### Services at Coriell

Having set the gold standard for biobanking around to globe, we at Coriell are experts in every step of the pipeline. We establish immortalized cell lines, run those lines through extensive quality control protocols, extract DNA from them, reprogram these cells into state-of-the-art induced pluripotent stem cells, freeze them and store them in our long term cryogenic storage facility, and we know how to distribute these precious materials to scientists around the world.

We'd like to help you in your lab. Take a look at the services we offer below.

And if there's something your team needs assistance with and you think we might be able to help, please drop us a line. We provide custom lab solutions as well.

<p><b>Core Facilities</b></p> <ul style="list-style-type: none"> <li>• <a href="#">Animal and Xenograft (/1/Services/Core-Facilities/Animal-and-Xenograft)</a></li> <li>• <a href="#">Bioinformatics and Biostatistics (/1/Services/Core-Facilities/Bioinformatics)</a></li> <li>• <a href="#">Cell Imaging (/1/Services/Core-Facilities/Flow-Cytometry-and-Cell-Sorting)</a></li> <li>• <a href="#">CRISPR Gene Engineering (/1/Services/Core-Facilities/CRISPR-Gene-Engineering)</a></li> <li>• <a href="#">Flow Cytometry and Cell Sorting (/1/Services/Core-Facilities/Flow-Cytometry-and-Cell-Sorting)</a></li> <li>• <a href="#">Genomics and Epigenomics (/1/Services/Core-Facilities/Genomics-and-Epigenomics)</a></li> <li>• <a href="#">iPSC - Induced Pluripotent Stem Cells (/1/Services/Core-Facilities/Induced-Pluripotent-Stem-Cells)</a></li> <li>• <a href="#">Organoids (/1/Services/Core-Facilities/Organoids)</a></li> </ul>
