which the schools were kept open during the year, is 9.2 months, which is but two-tenths of a month, or four days, over the time required by the law, and seemingly all that is demanded; but when we come to the actual facts, we find that there is a number of schools that do not come up to the full time; it is something to be deplored, yet we cannot help it. In many of the districts, and especially in those in the vicinity of places abounding in light labor, such as berry-picking, farm chores, &c., the children are sent out to earn what little they can to aid in the maintenance of the family. By reason of this there is not a sufficient number of children remaining in the school to warrant the employment of a teacher during this time of light labor. While the Trustees feel that they are not meeting the demands of the law respecting the time that the schools are to be kept open during the year, they yet believe that it would be wrong and a waste of money to continue the teacher in the school with but a

half-dozen children. Now, since it is no intention or fault on the part of the Trustees to wrong the district in the way of school privileges, we would here say that it would be wrong on the part of the County Superintendent to impose the penalties prescribed by law. For years this has been our view of the matter, and the reason why the penalty has not been imposed. We know that every law has its exception, and that man that cannot exercise proper discretion in the matter, is unworthy of the responsible charge of the supervision of schools that have perhaps more varied attending circumstances than any other charge on the face of the globe.

The following-named districts, with their respective times, are the ones that, with a general average of time of 7.6 months, have kept down the general average for the county :

New Albany District, No. 21, kept its school open for 8.2 months ; Sykesville, No. 44, for 8 months ; New Hanover, No. 54, for 6.5 months ; Magnolia, No. 59, for 8.8 months ; Chairville, No. 88, for 8.5 months ; Oak Grove, No. 89, for 8 months ; Free Soil, No. 91, for 8.3 months ; Atsion, No. 94, for 7 months ; Jones' Mill, No. 95, for 8 months ; Mount Relief, No. 97, for 5 months ; Crowleytown, No. 98, for 8 months ; Bridgeport, No. 100, for 8.3 months ; Lower Bank, No. 101, for 8.3 months ; Washington, No. 103, for 7 months ; Harrisville, No. 104, for 5.5 months.

As usual, we held examinations for teachers' certificates and for scholarships to the State College at the regular specified times. The one for scholarships, happening at the same time with one for teachers' certificates, had to be conducted by the County Superintendent alone, and, in consequence, special help had to be employed to aid my regular examiners, Mr. and Miss Watts, in conducting the large one for teachers' certificates, when the studies ranged in number from seven to fifteen.

And here we would say that the pay to the examiners for their services upon regular occasions is unjustly too little. On an average there are about fifty applicants in attendance upon examination, and when it is considered that each and every one of them must put his examination in writing, it is not to be wondered at when we see their result piled up in foolscap by the ream. For such an amount of work any lawyer would charge at least ten times the sum the examiners now receive, and any Presiding Judge in adjudication would justify the demand. Then why the paltry sum for the examiners? Merely because they submit to it without a word. Were they, at the instance of the officers at fountain head appreciating their labors, to arise in their might and demand their worthy constituents in the halls of legislation to right the wrong, the thing would be done.

The following are the results of the examinations for the year :

NUMBER OF CERTIFICATES GRANTED.

First grade to males.....	2
First grade to females.....	9
Second grade to males.....	3
Second grade to females.....	26
Third grade to males.....	15
Third grade to females.....	62
Total.....	117

NUMBER OF APPLICANTS REJECTED.

Males in all grades.....	17
Females in all grades.....	62
Total.....	79

The number rejected is forty and three-tenths per cent. of the number of applicants.

The districts that obtained library aid during the year are Nos. 22, 32, 52 and 82.

The reports of the school libraries are very unsatisfactory. There is no doubt that this arises from the fact that there is no particular person designated by law as librarian. If the teacher were made such and were required to keep a book in which to enter from time to time all moneys received and disbursed, apparatus procured, books bought, loaned and read, there would be little or no trouble for him to make out his report to the County Superintendent, provided the library year ended with the school year, and that no money or library aid could be had during the months of July and August, when the librarian was away from school on his vacation. The book thus kept should be the property of the district and handed down from successor to successor, as the change of teacher or librarian should require.

Smithville District, No. 35, is about building a new house to supersede the one now belonging to H. B. Smith's estate. No report of progress has yet been made, but I presume the house will be ready for occupancy by the first of November next.

Willow Grove and Old Springfield Districts, Nos. 38 and 39, have very poor school-houses. They being situated very near to each other, there could be no difficulty in combining them, when they could build one school-house adapted to two teachers, and thus have in some degree a graded school. Notwithstanding the advantage thus to be gained, there is quite an opposition to the idea.

Easton District, No. 72, voted \$850 to be used in the construction of a new house. When it will be built we cannot just say, as there has as yet been no report of progress.

Milford District, No. 84, is also about putting up a new small building for the colored children. The cost will be about \$400.

The new district, Mount Relief, No. 97, put up a new small house. Under the judicious management of the District Clerk, Charles H. Pittman, always liberally-minded toward school privileges, the actual cost to the district was not more than \$150. It was a much-needed district to accommodate the few children whose distances from the nearest school was about five or six miles.

Another new district, Friendship, No. 102, was created in an isolated portion of Randolph township, to meet the wants of some fifteen or twenty children without the reach of any school privileges or facilities. The school will be held in a private house in the settlement.

Arbor Day was observed in almost every school in the county. Seventy-one of them sent in very gratifying reports and they all gave evidence of much interest and enthusiasm. The programme of the exercises was prepared by the County Superintendent and supplemented by the teachers. It afforded instruction and amusement throughout the day.

Meetings of the Township Boards of Trustees were held as usual for the transaction of particular business, such as the settlement of accounts, changing boundary lines of districts, &c. But I regret to say that there is not the interest in these meetings that there should be. We seldom have more than the District Clerks present. From this fact, business of a general nature must be postponed to some special meeting.

The Teachers' Institute was held in union with that of Mercer county in the hall of the Normal School building, at Trenton, on Wednesday, Thursday and Friday, the 19th, 20th and 21st days of November. All the teachers, with the exception of a few that were sick, were present.

Our Teachers' Association is still as strong and vigorous as ever in its efforts to gain from month to months for its members that which will enable them to become strong, earnest and enthusiastic in their endeavors to lead their children on and up through the intricate mazes of high, consecutive, continuous thought. The teaching, lecturing and discussion were all done by the members high up in the profession of teaching. Among other subjects was that of acoustics, by the County Superintendent, as brought to bear upon the scientific treatment of music. After the subject was thoroughly discussed, the members copied in synopsis the eight equations showing the progression of transposition from key to key, the relation of the major to the minor scale in all its transpositions, forms and progressions. Once

having the knowledge of the construction of these equations, a mere glance at the table of these equations is all-sufficient to determine the scale and key for the practice of the art. Next year we propose to practice the art in the way of vocality, when we expect that most of the members will be able to teach it in their schools.

There is one thing of which I wish to speak, and that is the putting of a teacher that can just pass the third grade examination, into our rural schools where there are all grades of scholarship to be met. After a short time, the thoroughly-advanced, honest, ambitious student while striving with the teacher to do the best he can in his studies, finds that his efforts are worse than useless, from the fact that the direction of the instruction he receives is just the reverse of what it should be. He becomes discouraged and disgusted, and leaves the school declaring that the teacher is unfit for the position. Being poor and not able to go elsewhere for instruction, he is compelled to give up his ambitious aims, and to be satisfied with his present attainments. The result of this is that the school dwindles down to the lowest grade, and finally the community suffers from a dearth of educational talent. These rural districts pay their tax, and for it expect to have properly-qualified teachers to take charge of their children, but being disappointed from year to year, they give up and fall into a general apathy concerning the welfare of their schools. The great trouble is there is too much being done to-day to belittle the course of study. In evidence of which note the efforts at authorship to meet the demand. Every tyro wishing to display his talents launches out into the shallows of spelling, reading, language lessons, arithmetic, &c. As a consequence our markets are flooded with the trash, and the schools, at the instance of the teachers liking the mushroom delicacy, suffer of gluttony. Fifty years ago there was more real interest in the rural school than at present, and all because of the qualification of the teacher. Where is the rural school of to-day, in which are the higher subjects, then taught, such as Latin, higher algebra, trigonometry, surveying, astronomy, &c.? Echo answers "where?" The truth of the matter is, in it there is scarcely taught elementary algebra, mensuration, natural philosophy and bookkeeping, so essential to every boy's education. The only remedy for the wrong is to require the teacher to pass an examination commensurate with the studies that he is expected to teach, whatever grade his certificate may be styled. If it is to be the third grade, then let the studies of it be raised in number and degree to meet the demand. When this should take place, the teacher would be sufficiently well instructed to classify his school to the best interests of all. He would also know what studies should receive the attention for practical utility and what that for general culture. And knowing this he would soon be able to distinguish the important from the unimportant, in all school studies, for it is not to be denied that there is in every text-book, however

good, much that is not immediately applicable to good and permanent progress, and that should be thrown aside for that which is of lasting value to the student ; and also to determine the manner in which each kind should be studied—which ones should be particularly memorized in detail for expertness, and which should be generally abstracted as a whole for profound thought and generalization. A real, live, energetic, well-qualified teacher would enthuse every pupil of every grade in his school, and in the course of a short time, through the progress made by his children or students, he would so arouse the parents from their apathy, that with one accord they would do his utmost bidding in the way of school buildings, apparatus and appliances. In a word, we may say that intellectually as is the teacher so is the school and the community.

CAMDEN COUNTY.

CHARLES S. ALBERTSON, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent of Public Instruction :

SIR—I have the honor to submit my annual report of the condition of the public schools of Camden county, for the year ending August 31st, 1891.

I believe that during the year, the schools of the county have been conducted successfully and profitably.

I find an increasing interest in public education, manifested by all classes in the community. This is shown by the exciting “Annual Meetings,” and the large attendance at the commencement exercises and other entertainments in the various schools, as well as in many other ways.

The management of the schools in most instances has been broad and liberal, but not extravagant. The parsimony which characterized much of the school management in the past, seems to have almost entirely disappeared. The schools are now managed on business principles, and a liberal price is paid for a good article. This applies to the engagement of teachers as well as to other things.

The school property in the county is in good condition and is increasing in value and extent.

Two new school-houses have been completed and the third is in course of erection.

In District No. 12 a fine modern brick building with four class-rooms, a very complete system of heating and ventilation and fine appointments of every kind, has been completed and is now occupied. The cost of the building was ten thousand dollars, and it reflects credit upon the Board of Trustees and the borough of Haddonfield.

A good school building has been erected in District No. 4. This contains two class-rooms and has a seating capacity of one hundred. It is a very creditable building and cost about two thousand dollars.

There have been some slight changes in district lines and one new district has been formed.

The building now in course of erection in the new district (Newton, No. 47), as well as the lot, was donated by a few public-spirited citizens.

I have visited all the schools in the county, as prescribed by law, and have found the work done in most of the schools to be very satisfactory.

In many of the schools in which the work done was not so good, radical changes have been made, which I think will act for their improvement.

In our country schools our greatest difficulty is irregular attendance.

The teachers' examinations have been held regularly and forty-four certificates have been granted.

I believe that many of our teachers have a high appreciation of their profession and consider it worthy of their life work and not merely a stepping-stone to something better.

Regular meetings of our Teachers' Association have been held and have been well attended by our teachers. At each of the meetings the teachers have been entertained and instructed by educators of acknowledged ability.

We have held the annual examination of the pupils of the county and a number of diplomas and certificates have been granted.

Our Teachers' Institute was held at Atlantic City in connection with Atlantic, Salem and Gloucester counties. The institute was addressed by several distinguished educators and much was learned by the teachers that will be of use to them in their school work.

Much interesting and valuable information is contained in my accompanying statistical reports.

In conclusion, I cannot refrain from referring to the pleasant relations that have existed between the school officers and teachers and myself. This has made my first year as Superintendent a very pleasant one.

CAPE MAY COUNTY.

VINCENT O. MILLER, SUPERINTENDENT.

To E. O. Chapman, State Superintendent :

In submitting my annual report of the public schools of Cape May county, I am able to state that satisfactory work has been done in most of our schools. With a few exceptions, I have visited each school twice during the year. My observations on these visits, and the results of the annual examination of pupils, held in March, show that fair progress has been made.

It is a matter of regret that many of our Trustees do not show more public spirit in visiting the schools under their direction, some of them holding a trusteeship a full term of three years without paying a visit. This lack of interest too often induces a lack of interest on the part of the teacher. Our best schools are those in which most interest is shown by the Trustees.

By act of the last Legislature, Belle Plain, District No. 57, of Cumberland county, was added to Cape May. Our county thus regains a small portion of the territory lost to it by former legislation.

The tax muddle at Cape May Point closed the public school at that place for four months, and delayed the distribution of State school moneys in other districts of the county.

CUMBERLAND COUNTY.

CHARLES G. HAMPTON, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent of Public Instruction.

SIR—I have the honor to herewith submit my annual reports of the apportionment of public school moneys and the condition of public schools of Cumberland county for the school year ending August 31st, 1891.

The schools of the county have made gratifying progress during the year, and no difficulty of a special or serious nature has occurred in connection with them. No teacher or Trustee has died during the year, nor have I knowledge of any deaths among the pupils during this time. No serious breach of contract between teachers and Trustees has occurred, though a change of teachers has taken place in two schools during term time, but in both instances with the mutual consent of both teachers and Trustees. There was one instance, however, in which the Trustees of a country school refused to release from her contract a teacher who had accepted a position in a city school. The teacher, bound only by a verbal and rather indefinite contract, cheerfully acknowledged her obligations to the Trustees and remained until the close of her school.

I mention these facts to show the mutually pleasant relations existing between teachers and Trustees, without which the schools could not make the rapid advance in good, solid work which marks their progress.

The attendance of pupils has been greater than that of previous years, while the percentage of promptness and regularity of attendance, owing in a measure to the absence of any infectious or contagious disease, has been much greater than usual.

One district in the county is very large and but sparsely settled, some of the children being quite five miles from the school-house, while few are near enough to attend with any degree of regularity, yet the public sentiment in this district with reference to public schools is healthful and progressive.

Another district, owing to the fact that there is no material growth or prosperity within its limits, thus compelling the children on arriving at the age of manhood and womanhood to seek employment and homes elsewhere, is reduced to a school population of sixteen children.

With the exception of these two districts, there is a fair increase in the number of pupils and interest in public schools in all parts of the county.

Probably the greatest difficulty the ungraded schools incur is the almost yearly change of teachers, arising mainly from the very laudable desire on the part of ambitious teachers to secure an increase of salary and a graded school.

It is much to be regretted that the sparseness of the population in the outlying districts of the county, prevents adjacent districts from combining and forming graded schools, in the interests of both teachers and pupils, but such is the present condition of the districts, and the people can only make the best of the circumstances, which in course of time will doubtless improve.

I append a few statistics :

Number of children in county.....	11,730
Number enrolled in school registers.....	9,367
Average daily attendance.....	5,882
Amount expended for the support of schools..	\$94,628
Number of male teachers employed.....	33
Number of female teachers employed.....	150

ESSEX COUNTY.

CHARLES M. DAVIS, SUPERINTENDENT.

To Hon. Edwin O. Chapman, State Superintendent :

In obedience to law, I have the honor of making the following report for the schools of Essex county during the year ending August 31st, 1891.

The public schools of Newark are under the superintendence of Wm. N. Barringer, Ph.D.; those of Orange under Usher W. Cutts, A.M., while this report concerns those of the eleven townships in the county.

Twenty-three years ago there were forty-two (42) districts, which have been reduced to thirty-five (35), three having been annexed to Newark and others consolidated. Notwithstanding this annexation, the growth of the townships has been so marvelous and the interest of the citizens so great that the public schools of the townships have increased many fold in many ways, as will be seen from the following statements:

	1868.	1891.
On census roll.....	7,656	13,662
On school register.....	4,652	8,723
Average attendance.....	2,670	6,216
Number of buildings.....	42	47
Value of property.....	\$108,750	\$707,300
Number of male teachers.....	27	29
Number of female teachers.....	49	177
Average salary, male.....	\$55 75	\$119 64
Average salary, female.....	33 27	45 61
<hr/>		
Buildings—Very good.....	4	38
Good.....	7	6
Medium.....	12	1
Poor.....	9	1
Very poor.....	10	1
<hr/>		
Total.....	42	47

Only four buildings remain as they were in 1868, and some repairs have been made to these. The one marked *very poor* is in a district that has been annexed to another, the citizens of which are ready to build a good house as soon as a suitable location can be obtained.

The larger part of the county lies behind the range of hills called "The Orange Mountains," access to which is not easy. With the exception of the village of Caldwell, which is rapidly growing and whose public school has attained a very high degree of excellence, the population of this section is very little, if at all, greater than in 1868; in some districts it is less. But east of these hills the townships are becoming thickly settled, and there are in them several schools, the superior to which it will be difficult to find anywhere, whether in town or city. The general character of all these schools is high, and their influence is felt in the country districts, where the qualifications of the teachers are much better than formerly.

The influence of the County Normal Class, which extended through the year, has been felt for good in all the districts. Eighty teachers attended regularly and carried into their schools the results obtained from the instructions of the able conductors.

Where there is such general excellence it might seem invidious to mention any by name; and yet some of the schools so far take the lead of others that it is well to give them particular attention. First of all stand the public schools of Montclair and East Orange, in the character and furniture of their buildings, the high qualifications of their teachers, and the excellent training in natural history, natural science and manual work which they furnish to their pupils. These schools and that in Bloomfield prepare scholars for entrance to the highest colleges in the land. Connected with the Montclair school is a shop for industrial work in wood and iron. There are five lathes operated by a steam engine, which, under able instructors, the pupils are taught to use. The girls are taught various kinds of needlework, and a well-furnished kitchen gives them an opportunity to learn cooking. The South Orange school has made commendable progress in form-study, drawing and industrial work. Other schools are beginning to follow these examples.

East Orange has put up a High School building at a cost of about \$115,000, and the citizens of Montclair have authorized their Trustees to erect one which, no doubt, will rival that of their neighbor.

It must not be inferred from these commendations that High School work is the great and distinguished work of the public school. On the contrary, the attention given to the primary and grammar classes should be the most emphatic. And indeed it is just in these classes that, in the schools mentioned, as well as in the great majority of the others, the ablest teachers are employed and the greatest success obtained. There is great advance along all the lines in all the schools.

GLOUCESTER COUNTY.

JAMES GALLAHER, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

I have the honor to submit my first annual report of the schools of Gloucester County.

Owing to a protracted strike in the large glass manufacturing center there was a falling off in the school census of one hundred and seventy-seven as compared with the previous year.

SCHOOL-HOUSES.

Two new school buildings were erected during the year, one at Janvier District, No. 40, and the other at Westville District, No. 61. In many other places repairs and additions have been made. Modern desks are in every school-room but one in the county. Many are putting in slating for blackboards, so that in a short time nearly all of the school-rooms will be furnished with them.

SCHOOLS.

The schools throughout the county were well attended during the year. Night schools were held in Woodbury, Glassboro, Clayton and Williamstown. I visited several of these schools during the winter and found them doing excellent work, and some of them compared favorably with the best day schools in the county. Private schools do not prosper in this county, and I know of no other way of accounting for it than on account of the high state of efficiency of our public schools.

There is a general desire among the teachers to rise in their calling by fitting themselves for higher grade certificates. Twenty-five teachers held State certificates, and among them were seven first grade

State. Of the one hundred and five county certificates, there were fifteen first, thirty-five second and fifty-five third grade.

Commencement exercises are on the increase, and in a short time nearly all the schools will hold them. The usual county examinations were held throughout the county, and forty-five graduated in the elementary course and two in the advanced course.

The examinations of candidates for teachers' certificates were held in Woodbury at the time appointed by law. Sixty third grade, nine second grade and four first grade certificates were granted and four first grade certificates renewed. Sixty-five were refused certificates, either for not getting the required averages or on account of age.

Arbor Day was generally observed throughout the county by planting trees, and other appropriate exercises.

A Union Institute of Atlantic, Camden, Salem and Gloucester counties was held at Atlantic City the last of October. There is no doubt but that the teachers were greatly benefited while there, as the corps of instructors was unusually good.

Great interest is taken in our county associations, which are held four times a year at Woodbury. We employ the best talent that can be secured to instruct and inspire the teachers. Many of the teachers never miss attending these associations, and all are unanimous in saying that they have been more benefited and inspired in their work by these meetings than in any other way. I am much indebted to Mr. Milligan, my predecessor, for his kind assistance and timely suggestions.

HUDSON COUNTY.

GEORGE C. HOUGHTON, SUPERINTENDENT.

To E. O. Chapman, State Superintendent:

SIR—I herewith hand you my sixth annual report of the schools of Hudson county.

Within the year many changes have taken place in the several districts of the county. We have lost some excellent teachers and

have gained a large number of those for whose appointment the county will be justly entitled to be congratulated.

I am sorry to lose the valuable services of Mr. H. S. Philips, who was for many years Principal of the school at Bull's Ferry, where his excellent work was manifest in a marked degree. His successor, Mr. Joel Horton, is, however, a progressive man, and the school curriculum under him will not be allowed to deteriorate.

Mr. John F. Ogden, who resigned his position as Principal of the school in West New York, was a very successful teacher. His position was a very difficult one. He had an ungraded school in a district where there had been dissensions between a large number of the residents and the Trustees; and for lack of sufficient funds the school had been closed for some time. His successor, a young man of promise, testifies to the faithful work of Mr. Ogden. The harmony now existing in the district, and the yielding of the Trustees to my request that they should engage an additional teacher, have made this former much-distressed school a more successful one than hitherto.

In the consolidated district No. 3, New Durham, there are now four schools, and the new Principals, Messrs. Wilcox, Roberson and Murphy, have shown considerable ability in advancing the standard of public instruction in that district. Mr. Roberson succeeds a very successful teacher, Miss Clara Winkelman; Mr. Wilcox found little to encourage him when he began his work, but has greatly improved the course of study and methods; Mr. Murphy will have charge of the new school building; he is engaged in another part of the district at the present time.

There are now but two schools in the county ungraded. The "Furnace School" (in the Second District) is so situated that probably there will never be required the services of more than one teacher, and it is a hard battle-ground. But the school in old district No. 4 (now consolidated with No. 3) will soon require a second teacher. All the other schools in the county where there was formerly but one teacher have this year received an additional one, and the satisfactory results are far beyond anything that the Trustees could believe possible.

In Guttenberg a large addition to the school building has been erected, and in four of the other districts new school-houses have been built.

Hoboken has added to its accommodations for public instruction one of the finest school buildings in the State. The architects, Messrs. Beyer & McCann, have certainly studied to some purpose the requirements of a school, and the city authorities have been liberal in their expenditures for the necessities of education.

In West New York a very suitable school-house has been built, and one that will accommodate even this growing population for the next decade.

In New Durham a fine building is nearing completion and will demonstrate, I believe, the wisdom of consolidating Districts Nos. 3 and 4, and placing a school-house in such a position that the children of that neighborhood will not be obliged to travel two miles over very muddy roads to attend school.

In Kearny a High School has been built, and this action on the part of the Board of Education will undoubtedly raise the standard of instruction in this district. The newly-appointed Superintendent, Mr. John Keynton, is rapidly bringing about the uniformity which was so greatly needed in this part of the county.

I regret that I cannot report a new school-house or an addition to the old one in Harrison. I am sure that I have not failed in my duty, either in urging the Board to build or in reporting to you the needs, year by year. It has seemed to me that the forty-first section of the School law requires an "ample" building when it demands a "suitable" building, and under that construction, the Harrison school-house is not "suitable" for the requirements of the district.

In Bayonne the school work is improving, as was to be expected, under the admirable management of the new Superintendent, Mr. Davis, who for many years was the Superintendent of Essex county. The Academic Department of Bayonne is most successfully carried on by Miss Thomas, and I am justified in saying that in no city of this county or State is the "High School" Department in more able hands than in Bayonne. It is a pity that more ample accommodations are not provided. More than a score of pupils who desire to come under the instructions of Miss Thomas' progressive methods have been unable to obtain admission. Some of the boys who have been prepared by Miss Thomas have entered, with credit, Rutgers College, and others are preparing to enter next fall. My visits to this department have always made very favorable impressions upon me, and I hope that the Board will give Miss Thomas additional facilities in the new year.

Manual training is every year making greater headway in the county, and in the fall of 1892 I expect two more districts to adopt at least some of the departments of industrial education. West Hoboken continues its work in a somewhat limited way, and the Town of Union is yearly advancing in all the industrial branches that have been adopted so very successfully by Mr. Ortel throughout his excellent school.

In Hoboken their very limited resources hamper them greatly, and the inadequate space that is at present possible for them to give to the wood-working is embarrassing to the full efficiency of this department. Indeed, it is only just to their excellent corps of teachers that it should be said that the necessity has developed during the past two years for a suitable manual training college building in Hoboken, one in which each department should have ample space for all its require-

ments, independent of all other branches. They are occupying four fairly large rooms in the building known as the "Martha Institute." The situation of the building is a good one, because it is in about the center of the city and as convenient of access from the schools of the northern as from the schools in the southern part of Hoboken, but the building itself is old, indifferently constructed and poorly ventilated. If they should occupy all the room really needed for their work, including their sewing department, which is now carried on in the public school buildings, the rent alone would equal the interest on \$30,000. How to obtain a suitable manual training college building is now a problem which must soon be solved in this rapidly-growing city.

The Manual Training Board report this year as follows:

"We have now five teachers and an assistant. The wood-carving and clay-modeling have heretofore been in one department and taught by one instructor, but in September these branches were made separate departments, and an assistant was given to the newly-appointed modeling teacher. By this means, and by increasing the duties of the sewing teacher, several additional classes in the public schools have been allowed the benefit of manual training.

"To fill the vacancy caused by the resignation of the instructor in wood-working, Mr. Healy, who accepted a similar position in the Trenton Model School, the Board appointed Mr. J. S. Bloomer, whose work forestalls any retrogression in this branch of manual training.

"Provision has been made for occasional visits to other industrial institutions, the Board recognizing the benefits that will be derived from these very practical 'tours of inspection.'

"From the annual reports of the teachers we quote portions (given below) which bear upon that part of our training which is of general interest."

WOOD-CARVING AND CLAY-MODELING—MISS JEANNETTE PALEN.

"The result of the past year's work in this department, so far as we can see, has been of value, not alone in the training of the eye and hand, but in the development of the mind of the child, who comes without any idea of form, or thought of the beautiful around him.

"By the use of the type forms, sphere, cube, &c., he learns to think of the form, and to compare it with natural objects.

"This trains his eye, while with his mind he directs his hand, and in that way thought is developed, which is one of the chief objects of our instruction, and inculcates orderly and quiet habits, to develop industry and perseverance, and, above all, a love for work of all kinds.

"It is this development of interest in the carving or modeling, and love for the work, that changes, in many cases, boys who come into the class boisterous and thoroughly disorderly, into quiet, persevering 'workmen.' They learn that they can do something of comparative usefulness with their own hands, for which they are personally responsible, and that success does not depend upon doing many things, but upon doing everything as *carefully* and *thoroughly* as possible, and only he who observes the small things and uses his eyes to see all that there is to be seen around him, can become a valuable workman.

"To learn what profit a boy has derived from his study a piece of clay is given him and his imagination and memory are allowed free scope. Some will model a yacht, full-rigged, while others develop some other model that pleases their fancy.

"The interest in the carving has been carried into many homes where tools have been provided for the boys, and all of the spare hours utilized by carving when out of school.

"Many encouraging words came from educators who visited our exhibition, in May, in respect to the real progress made in the work.

"The changes that have been made by the fitting and arranging in a thorough manner a new room for carving, as well as remodeling with new benches the old room for modeling, add much to the facility and usefulness of the department."

DOMESTIC ECONOMY—MISS E. HUGER.

"The general attendance during the year has been better than heretofore, and the work done by all of the classes excelled that of previous years, due much to the fact that many of the girls had profited by having had older sisters in the classes that preceded them, thereby incidentally showing a practical result of our instruction.

"The course is arranged in such manner as to cultivate judgment in the quality of the materials, in order to be able to select the best. Though the variety be limited and the quantity small, good quality of material is the first principle of culinary economy.

"Were the time longer and the hours such as to permit of little expeditions to the market in selecting the supplies, the time could be used very profitably, and yet our meat-charts supply this demand fairly well.

"After the cooking of water follows the lessons of the effect of heat upon meat and starchy foods, then soups, stews and several varieties of bread and biscuits are made by the children.

"Some simple chemical experiments are given in connection with the practical work to awaken *interest* and *thought*, and certainly the children think, deliberate and reason better for having this branch of the work.

"Encouragement from parents is an important factor in this department, and it will be found that 'home practice' will keep the pupils in 'good heart' in spite of the inevitable mistakes, failures and disappointments attendant upon employment of this nature. The sense of discouragement is sure to be forgotten when patient effort is at last crowned with success, and a natural pride is displayed by the young cook, after several unsuccessful trials, when a specimen of cookery worthy of experienced and older heads is produced.

"Perfect order and cleanliness prevail in the little kitchens. Wastefulness is especially guarded against, and the utmost painstaking insisted upon in the care of all supplies, materials and utensils.

"The best exhibition of our work can be seen daily in the classrooms, and parents are urged to come often and are always welcomed."

WOOD-WORKING—E. M. HEALY.

"The attendance while being fair, might have been greatly improved if the standing of the pupils were affected in their weekly school reports.

"The pupils never flagged in their interest from the beginning, but they rather seemed to imbibe the spirit of industry as their work progressed, and when the time came for the summer closing, they laid the tools down with manifest regret.

"I trust that I may be permitted to say that eight months have proved inadequate for the pursuit of the subjects taught in this department, and the two months which you have determined to add in the future to each year's course will be of inestimable value to both teachers and pupils.

"In severing my connection with your college, I wish to express my appreciation of the kindly aid and cordial consideration which I have received from the Board of Trustees.

"My interest in your college will go with me to my new field, with the wish that it may continue to grow, and its scope of usefulness increase."

SEWING—MRS. DAVID E. RUE.

"That the art of sewing is an indispensable element in a girl's education is universally admitted.

"That this branch of instruction is appreciated it is only necessary to ask the girls employed with their needles, if they 'like their work,' and an emphatic affirmative answer will always be given.

"That it has awakened an interest in the parents, is known by the many words of commendation from them; and they have testified to the excellent results shown in their homes.

"Several of the girls who have completed the course have found steady and remunerative employment owing to their skill with the needle. The tendency to *drop out of the regular school course before the end of the year* has been decidedly checked, as the girls are anxious to remain and finish their course in sewing.

"The classes beginning to sew are taught how to wear and use the thimble, to measure the thread, thread the needle, and the proper use of all the implements of sewing. The neatness and exactness of the first stitches taught enable the girl to master those that are more difficult as she is advanced.

"Part of the work done by the classes was placed upon exhibition near the close of the school year. This gave each pupil an opportunity to show some specimen of her work to those most interested, and this natural pride in work performed is an incentive to improve in future effort.

"The arrangement of the various sewing models shown on exhibition was such as to permit an intelligent study of the method pursued, and covered all grades, from the lowest to the highest. The practical skill of each pupil was shown, and elicited much praise from parents and friends who were present."

The exhibit of our work in the several departments, which was given on the 15th and 16th of May, in the large hall of the Institute Building, has been referred to above and it is proper that we should speak of it more particularly. Unfortunately we have no record of the exact number of those who attended the exhibit, but we know that there were *above five thousand children*, including a thousand or more who came from Jersey City, West Hoboken, Union Hill and North Bergen, and but for the storm which prevailed during both days we should not have been able to accommodate the throngs of people who thus manifested their interest in our industrial education. This interest is constantly increasing among all classes of people.

While the large hall contained the chief exhibit, the class-rooms were thrown open and classes were at work, giving a practical idea of the instruction.

Many of our visitors, indeed a very large portion, were from neighboring cities and interested in other industrial schools. We are still in constant receipt of letters from different parts of the country, making inquiry about methods, and this has led us to contemplate issuing a simple "Primer" of our own manual training.

In regard to the practical results of our work, as shown in this annual exhibit, we beg leave to quote from the report made by one of the Faculty of an Institute of Manual Training in a neighboring city, and published in the "New York Evening Post," May 22d, 1891:

"The exhibition of a year's work in sewing, cooking, clay-modeling, wood-carving and joinery from the public schools of Hoboken, which was held on Friday and Saturday last in that city, was a showing of much interest to many people. The instruction in manual training is not directly in the hands of the city authorities, but is controlled by a Board of Trustees, who have brought together a small but earnest and efficient band of teachers, and the Board guarantee all the expenses. The actual funds are, however, in great part, if not entirely, derived from city and State grants. The work is carried on in a building apart from the schools, in which well-equipped, but small and cramped, work-rooms are fitted up. The time occupied in passing to and from the work reduces somewhat the very limited amount given to the subjects.

"The course in sewing, which is given in the last five classes of the grammar school, begins with outline running, stitching of geometric and free-hand figures, and then extends through a series of well-graded exercises in overhanding, hemming, felling, sewing on buttons, making button-holes, gussets, &c. The specimens of darning on stockinet and cashmere were exceedingly well done, and some very neat patching on striped calico was shown. The course ends with some simple work in embroidery. All the exercises use but little material, and no elaborate finished pieces are attempted. Practice in paper-cutting and folding is introduced into the course in order to teach proper methods of cutting and of using the scissors, and also as affording an opportunity for instruction in the proper combination of colors.

"Cooking is taken in the upper three classes for an hour and a half a week, and the tempting array of practical results seen on Saturday testifies to the thoroughness and excellence of the instruction. The many specimens of bread, soups, jellies, and cooked meats certainly appeared to be in every way what they should be. It was evident that the endeavor had been to give a training of direct service in homes of moderate circumstances. Particular study had been given to the saving of things that are commonly wasted, and a number of soups and other dishes were shown made from odds and ends not generally so used. A quantity of soap has been also made by the pupils from the grease left over from the lessons. The pupils have the entire charge of the kitchen, which is a model of neatness and order, and in every case clean, and put away their own utensils. They are taught the washing of dishes and the care of towels. To bring so far as possible, an intelligent appreciation of the subject, instruction is given to the classes in the simple facts of digestion and the chemistry of foods.

"In the fourth class the boys practice clay-modeling for one hour and a half a week. This is their first manual work. The exercises begin with the making of the type solids and the familiar appearance of

these forms in nature, and end with simple work from cast. The results are of course crude in execution, as is inevitable with eleven-year-old pupils, but show a good foundation in form perception and the practice is a preparation for the further hand-work. Wood-carving is practiced during the next year, in an admirably-graded series of lessons. The later exercises in this work showed in many cases a surprising degree of artistic feeling, and throughout the courses a very broad and free treatment was noticed.

"The exercises in joinery, which occupy two and one-half hours a week in the second class, resulted in a most interesting collection. The average age of the boys in this class is thirteen years, and the course presents a very happy illustration of well-adapted and well-graded exercises. After the first simple exercises in sawing and planing, a series of joints are made, running from the simple half-lap to the single dovetails. All of the pieces are small, and consume but little time and material, while the neatness and accuracy with which they are made show that they are well within the growing capacities of the pupils. At the end of the year one month is devoted to constructive pieces, which illustrate the application of the elements previously covered. The articles exhibited comprised many small models of tables, stools, bootjacks, easels, sleds and doors.

"Altogether the exhibition showed a most efficient year's work, and considering the small amount of time given to the practice, reflects great credit upon the ability and devotion of the instructors. These teachers, who have been in most cases specially trained for the work, have evidently studied the best practice in their different lines and availed themselves of the latest thought on the subject.

"Compared with these well-arranged courses the work of the New York public schools, exhibited last year at the Teachers' Bazaar fair, was mere trash, and can hardly be classed in the same category. In adaptation to purpose, in economy of material, and in the character of the work, the Hoboken exhibition was a success where the other was a lamentable failure."

HUNTERDON COUNTY.

E. M. HEATH, COUNTY SUPERINTENDENT.

To E. O. Chapman, State Superintendent :

In submitting my third annual report of the condition of the public schools in Hunterdon county, I will, as formerly, present a synopsis of the statistical reports :

Amount derived from \$100,000 fund.....	\$2,205 30
Amount derived from State school tax.....	57,796 45
Amount derived from surplus revenue.....	3,297 43
Amount of district school tax voted for payment of teachers' salaries.....	1,825 00
Amount of district school tax voted for building, repairing and furnishing school-houses.....	4,615 00
Total amount of district school tax raised.....	6,440 00
Total amount received from all sources for public school purposes.....	69,739 18
Number of children within the school ages, according to census of 1890.....	9,053
Twelve districts numbering less than 45 each, aggregating 421 children, receive.....	\$3,300 00
Thirty-nine districts numbering 45 and less than 56, aggregating 1,860 children, receive.	14,625 00
Fifty-six districts numbering 56 or over, aggregating 6,772 children, receive.....	45,374 18
Amount per child to districts numbering 56 and upwards,	6 700262
Average number of months the schools have been kept open.....	9.57
Number of children the school-houses will comfortably seat.....	7,273
Estimated number of children in the county attending private schools.....	105

Estimated number of children who have attended no school during the year.....	881
Number of male teachers employed.....	54
Number of female teachers employed.....	101
Average salary per month paid to male teachers.....	\$54 77
Average salary per month paid to female teachers.....	34 80

The report of last year showed a decrease in the school census of two hundred and forty-five, and this year's report a still further decrease of one hundred and sixty-seven. To whatever cause this decrease may be attributed, it is certain to have an unfavorable influence upon schools of the rural districts, by increasing the number of \$275 and \$375 districts, making it impossible for them to employ the best teachers, through lack of funds. Upon this point some needed legislation is very generally demanded. Of the one hundred and fifty-one teachers who have taught in the county the past year, eight hold first grade State certificates, six second grade State certificates, and six third grade State certificates. Twenty-nine hold first grade county certificates, fifty-five second grade county certificates and forty-seven third grade county certificates. In my intercourse with the teachers it has been my aim to encourage those possessing low grade certificates, to strive to attain a higher grade of scholarship and efficiency. I am very grateful that my request in this direction has met with such a general response, and those teachers who have given the required extra study, will not only be benefited themselves intellectually, but will be a greater power in their school work, and thus secure to themselves better salaries. In this connection it is pleasing to announce that three of our progressive, energetic teachers, Messrs. W. D. Evans, Stacy B. Emmons and A. B. Rittenhouse, took the course of study prescribed by the State Board of Examiners at Trenton, and received first grade State certificates. Commencement exercises were held in eight of the schools, and were attended by large and appreciative audiences. These exercises cannot fail of being useful, affording a necessary stimulus that each one may be better than its predecessor. We still have two Teachers' Associations, both of which have held very interesting meetings. The merging of these two associations into one good, strong association would, I think, be the means of accomplishing a great deal more good than can be accomplished by a separate existence. Our institute was held in the Flemington Opera House, Nov. 17th, 18th and 19th. The attendance was good, ninety-four per cent. of the teachers being present. The institute gave very general satisfaction, though not as varied as some would have liked, yet it met the wants of a large number of the teachers.

At the quarterly examinations for teachers' certificates there were one hundred and eighty-four applicants, forty of whom were rejected, resulting as follows:

MERCER COUNTY.

43

First grade granted to males.....	6
First grade granted to females.....	0
Second grade granted to males.....	9
Second grade granted to females.....	16
Third grade granted to males.....	26
Third grade granted to females.....	87

The general condition of the school buildings of the county is good ; while there are a few that should be replaced by new ones, yet a large number are quite satisfactory. No new buildings have been erected during the year, but a number have been refurnished and otherwise improved. With the school work of the past year I have been very much pleased ; in many respects it has been our best. The teachers have been thorough, energetic and practical, and are deserving of commendation. To examiners, teachers, school officers, parents and scholars, I tender my grateful acknowledgments for their cordial support.

MERCER COUNTY.

LLOYD WILBUR, COUNTY SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

As the statistical reports accompanying this are so full and comprehensive, I do not think it necessary to restate here what is so fully set forth in them, as it would be a mere repetition. I shall therefore omit the usual synopsis of our financial condition.

In making this report, I may say in the beginning that I do not think we have had a more prosperous and successful school year than the one just closed since I have had charge of this department of the county service. There certainly has been great improvement in the corps of teachers. I think the higher requirements of our quarterly

examinations have become so well known among those that desire to become teachers that the candidates come much better prepared than formerly. The applicants that have presented themselves during the past year have certainly been drawn from a class that have had better opportunities for preparation than those of any previous year of my supervision, many of them having spent a year or more at the Normal School. But while it is true that our teachers are steadily improving in many ways, and that the requirements are growing higher in some departments, I cannot but think that some things are lacking yet. I think the greatest improvements are in the primary departments. Perhaps these are the most important. And in the *graded* schools there may be no ground of complaint, but in the *country* schools, in which there is but *one* teacher employed, I have felt that there is an unsupplied need. I have found that in many of the country schools during the winter there are pupils—large boys—that desire and need a kind of instruction that most of the teachers are not prepared to give. I cannot make what I wish to say more clear than by instancing a case. In one of the rural districts a big boy came to me to say that he wanted to learn surveying and mensuration. I examined him carefully and found that he was thoroughly proficient in arithmetic and well along in algebra. The teacher of the school was one of the best primary teachers I have ever known, but she knew no more about the subjects that he wanted to learn than she did about Sanscrit. The boy could not go away to a boarding school. He had neither the time nor the money. What was he to do?

The mention of this case derives its importance from the fact that it is one of a *class*. There are *many* such cases in country districts. Does it not seem as though such pupils ought to have the opportunity of studying the branches they wish when they are between the ages fixed by law for children to be numbered as a basis for making out the money apportionment? To them it is a vital matter. They must acquire a knowledge of these branches at the district school, or not at all. These things could be learned in former days from the old-fashioned itinerant schoolmaster. Must we, with all our new-fangled improvements, fall behind the old regime?

The year just passed has been a great one for *minor* improvements in the school-houses. I think there have been more improvements of this *grade*, such as new roofs, new floors, new porches, new window shutters, &c., than in any year of my incumbency, and at the same time I think a comparison will show that we have fewer schools that are in debt than almost any other county in the State.

We have formed one new district this year, in which they have built a school-house that we are all proud of. It is at Hillcrest, and its territory was taken from District No. 17, with a small strip from No. 18.

The property cost about forty-five hundred dollars, and the build-

ing is quite a gem and model for other districts. I do not think I have ever seen more enthusiasm and interest in school matters than have been shown by the people of Hillcrest. The size of the new building is twenty-six feet by sixty. It has a ceiling twelve feet high, and is lighted by very large windows having inside blinds. It is thoroughly ventilated, and heated by a large furnace in the cellar. The blackboard capacity is one hundred and seventy-five square feet. It has two entries and an office. The yard is beautifully graded and one hundred feet by two hundred in size. It is soon to be dedicated with appropriate ceremonies.

We have also built a very substantial and suitable new school-house in District No. 50, called Hickory Corner. It will be furnished with all modern arrangements and conveniences.

In making this report I need not speak particularly of the usual routine work of the office. I have tried to attend to it as well as I could, and to carry out the instructions I have received from time to time from the State office; and I am not aware of anything being omitted or slighted.

In the conduct of our institute I think we came a little nearer to having an *ideal* institute as contemplated by the law than we ever succeeded in doing before. The one *rule* that we tried to have run through all the proceedings was to have nothing presented nor a period occupied with any subject that would not be of practical utility in the school-room. Nothing merely ornamental or fanciful was tolerated. The result was entire satisfaction and a feeling among all concerned that no time had been wasted. The institute was held jointly with Burlington county; to the services of whose able Superintendent our meeting owed much of its success. There was hardly a teacher absent belonging to either county.

The old complaint of lack of uniformity in books used in the schools still prevails to some extent; and in this connection I think I may say there is a *new* embarrassment—a superabundance of excellent material to choose from. I think more school books of superlative merit have been issued by the different publishing houses within the last year or two than have ever before been heard of. It puts me in mind of the old couplet,

“How happy could I be with either,” &c

What we want is uniformity, and it does not seem to be the easiest thing in the world to get it.

MIDDLESEX COUNTY.

H. BREWSTER WILLIS, COUNTY SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

In obedience to the law, I have the honor to present my annual report concerning the public schools of Middlesex county, ending August 31st, 1891.

The following is a condensed statement of my statistical report :

Amount of money received from the State.....	\$80,760 77
Amount of money received from district tax for teachers' salaries.....	9,000 00
Amount of money received from district tax for building, repairs and incidental expenses.....	23,967 60
Total amount district tax received.....	32,967 60
Total amount school money received from all sources..	113,728 37
Valuation of school property.....	342,050 00
Number children in school census.....	15,299
Average number months schools were open.....	9.4
Number children enrolled.....	8,706
Number children attending private schools.....	3,084
Number male teachers employed	19
Average salary per month to male teachers.....	\$73 76
Number female teachers employed.....	171
Average salary per month to female teachers	\$37 08
Number school districts in the county.....	78
Number \$275 districts.....	9
Number \$375 districts.....	42
Number per capita districts.....	27
Number persons examined by County Board	126
Number candidates rejected by County Board.....	40
Number appeared for exercise.....	27

The increase of State school money has diminished the amount of district tax required for teachers' salaries. It is pleasing to report that an increase of \$9,155.58 special school tax has been raised, exceeding that of any previous year, for building, repairs and incidentals. The public school-houses and grounds of Middlesex county will bear a favorable comparison with those of any county in the State.

Arbor Day was generally observed. A number of trees and shrubs were set out on school grounds with appropriate exercises.

The Teachers' Institute was held November 24th, 25th and 26th in the Livingston Avenue High School building, New Brunswick. The address of welcome was made by E. A. Apgar, City Superintendent, and the response to the same by the County Superintendent. Prof. Nicholas Murray Butler, E. H. Cook, Professor Brooks, Professor Frye and Miss Rena F. Merwin instructed the institute. In addition to the above instructors, the Rev. P. T. Pockman, Rev. Allan Campbell, E. A. Apgar, W. H. Butts, Miss R. Anna Miller, Miss Sadie Brewster, Miss Emma Pratt, Miss Clara Edgar, Miss Margaret McLaughlin, Miss Mary L. Thomas, Professor Wilmot, Professor Hart, Professor Holland, Fred. Van Dusen, A. T. S. Clark, A. H. Wilson and others took part in the institute exercises.

The last evening of the institute was devoted to the Reading Circle. County Superintendent presided. Reports were received from the three circles and addresses made by A. H. Wilson, A. T. S. Clarke and the County Superintendent. At the close of the exercises the following resolution was adopted:

"Resolved, That we recognize the high quality and earnest spirit that characterized the papers and addresses presented at the series of meetings. That we believe the cause of education is rapidly progressing throughout our country; that the true teacher's spirit is animating our teachers more than before; and that the standard is being elevated, and the proper element is rallying, more than ever before, to the support of the general interests of the cause in which we labor. That we as teachers richly enjoy the pleasures of the institute and anxiously look forward to its annual return. That the thanks of the institute be extended to the County and the City Superintendents, the Board of Education, the members of the institute and all who in any way participated in the exercises."

The three Reading Circles successfully maintained during the year have done much to encourage professional reading. The diploma our teachers seek is that of personal improvement.

Upon reviewing the work of the past school year, I am fully convinced that the public school interest in Middlesex county is full of promise.

MONMOUTH COUNTY.

SAMUEL LOCKWOOD, SUPERINTENDENT.

To. Hon. E. O. Chapman, State Superintendent :

SIR—I have the honor of reporting to you my school work for the year ending August 31st, 1891.

The following is an exhibit of the resources on which the appropriation of the public school moneys was made last May for the coming year :

Apportionment of school moneys for Monmouth county for the year beginning September 1st, 1891, and ending August 31st, 1892 :

Number of children in the county, according to census of 1890.....	18,750
Interest from surplus revenue.....	\$2,339 35
State appropriation from the \$100,000.....	4,567 47
Appropriation from the \$5, or State school tax.....	114,345 56
Total amount of school moneys.....	121,252 38
\$375 districts, having not more than 58 children nor less than 45 each.....	14
Districts receiving each \$275, having less than 45 children each.....	10
Number of children in these 24 districts.....	1,076
Amount appropriated to the children of these 24 districts.....	\$7,603 62
Average per child, for the above.....	\$7.43494
Number of children in the districts which number more than 58.....	17,674
Amount from all sources to each child in the above districts.....	\$6.40785

As the facts and figures are all reported in their proper places, reiteration here might seem ostentatious. Less, however, cannot be said than that generally generous provision is being made for the

growing necessities of the school population. Jerseyville, No. 102, has a fine new school-house. Asbury Park has erected a new building, enlarged the grammar school at Ocean Grove, increased the accommodations of another of its schools, and temporarily hired a building for the overflow of its High School. The well-known public spirit of Long Branch has been seriously tried. The year opened with a fire in one of its schools, involving some outlay. A fine new building has been put up in Sub-District 1, at a cost of \$15,000, which in equipment, ventilation, and hygiene is as near perfection as seems possible. The former building was moved to Branchport, thus making another Sub-District, No. 7, all feeders to the High School. The conflagration at Seabright destroyed the fine new school-house there, and a tax of \$10,000 is voted to restore it. With the pressing need of enlarged accommodations, and the replacing that which fire has consumed, Long Branch has been seriously taxed, but has nobly met the occasion. The school system at Long Branch is almost ideal, and with its large-minded Board of Education, its accomplished Principal, and able faculty of instruction, the schools commend themselves as worthy the devotion and sacrifice of the people.

In December at a flag-raising of School No. 95, the colors being presented by our veteran school-man, Hon. Robert Laird, M.D., remembering the adage, "a word fitly spoken," I made it the occasion of an appeal to the large audience for the school needs of the district. The simple logic was that good patriotism aimed to make good citizens of the children, hence it would show indisputable patriotism if steps should be taken to erect a new and suitable structure in place of the old, comfortless and inadequate school-house. The District Clerk, Capt. James H. Hudson, assumed a praiseworthy prominence in the enterprise; and now the heights of Brielle, "beautiful for situation," possess a new school-house.

Several schools have made noteworthy improvements looking to comfort and enlarged accommodations. These with the new buildings have increased the total school property of the county very materially. Indeed, I confess myself almost startled at the figures. As the pleasant duty fell to me to organize the county under the "new school law," I cannot but recall my first reported valuation of the entire public school property in the county, \$85,000. My present report returns a total of \$496,000, or close upon half a million.

Such an exhibit *then* could only be regarded as simply ideal—in a word, desirable, but not attainable. Whereas *now* it is actual. Nor is it merely quantity—it is also quality. Even in some of my rural schools to-day, are teachers of an ability which could command the high places then. I would instance a teacher who has just left us. He was doing commendable work in a one-room rural school. He is called to the principalship of a High School in a sister State. He writes me regretting to leave his school, but "though for a smaller

salary," he considers the promotion worth the sacrifice. Comment is hardly necessary.

My examination of competitors for the free scholarships in our State College was eminently satisfactory. Thus our county has filled both quotas, that for the older law giving Monmouth two appointments, and that for the recent law, three, viz., one for each Assembly District. Besides these five, Monmouth has other three in the college well advanced, thus having now eight in this institution. Seven of these are from the public schools. The recent law has virtually made the public school an integral part of the university; the system being thus enthused with a high impulse, spurring alike teacher and pupil.

During the year our graded schools have diplomated some sixty graduates. Many of these have scholarships sufficient to pass respectably the county examination for the third grade license. It was a wholesome regulation that raised the age from sixteen to eighteen years. Still, as the education those young persons have received is entirely academical, that is, contains no Normal training, their efficiency is not always of the best. And yet, on the plea of "home talent," the Normal graduate is too often set aside in the competition.

Some human ordinances happily are dovetailed into "the eternal fitness of things." Such are abiding. Others are temporary—they serve their purpose, then pass away. Others, again, which promised well, fail upon trial, and should be superseded or reconstructed. Hence, generally, an ordinance is a set experiment! Pedagogy must build on the empirical and experiential. With reason it must induct and deduct—but with judgment it must experiment, adopting whatever is proven to be worthy.

We have now rounded out two or three years of experimentation in virtually excusing examinations on a county second grade, where a third grade with a general marking of 85 has been got, and followed by a year of good school-room work. Simply two topics are reserved, United States history and bookkeeping, both, in fact, really third grade topics, as both are taught by third-graders. This second grade is worth thrice a third grade, and yet a lady teacher rightly viewing the situation, took her seat at one of my examinations in a decidedly nonchalant way, and in fifty minutes by the clock her work, which was really good, was all done! Thus in those few minutes she had secured a three-years' license. History needs only a fair memory, and as for bookkeeping, how very little can be asked on that?

I cannot, then, but regard the old solid second grade as defunct. Now we should look at this matter with the question of gain or loss. The old second-graders were generally aspirants for the first grade, towards which they had made a great advance. Take my registration of licenses. We may suppose the May examinations of 1888 as the close of the old regime. Then 16 candidates for the first time obtained second grades, and 12 got first grades. At the May term of

1891, 21 got second for the first time, and 2 got first grades. We should note also that generally the second-graders of 1891 had only just completed a year's work, while those of 1888 averaged not less than six years. I cannot, then, view the experiment as it has worked in my county, other than an arrest of what was an advancing scholarship.

A union Teachers' Institute, Ocean joining Monmouth, was held at Asbury Park. Again I am constrained to speak with gratification of the attendance, my roll showing an absence of only five from a call of 230, and the absentees were excused for good cause shown. I have upon occasion done a little in the direction of agriculture, and am glad that the prospect promises work on this line.

This fitly introduces Arbor Day, which I think should be the occasion of some intelligent talk on the mode of growth and sustenance of a tree. The best fruit of Arbor Day must come of practical work, the planting of trees, culture of flowers, care and beautifying of the school grounds, not even forgetting that plants can be profitably grown in the school-room. But excepting indoor culture of flowers, the opportunities here mentioned are every year becoming less. Judicious programmes are of good account. But even these may be made too generous in quantity, and too ornate and diffuse in matter. Is not this for the live teacher in a rural school a golden opportunity for a little lecture on agriculture? For the sake of novelty I asked my teachers to take a vote on a State flower. But in a majority of instances the thing was done in a bungling way; for when children vote for the "callow" lily, may not the teacher be toiling unwittingly in the shades of the "Dark Continent?" Probably we shall try again after brushing aside such callow conceptions of opportunity. Verily, some generous acquaintance with books is indispensable. In a word, a little culture, towards which the Reading Circle has done some commendable work.

The year has been exacting, but with harmony and progress it has been a labor of love.

MORRIS COUNTY.

JAMES O. COOPER, SUPERINTENDENT.

To Edwin O. Chapman, State Superintendent :

It is with a considerable degree of pleasure that I submit herewith my second annual report of the schools of Morris county. My first year's experience as Superintendent has been a very pleasant and profitable (not financially) one to me, and I trust profitable, at least, to the teachers under my supervision.

The following is a condensed statement of statistics which may be of interest :

Appropriation from State school tax.....	\$68,412 09
Appropriation from \$100,000 fund.....	3,537 35
Appropriation from surplus revenue.....	3,597 04
Special district tax voted for teachers' salaries.....	10,780 55
Special district tax voted for building, repairing, &c.....	18,156 00
Balances on hand from all sources.....	14,098 51
Total receipts from all sources.....	118,581 54
Total expenditures.....	107,440 43
Total value of school property.....	324,115 00
Number of children included in census.....	14,152
Average number of months the schools have been kept open.....	9.72
Number of children enrolled.....	9,283
Seating capacity of school buildings.....	9,361
Number of male teachers employed.....	52
Number of female teachers employed.....	132
Average monthly salary paid males.....	\$60 20
Average monthly salary paid females.....	39 90
Number of \$275 districts.....	19
Number of \$375 districts.....	49
Number of districts drawing more than \$375.....	43
Total number of districts in county.....	111

In comparing these statistics with those of previous years, we are enabled to report progress in many respects.

SCHOOL-HOUSES.

Much improvement has been made in respect to convenience, comfort, appearance and value of school-houses.

The people of Dover have voted \$15,000 for the erection of a fine brick building of eight rooms, which is now inclosed, and will be ready for occupancy early in the spring. The Smead system of heating and ventilating will be used.

In Port Morris a new building, to cost \$5,500, is in the course of erection.

In Netcong they have purchased a lot and are about deciding upon plans of a new building to cost from ten to twelve thousand dollars.

Milton and Russia Districts have been consolidated, and one thousand dollars have been voted for a new building, which should have been completed ere this.

Center Grove and Union Valley Districts need new buildings at once.

On my first visits last autumn I found in five districts, viz., Union Valley, Russia, Flock, Longwood and Taylortown, those ancient benches along the sides of the rooms, which consist of slabs ten to twelve feet long, supported by four legs, and desks back of them so high that only the largest pupils could use them to write upon, and smaller pupils were obliged to sit with feet dangling, unable to touch the floor. I immediately requested the Trustees to call special meetings to vote taxes for the purchase of new furniture. In the four first-named districts they complied with my request and now have modern furniture.

In Taylortown they have not acted as yet, and I may be compelled to condemn their building before they will act.

Many other school properties have been improved in the way of new blackboards, new furniture, new roofs, enlarged playgrounds, new outbuildings and fresh coats of paint.

TEACHERS.

Our teachers, generally, have been very conscientious in the discharge of their duties, and are trying, constantly, to more thoroughly prepare themselves for the great responsibilities of their profession. I am sorry to say that there are a few exceptions to the general rule.

TRUSTEES.

Trustees have been much more prompt in the discharge of their duties, and considerate for the best interests of their respective schools, and accurate in keeping their accounts. There is still room for improvement.

Last autumn I made an effort to have all of the Trustees in the county meet me at township meetings, but in this I failed to a certain extent, as only about 65 per cent. of the districts had representatives in attendance. In these meetings, in my talks, I endeavored to enlist the sympathy and co-operation of the Trustees in the improvement of our schools generally, and explained different acts of the School law with regard to the meaning of which they were in doubt.

INSTITUTE AND COUNTY ASSOCIATION.

The work done at the Tri-County Institute, held at Morristown last December, was instrumental in giving us better results in the study of geography and reading, during the balance of the year. Yet reading is the most poorly-taught study in our schools.

The County Association held a very interesting and instructive session last May, at which there was an exhibit of general class-room work from throughout the county. This exhibit of work suggested many new ideas, and will, we think, result in better methods of instruction.

ARBOR DAY.

Every school in the county held appropriate exercises on this day, and in many schools the programme that I had previously prepared was fully carried out. All schools reported to me of their doings. On many grounds shade trees were planted, flower-beds made, and the grounds generally improved.

EXAMINATIONS.

The four quarterly examinations were held, at which one hundred and ninety-six candidates presented themselves. Two first grade certificates were granted, twenty-two second, and eighty-six third. Eighty-six applicants were rejected.

VISITS.

During the year I made three hundred and three visits, during which I endeavored to make myself of service to the teachers by the aid of the fourteen years' experience I had previously had in actual school-room work.

OCEAN COUNTY.

E. M. LONAN, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent:

I herewith present to you my report for the schools of Ocean county for the year ending August 31st, 1891.

Census returns came in promptly, but I am again much annoyed by the tardiness of District Clerks in sending in their financial reports.

At our last examination we had thirty-nine candidates, and of this number thirteen failed to secure the proper credentials.

I have always been fortunate in securing a very efficient Board of Examiners. Mr. Peter Tilton has been on my Board since the resignation of Hon. A. C. B. Havens, who resigned on account of his being elected County Clerk.

Mr. Tilton "fills the bill;" he is firm, courteous and a gentleman. He is ably assisted by Prof. J. D. Dillingham, Principal of the public school at Toms River. On account of the number of candidates at the June examination, I called in my friend, Mr. Noah Jeffrey (holding a first grade license), now teaching at Bayville, to assist us.

All the other examinations are conducted by Mr. Tilton and myself. Serious illness last winter prevented me from making my usual number of visits. Last December I again "joined teams" with my old friend, Prof. Lockwood, and held our institute at Asbury Park. We had a very good attendance and an enjoyable time.

The interest and enthusiasm was great, and the attendance was large. We had very able instructors, with lots of help from home talent.

Arbor Day was generally observed. Quite a number of young people have entered the Normal School to prepare for teaching. The Normal is very popular in our county.

I regret to say that death has entered our corps of teachers and taken four of our number.

George W. Johnson, Principal of the school at New Egypt, died suddenly, right in the prime of life. Mr. Johnson was a high-toned Christian gentleman, beloved by all who knew him. As a teacher he had few equals. Words are inadequate to express my sorrow for his loss to the community.

Then Miss May J. Cook, of Cedar River, passed away. She was noted for her many good qualities. Miss Tillie Osborn followed in the same road. She had been a very successful teacher for a number of years. She was very energetic, also well known and much respected. Death, the grim reaper, then removed from our midst Miss Ella Parsons, teacher in one of the primary departments at Toms River. Miss Parsons was deservedly popular, and was much beloved by the whole community.

The past year has been one of great activity and progress in this county, in all branches of educational work. Under the new regulations for granting license, many of our teachers have taken greater interest than heretofore, and the result is shown in more thorough and effective school-room work.

Our people are fast learning the true worth of the public schools, as is evidenced by improvements being made every year in the renovation of school buildings, as regards appearance, room, comfort, sanitation, &c.

Toms River District, No. 31, has repainted her building inside and out, and placed a new bell in the tower. Union District, No. 32, has enlarged her building, built a bell-tower and placed a bell therein. Silvertown District, No. 26, has repainted her building outside, and wainscoted and ceiled the inside with hard wood. This being put on over the plastering makes the building warmer and stronger. The citizens of Lakewood have made a move in keeping with the rapid growth of that town; they have arranged to build a \$20,000 building, with all modern improvements, which they propose to have ready at the opening of the next school year. During the year one new district, Brindletown, No. 53, has been created. By the annexation of Little Egg Harbor township to Ocean county we acquired five more schools, and we now have fifty-eight. Though our county is so large she is sparsely settled in some parts, and the greater percentage of our schools are small-paying ones. They are as follows: Eleven of them receive \$275, thirty-one of them receive \$375, sixteen receive greater amounts according to the census.

The result of examinations of candidates for teachers' certificates is as follows:

Number of certificates granted—	
First grade.....	6
Second grade.....	15
Third grade.....	29
Rejected candidates.....	19

Pursuant to an act of the Legislature of 1890, providing for the purchase and display of United States flags in connection with the public school buildings of the State, quite a number of our schools now have flags. Such a measure cannot fail to engender a spirit of patriotism among the citizens of the near future. I think the study of "Civil Government" should be made one of the prescribed studies of the State, in all schools having advanced grades or classes.

PASSAIC COUNTY.

ALEXANDER ELLIOTT, JR., SUPERINTENDENT.

To Hon. Edwin O. Chapman, State Superintendent:

I herewith present to you a report prepared by me of the work of my predecessor for the year ending August 31st, 1891.

The returns have not been made promptly, some have been sent to my predecessor and some to me, and I have had considerable difficulty in gathering them together and doing work on the report which properly belonged to my predecessor. I beg therefore to submit to you the report for the year ending August 31st, 1891, compiled from such data as I have in my possession.

At the last August examination we had seven candidates; of this number five were granted third grade certificates.

Not being in office at the time the institute was held and of which a statement should be made in this report, I am unable to express any views. I have no doubt, however, that it was attended in the highly commendable manner in which all else was done that my venerable and reliable predecessor had in hand, and judging from indications from the institute held last week, I am satisfied that the teachers had a very profitable and social time.

I am convinced from the visits made by me since my appointment as Superintendent, that the workings of the public schools have been steady and substantial.

Permit me to add that without the assistance of Superintendent Terhune, of Bergen county, I fear I would have been unable to prepare this report. He has been untiring in his efforts, and through his assistance I am enabled to herewith submit this report as complete as the records in hand will permit.

SALEM COUNTY.

ROBERT GWYNNE, JR., SUPERINTENDENT.

Hon. E. O. Chapman, State Superintendent :

DEAR SIR—Herewith I send the statistical report for Salem county.

The past year has been one in which our schools have been fairly well attended, but the pleasant weather of almost the entire year and the almost complete exemption of our children from disease should have secured for us even better attendance and better results in the educational line. I should rejoice were I able to report thorough work done in every district of our county, but the Superintendent who is compelled to recruit his corps of teachers very largely from the ranks of those holding certificates of the third grade—the beginners, the laggards and the drones of the profession—cannot do so.

Last year fifty-two of our eighty-eight teachers held such certificates; two had been teaching on certificates of that grade in this and other counties for twelve successive years, and quite a number from four to eleven years each. Of these fifty-two teachers not one had any preliminary training in the profession. Some have been industrious and by experience have improved their methods. The vast majority of them did poor work in some one or more branches, while some were complete and hopeless failures in every respect. Our children are not being *educated* by such teachers. In some instances the money apportioned for the support of the schools is worse than wasted. The school buildings in our county are nearly all in good condition, and the people take pride in keeping them so. Our list of text-books is made up of the works of standard authors; our school equipment of apparatus, books of reference, maps and charts, &c., is being constantly enlarged—everything is growing better excepting the teachers. There is general complaint from parents that their children cannot study physics, bookkeeping and other advanced branches, but many of the teachers cannot handle them, and they have to be omitted from the course of study. There is a demand from the farmers that chemistry and other branches useful to those who will be dependent on agriculture for a living be taught in our country schools. Who is to teach them? Not our present teachers, certainly.

Last year I made a close investigation of the instruction given in the fundamental branches—spelling, reading, writing and arithmetic. Outside of our graded schools I found but five teachers out of fifty-one who were teaching all four correctly. Some were correct in their method in one or more, but there were only five who received my unqualified approval.

For two years Prof. E. S. Richards, Principal of the Salem High School, has conducted a summer school, to prepare those who wished to take the teachers' examination. Wishing to do more than merely cram these candidates, he has paid particular attention to psychology, to analysis, to normal methods in all branches. The result is that his pupils are making our best teachers outside of those who come from the Normal School. I believe that such a school could be maintained in every county under the care and, to a certain extent, the patronage of the State, and that the scheme would be of great advantage.

There should be an amendment to the law, so that the election of a teacher should be subject to the approval of the County Superintendent. Such an amendment would prevent many bad teachers remaining to trouble us year after year.

During the past year District No. 18 has entirely remodeled its two school buildings and now has two neat and commodious structures in place of the two disgraceful huts in which school has been held for more than fifty years. Districts 7, 8, 9, 14, 18, 47 and 57 have replaced their old forms with modern furniture. Districts 1, 21, 48,

57 and 64 have drawn on the Library Fund. I shall try, this coming year, to have more of the districts draw on that fund, if for nothing else than to secure new dictionaries and gazetteers. Nearly every gazetteer in the county and most of the dictionaries are those sent out by the State away back in the '60s.

A very successful institute was held in connection with the counties of Atlantic, Camden and Gloucester at Atlantic City in October last. Thanks to Superintendent Morse, of Atlantic county, who is a thorough executive as well as a genius in educational matters, our stay there was pleasant and nothing occurred in any way to interfere with the programme mapped out for the three days. Prof. Frye, Prof. Woodhull, Prof. Russell, Prof. Apgar, Mrs. Monroe, and Dr. Edward Brooks were our instructors. Every teacher in the county was present, excepting one or two detained at home by sickness.

Teachers' examinations were regularly held and during the year 1 first grade, 6 second grade, and 47 third grade certificates were granted, 64 applicants being rejected. One certificate was revoked and two teachers were compelled to give up their schools by reason of failure at examination and the expiration of their certificates.

Arbor Day was duly celebrated and I forwarded a statement of the number of trees planted. Nearly every school in the county participated, either with tree-planting or with appropriate exercises. I sent to the teachers the programme prepared by Superintendent Terhune, of Bergen, together with some suggestions of my own, and it was very generally adopted.

There should be a general revision of the boundaries of our school districts. These boundaries were arranged many years ago and, excepting in a few instances, remain unchanged to this day. In recent years new roads have been opened, the population has shifted and other conditions exist that make a revision of the lines necessary. One of our districts has fallen below the 45-children limit for several years, yet last year 47 children were enrolled in its school, 33 belonging in the district and 14 outside, the latter attending because the school-house was nearer their homes than was the one in their own district. I find that in the shifting of District Clerks many deeds to land owned and occupied for school purposes, and many insurance policies and other valuable papers have been lost. In two instances I find that districts have never had title deeds to school property they hold, but as they have held possession for nearly a century, they probably will not be disturbed.

Preventing encroachment on the State school money, for any other than the purpose for which it was apportioned, is becoming harder work each year, but I have so far prevented it. Securing District Clerks who will make out their reports promptly and correctly is also getting more difficult. If we still retain our District Trustee system, we should have one man only in each township to take the

school census and to keep the accounts of the township schools, and he should be paid a specified salary. Men with patriotism enough to serve as Clerk of a \$275 district without compensation are becoming scarcer every year, and the trials and burdens of the Superintendent increase.

Our school examinations were held in March and May, and pupils in nearly every school in the county participated. Some of the papers were a pleasure to examine and a number of the schools showed a steady advance, both in the number taking part and in the facility in answering questions. One pupil secured a certificate of the advanced grade, 17 secured county diplomas, 74 second grade and 149 third grade, while 117 passed in special branches.

Mindful of what hurt our schools in the past, I determined that if any teacher failed to properly present the elementary branches to her pupils this coming year it should be that teacher's fault alone, and this report is written at the close of a session of our Teachers' Association (the first ever held in our county at the commencement of the school year), called expressly for instruction in reading, spelling, writing and number work. Of the 112 teachers in the county and the city of Salem, 99 were in attendance, and the entire day was devoted to instruction and practice. That it will bear good fruit I am sure, and I sincerely hope that 1891-92 may witness unusual activity and endeavor in our schools.

SOMERSET COUNTY.

W. T. F. AYERS, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

SIR—In presenting to you my annual report, I desire to say that I find the schools in a condition somewhat improved upon that of former years. This, I think, is due in a large measure to the general interest manifested by the teachers in the Reading Circle and Profes-

Arbor Day was observed by appropriate exercises in nearly all the schools in the county.

My seven years' experience as County Superintendent, and my knowledge of the teachers make me confident of a more successful future, and I enter upon my labor encouraged, hopeful and cheerful.

SUSSEX COUNTY.

LUTHER HILL, SUPERINTENDENT.

Hon. E. O. Chapman, State Superintendent :

The summary of my annual report, herewith submitted, presents encouraging evidence of progress in comparison with the results of former years. The census is nearly the same as last year, with a gain in the enrollment of pupils and in the attendance. There is a fractional decrease in the time that the schools were kept open and a hopeful increase in the average of both male and female teachers' salaries. For a number of years, instead of erroneously subdividing the township averages in these particulars, I have given the true district averages. In the report of Superintendent Haas, of Burlington county, for 1888, attention was called to the fact that such has not been the general practice throughout the State. There ought to be uniformity in preparing the statistics of the annual report. It is to be feared that there may be some misunderstanding in reference to the *attendance* for the past school year, arising from the use of the new school registers, teachers being in doubt whether to report the *possible* or *actual* attendance.

Andover and Stanhope have completed their new school buildings and have increased the total value of school property about \$15,000. Both districts have reason to rejoice in the fact that they have excellent school buildings. Amity and Washingtonville will erect new

school-houses during the present year. Several others should build and will make the attempt. There is necessity of immediate action in this respect, particularly in Districts No. 17, 20, 26, 38, 40, 46, 52 and 65.

There is a growing tendency in rural districts to *domicile* advanced pupils in the towns and villages, that they may have better educational advantages, and Trustees are complaining that by this means their schools are being overcrowded. Cannot some plan for a County High School, for each rural county, centrally located, be devised that would afford better opportunities for these scattering advanced pupils to complete their education?

The third in the series of Tri-County Institutes for Morris, Sussex and Warren counties was held at Morristown December 10th, 11th and 12th last. The attendance was good and the exercises were both entertaining and instructive.

The meetings of our County Association have been well attended. Teachers are trying to prepare themselves more fully for the work. We have a greater number of students from the county attending the State Normal School than ever before.

The work in the school-rooms done by the teachers for the year has been most satisfactory.

UNION COUNTY.

B. HOLMES, SUPERINTENDENT.

To Hon. E. O. Chapman, State Superintendent :

In obedience to law I have the honor to submit the following brief report, supplementary to the tabulated statistics of the several cities and townships of the county herewith transmitted.

The school property of the county as a whole is in excellent condition. The spirit of improvement has not fallen behind that of last year.

The school buildings in District No. 2, East Linden, and No. 27, Connecticut Farms, have been nicely painted and the entire premises put in excellent order for the coming year. In No. 19, Summit, the interior of the building has been newly painted, the basement cemented and other improvements made. In No. 20, East Summit, water has been introduced, a great convenience to the pupils of the school.

In District No. 28 the rooms have been neatly ceiled with hard pine. District No. 9, Cranford, has increased the capacity of its building by making a new room for the advanced class. The school is rapidly increasing and in a few years more school accommodations will be needed. The additional rooms in No. 25, North Roselle, completed early last year, are a great improvement, and have been fully appreciated by teachers and pupils.

District No. 10, Westfield, has erected during the year one of the finest school buildings to be found in the county. For some time the school in this district has labored under great disadvantages in room. Some of the rooms were uncomfortably filled, and additional accommodations were temporarily secured in a hall, but the increase of population made it necessary that permanent school facilities should be secured. This has been accomplished by the erection of an elegant brick structure, finely situated on a commanding site. It contains six session-rooms, an assembly hall and Principal's room. It has a seating capacity of three hundred and twenty-five, and is occupied by the High School, grammar and intermediate grades. It is heated and ventilated by the "Smead system," which had been satisfactorily tried in the old building. All things considered, it is one of the most complete school buildings in the vicinity.

The grounds around it have been graded and set with trees, and laid out in lawn, flower plots and playground. Much credit is due to the Board of Trustees who have carried the work to completion.

The rooms of the old building have been re-arranged, partitions removed, and it has been put in good order for the primary classes. The district now has ample school accommodations, and pupils, teachers and people are to be congratulated on the result.

Among the districts of the county, the buildings of the following may be classed as "very good;" and the Boards of Trustees are to be commended for the appearance of the school property: Nos. 1, 2, 4, 9, 10, 14, 16, 19, 25, 27, 28 and 29.

The school census shows an increase of children of school age of seven hundred and ninety-nine, an addition of nearly five per cent. to that of last year.

The school libraries are, as a rule, in a flourishing condition. Every district, with a single exception, has availed itself of the terms of the State law in this respect. The number of volumes (exclusive of libraries in cities) is over four thousand. Number of books purchased during the year, over three hundred. Number of books taken out,

nearly nine thousand ; clearly indicating that the pupils are making a good use of the opportunities afforded them. The habit of reading good books, acquired in early life, has a strong influence on the future of a boy or girl.

The observance of Arbor Day is very general in the county, the extent of the programme varying much with the size of the school, the principal features being appropriate literary exercises and the practical work of planting trees and shrubs on the school grounds or at the residence of some one in the district.

There has been more change in teachers for the coming year than for a long time. It is with great regret that we lose three of our leading Principals. Two, Mr. Town, of No. 4, and Mr. Armstrong, of No. 25, who have given many years of faithful service to their districts, have found more lucrative situations in cities ; the other, Mr. Chapman, of No. 19, leaves the school-room, after successful work for four years, to enter business.

It is a high tribute to these gentlemen to know that their respective Boards of Trustees had re-engaged them for the year and very reluctantly consented to their release. The influence of such men reaches beyond the immediate sphere of their labors and the whole county suffers a loss when they go elsewhere. It is a duty and a pleasure to me to speak in praise of their work and to know that their services were highly appreciated by those most competent to judge—their co-workers and the community they served.

There is an increased demand for teachers who have received a Normal School or college training and, in addition, a considerable experience. The sentiment prevails that it is wise and profitable to pay well for professional training and successful experience, and where the conditions will admit this idea has been put in practice. More teachers having a normal education have been appointed for the year just commencing than for years before.

The regular quarterly examinations for teachers' certificates have been held in accordance with the School law. The number of first grade certificates granted was six ; second grade, five, and third grade, twenty-seven. My associates on the Board of Examiners were Mr. I. P. Town, Principal of No. 4, South Roselle, and Mr. E. A. Chapman, Principal of School No. 19, Summit. By the courtesy of the Board of Trustees of District No. 10, Westfield, the examinations were held in that school building.

In addition to the visitations and examinations prescribed by the State Board of Education, an annual written examination of the pupils is held in each school in the month of June. Questions are prepared covering the three grades in the course of study adopted for the county, and examinations on the same grade and subject are held in each school at the same time. While this involves a large amount of work in preparing and circulating the questions and necessary

schedules for tabulating the results, as well as a considerable expense in printing, postage, travel, &c., it is believed that it is all more than balanced by the good derived from it. The interest manifested by the Principals and teachers and the assistance rendered by them in this work is gratefully acknowledged.

As the result of the examination two hundred and seventy-eight primary and grammar certificates were given to those who attained an average of seventy-five per cent. in these grades, and fifty-seven diplomas awarded to those who had completed the High School course.

During the year the Teachers' Association of the county has held its regular quarterly meetings. This association is a voluntary organization for the purpose of receiving information in the latest and best methods of teaching from experienced instructors, for conference in school matters, and to promote sociability among the teachers of the county. The meetings have been unusually interesting and instructive.

In conclusion, I may add that the general interest in the schools is very gratifying, and that the year's work has been fairly satisfactory and the outlook for the future encouraging.

WARREN COUNTY.

ROBERT S. PRICE, SUPERINTENDENT.

Hon. E. O. Chapman, State Superintendent :

I most respectfully submit my annual reports of the public schools of Warren county, for the year commencing September 1st, 1890, and ending August 31st, 1891. It is with much satisfaction that I state the year has been one of encouragement, but the progress made has not been all that was desired.

Teachers and school officers have all heartily co-operated with me, and from the generally increased interest in education, we have good reason to hope for more rapid advancement in the future.

Very many of our schools made ten months, and none less than nine, the time required by law. The average time made was nine and sixty-four hundredths months.

The total amount of money expended during the year, as my statistical report shows, was ninety-seven thousand six hundred and forty-five dollars and seven cents (\$97,645.07), of which the teachers received fifty-eight thousand five hundred and forty-seven dollars and five cents (\$58,547.05). Amount expended for building and repairing, \$28,294.21; for fuel, \$3,991.40, and for incidentals, \$6,812.41.

The total number of teachers employed during the year was one hundred and fifty-five; forty-one males at an average salary of \$53.84, and one hundred and fourteen females at an average salary of \$33.45. This is an increase of salary over any previous year, but the small increase of salary is not equivalent to the advancement made in the efficiency of the teachers. Teachers are beginning to regard their work in the true light of an honorable profession, and, by careful reading and close study, preparing themselves for it.

The erection of new buildings, and the improvement of the condition of our school property, deserve to be mentioned. Phillipsburg has almost completed a very large and handsome building, at a cost of about \$30,000. At Belvidere they have their new building finished and ready to be occupied. The building is not large, but is one of the handsomest and most convenient buildings in the State, costing about \$20,000. A new building was erected at Hughesville, District No. 2, at a cost of \$3,000. The increase of the number of children in this district demanded a larger and better building, and through the efforts of Charles Bachman, Clerk of the district, and others, the money was appropriated, and a good, substantial building, with two apartments, was completed and nearly ready to be occupied at the commencement of this school year. Two teachers have been employed for the first time in this district, and we hope to make the school one of the best of its size in the county. District No. 13, seeing that the five adjoining districts had within the past three or four years erected new buildings, was moved with the same spirit of enterprise and completed a new building and furnished it in time to be occupied by the school September 1st. Many other districts made needed repairs, and some of them refurnished their buildings during the year. We have a right to be proud of the progress made in the improvement of the condition of our school buildings, and, except in one district where the people cannot agree upon just what is best to be done, there has not been a meeting called in the county for several years, for the purpose of appropriating money for new buildings, without it has been harmonious, and in nearly every case the amount recommended by the Board of Trustees appropriated.

We held our institute jointly with Morris and Sussex counties, at

Morristown, December 10th, 11th and 12th. There were about 450 teachers present, and all the teachers in Warren, except four or five who were excused on account of sickness, were present.

Our annual Arbor Day circular was issued and the day was generally observed by the schools with appropriate exercises. Many trees were planted and exercises of an entertaining and instructive character were held in the school-rooms, to which the parents and friends of the schools were invited.

The regular quarterly examinations of teachers were held as the law directs. There were 226 applicants for certificates, of which number 156 received certificates and 70 were rejected. Certificates were issued as follows: First grade, 10; second grade, 33; third grade, 113.

The following items of interest are taken from my statistical reports: Total amount of school money received from the State, apportioned May, 1891, \$60,310.41; amount received from State tax, \$57,848.85; amount from State appropriation, \$2,461.56; amount apportioned to districts numbering less than forty-five children, \$275; amount apportioned to districts numbering from forty-five to sixty-nine children, \$375; rate per child in districts receiving more than \$375 each is \$5.20; total number of districts in the county, 89; number of districts receiving \$375 each is 41; number of districts receiving more than \$375 each is 29; number of districts receiving \$275 each is 19; number of children of school age in the county May, 1891, 10,130; value of school property in the county, \$261,200.

We have passed another quite successful year and have endeavored faithfully to perform our duties, but the longer we serve the educational interests of the county the more we realize how much there is to be done, and have resolved at the commencement of this school year to accomplish more than we have during the one just closed. We hope that the time will soon come when every child of school age in the county will become enrolled in our public school registers or attend some private institution of learning.

REPORTS OF CITY SUPERINTENDENTS.

ATLANTIC CITY.

C. J. ADAMS, SUPERINTENDENT.

Hon. E. O. Chapman, State Superintendent :

I hereby respectfully present my first annual report of the public schools of Atlantic City, N. J.

The schools of our city through the intelligent and ceaseless efforts of the Board of Education, backed and applauded by a generous public and aided by a corps of earnest and faithful teachers, present their present proportions and efficiency. Many difficulties have been overcome during the past year and the sentiment of our city now is to maintain and perpetuate a vigorous system of public instruction ; the feeling that the masses shall receive at least a practical education was never stronger and I therefore feel assured that the taxpayers will approve liberal appropriations for the cause of public instruction.

The work of the past year has been in a high degree satisfactory, though some radical changes were made at the beginning of the school year. The spirit and efforts of the teachers to meet the new order of things have been very commendable. The aim throughout the year's work has been to secure accuracy and thoroughness.

Much interest has been aroused and considerable progress made in music during the last several months of the school year. The teachers are impressing it upon the pupils that as music is one of the prescribed studies of the course, careful attention and study must be given to it. They cheerfully co-operate with the special teacher, who has shown herself most faithful in her efforts to bring up and advance this department of our schools. We are much pleased with the proficiency of some of the primary classes in music, and as time goes on and primary work advances we hope to see excellence in musical attainments a prominent feature of our public schools.

Our schools in all departments have shown a steady improvement. The school buildings are convenient and well ventilated. The attendance greatly increased over former years. The discipline has been as

satisfactory as could be expected with the serious drawback of overcrowding, especially in the lower grades. These obstacles have already been set aside for the coming year by the building of additional rooms (twelve in number), thus affording ample opportunity for convenient organization, and by addition to the corps of teachers, when we shall have no excuse for not doing the best possible work.

BRIDGETON.

WILLIAM EDWARD COX, SUPERINTENDENT.

Hon. E. O. Chapman, State Superintendent:

DEAR SIR—I herewith present my annual report of the schools of Bridgeton for the last year.

Soon after the opening of the schools in September an epidemic of diphtheria broke out in our city, being especially severe in the Second ward and in parts of the other wards adjacent to the low-lying mud flats along the creek.

The attendance at the schools most affected was very small, dwindling during the attendant scare among the people to as few as eight in some of the rooms. Our local Board of Health took prompt measures to eradicate the disease, being particular to have its physician visit the schools to examine the children, so that the first stages of the complaint might be noticed. Happily, after a time, the disease ceased spreading and our schools again became well attended.

We have allowed another year to go by without having secured any additional school buildings. We are lamentably lame in this particular. In our Second ward, according to our last census, taken in May, we have, between the ages of five and fifteen, an excess of 225 beyond the seating capacity of the school-house in that ward.

In the First and Fourth wards combined, between the same ages (five and fifteen), the excess beyond seating capacity is 144; and in the Third ward something over 50.

According to these figures the greatest need is for an additional house in the Second ward. The greatest demand, as expressed by the people, is in the Third ward, we being obliged to send some of the secondary pupils of that ward into the Fourth ward, an arrangement which did not prove very satisfactory, and which we discontinued at the end of the year, and have now adopted the miserable expedient of

sending the children half a day at a time. Inasmuch as the Third ward had 93 pupils last year in private schools, which number is more than the rest of the city combined with 20 to spare, the citizens of that ward feel that their demand for further accommodations is well founded.

The fault for this condition of affairs lies with the Board of Education primarily, and secondarily with our City Council. At one time when the Board of Education had requested the Council to build additional facilities in the Third ward, the Council allowed the minority of the Board to befog their minds on the question and to commit themselves to a scheme so impracticable that the Board at its next meeting could not adopt it. However, at the present writing a proposition is before the Board to request Council to build in each of two wards, which I trust may receive the unanimous support of the Board.

Last October, during the last days, our teachers all went to the institute at Cape May. I said all; there was an exception, in one teacher, who was compelled, because of sickness at her home, to ask an excuse. We had a pleasant time. I wish I could truthfully indorse all that was given in the way of instruction, but I cannot. The teachers of Cumberland county are too intelligent and too hungry for real practical methods in school work to feel satisfied in being merely entertained. Some of the work at the institute was excellent.

We inaugurated monthly teachers' meetings during the year, which, while not being entirely as satisfactory as was desired, still were in the direction of right. Heretofore these meetings were simply an impossibility, now they are possible. I hope during the coming year they will take good root and flourish.

Arbor Day exercises were held at each of the schools—that is, so far as the literary exercises were concerned. We were obliged to omit the tree-planting, as our yards were well filled, and no suitable place could be suggested. Our local agricultural society has just purchased and occupied a new location. I have written the Executive Committee requesting the favor of having them reserve a portion of the ground for planting trees by the public school children. I trust we may have a favorable reply. To Rev. C. C. Tilley, who addressed the children of the Third ward; to Rev. John Handley, who spoke at Bank street; to Rev. P. Provost, who assisted at North Pearl street, and to Revs. H. H. Beadle and J. B. Whitten, who kindly lent their help at the Second Ward School on Arbor Day, my thanks are due.

In reviewing the work for the year, while I feel disheartened at our failure to increase our school facilities, and for which there is no excuse whatever, I do feel encouraged as I contemplate the work our teachers are doing. As a whole we have a good, and efficient corps of workers, painstaking, keen, alert; they only need the more efficient co-operation of the Board to render their work still more practical.

ELIZABETH.

J. AUGUSTUS DIX, SUPERINTENDENT.

To E. O. Chapman, State Superintendent:

DEAR SIR—Although the necessity for additional school accommodations has greatly increased, we have not yet succeeded in securing them. A beginning, however, has been made in the old Eighth, now Sixth ward, and steps are being taken to obtain title to a plot of land. A special committee of the Board of Education, appointed in February, 1891, reported the following month. After stating how many children had attended the Grier Avenue School, and how the work was growing, the report proceeded as follows:

"The building in use is not at all adapted for school purposes; it is not large enough to properly accommodate the children now in attendance. The ventilation is poor and in some rooms the air is foul and heavy, and it is impossible to prevent this, as there are not cubic feet of air enough for so many children to breathe.

"In view of these facts, the committee feel justified in recommending a new primary school building for that part of the city, the cost not to exceed twenty thousand dollars (\$20,000). There is no question among those who have carefully looked into the matter, that a new building would not be at once filled to its utmost capacity."

The report was referred to the Committee on Sites and New Buildings, with instructions to report a site, which they did April 23d, selecting a plot on Grier avenue 100 x 200 feet in size. This land is held by the city under the "Martin Act," and the City Attorney has been directed to take the necessary steps to vest the fee in the city for school purposes. This, however, will take some time, and meanwhile we must do the best we can with the poor substitute now doing duty for a school-house. Last year I stated that we needed at least two new primary schools besides the Grier Avenue School and the need is daily becoming greater, the school census of 1891 showing an increase of five hundred and one (501) in the number of children of school age. The report of the Secretary of the Board, who acted as census-taker, is as follows:

To the Board of Education :

ELIZABETH, N. J., June 3d, 1891.

GENTLEMEN—As census-taker, I herewith submit the following report :

DISTRICTS.	Between 5 and 18 years of age.													Total in year 1890.	Increase.	Decrease.	Number of children attending private school.	Unvaccinated.	Under 15 employed in factories or stores.	Attending no school.

Respectfully submitted,

W. H. RYAN.

By comparing these figures with the reports made to me by the Principals, it is apparent that the census is erroneous in respect to the number attending private schools or the number attending no school, or in respect to both, for the census shows ninety-seven hundred and eighty-four children of school age, and the Principals report forty-seven hundred and forty-six of like age enrolled in the public schools, leaving five thousand and thirty-eight for private schools and no schools, or eight hundred and twenty-six more than the census shows, the sum of these two items in the census returns being but forty-two hundred and twelve. As the number of those reported as attending private schools agrees closely with the returns of previous years, I am inclined to think that the great error is in respect to those attending no school. Assuming that the census is correct in its totals and in the number attending private schools, the number of children between five and eighteen years of age who attended no school was twenty-seven hundred and fifty-five, or about twenty-eight per cent. of the whole number of children of like age in the city.

If, however, the census is correct in this item, there were nineteen hundred and twenty-nine attending no school or nearly twenty per cent. In either case, it is evident that the public schools are not doing the work they should, and they cannot do it until we have additional buildings.

There were sixteen graduates from the Battin High School in June, 1891, eight from the Normal Training Class, and seventy-nine from the four grammar schools. The High School Commencement was held at the Opera House, an entrance fee being charged, as was the case last year.

Through the influence of Mr. Elias D. Smith, formerly City Superintendent, a valuable geological collection, numbering over five hundred specimens, belonging to the estate of Edward R. Kellogg, deceased, was presented to the Battin High School last spring. These specimens were collected some years ago under the supervision of Professor Cook, late State Geologist of New Jersey, while Mr. Kellogg was a student in the Troy Polytechnic Institute. They include fossiliferous rocks of all ages; an orthoceras two and a half feet long, brachiopods, trilobites, corals, crinoids, ganoids, &c. There are also many fine specimens of minerals and metallic ores. This collection will be helpful to the students, and it is hoped that the example thus set may stimulate others from time to time to give to the school natural and scientific objects that can be used to illustrate the various studies pursued.

In the spring we received the medal awarded the Elizabeth schools at the Paris Exposition, and also the diploma of award, to which reference has been made in previous reports.

At the end of the school year, Miss M. E. Habberton, who has been in charge of the department of industrial drawing, and also manual

training, while a part of the course, resigned her position, taking a similar one in Orange. Miss Habberton had been in the employ of the Board for seven years, and her excellent work has frequently been referred to in my previous reports. It had given our schools a reputation far beyond our borders. Her successor, Miss Ora Royce, comes to us from the schools of Wilmington, Delaware, and we have every reason to expect a continuation of the good work in this department.

It is intended to have the regular teachers instruct the pupils in drawing under Miss Royce's supervision, and as many of them were not prepared to do this, they are now being instructed by her so as to fit them for the work.

As stated last year, manual training was dropped from our course of study in February, 1890, but in September of this year it was partly restored, carpenter work, wood-carving and cooking being, however, omitted.

From the reports made to me I make the following extracts:

BATTIN HIGH SCHOOL—MISS L. H. SAYRE, PRINCIPAL.

* * * "In some departments the work has been the same as last year, in others additional work has been done. In geometry it was found practicable to add one more book, the class thus taking five books of Davies' Geometry instead of four. This has been easily accomplished, original work having been done besides that of the text-book.

"Geology during previous years has not been taken up until the first of January; this year it was begun in September and the final examination held in January. The gift of about five hundred minerals from the estate of Mr. Kellogg was greatly appreciated and will be of value in connection with this branch.

"Chemistry was begun the first of February and continued to the end of the year; this gives but a short course, but it is all the time that can at present be devoted to it. The subject was taken up experimentally, the pupils performing many of the experiments. In all departments the pupils are encouraged, and as far as possible required to do personal work. * * *

"In order to place our school on the 'approved list' of the State, by which pupils can enter the State Normal School without examination, bookkeeping and Latin are required. The former is on the course for the grammar schools, but is only carried out in regard to making up certain forms. This might be introduced twice a week in the third class, in place of the review in arithmetic, which we have found necessary, but as our course is three years instead of four, as in most of the High Schools, it does not seem possible to introduce the Latin at present." * * *

SCHOOL NO. 1—MR. B. HOLMES, PRINCIPAL.

* * * “Beyond the regular grade laid down in the course of study adopted by the Board of Education little has been attempted more than the previous year. In fact, the past year has been so seriously broken in upon by resignations and continued ill health of teachers, whose places were in many instances filled by substitutes, that plans for new or extra work had to be very much modified or entirely abandoned.

“The idea of giving the most essential requisites of a common-school education—and that the most practicable possible—to the pupils in the primary grades, which was mentioned at some length in my report last year, has been more forcibly impressed upon me during the year just closed. The great mass of pupils in manufacturing communities must get what school instruction they have in the primary and lower classes of the Grammar Department. The fact that of more than 1,200 pupils, 1,048 were between six and fourteen years of age, sixty-seven being under six, and less than a hundred over fourteen years, shows that what is to be done for the many must be accomplished before they reach the latter age.

“With this fact in view, we have continued the special effort to do all that was practicable in this direction in the classes in those grades.

“Kindergarten work has been continued in the lower classes of the primary grades, but nothing new has been added in this branch during the year.

“Elementary business forms in connection with arithmetic have been introduced in the primary classes lower than heretofore, giving particular attention to spelling, use of capitals, punctuation, &c.

“The plan of supplementary reading has been continued in a large number of classes with good results, with the direct purpose of improvement in the branch, and at the same time gaining a knowledge of special subjects—science, history, literature, &c. Some classes have made a great gain in this respect over former years.

“A new and general interest in geography has been awakened by the use of progressive map-drawing. This subject is not by any means new, but from a regular application of what has been learned on the subject (daily or weekly) to a well-prepared plan, has proved useful and interesting to the pupils and helpful to the teacher.

“The larger proportionate number of children in the lower than the upper classes, though somewhat lessened by the new Primary School No. 5, still continues to a large extent. This fact of itself makes it the more difficult to add any new feature to the details of the course of instruction, every moment being needed to cover the essentials of the course to make the best possible preparation for the early promotion which is certain under existing circumstances to come.”

SCHOOL NO. 2—MR. N. W. PEASE, PRINCIPAL.

* * * “During the entire year more attention was given and more diligent effort made in training the classes of the Primary Department thoroughly, as that always insures an efficient Grammar Department. Too much stress cannot be laid upon this fact. Everything calculated to awaken curiosity, gain and hold the attention, has been employed by the teachers. Pupils have been trained to observe, compare, think and judge for themselves, as far as possible. The aim has also been to inspire confidence in themselves and in their own powers, and to lead them to give expression to their ideas with ease and facility, either orally or by writing, or with pencil and paper and scissors.

“Language is fundamental and expression a primal need and delight to the child. There is a language of form. Form study (often called by another name) cultivates, broadens and strengthens the powers of the child. To produce to a nicety something akin to the conception in his mind or similar to an object placed before him cultivates expression wonderfully and disciplines him as well. The ideographic system of the ancient Egyptians and Assyrians was neither a myth nor a mistake. There was sound philosophy and real culture in it, as well as true and forcible expression, a single symbol or sketch perhaps conveying the history of an epoch or a dynasty. Thus in form study the child gathers and combines many ideas in a single object produced by his thought, effort and skill. Hence paper-folding, simple designing, paper-cutting and the like have been employed with discretion.

“Again, all new words coming up in class work daily were put to practical use at once—that is, pupils were required, by their own thinking, to form correct statements with those words in them. The value and utility of this practice we estimate highly.

“Further, items of general interest, current news and events were introduced in each class daily and discussed generally. Pupils were encouraged to search for, inquire about and bring something interesting alike to teacher and class. Only a few moments were allowed each day for this purpose, but we found the practice imparted interest, enjoyment, breadth of view, general information and culture even to the dullest pupils. When anything on this line was brought up which proved to be of more than ordinary interest all the class was instructed to tell about it on slate or paper. The next morning the teacher would say, “Let us have perfect lessons to-day, and save time to hear what you have written.” It is needless to enlarge. The pupils always did their parts eagerly and well.

“Much attention was given to reading, and careful training employed, so as to lead the pupils to give true expression to ideas and

thoughts. We aimed high in this direction, and though we did not attain the standard desired, still we have a good measure of satisfaction as to results.

"In teaching number, our methods and practices have been such as are commended by our most advanced educators.

"In the study of geography we have made decided changes in all classes of both grades. There has been too much aimless, senseless, desultory study of this branch in schools generally—an entire lack of system. To remedy this a complete outline of the subject has been prepared by topics, and pupils are required to search for, and to collect items, facts and truths relative to a division, a country, a State, or a group of States for himself, thus systemizing his work and rendering his knowledge permanent and comprehensive as well. Rapid sketching and careful map-drawing from memory have also been practiced the same as for many years past. We thoroughly believe in that sort of work.

"Language or grammar has been taught synthetically with some analysis and parsing. To construct quickly and correctly proves that the pupil understands grammar practically at least, and that is what he needs. Correction of false syntax, save such as occurs often enough in the school-room, we did not practice. The average pupil will employ plenty of solecisms without placing specimens before him.

"The topical method has been employed in history, and the connection of history with geography, and geography with history carefully noted.

"The Grier Avenue Annex consists of only three classes of the primary grade, and four teachers employed.

"The total enrollment for the year was nearly two hundred. Two of the teachers had never taught prior to September, 1890, but they performed their duties most satisfactorily. Through the careful management of Miss Whitney, who had charge of the school, the year's work proved fairly successful. The need of a new and well-appointed school building was deeply felt by all, and is still."

SCHOOL NO. 3—MR. W. D. HEYER, PRINCIPAL.

"The school opened September 8th, 1890, with about the usual number of scholars, and the average attendance has been fair throughout the year.

"The progress has been good in all the classes, and the interest manifested by both teachers and pupils in the work of the school has been very gratifying.

"In rooms 1 and 2 the classes are in two divisions, one division attending in the morning, and the other in the afternoon. These divisions differ slightly in grade. A half day's schooling appears to be sufficient for these little children.

"If it should be desired to give them whole-day sessions, four additional class-rooms could easily be made by extending the building in the rear.

"All the classes have been kept fully up to the grade, and the number promoted from each class has been over ninety per cent. of the whole number in the class. In the graduating class all the scholars, except one, who took the Superintendent's examination, passed. They will not all enter the High School, however, as some prefer to attend other institutions."

SCHOOL NO. 4—MR. W. F. ROBINSON, PRINCIPAL.

"There seems to be but one feature in our year's work that needs special comment in this report, as all other important matters have been given more or less attention in the past.

"When manual training was in operation in this school I felt that our course of study needed but one additional subject to place us where we could justly compete with neighboring progressive cities for recognition in the pedagogical evolution that is sweeping over our land. While the hand and eye were being trained to a high degree of perception, the *ear* was largely neglected. Among the senses the ear ranks next to the eye as a source of knowledge, and a fine discrimination can be reached only through a well-directed course in music. With this in mind I have been able, through the earnest efforts of Miss Jones, to have music taught in three of the primary grades. She has used the Holt system, and the children were taught to sing the intervals of the major scale. They can sing at sight short exercises in common $\frac{2}{4}$, $\frac{3}{4}$ and $\frac{3}{8}$ time, using whole, half, quarter and eighth notes and rests. I shall not attempt at this date to trace the effects of these lessons into the other work of each child, but for the present simply add that it is our purpose to continue these lessons next year and carry them into a larger number of grades, if possible. Miss Jones deserves our highest commendations for this work, which was entirely voluntary on her part and without compensation."

SCHOOL NO. 5—MISS L. E. BRAUN, PRINCIPAL.

* * * "The course of instruction has been closely followed in all grades and with better results than were obtained the preceding year.

"In reading more time was given to phonetics and vocal gymnastics. Supplementary reading was also extensively taken up.

"In arithmetic no material change was made in methods of teaching. The full grade was completed in each class.

"In the lowest grade where geography is taught (without text-book), Geographical Readers were introduced and proved so satisfactory that the second book of the series will be used in the upper classes in connection with the text-book the coming year. * * *

"The kindergarten work was very extensively and thoroughly taught, both by the First Assistant and the teacher having the overflow from room 1.

"As the average attendance in room 1 was seventy-seven for the year, and during several months over eighty, I consider the work accomplished remarkable. The following occupations were taught:

"1. Network drawing. 2. Pricking and embroidery (outlines and original designs). 3. Stick-laying. 4. Paper-folding. 5. Paper-cutting. 6. Peas work.

"Paper-folding, paper-cutting, network drawing were also taken up in the fifth and fourth classes."

SCHOOL NO. 6.—MISS M. E. PARROT, PRINCIPAL.

"The school year just closed has been a very pleasant one. I appreciated at the start that it would be a year of hard work. It has been, and yet I have received such hearty support from my teachers that it has been a pleasure to work with and for them.

"We have tried during the year to put our school in what we call good working order. Our efforts have been expended in trying to so systematize our work that we shall be a unit. As we had so many scholars from private schools, who had been advanced in some one branch to the sacrifice of others, we found the grading particularly difficult and have been obliged to change the children from room to room. Next year we will not have that to contend with and can begin regular work the first week of the term.

"Looking at the school *as a whole*, I consider the order has been decidedly above the average. I think the teachers are interested in the subject they teach. I have heard during the year lessons given in each of the classes, and, for young teachers, the masterly way in which some have treated the subjects is remarkable." * * *

DRAWING.—MISS M. E. HABBERTON, INSTRUCTOR.

"The work of drawing in the grammar and High Schools has been conducted in much the same way during the past year as in previous years, with results in nearly all the classes even more satisfactory than heretofore.

"Coloring, introduced in the High School in 1889-1890, has been continued with increased interest, and has been taken up by some of

the first and second grammar classes voluntarily, with such out-of-school assistance as I could give, and with results that would be creditable had instruction been given in the regular way.

"The only work that has not been entirely satisfactory has been that of some of the primary classes where the instruction devolved upon the regular class teachers. This is in no way a reflection on those teachers, but is the inevitable result of requiring from them a kind of work for which they have not been prepared and which in many cases they do not understand. My time has been so crowded that much of the instruction and supervision I have given them has of necessity been out of school hours.

"I must add that they have, almost without exception, shown a cheerful willingness to do the best in their power, and many of them have succeeded admirably.

"To have the primary work so conducted as to lay a proper foundation for what follows, either the classes should be taught by a specialist, or opportunity should be given the teachers to receive such instruction as will enable them to give the lessons satisfactorily."

HOBOKEN.

DAVID E. RUE, SUPERINTENDENT.

To the Honorable E. O. Chapman, State Superintendent :

No radical changes have been made in the school department of this city during the year past. The Evening and Normal Schools, which had been discontinued, were again opened. Large numbers availed themselves of the opportunity for evening instruction. At the examination in November thirty (30) pupils of the Normal School received teachers' diplomas.

The opening of the new school has relieved to a great extent the strain of overcrowding on the other schools. It has necessitated the redistricting of the whole city.

School No. 4 has been made a primary school, and Mr. Alexander Musgrave appointed as Principal.

An assistant teacher has been added to the drawing department. Music continues to be taught in the schools with good results.

THE HIGH SCHOOL.

The total enrollment in the High School for the year was one hundred and seventy-six (176), a considerable increase over preceding years. This increased attendance has been provided for by the formation of a new class and the appointment of a new teacher, Mr. E. H. Kiernan, a graduate of Stevens Institute. The grammar department of School No. 4 having removed to the new school, the High School now occupies the top floor of the former building, which gives much needed class-room facilities and makes possible a general assembly each morning. The graduating class of 1891 held its commencement exercises in the Hoboken Opera House on the evening of June 23d. An excellent programme was rendered, forty-two pupils receiving diplomas. This school is growing and the coming year promises to be a prosperous one in its history.

TEACHERS' MEETINGS.

The regular teachers' meetings are held on the second Wednesday of each month. They have been characterized during the past year by attractive programmes and renewed interest. The Manual makes attendance on them compulsory. While it cannot but be admitted that if the attendance were purely voluntary it would not be so large as it is, still the attitude of the teachers towards these meetings has changed during the past few years decidedly for the better. They are beginning to esteem them at their proper value, which consists not only in the entertainment derived from them but also in the instruction received from addresses on various educational topics and the mutual help derived from discussion of educational methods.

SCHOOL NO. 6.

The problem of accommodating the school-going population of Hoboken, has been partially solved by the addition of the new School No. 6, which was opened on September 8th, 1881, with appropriate ceremonies, consisting of music, addresses by the Mayor, President of the Board of Education, and other gentlemen.

This building is situated at the corner of Eleventh street and

Willow avenue. The cost of its construction, exclusive of the land, was over \$100,000. Architecturally, and in regard to its sanitary arrangements and general equipment, it is all that a modern school-house should be. The building is three stories high, with a basement, a part of which is used as a playground, and a part containing the heating and ventilating apparatus. The first floor, in which is the primary department, has nine class-rooms. Two of these rooms are separated by sliding partitions, making a capacious assembly-room for the primary pupils. The second floor contains seven class-rooms, and one assembly-room, 48 by 60 feet. The third floor contains the same number of rooms, including also an assembly-room of the same size as that on the second floor. Each of these assembly-rooms will seat 500 people. The ceiling of the third-floor assembly-room is 18 feet high, lighted by gas-chandeliers, and makes a most comfortable lecture-room, to which use it is expected to be put in the future. Each class-room in the building is 23 by 33 feet, and 14 feet high, and seats about 50 pupils. Each room has a clothing-closet. The teachers' and pupils' desks are of the most approved modern fashion. Light is admitted into each class-room through three large windows. It is so arranged that in no case does the light flash into the pupils' eyes, but is always over the left shoulder. There is a teachers' room on each floor. The Principal's room is on the first floor, and from it electric bells and speaking-tubes lead to each of the class-rooms. The ceiling of the building throughout is of embossed sheet steel. The floors are all double. The corridors, running from one end of the building to the other, are 8 feet wide. At the ends of the corridors are iron stairways for the use of the pupils. Teachers and visitors use the main entrance and main stairway, which is wooden. The heating is done on the indirect radiation plan. On the coldest days the temperature can, without any extra effort, be made 70 degrees Fahrenheit, in any part. As to ventilation, each room has four outlets for foul air, two at the top and two at the bottom, with large registers controlled by the teacher. All the windows have fan-lights above the transoms, allowing the ingress of fresh air, and arranged so as to prevent drafts. The air in the water-closet rooms is purified by draft-flues, which are heated by the smoke-flue leading from the large boiler fire. There is also a small boiler, which supplies steam for a five horse-power engine which runs two fans in the tower. These fans pump out the foul air, which is conducted from all the class-rooms by flues, to a space between the pitched roof and upper ceilings, extending over every part of the building. There can be no failure or mistake in this method of ventilation; being compelled by positive power, it must act. The outside appearance of the school is imposing and attractive. Philadelphia front brick is judiciously combined with Belleville brownstone and terra-cotta. The main entrance is through a massive arch. There are two large play-

grounds, which, with the sidewalks, are covered with hard, smooth concrete. The building is inclosed by a substantial iron railing. The architects were Messrs. Beyer & McCann, a firm of this city.

A statement of the condition of industrial education in this city, will be given in the separate report by the Board of Trustees to the State Superintendent.

PATERSON.

O. M. BRANDS, SUPERINTENDENT.

Hon. E. O. Chapman, State Superintendent :

DEAR SIR—I respectfully submit the following report of the schools of this city in addition to the usual statistics called for by your office :

NUMBER OF TEACHERS.

Number of Principals.....	15
Assistant Principals.....	1
Number in Normal and High Schools.....	19
Number in the grammar departments.....	35
Number in the primary departments.....	160
Teacher of drawing.....	1
Instructor in woodwork.....	1
Total number of teachers (15 males, 207 females).....	222

POPULATION, ENROLLMENT AND ATTENDANCE.

Population of Paterson by census of 1890	78,347
Whole number of children between the ages of 5 and 18 years in the city, May, 1890.	22,094
Whole number enrolled in the day schools during the year.	12,603
Whole number enrolled in the evening schools during the year.....	2,711
Total number enrolled in all the schools during the year.....	15,314

Average enrollment in the day schools during the year.....	9,132
Average enrollment in the evening schools during the year.....	582
Average enrollment in the evening schools for three months.....	1,941
Average attendance in the day schools during the year.....	7,944
Average attendance in the evening schools for three months.....	1,102
Number enrolled at date (Feb. 27th) in day schools.....	9,189
Number of seats at desks in the schools.....	9,198

ENROLLMENT BY GRADES OF THE SCHOOLS AT DATE.

	Enrolled.	Per Cent.
Normal Training Class.....	30	0.33
High School.....	268	2.92
Grammar schools.....	1,384	15.06
Primary schools.....	7,507	81.69
Total present enrollment in day schools.....	9,189	100.00

NUMBER OF CHILDREN BETWEEN THE AGES OF 5 AND 18 YEARS ACCORDING TO SCHOOL CENSUS, MAY, 1890.

1st Ward.....	2,609	5th Ward.....	3,100
2d ".....	2,597	6th ".....	1,070
3d ".....	3,297	7th ".....	2,443
4th ".....	2,148	8th ".....	4,830
Total.....			22,094

Total cost per capita on average enrollment, \$14.74 ; total ordinary expenses in day schools, \$132,633.52 ; per cent. of average number enrolled attending, 87.

SUMMARY.

Total cost of day schools.....	\$134,633 52
Total cost of evening schools.....	3,834 91
Salaries not charged to schools.....	3,200 00
Sundry other expenses not charged to schools.....	3,667 08
Total expenditures of Board of Education on current account...	145,335 51
Expenditures on permanent account.....	2,500 00
Total.....	\$147,835 51

SALARIES.

During the past fiscal year two noteworthy amendments were made to the schedule of teachers' salaries. Prior to recent amendment, teachers in the grammar department, other than head assistants, were paid \$500 per year during the first four years of service in that department, and increased to \$550 per year, the maximum, at the beginning of the fifth year. As the highest-grade primary assistants received \$550 per year at once, there appeared to be an unfair discrim-

ination against grammar assistants, in that they were required to serve four years as such before being entitled to a salary equal to that of the highest-grade primary teacher. On the recommendation of the Committee on Teachers, the Board at the regular meeting in February, amended the schedule as follows: That on and after April 1st, 1891, all assistants in the grammar department, except head assistants, who shall have served six months in said department, and whose success and efficiency shall thereupon be attested by Principals and the Superintendent, shall be paid at the rate of \$550 per year. The adoption of this rule gives to *successful teachers* an increase in yearly salary of \$50 three and one-half years sooner than under former schedule. As a large majority of the teachers in the grammar department were already receiving \$550, having taught four or more years, the increase practically affected a comparatively small number who have been appointed more recently.

At the same time the schedule was amended so as to provide for the payment of the maximum salary paid in the primary department (\$550) to kindergarten teachers who, after five years' service in that grade, shall have been recommended as successful by the Superintendent; meantime the salary of kindergarten teachers during the intervening years remains as fixed by schedule formerly adopted.

For special explanation and comment upon the increase in salaries thus made, I refer you to other pages and topics of the present report.

It will be noticed that the increase in salaries thus provided for is made dependent upon the efficiency and success of the individual teachers—in other words the salaries are graded, after a period of probation, according to success in teaching. The question here arises, what shall become of such teachers as fail to obtain a recommendation—whose efficiency and success will not warrant conscientious approval? It is true that the salary of such teachers would remain at the minimum—would not be increased; but if some teachers are indeed so inefficient, so unsuccessful, as not to merit the increase of salary thus provided, will their services to the schools be more effective, more valuable, at the minimum salary? Would not the service of any such be dear at any price, no matter how small? In short, would their services be desirable at all in positions in which they are unsuccessful? To the latter question the emphatic “No” must be accepted as the correct answer. Somebody disposes of the main question in the following words: “Grading salaries according to success in teaching is usually a failure, and boards of education should thoroughly understand what they are doing before undertaking the experiment. Either a teacher is or is not qualified to teach. Of course not all have equal abilities; this cannot be expected; but all teachers must eat and be clothed; the best as well as the poorest. If it is found after sufficient time that any teacher is indifferent in

teaching, and inferior in government, let him (or her?) be dropped and another put in his place; but if he is retained it would seem to be reasonable that he should have as good pay as others who have taught as long as he. Teaching ability cannot be improved by cutting down salaries. It should be either encouragement and improvement or dismissal."

As remarked in former reports, the compensation of female teachers in our schools has been increased from time to time, and on several occasions, until now their salaries compare quite favorable with those paid for similar service in other cities, except some of the largest. But male teachers—our Principals in general—have not been so fortunate. In only two or three instances, and then confined to as few individuals, has there been in many years even a slightly encouraging recognition of long and acceptable service through an increase in salary.

I trust that I need offer no apology for entering an earnest plea for a fair recognition of the just claims to which a principalship in these large schools is entitled. The salaries now paid are certainly very small when compared with those paid in similar schools in other cities, insignificant, of course, in comparison with those paid for principalships in still others. It is a question of position rather than of men. An important position demands ability which can only be obtained through proper compensation. Communities willing to pay the average compensation secure and retain the services of capable men.

CHARACTER OF APPOINTMENTS.

It will be seen from the foregoing that all vacancies have been filled by the appointment of graduates of our city Normal School, and that we are depending exclusively upon that institution to supply the talent, skill, &c., desirable in a corps of assistant teachers. That entire dependence should be placed on this source of supply is extremely questionable. Strict adherence to the policy of appointing only such assistants as are graduates of our local Normal Training School deprives our schools of the possible acquisition of the services of able and experienced teachers—of those who would take positions ready and able to take up the work effectively from the first entrance upon it, and with skill derived from training and experience in teaching already obtained elsewhere. In other words, we give the preference to untried and inexperienced appointees and depend entirely upon such to reinforce our teaching corps, awaiting the development, by experience and practice after appointment, of such skill as the individual may be capable of acquiring, and we close our class-room doors upon already-acquired skill and experience gained elsewhere. It must be evident that, while protecting the interests of our home grad-

uates, this policy deprives our schools of the services of not a few talented teachers who have merited standing in the profession elsewhere. I am aware that a similar custom prevails in the appointment of teachers in other cities having Normal Training Schools; but almost invariably the reports of Superintendents comment upon the manifest disadvantage to schools of the practical exclusion from appointment of superior teachers of experience and skill in special instances—*i. e.* when the local supply does not at the time meet the demand for skill. A community so rich in talent as to require no aid from beyond its local boundaries—which has facilities for the production and duplication *in every instance* of the best produced elsewhere—does not exist anywhere. It is improbable, not to say impossible, that from the available local supply a sufficient number of those who possess genius or aptitude can be had, and hence if not occasionally supplemented from other sources the efficiency of the corps must gradually but surely degenerate, and the character and quality of the instruction deteriorate accordingly.

While we can boast of as many bright young teachers in proportion to the numbers trained in our normal department as are produced under similar instruction anywhere, the number of such is not sufficient to meet reasonable demands for teaching talent. Especially is this the fact when discrimination is not strictly exercised in the selection from the available number of only those who are the best a practical “survival of the fittest.”

GRAMMAR AND PRIMARY SCHOOLS.

Owing to circumstances beyond my control, the revised course of study mentioned in former report was not put into effect at the time expected, and these schools have continued their work under the former course. Lack of funds to the credit of the printing account was the principal cause of delay in the promulgation of the revised course. It is now probable that it will be printed and introduced at the beginning of the school year in September next.

The result of the examinations of the schools during the past year shows substantial progress, especially in thoroughness of instruction. Especial pains have been taken to insist upon and impress the importance of solid work, and that no opportunity should be lost to give it that practical direction so necessary to those whose school time is limited to a few short years. It is very important that each grade shall perform its work so well that time shall not have to be taken to do the work of a lower grade in a higher one, thus throwing a burden upon succeeding classes. Care has been observed in promoting pupils, and a greater proportion of well-prepared pupils only have passed from grade to grade, the beneficial effects of which are being felt in higher grade classes.

Less than three per cent. of our pupils are enrolled in the High School, only about fifteen per cent. of them are to be found in the grammar grades, while eighty-two per cent. of all are enrolled in the primary department. From this it appears that an overwhelming majority of the people whose votes and influence are to direct our future local government are, through force of circumstances, restricted to the primary and grammar grades for their education; and, as has been said in the report of your Committee on Teachers, "Here, therefore, is an urgent appeal to those who direct educational affairs to appoint well-qualified and efficient teachers to these grades, and to retain no teacher for her own benefit when that benefit is inconsistent with the educational interests of a class of pupils." Truly the broadest charity should be exercised here. The stern necessities of life compel hundreds of early withdrawals from school, and hence every effort to secure efficient, intelligent teachers, and to secure thoroughness of instruction in the grammar and primary grades, should be sustained.

"Go home and prepare your lessons and then return to school and recite them" is a requirement that has been honored too long. Believing that much of the study and preparation of lessons should be had at school, under the active and intelligent guidance of the teacher, and that the preparation or study is not less important than the recitation, your Committee on Teachers recommended that pupils shall not be required to study more than one lesson per day at home. It is confidently believed that the progress of pupils will be more rapid, certainly more satisfactory, in having the personal supervision and direction of their teachers during the vital process, the gleanings of correct impressions and ideas from the printed page. And besides, if five hours of vigorous work per day is performed in school, the pupil need not—should not—be required to do much more out of school.

KINDERGARTEN NEEDS.

I desire to renew the recommendation made in my last annual report, that a trained kindergartener be employed to give at least one hour's instruction per week to the Normal Training Class. If the kindergarten feature in our primary instruction is to be fostered—and it should be—we must have the services of teachers who have had opportunity to become qualified to an extent sufficient to justify their appointment to kindergarten classes. This is a question the importance of which merits favorable consideration at a very early moment. Soon we shall be compelled to practically abandon kindergarten instruction unless the Normal Class can be caused to supply teachers fairly fitted to perform this special work. Already some of our most skillful kindergarten teachers have accepted promotion to higher grade teaching and higher salary. Unless, therefore, we train our

graduates for this work, or secure the services of others trained elsewhere, *and pay to such salaries that will justify their remaining in their kindergarten classes*, the kindergarten must suffer and languish from insufficient nourishment and care.

Since the foregoing was written the Board of Education has adopted a resolution increasing the salaries of the kindergarten teachers after five years' successful service, to be attested by the Superintendent, to the maximum salary (\$550) paid in the primary department. This is a most commendable measure, and makes it more than ever desirable that graduates of the Normal Training School should be specially instructed in kindergarten methods, and that only such graduates or other persons as have undergone a course of training in kindergarten work should be appointed to conduct kindergarten classes. The Board certainly cannot intend to offer such positions with increased salary to those unqualified for the service required, and it is not reasonable to suppose that it is intended to appoint unqualified persons and await the acquisition on their part of skill, which is a necessary factor at the beginning. I earnestly recommend that the Normal Class of the next school year, together with such of the class of the present year as desire it, shall be given instruction and practice in kindergarten methods and teaching; and furthermore, that neither a graduate of the Normal Class nor other person shall hereafter be appointed as teacher of a kindergarten class unless duly licensed for the purpose by the Board of Examiners. As the kindergarten has special need of competent teachers not less than the primary, the grammar, or the High School department, for each of which certificates are awarded to properly-qualified persons, it follows logically that there should be applied an equally satisfactory test of a teacher's fitness for service in the former.

PROMOTIONS TO THE HIGH SCHOOL.

In June last the usual second term or annual examination of the schools was held, and in all grades there was a noticeable and gratifying improvement in the scholarship of the pupils. It was apparent that both pupils and teachers had made efforts to accomplish the work of the various grades as thoroughly as possible. It seemed to have been realized that nothing short of painstaking work would be allowed to result in the advancement to higher grades, and this impression, once fixed, bore legitimate fruit—*i. e.* greater proficiency in the studies pursued, as indicated by the records of examination.

The examination of the candidates from the highest grammar grades for admission to the High School was conducted in the assembly-room of the High School under the personal supervision of the Superintendent, who was ably assisted by the head assistants of all the gram-

mar schools. The questions had all been carefully prepared by the Superintendent and were designed to make as thorough and as reasonable a test of the results of grammar school instruction as could be made through the instrumentality of a formal examination. The scope and difficulty of the examination may be estimated upon a perusal of the questions proposed and which are appended.

It will be recollected that special effort was made during the year preceding this examination to cause it to be distinctly understood that pupils must be well qualified to enter the High School, and that only those who, by effort sufficient to accomplish the work of the grammar schools, were found to be prepared would be advanced. At the examination preceding (June, 1889) many of the candidates were consequently rejected, not being prepared to take up the studies of a more advanced course, with the consequent dropping of studies in which proficiency had not been fairly-well attained. It is not improbable that this fact proved to be the stimulus required, for, on the completion of the examination in June last, it was found that of one hundred and seventy-three candidates only seven failed to qualify, and one hundred and sixty-six passed successfully.

Greater care had been exercised in the promotion of pupils in the grammar grades, and consequently those entering the highest grades were better prepared to perform the work and to accomplish it satisfactorily.

In referring to the failure of so large a number of candidates at the examination of the preceding year, (1889), I took occasion to make the following comment: "Although the failure to pass was a grievous disappointment to some of the pupils and to their parents, yet it would have been a moral wrong to advance these unprepared pupils, and I do not doubt that all concerned will have reason to rejoice that although failure was for the moment unpleasant, the ultimate outcome was the desired proficiency and success rather than further discouragement and failure after entering the High School." I am glad to say that pupils who previously failed have, at the last examination, acquitted themselves with great credit, and both they and their parents freely acknowledge the greater advantage for further progress arising from preparedness to take the next step.

HIGH SCHOOL.

A revision of the course of study for the High School has been made which adds arithmetic and penmanship—subjects which heretofore received no stated attention in that school. In other ways the course has been made more practical. It will require that more time be given to what may be called essential subjects which require the direct services and guidance of a teacher, and less time in school to

those subjects which, while desirable as tending to increase the general intelligence and cultivation of the pupil, are nevertheless of a nature that does not absolutely demand an equal amount of direct teaching time—school time—but can readily be pursued in spare moments by all who have a taste for historical reading and purely literary recreation. School time is too short and too precious to be occupied in any subject that can be pursued at leisure out of school, especially so when other subjects which cannot be so well pursued in that way demand attention because essential.

It is quite impossible to so extend a course of study as to embrace all the special requirements of every individual in the community. The number of subjects to be taught would require several varying courses of instruction and a greatly increased teaching corps to present them. It is not the province of the public school to provide instruction in every different specialty which a multitude of individuals may intend to pursue as an avocation; but it is, or should be, the mission of the public school to present instruction in those branches which are generally useful to all persons in all avocations, and which each needs, no matter what special line of occupation he may in future be called to pursue—such subjects as are essential in making a man fairly intelligent, and a speaking acquaintance with which he can secure, no matter what his special pursuit. This is what I understand to be a practical education in the school sense. It is that kind of education which the great majority of the people of this city require and demand for their children, and which alone they have time for before being compelled to assist in earning a livelihood. On the other hand, a comparative few claim that our High School should have a curriculum which will prepare students for admission to college, and therefore they urge that our High School course should embrace the classics—Latin, Greek, &c.—and they point to the fact that many city High Schools include these in their courses of study, and hence, that we are “behind the times” in not presenting all the advantages for a prospective liberal or college course to be pursued, if desired by any, on graduation from the High School. Such are the demands of the great majority and of the small minority. Now, to accommodate these varying demands several courses of instruction would be necessary, each taking almost or quite the whole time of the pupil who elects it, and necessitating an increased corps of instructors to meet the requirements of the extended round of subjects. This implies increased revenue, increased expenditure—an expenditure which the minority could not supply and which the majority is not at present willing to provide for the benefit of the few.

As the Board is at present unable to provide the means required to establish the proposed “Business Course” in the High School, which would include some of the more practical subjects of the present course, together with bookkeeping, penmanship, business forms and

commercial law, covering a period of two years—thus providing a course which would be almost equally valuable to the sexes, and diverting some or many of the girls from the Normal Class which is now over-supplying us with teachers—it has been deemed best to revise the course that has been pursued for some time, a course which was neither well calculated to fit students with knowledge required in ordinary avocations nor to prepare them for admission to college, and to arrange it to meet the wants of the students until such time as the Board can meet the demands of two courses, a general course and a business course. With this in view, arithmetic and penmanship have been added to the course of study at present pursued in the High School, it being evident that but few, if any, of the students are so proficient in these subjects on entering the school as to warrant their discontinuance.

On various occasions I have recommended and urged the adoption of a business or commercial course of instruction for the High School (see annual report for 1889-90), and expected to have the pleasure to witness the accomplishment of this important and desirable measure on the re-opening of the schools in September last; but, for reasons elsewhere mentioned, the finances of the Board were in such condition as to preclude the practicability of instituting the course at the time. It gives me great satisfaction to record the fact that since the first paragraph under this caption was written, the Board of Education has adopted the following recommendation of the Committee on Teachers, viz.: "In view of the fact that character and capacity are to be obtained through the pursuit of studies that will help those who expect to enter upon the ordinary avocations of the world as well as through subjects that do not have a direct bearing upon business employments, it becomes desirable to so shape courses of instruction in High Schools that they may specialize towards practical ends and needs. High Schools in many of the larger cities have opened their doors to the increasing popular demand for training that shall be useful to the graduate in whatever business avocation he may subsequently choose—a training which has heretofore been possible only to those who could afford to seek it in schools where high tuition is charged.

"In order, therefore, to increase the efficiency of the school system of this city, it is desirable that a business or commercial course of instruction be instituted in our High School in addition to the general course pursued at present; and your committee recommends that on its requisition the Committee on Erection, Repairs and Furniture have the necessary rooms in the High School fitted with appropriate furniture and appliances, and that the Committee on Books and Stationery be in like manner required to procure such text-books, stationery, &c., as may be required in the pursuit of a commercial course of instruction. It is further recommended that the Committee

on Teachers be empowered to employ a properly-qualified teacher to conduct the instruction, subject to the approval of the Board."

It is probable that the necessary arrangements will be made before the beginning of the next school year, and that a commercial course in the High School will be inaugurated at the opening of the schools in September next, possibly before that date if circumstances will admit it.

NORMAL TRAINING CLASS.

The instruction in this department has progressed quite as favorably as during former years.

The faithful, painstaking and able efforts of the teacher of this Training Class, Miss M. D. Gall, merit the highest commendation. Her efforts have been supplemented by the thorough and practical methods pursued by Professor White, whose instruction in psychology has been most lucid and beneficial.

It will in no wise detract from the credit due these able instructors to express the opinion that the system which requires the entire round of instruction to be performed mainly by a single teacher is not the best, and should not be expected to produce the best results. The instruction to be given in this training department is so important to the schools that its various subjects should be presented and impressed by the instructors each especially expert in the subject assigned to him. It is required here that methodology in application to each of the subjects of the course of study for the primary and grammar schools, especially the former, shall be taught; that school management and discipline shall receive, theoretically at least, the consideration which their importance demands; that the history and philosophy of education—mental science—shall be so presented, exemplified and studied that they may be of practical value in the work of the class-room. It would be unjust and unreasonable to expect that one or two instructors should accomplish in a single year in a city Normal Training School all that a numerous corps of instructors in a State institution should accomplish in a course of two or three years' instruction. Our Normal Training School is yearly accomplishing as much as should be expected under the present system.

In the matter of the management and discipline of pupils, the students of the average Normal School are given theories and principles which cannot usually be applied and tested practically during the course of normal instruction. The small classes of little children already well disciplined, which are called to the normal class-room for the exemplification of methods in primary teaching, afford the normal student but little actual experience in class management—absolutely none in the exercise of the disciplinary faculty. It is but seldom that a course of normal training is so arranged as to admit of the actual

conditions which will confront the normal graduate on taking charge of a class as its teacher, and hence this vital function of management and discipline must await exercise and test after graduation and appointment. Under such conditions, we should not expect that the young and immature teacher will invariably exhibit the tact and efficiency of certain teachers who have had long practice and experience. No matter what the theoretical training, practice and experience in the actualities of the class-room cannot be left out of the account in making up the sum total which constitutes an effective teacher. Even though highly endowed with natural aptitude for teaching and management, the young teacher has much to learn through the medium of experience. Much, then, remains to be learned after undertaking the work, and at the outset perfection should not be expected in the novice. Suggestion, advice, and direction are greatly needed by these young teachers after they are given charge of classes, and their ultimate success or failure will depend in no inconsiderable extent upon the spirit which animates the Principals of the schools to which they are assigned. It is certainly not unreasonable to expect that every possible assistance will be given by those whose chief duty it is, not being confined to class teaching, to personally supervise the work in all their class-rooms, giving reasonable aid where it is most needed. If, after all, it becomes evident that the temporary appointee cannot become a successful teacher, recommendation of the candidate for permanent appointment should not be made.

RAHWAY.

ELIHU B. SILVERS, SUPERINTENDENT.

Hon. E. O. Chapman, State Superintendent:

The schools under my supervision have had an unusually successful year. The recent addition of High School classes has given universal satisfaction and proved the means of keeping many from seeking advanced advantages elsewhere. Our grade has been advanced to the extent of admission of both the State Normal School and the require-

ments of the State Scholarship ; further than this we do not at this time expect to go. The recent introduction, on a firm basis, of a systematic kindergarten department in most of our schools is a success, the teachers being graduates of our State Normal School. This plan of communicating knowledge, in my opinion, is well fitted to all—even the most advanced departments. The sanitary condition of our school buildings receives especial attention. The general physical condition of the pupils is not neglected, and the light is so arranged that their vision is not impaired. These essentials in the olden time have not received proper attention. The Board of Education is a painstaking body, acting harmoniously and generously.

MANUAL TRAINING.

GARFIELD.

To E. O. Chapman, State Superintendent :

The children are instructed in manual training from their entrance to school through all the grades of the primary and grammar departments. The work consists of various kindergarten employments taught by a trained teacher, and mechanical and free-hand drawing, the constructive work and moulding going along with this.

I have the honor to submit the following report of the funds for manual training, for the school year ending August 31st, 1891.

RECEIPTS.

District tax.....	\$500 00
From State Comptroller.....	500 00

DISBURSEMENTS.

For salaries and materials	\$604 50
Balance in hands of Collector.....	396 50

HOBOKEN.

To the Hon. E. O. Chapman, State Superintendent :

DEAR SIR—This Board, in accordance with the requirements of the act of 1881, for the establishment of industrial education, under which act this Board is constituted, has the honor to submit its fourth annual report.

There are but few changes in our work from year to year, and yet the changes that are made are, we affirm, always on the lines of pro-

gress and advancement. Our very limited resources hamper us greatly, and the inadequate space that it is, at present, possible for us to give to the wood-working is embarrassing to the full efficiency of this department. Indeed, it is only just to our excellent corps of teachers that we should report the necessity that has developed during the past two years, for a suitable manual training college building, one in which each department should have ample space for all its requirements, independent of all other branches. We are occupying four fairly large rooms in the building known as the "Martha Institute." The situation of the building is a good one because it is in about the center of the city, and as convenient of access from the schools in the northern as from the schools in the southern part of Hoboken, but the building itself is old, indifferently constructed, and poorly ventilated. If we should occupy all the room really needed for our work, including our sewing department, which is now carried on in the public school buildings, the rent alone would equal the interest on \$30,000. How to obtain a suitable manual training college building is now a problem which must soon be solved.

We have five teachers and an assistant. The wood-carving and clay-modeling have heretofore been in one department, and taught by one instructor, but in September these branches were made separate departments and an assistant was given to the newly-appointed modeling teacher. By this means, and by increasing the duties of the sewing teacher, several additional classes in the public schools have been allowed the benefit of manual training.

To fill the vacancy caused by the resignation of our instructor in wood-working, Mr. E. M. Healy, who accepted a similar position in the Trenton Model School, the Board appointed Mr. J. S. Bloomer, whose work forestalls any retrogression in this branch of our training.

Provision has been made for occasional class visits to other industrial institutions, the Board recognizing the benefits that will be derived by the pupils from these very practical "tours of inspection."

From the annual reports of our teachers we quote portions (given below) which bear upon that part of our training which is of general interest.

WOOD-CARVING AND CLAY-MODELING—MISS JEANNETTE PALEN.

"The result of the past year's work in this department (so far as we can see), has been of value, not alone in the training of the eye and hand, but in the development of the mind of the child, who comes to the class without any idea of form, or thought of the beautiful around him.

"By the use of the type forms, sphere, cube, &c., he learns to think of the form, and to compare it with natural objects.

"This trains his eye, while with his mind he directs his hand, and in that way thought is developed, which is one of the chief objects of our instruction, and inculcates orderly and quiet habits, to develop industry and perseverance, and above all, love for work of all kinds.

"It is this development of interest in the carving or modeling, and love for the work, that changes, in many cases, boys who come into the class boisterous and thoroughly disorderly into quiet, persevering 'workmen.' They learn that they can do something of comparative usefulness with their own hands for which they are personally responsible and that success does not depend upon doing many things, but upon doing everything as *carefully* and *thoroughly* as possible, and only he who observes the small things and uses his eyes to see all that there is to be seen around him can become a valuable workman.

"To learn what profit a boy has derived from his study, a piece of clay is given him and his imagination and memory are allowed free scope. Some will model a yacht, full rigged, while others develop some other model that pleases their fancy.

"The interest in the carving has been carried into many homes, where tools have been provided for the boys, and all of the spare hours utilized by carving, when out of school.

"Many encouraging words came from educators (who visited our exhibition in May) in respect to the real progress made in the work.

"The changes that have been made by the fitting and arranging in a thorough manner a new room for carving, as well as remodeling with new benches the old room for modeling, add much to the facility and usefulness of the department."

DOMESTIC ECONOMY—MISS E. HUGER.

"The general attendance during the year has been better than heretofore and the work done by all of the classes excelled that of previous years, due much to the fact that many of the girls had profited by having had older sisters in the classes that preceded them, thereby incidentally showing a practical result of our instruction.

"The course is arranged so as to cultivate judgment in the quality of the materials, in order to be able to select the best. Though the variety be limited and the quantity small, good quality of material is the first principle of culinary economy.

"Were the time longer and the hours such as to permit of little expeditions to the market in selecting the supplies, the time could be used very profitably, and yet our meat-charts supply this demand fairly well.

"After the cooking of water, follows the lessons of the effect of heat upon meat and starchy foods, then soups, stews and several varieties of bread and biscuits are made by the children.

"Some simple chemical experiments are given in connection with the practical work, to awaken *interest* and *thought*, and certainly the children think, deliberate and reason better for having this branch of the work.

"Encouragement from parents is an important factor in this department and it will be found that 'home practice' will keep the pupils in 'good heart' in spite of the inevitable mistakes, failures and disappointments attendant upon employment of this nature. The sense of discouragement is sure to be forgotten when patient effort is at last crowned with success, and a natural pride is displayed by the young cook, after several unsuccessful trials, when a specimen of cookery worthy of experienced and older heads is produced.

"Perfect order and cleanliness prevail in the little kitchens. Waste-fulness is especially guarded against and the utmost painstaking insisted upon in the care of all supplies, materials and utensils.

"The best exhibition of our work can be seen daily in the classroom, and parents are urged to come often and are always welcome."

WOOD-WORKING—E. M. HEALY.

"The attendance in my department, while being fair, might have been greatly improved if the standing of the pupils were affected in their weekly school reports.

"The pupils never flagged in their interest from the beginning, but they rather seemed to imbibe the spirit of industry as their work progressed, and when the time came for the summer closing they laid the tools down with manifest regret.

"I trust that I may be permitted to say that eight months have proved inadequate for the pursuit of the subjects taught in this department, and the two months which you have determined to add in the future to each year's course will be of inestimable value to both teachers and pupils.

"In severing my connection with your college I wish to express my appreciation of the kindly aid and cordial consideration which I have ever received from the Board of Trustees.

"My interest in your college will go with me to my new field, with the wish that it may continue to grow and its scope of usefulness increase."

SEWING—MRS. DAVID E. RUE.

"That the art of sewing is an indispensable element in a girl's education is universally admitted.

"That this branch of instruction is appreciated it is only necessary to ask the girls employed with their needles if they 'like their work' and an emphatic affirmative answer will always be given.

"That it has awakened an interest in the parents is known by the many words of commendation from them; and they have testified to the excellent results shown in their homes.

"Several of the girls who have completed the course have found steady and remunerative employment owing to their skill with the needle. The tendency to *drop out of the regular school course before the end of the year* has been decidedly checked, as the girls are anxious to remain and finish their course in sewing.

"The classes beginning to sew are taught how to wear and use the thimble, to measure the thread, thread the needle and the proper use of all the implements in sewing. The neatness and exactness of the first stitches taught enable the girl to master those that are more difficult as she is advanced.

"Part of the work done by the classes was placed upon exhibition near the close of the school year. This gave each pupil an opportunity to show some specimen of her work to those most interested, and this natural pride in work performed is an incentive to improve in future effort.

"The arrangement of the various sewing models shown on exhibition was such as to permit an intelligent study of the method pursued, and covered all grades, from the lowest to the highest. The practical skill of each pupil was shown and elicited much praise from parents and friends who were present."

The exhibit of our work in the several departments, which was given on the 15th and 16th of May, in the large hall of the Institute Building, has been referred to above, and it is proper that we should speak of it more particularly. Unfortunately we have no record of the exact numbers of those who attended the exhibit, but we know that there were above 5,000 children, including a thousand or more who came from Jersey City, West Hoboken, Union Hill and North Bergen, and but for the storm which prevailed during both days we should not have been able to accommodate the throngs of people who thus manifested their interest in our industrial education. This interest is constantly increasing among all classes of people.

While the large hall contained the chief exhibit, the class-rooms were thrown open and classes were at work, giving a practical idea of the instruction.

Many of our visitors, indeed a very large portion, were from neighboring cities and interested in other industrial schools. We are still in constant receipt of letters from different parts of the county, making inquiry about our methods, and this has led us to contemplate issuing a simple "Primer" of our own manual training.

In regard to the practical results of our work as shown in this annual exhibit we beg leave to quote from the report made by one of the Faculty of an Institute of Manual Training in a neighboring city, and published in the "New York Evening Post," May 22d, 1891.

"The exhibition of a year's work in sewing, cooking, clay-modeling, wood-carving and joinery from the public schools of Hoboken, which was held on Friday and Saturday last in that city, was a showing of much interest to many people. The instruction in manual training is not directly in the hands of the city authorities, but is controlled by a Board of Trustees, who have brought together a small but earnest and efficient band of teachers and who guarantee all the expenses. The actual funds are, however, in great part, if not entirely, derived from city and State grants. The work is carried on in a building apart from the schools, in which well-equipped, but small and cramped, work-rooms are fitted up. The time occupied in passing to and from the work reduces the very limited amount given to the subjects.

"The course in sewing, which is given in the last five classes of the grammar school, begins with outline-running, stitching of geometric and free-hand figures, and then extends through a series of well-graded exercises in overhanding, hemming, felling, sewing on buttons, making button-holes, gussets, &c. The specimens of darning on stockinet and cashmere were exceedingly well done, and some very neat patching on striped calico was shown. The course ends with some simple work in embroidery. All the exercises use but little material, and no elaborate finished pieces are attempted. Practice in paper-cutting and folding is introduced into the course in order to teach proper methods of cutting and of using the scissors, and also as affording an opportunity for instruction in the proper combination of colors.

"Cooking is taken in the upper three classes for an hour and a half a week, and the tempting array of practical results seen on Saturday testifies to the thoroughness and excellence of the instruction. The many specimens of bread, soups, jellies and cooked meats certainly appeared to be in every way what they should be. It was evident that the endeavor had been to give a training of direct service in homes of moderate circumstances. Particular study had been given to the saving of things that are commonly wasted, and a number of soups and other dishes were shown made from odds and ends not generally so used. A quantity of soap has also been made by the pupils from the grease left over from the lessons. The pupils have the entire charge of the kitchen, which is a model of neatness and order, and in every case clean and put away their own utensils. They are taught the washing of dishes and the care of towels. To bring, so far as possible, an intelligent appreciation of the subject, instruction is given to the classes in the simple facts of digestion and the chemistry of foods.

"In the fourth class the boys practice clay-modeling for one hour and a half a week. This is their first manual work. The exercises begin with the making of the type solids and the familiar appearance

of these forms in nature, and end with simple work from a cast. The results are, of course, crude in execution, as is inevitable with eleven-year-old pupils, but show a good foundation in form perception, and the practice is a preparation for further hand-work. Wood-carving is practiced during the next year, in an admirably-graded series of lessons. The later exercises in this work showed in many cases a surprising degree of artistic feeling, and throughout the course a very broad and free treatment was noticed.

"The exercises in joinery, which occupy two and one-half hours a week in the second class, resulted in a most interesting collection. The average age of the boys in this class is thirteen years and the course presents a very happy illustration of well-adapted and well-graded exercises. After the first simple exercises in sawing and planing, a series of joints are made, running from the simple half lap to the single dovetail. All of the pieces are small and consume but little time and material, while the neatness and accuracy with which they are made show that they are well within the growing capacities of the pupils. At the end of the year one month is devoted to constructive pieces which illustrate the application of the elements previously covered. The articles exhibited comprised many small models of tables, stools, bootjacks, easels, sleds and doors.

"Altogether the exhibition showed a most efficient year's work, and considering the small amount of time given to the practice, reflects great credit upon the ability and devotion of the instructors. These teachers, who have been in most cases specially trained for the work, have evidently studied the best practice in their different lines and availed themselves of the latest thought on the subject.

"Compared with these well-arranged courses, the work of the New York public schools exhibited last year at the Teachers' Bazaar fair, was mere trash, and can hardly be classed in the same category. In adaptation to purpose, in economy of material and in the character of the work, the Hoboken exhibition was a success where the other was a lamentable failure."

We append the report of our Treasurer, and trust that the practical work of this Board and its economic management of the limited funds at our disposal, will commend themselves to your judgment.

HOBOKEN, N. J., December 2d, 1891.

To the Board of Trustees New Jersey Industrial Education, City of Hoboken :

I have the honor to submit the following report of the funds of the Board for the year ending December 2d, 1891 :

RECEIPTS.

To balance on hand November 1st, 1890.....	\$2,164 78
“ State Comptroller, appropriation 1890....	\$2,000 00
“ Mayor and Council of Hoboken, 1890....	2,000 00
“ Interest on deposits.....	110 61

Respectfully submitted,

T. H. McCANN,
Treasurer.

MORRISTOWN.

To Hon. E. O. Chapman, State Superintendent :

DEAR SIR—I have the honor to transmit herewith a report of the work done in manual training by the Morristown schools during the year just closed.

First. Regular work during school hours has been done under the supervision of our excellent teacher, Miss Van Horn, in drawing,

modeling in clay, weaving, &c., during the whole school year. This work and its results have been most satisfactory to the Board of Education and to the parents of the children instructed. This work has been done for many years, but we propose to enlarge it during the coming year, and to make it an integral part of the manual training system.

Second. In sewing, needlework and cutting, very efficient work has been done by the two teachers employed for the purpose. This instruction is given on Saturdays; the scholars are divided into graded classes and systematically taught. Progress in this branch has been very satisfactory. Number of pupils, eighty.

Third. The wood-working department is also conducted on Saturdays, in a building especially prepared for it. Although attendance is entirely voluntary very good work has been done, but the number reached and benefited is smaller than in the other departments, and therefore, not so satisfactory to the Board. The teacher is from the New York Training School, Mr. Hall by name, and is a very competent instructor.

Fourth. Systematic instruction in cooking has also been given to volunteer classes on Saturdays. In this department as in the preceding, the numbers reached have not been as large as we could wish.

In May last an exhibition of work in all these departments was made in the assembly-room of the Maple Street School. A great many visited it and expressed satisfaction with the introduction of the system as a part of regular school duties.

The following report of expenses is submitted:

The amount due from the State for 1889-90 was not received until October, 1890, and therefore the report includes State appropriations for two years.

TREASURER'S REPORT.

Balance August 31st, 1890.....	\$74 08

August 31st, 1891. Balance on hand..... \$319 49

We also have on hand a very complete plant for cooking, wood-working, sewing and cutting, drawing and modeling.

ORANGE.

Hon. E. O. Chapman, State Superintendent:

The results of the work in manual training in the public schools of this city for the past year have been very satisfactory. Instruction has been given by the special and the class teachers under the various heads of the kindergarten occupation in the primary grades—the clay-modeling, drawing, sewing, carpentry and domestic economy—in the more advanced classes. The more firmly this branch of instruction becomes established as a part of the curriculum in our schools, the more clearly is its importance shown. The training of the power of observation, the necessity of concentration of thought and strict attention to the matter in hand, the constant demand for carefulness and accurate adjustment, the need of exercising judgment and foresight for the accomplishment of required results, and the development of the consciousness of power are some of the strongest arguments in favor of manual training.

All the pupils in our schools have received instruction in some form of the manual methods, according to the grade in which they were enrolled. Some changes must now be made in the High School. When manual training was made a part of the course of study three years ago, the pupils of the High School and of the grammar grades began carpentry and sewing at the same time, with the same elementary lessons. The older pupils advanced more rapidly than the others, and the required amount of work has now been completed by some of the classes. There will be no need of continuing the instruction in their case, unless special lessons are arranged for them.

Specimens of the daily work of the various grades and schools were sent to the exhibit at Trenton, at the meeting of the State Association of Teachers, in December last.

FINANCIAL.

The sum of \$1,800 was appropriated by the city in 1890 for the support of manual training, and a like amount was received from the State. The expenditures were as follows :

Teachers' salaries.....	\$2,312 00
Janitor.....	150 00
Repairs.....	65 48
Supplies.....	240 67
Trenton exhibit.....	25 33
Rent and steam heat.....	625 00
	<hr/>
	\$3,418 48

PASSAIC.

Hon. E. O. Chapman, State Superintendent :

DEAR SIR—In accordance with the requirements of the statute establishing manual training in the public schools, the Board of Education of Passaic City hereby report the work done last year.

I. *Drawing*.—A graduate of Cooper Institute was secured, who took charge of all the drawing exercises in the primary and grammar grades. Correct methods were followed. Geometrical models were secured for all the schools, and the pupils were required to work in accordance with the laws of perspective.

II. *Making*.—1. In the lower primary grades kindergarten exercises were conducted by a lady, who was secured by the Board for this special purpose—a graduate of the Training School, at No. 9 University Place, New York. In the more advanced grades were instituted paper-folding, weaving, parquetry, paper-cutting, clay-modeling and sewing. Object—Training in form.

2 In the grammar grades were instituted studies in paper-cutting, pattern-making and clay-modeling. Object—Constructions leading to working drawings.

III. *Exhibits.*—We carried an exhibit of our work to Trenton in December last, during the meeting of the State Association.

IV. On the first to third days of June there was a home exhibit, given in the City Hall. Four or five hundred adults, and hundreds of children visited this. It met with approval. Good was done, in that the different teachers and pupils could see what was being done in other schools than their own.

The City Council were enabled, without going to the several schools, to inspect samples of the work.

Instead of \$500, as last year, the City Council have this year voted \$600 for manual training.

The work may be considered as fairly and firmly established here. The wheels of progress will not go backward.

PATERSON.

Hon. E. O. Chapman, State Superintendent :

DEAR SIR—I have the honor to submit the following report, financial and otherwise, of manual training as a feature of public education in this city.

Our financial year ends on March 20th, and all our accounts are closed and balanced on that date yearly.

The following statement of our manual training account is from the annual report of the Secretary of our Board for the year 1890-91 :

FINANCIAL.

Dr.

To balance in hand, March 20th, 1890.....	\$2,632 20
“ city and State appropriations since.....	2,000 00
	<hr/>
	\$4,632 20

Cr.

By disbursements for salaries, rent, &c.....	\$2,862 72
“ balance on hand March 20th, 1891.....	1,769 48
	<hr/>
	\$4,632 20

In addition, I beg to submit the following quotations from my recent annual report :

“ MANUAL TRAINING.

“ Since the date of my last annual report the training shop has been removed to a large and well-lighted room in the Smith Block on Market street. From its central location and ample space it offers facilities not heretofore provided, and the change of location has been very gratifying to all concerned. During the year instruction has progressed in shop work as favorably as in former years and there has not been the slightest abatement in the interest of pupils. Unfortunately the funds to the credit of the Committee on Manual Training have not been sufficient to permit an extension of this feature of our school system, and hence the character and extent of the work remains practically the same as one year ago. An appropriation of two thousand dollars (\$2,000) per year from which two salaries of one thousand dollars (\$1,000) are paid exhausts the account, and if a balance from the original and larger appropriation had not remained to supplement the current appropriation the running expenses for rent, material, tools and appliances could not have been met. This balance is constantly growing less, and there is necessity for an immediate increase in the sum appropriated by the city in order that an equal amount from the State may be made available according to law. It is to be borne in mind that kindergarten and drawing material used in the schools are to be provided from the manual training account, these being embraced under the head of instruction in manual training.

“ In December last an exhibit of manual training products from the schools of this city was made at Trenton during the sessions of the State Teachers' Association. An entire room was occupied by specimens of carpentry, joinery, wood-carving, cabinet work, &c., and specimens of drawing and kindergarten work from the various schools of this city. In the matter of woodwork from our training shop, the exhibit was certainly unexcelled, if equaled, and it received many deserved expressions of praise and admiration. The exhibit of drawings, &c., was creditable, considering the limited time of systematic instruction and facilities afforded for its accomplishment. On the return of the exhibit from Trenton it was placed on view in the rooms

of the training shop and large numbers of our citizens took the opportunity to examine the work and become acquainted with its extent and value educationally.

"The following are the reports of Mr. Edwin Hilton, instructor in the training shop, and of Mrs. C. E. Thomas, special teacher of form study and drawing :

"MANUAL TRAINING SHOP, }
"PATERSON, March 19th, 1891. }

"*Superintendent O. M. Brands :*

"DEAR SIR—I respectfully submit the following report of the progress of the instruction in the training shop for the year past :

"The total number of boys now receiving instruction is three hundred and fifty (350), arranged in fifteen (15) classes ranging from fifteen to thirty pupils in each class. Each class receives one and a quarter hour's instruction per week. The High School boys are instructed during the afternoon and the grammar school boys during the forenoon sessions.

"The system of giving credit marks for proficiency in work has proved a great success, inasmuch as it has inspired the boys to attain a good general average for the year.

"Besides the current lesson work, during the year kindergarten tables and drawing stands, used in the different schools, have been made by the boys. This has afforded agreeable variety and has given the pupils satisfaction in realizing that they have become competent to produce something useful.

"The special class in carving and wood-turning which was formed at the beginning of the term has made very satisfactory progress. This class is composed of pupils who have shown superior ability in shop work and are therefore permitted to become members of the class irrespective of their grade in the schools.

"Very respectfully submitted,

"EDWIN D. HILTON,
"Instructor in Training Shop."

"PATERSON March 19th, 1891.

"*Superintendent O. M. Brands :*

"DEAR SIR—During the past year instruction in form study and drawing has been continued as follows : Grade meetings were resumed in September, teachers being called and lessons given each grade once a month. A programme for daily lessons in the lower primary grades, and semi and tri-weekly lessons in the grammar and upper primary grades, was given to each teacher, marking the date and subject of each lesson.

"At the grade meetings the work for the following month was gone over in a way that would prepare teachers to give the lessons well and intelligently in their respective classes.

"As much variety in the work and drawing of objects as were possible has been aimed at, that all might be helped and each teacher feel an understanding of the subject.

"The daily and weekly programme has been of great benefit in keeping the work uniform throughout the schools, and it has been carefully and conscientiously carried out by the teachers.

"Three programmes of class work have been sent out, on the 1st of Oct, 1st of Dec., 1st of March. The latter covering the remainder of the school term.

"Regular instruction has been given by me in the Normal Training Class each Monday. The interest and attention given to the work by this class have been most encouraging.

"Visiting of all schools, and criticisms of class work have continued as formerly, also special instruction in classes—wherever needed or requested. Clay of good quality was supplied in October, and modeling continued in the primary grades.

"The scissors purchased for the teachers' classes have made it possible to combine cutting of paper forms and decorative designs with the drawing—and many teachers have been able to obtain good work in borders, and arrangements of colored papers.

"To the supply of models for teachers' use, have been added several sets for each school, thus giving nearly every primary teacher her own box of type forms and tablets.

"This is a decided advantage and of great help in teaching form.

"In response to a request for work in manual training, form study and drawing, for an exhibit at Trenton during the Christmas holidays, each school was called on for a contribution. Though the time for preparing and mounting the work suitably was very short, each school sent several charts showing the regular class work in each grade. Had it been possible to allow more time for preparation and careful selection of drawings we could have shown better work. It is expected that our next efforts will show decided progress.

"Respectfully submitted,

"CAROLINE E. THOMAS."

* * * * *

"The removal of the training shop to the large and conveniently-located room in the Smith Block, on Market street, has been greatly to the advantage of the students and their instruction. The removal was accomplished with but short interruption of the regular class work, and it is notable that many of the students had acquired such skill in the use of tools as to be able to render valuable aid in fitting the room for occupancy as a workshop, and which they cheerfully rendered and keenly enjoyed.

"The instruction in the training shop has progressed as favorably under the painstaking supervision of Mr. Edwin Hilton as in the preceding years, and many students have developed skill surprising to all who have taken opportunity to inspect specimens of their work, while all have been enthusiastic in their interest in this feature of their school work.

"In the matter of 'Form Study and Drawing' the work has been perseveringly pushed during the year. Classes of teachers meet weekly to receive instruction by the Director of Drawing, and similar instruction is given the students weekly in the Normal Training Class. The influence of this maintained and systematic instruction of teachers is gradually bearing fruit in the class-rooms, under the increased ability on the part of teachers to impart that which they have received. And yet there are instances in which, either from indifference or lack of skill, which is not alone confined to the work in drawing, teachers fail to secure results commensurate with their opportunities. In this,

as in other school work, the class will be what the teacher makes it. Indifference and lack of interest on part of the teacher are sure to be reflected in the pupil.

"The exhibit of specimens of manual training work from our schools at Trenton in December last was admitted to be very creditable, in some respects superior. In the matter of woodwork it was unexcelled, by most visitors considered unequaled. Considering the short period of systematic instruction in drawing that exhibit was interesting as exhibiting the individual talent of pupils and teachers. In kindergarten work the exhibit was gratifying."

SOUTH ORANGE.

To Hon. E. O. Chapman, State Superintendent:

I would submit the following report of the manual training work in the South Orange, Essex county, school during the past year.

In September, 1890, four branches of manual training work were introduced into the school course, namely, sewing, carpentry, wood-carving and clay-modeling. The foundation upon which this work is built is a thorough study of form in the primary grades, preparing for drawing, which is taught in all the grades of the school. A special teacher gives all her time to the teaching of drawing and of the manual training branches just mentioned.

Sewing.—Sewing was taught to the girls of the fourth, fifth, sixth and seventh years, ranging in age from eight to thirteen years. About eighty-five girls received instruction in this branch. They were given one lesson per week of from forty minutes to one hour, according to age. Instruction was given by the special teacher in a room devoted to the purpose.

Carpentry.—About sixty boys received instruction in carpentry, being the boys of the sixth, seventh and eighth years. They were given one lesson per week, an hour in length. The shop is fitted with single benches, and each bench has its full complement of tools. The work done during the year comprised the use of various tools, the

simple preparation of material, and the construction of various kinds of joints and of some simple articles. All work was done from working drawings made by each pupil before entering upon the construction.

Wood-carving.—Instruction in Swedish wood-carving is given to the pupils of the highest grammar grade, about thirty in number. Boys and girls do the same work. After the first lessons the patterns and designs used are made by the pupils. One hour per week is given to the work. A class in relief-carving was formed in January from the pupils of the High School department. The work was optional, but was chosen by a large class of both boys and girls.

Clay-modeling.—About forty boys of the fourth and fifth years in school were given an hour's lesson per week in clay-modeling by the special teacher. Work in clay-modeling in connection with the study of form is done in the three lowest primary classes containing 110 pupils, under direction of the class teachers.

Drawing.—Two lessons per week in drawing were given in all the grades from the lowest primary through the High School. In the three lowest primary classes, however, the lessons were daily. The work begins with a thorough study of form, in doing which colored sticks, colored paper and clay are used. The drawing work proper proceeds in three parallel lines—mechanical, object and decorative.

Equipment.—Two rooms have been fitted up for the manual work. One is a carpenter shop, containing seven double benches, the two boys at each bench facing each other. Fourteen complete sets of tools are furnished. This room also contains closet in which each boy has a compartment for his work. A second room is fitted with long tables and to it are sent pupils for sewing, wood-carving and clay-modeling. A financial report of the cost of this equipment has been submitted.

Results.—The results are the same as have been obtained wherever the work has been carried on intelligently and sympathetically. The amount of purely mental work done has not been diminished. I believe that the intellectual faculties of the children are being quickened by this work and that they are being prepared by it to do better work of all kinds. In helping us to build up characters for industry, perseverance and accuracy, it will not fail to be most important. In my opinion manual training is valuable in educational systems in three ways which I name in order of their importance:

1. In character-building—that which the public school should chiefly concern itself with.
2. In quickening the intellect and in compelling thought.
3. In giving practically useful knowledge.

My observation of a year of this work strengthens me in this opinion.

TOWN OF UNION.

To Hon. E. O. Chapman, State Superintendent:

DEAR SIR—Accompanying please find financial report of the Manual Training Department of Public School, District No. 6, Town of Union, Hudson county.

The instruction during the year just ended has been continued in the same direction and according to the same scheme as reported last year.

The work in all its branches has been thoroughly incorporated into the regular school curriculum, and the interest of the parents in the progress of their children is manifested more and more by frequent visits to the school. An exhibition of the visible work accomplished in sewing, cooking, wood-working, mechanical drawing, designing, clay-modeling, constructive geometrical and primary work was held the latter part of January at the school building.

Although the weather was extremely unfavorable, the work was inspected by over 3,000 visitors, not including children. Among

these visitors were delegations of teachers from every school district and city in this county, as well as from New York and other cities.

Favorable and encouraging reports of this exhibition appeared in several of the New York daily, as well as all of our local and county papers, and the "New York School Journal."

This simply proves the widespread interest that is felt by the public in this kind of instruction, and establishes the fact that manual training has come to be recognized as a necessary and integral part of a common-school education.

WEST HOBOKEN.

To E. O. Chapman, State Superintendent :

Within the last two years twenty-four classes have received instruction in industrial drawing.

In supplementary class, instruction has been given in the following branches: Geometrical problems, elementary orthographic projection of simple geometric solids and figures and of objects of use, per-

spective drawing, both instrumental and free-hand, study of natural forms and conventionalization of the same, and exercises in design for surface coverings, tiles, &c., and historical ornament.

In grammar classes the same branches are taken, but simplified as much as possible, including free-hand and mechanical work, and enlargement of historical and pictorial drawings.

In primary classes the work is entirely free-hand, and includes working drawings and patterns of geometric solids, form study and as much as possible of color, exercises of simple designs to fill geometric figures, the aim being to cultivate creative and perceptive faculties of children, to fit primary classes for grammar work, and a better appreciation of manufactured articles, and for general culture and to encourage others to continue their studies and, after a fair technical training, to become artists, architects, engineers, designers, &c.

Sewing has been carried on throughout the entire school of eighteen classes, beginning in the lowest grade with the running stitch, passing to paper-folding, unbleached hem, back stitch and overcast, felled seam, gusset, button-holes, darning stockings, herring-bone stitching, and ending in the highest grammar grade with patching and cashmere darning.

The results have been most excellent and much interest has been taken in the work by the children.
