Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Stream Encroachment Permit, a U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwaters, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities which require a permit may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Stream Encroachment: Under the Flood Control Act DEP is empowered to require a permit to control construction within and proximate to flood hazard areas to reduce flood damage to and from new development and to protect the flood storage capacity and ecology of flood plains.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

Office of Legal Affairs

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes 30 calendar days after publication of this notice. All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

Public notice of proposed permit actions

Facility name/ NJPDES Permit No./ Permit type	Facility location address County	NJDEP case manager/ Bureau	Receiving Stream or Formation or POTW/ Classification/ Watershed	Executive Summary
Research Glass of NJ NJPDES Permit No. NJ0063541 DGW	3770 North West Blvd. Vineland City Cumberland County	Judy Majoras Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	The facility manufactures hand-blown and hand-tooled laboratory glassware from premade glass tubing of various sizes. Finished glassware is polished with an abrasive and annealed in a kiln for consistent strength. Glassware is then cleaned in an ultrasonic cleaner which holds approximately three gallons of water to which liquid laundry detergent is added. The cleaner is generally used once a day. The NJPDES permit authorizes the discharge of the wash water to the facility's septic system. However, the wash water has been rerouted to a holding tank and is periodically hauled offsite. The discharge of wash water to the septic system has ceased. The facility now discharges only sanitary waste to the septic system and a NJPDES-DGW permit is no longer required.
Four Seasons at Chester NJPDES Permit No. NJ0071013 DGW	Chester Township Morris County	Eunice Szkoda Nonpoint Pollution Control (609) 633-7021	II-A	This proposed residential development shall consist of 120 three bedroom condominium units and 7 four bedroom single family detached homes. Sanitary sewage from this development of a maximum volume of 38,100 GPD shall be directed to an onsite sewage treatment plant and subsurface disposal system. Effluent and ground water monitoring shall be established by this permit.
Day's Inn - Cookstown NJPDES Permit No. NJ0065528 DGW	21 Cookstown Road New Hanover Twsp. Burlington County	Ron Bannister Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	The Day's Inn Cookstown is an existing 100 room hotel which contains a 40 seat bar & restaurant and 300 square feet of office space. An on-site wastewater treatment plant that manages sanitary waste from the facility and discharges sanitary wastewater to an on-site subsurface disposal bed. However, the existing disposal bed was not properly sized to handle the existing flow generated by the facility. To rectify this existing situation, a new subsurface disposal providing an additional 4,150 square feet of disposal area, will be constructed to manage the excess flow. The wastewater from the facility will be treated to Ground Water Quality Standards for all constituents prior to discharge with the exception of fecal coliform bacteria. The disposal bed will be utilized to treat fecal coliform bacteria to the Ground Water Quality Standards and the limitation shall be met at down gradient ground water monitoring wells. Flow from the facility shall be limited to 8,930 gpd.
Brandywine at Broadway NJPDES Permit No. NJ0100382 DGW	Rt. 57 Washington Twsp. Warren County	Mark Miller Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	The proposed facility will consist of 120 multifamily dwelling units and five (5) 24,000 square foot (ft ²) commercial lots. The sanitary wastewater design flow of the facility is 46,500 gallons per day. A wastewater treatment plant shall produce an effluent that will substantially reduce total nitrogen. Prior to disposal to ground water via four (4) infiltration/percolation lagoons, the effluent shall be disinfected.
Delsea Middle School NJPDES Permit No. NJ0066605 DGW	Blackwoodtown Rd. Franklin Twsp. Gloucester County	Judy Majoras Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	Delsea Middle School and Delsea High School are situated on adjoining properties. The two schools accommodate approximately 2125 students and faculty. Sanitary wastewater from the two schools is treated in a treatment plant on the Middle School property and discharged to a septic field. The combined wastewater is treated in aeration tanks and with ozone prior to discharge. The effluent is monitored prior to discharge to the field and a system of monitoring wells is sampled quarterly to monitor for contamination in the ground water.

Dredged material is deposited into a rehandling basin located adjacent to the site and when it becomes full, the dredged material is then pumped hydraulically to either of the two adjacent upland confined disposal facilities (CDF). Dredged material travels across the vegetated disposal area where solids settle out and the remaining free water is directed to a controllable weir which discharges to surface water via the Klondike Ditch. When the dredged material is placed within the upland CDFs, contaminants which may be adsorbed to the sediments may become soluble and be transported to ground water through leachate generation. The NJPDES-DGW permit allows the facility to continue operation, but establishes a compliance schedule to develop and implement a ground water protection program (GWPP) plan in accordance with N.J.A.C. 7:14A-7.6.</p>
