Party of Record:

Brian O. Lipman, Esq., Acting Director, New Jersey Division of Rate Counsel

BY THE BOARD:

This Order reflects the actions of the New Jersey Board of Public Utilities ("Board" or "BPU") on the applications received for participation in Program Year 2 ("PY2") of the Community Solar Energy Pilot Program ("Pilot Program"), codified at N.J.A.C. 14:8-9 et seq.

BACKGROUND

The Pilot Program was established by the Board pursuant to the Clean Energy Act of 2018 (L. 2018, c. 17) ("Act" or "CEA") through rules adopted on January 17, 2019 and published in the New Jersey Register on February 19, 2019.¹ The Pilot Program enables New Jersey electric utility customers to participate in a solar energy project that may be remotely located from their properties and receive a credit on their utility bills. Community solar therefore enables access to clean energy generation for utility customers currently unable to place solar generation directly on their own properties. The BPU is particularly interested in ensuring that low-and moderate-income ("LMI") customers are able to access community solar, and that community solar development is pursued without compromising the preservation of open space or protected lands in New Jersey. The Pilot Program is designed to provide the necessary experience and to lay the groundwork for the development and implementation of a full-scale Community Solar Energy Program within 36 months of the implementation of the Pilot Program.

¹ 51 N.J.R. 232(a).

Community solar projects are selected by the Board for participation in the Pilot Program via a competitive solicitation process, as directed by N.J.A.C. 14:8-9.3(c). During the first Program Year ("PY1") solicitation, the Board received 252 applications and selected 45 applications, representing approximately 78 MW. In July 2020, the Board conducted a stakeholder process regarding lessons learned from PY1 and possible improvements to the Pilot Program.

Following public comment, the Board proposed two (2) rule amendments to the Pilot Program, published in the New Jersey Register on November 16, 2020, with comments received no later than January 15, 2021. The first rule amendment proposed to change some administrative requirements, particularly those relating to project milestone deadlines, and facilitate LMI verification.² This rule amendment is being considered by the Board on a companion item on this Board Agenda. The second rule amendment proposed to allow a new type of customer enrollment, called "automatic enrollment" or "opt-out" for 100% LMI projects owned by local government entities.³ This rule amendment will be considered at a later time.

On October 2, 2020, the Board issued the Application Form for the PY2 solicitation.⁴ The Application Form included application requirements and the PY2 Evaluation Criteria, and set the deadline for submitting applications of February 5, 2021 at 5:00 p.m. EST. The Board directed Board Staff ("Staff") to develop an online application process for submitting applications. In the October 2 Order, the Board clarified that, in order to limit regulatory uncertainty for projects applying to PY2 of the Pilot Program, applications selected as part of PY2 will be eligible to register for the Transition Incentive ("TI") Program, even if said Applications are selected after the establishment of the Successor Solar Incentive ("SuSI") Program. PY2 projects' TI eligibility is subject to maintaining compliance with the rules and regulations of the TI Program and Community Solar regulatory deadlines.

The October 2 Order set the PY2 capacity at 150 MWdc, with the flexibility to allocate up to 10% (i.e. 15 MW) over or under this 150 MW capacity limit. In the event that there are not enough applications submitted in a given service territory to provide adequate competition, the Board found that it may, at its discretion, elect to not award any capacity in said service territory, and may reallocate the unused capacity. Pursuant to N.J.A.C. 14:8-9.4(e), at least 40% of the PY2 capacity (i.e. at least 60 MW) must be allocated to projects serving LMI subscribers. Furthermore, N.J.A.C. 14:8-9.4(d) provides that: "the annual capacity will be divided among each EDC area based on their average respective percentages of in-State retail electric sales."

² 52 N.J.R. 2039(a).

³ 52 N.J.R. 2041(a).

⁴ In re the Community Solar Energy Pilot Program; In re The Community Solar Energy Pilot Program Year 2 Application Form and Process, BPU Docket Nos. QO18060646, QO20080556, Order dated October 2, 2020 ("October 2 Order").

The breakdown of PY2 available capacity is as follows:

Table 1: PY2 Available Capacity		
EDC	% retail sales	MWdc allocated capacity
Atlantic City Electric Company ("ACE")	12.35%	18.525
Jersey Central Power & Light Company ("JCP&L")	28.86%	43.29
Public Service Electric & Gas Company ("PSE&G")	56.87%	85.305
Rockland Electric Company ("RECO")	1.92%	2.88
Total	100%	150

In January 2021, Staff issued supplemental instructions for submitting an application via the Board's online e-Filing portal. In response to questions, Staff held an informational webinar demonstrating how to upload applications to the e-Filing portal on February 3, 2021; a recording of the webinar was circulated on the community solar listserv and was posted on the New Jersey Clean Energy Program website.

The Board's rule at N.J.A.C. 14:8-10.1 indicates that solar electric generating facilities meeting the TI eligibility criteria established in the subchapter may register for the TI Program "following April 30, 2020, and prior to the Board's announcement of the opening of a registration process for the solar Successor Incentive Program." On July 28, 2021, the Board ordered the closure of the TI Program to new registrations on 11:59:59 p.m. on August 27, 2021.⁵ In the July 2021 Order, the Board once again reiterated that projects selected to participate in PY2 of the Pilot Program shall be allowed to register for the TI Program regardless of when these Applications are selected by the Board.

STAFF RECOMMENDATIONS

Community Solar Applications Received

The Board received 412 applications by the deadline of February 5, 2021 at 5:00 p.m. Collectively, these applications represent approximately 804 MWdc.⁶

These 412 applications were broken down by EDC as follows:

Table 2: Number of Applications Received in Each EDC Territory	
ACE.....	63 applications received
JCP&L.....	108 applications received
PSE&G.....	234 applications received
RECO.....	7 applications received

⁵ In re A New Jersey Solar Transition Pursuant to P.L. 2018, C. 17, BPU Docket No. QO19010068, Order dated July 28, 2021 (July 2021 Order).

⁶ A small number of applications provided a capacity range; Staff assumed the high end of the range for this overall estimate.

The 5:00 p.m. cut off was applied strictly, based on the electronic timestamp automatically generated when each application was submitted. Several applications were submitted after 5:00 p.m. These applications were not accepted, and are not included in the 412 applications counted above.⁷

Evaluation Committee Review

As set forth in the PY2 Application Form, applications were first reviewed for administrative completeness. Applications were deemed complete if: 1) All questions are completed, except those explicitly marked as optional, 2) All required attachments are included (see Appendix B for a checklist of required attachments), and 3) All required signatures are included.

Applications that were found to be administratively complete were then scored by the Evaluation Committee, based upon the information provided in the applications, and following the scoring rubric issued by the Board in Appendix C of the PY2 Application Form, and reproduced below:

Table 3: PY2 Evaluation Criteria	
Evaluation Criteria	Max. Points (total possible points: 100)
Low- and Moderate-Income and Environmental Justice Inclusion Higher preference: LMI project	25
Siting Higher preference, e.g.: landfills, brownfields, areas of historic fill, rooftops, parking lots, parking decks, canopies over impervious surfaces (e.g. walkway), former sand and gravel pits, former mines Medium preference, e.g.: floating solar on water bodies such as water treatment plants and sand and gravel pits, that have little to no established floral and faunal resources (*) No Points, e.g.: preserved lands, wetlands, forested areas, farmland Bonus points for site enhancements, e.g. landscaping, land enhancement, pollination support (**)	20
Bonus points if project is located in a redevelopment area or an economic opportunity zone (**)	Max. possible bonus points: 3
*Note: Applicants with a floating solar project must meet with DEP prior to submitting an Application, and take special notice of DEP's siting guidelines.	Max. possible bonus points: 2
**Note: bonus points will only be available for projects in the "higher" or "medium" preference siting categories. Projects in the "No Points" siting categories are not eligible for bonus points.	

⁷ On August 25, 2021, the Board received a petition requesting consideration for an application that was submitted after the 5:00 p.m. deadline. This petition, BPU Docket No. QO21081100, is being considered as a separate item on this Board Agenda.

Community and Environmental Justice Engagement Higher preference: formal agreement, ongoing collaboration or effective partnership with municipality and/or local community organizations and/or affordable housing provider (per Section X, Questions 1, 2, and 3) Medium preference: consultation with municipality and/or local community organization(s) and/or or affordable housing provider (per Section X, Question 4) No Points: no collaboration or collaboration has not been proven	15
Product Offering Higher preference: guaranteed savings >20%, flexible terms* Medium preference: guaranteed savings >10%, flexible terms* Low preference: guaranteed savings >5% No Points: no guaranteed savings, no flexible terms* *Flexible terms may include: no cancellation fee, short-term contract	15
Other Benefits Higher preference: Provides jobs and/or job training and/or demonstrates co-benefits (e.g. paired with storage, EV charging station, energy audits, energy efficiency)	10
Geographic Limit within EDC service territory Higher preference: municipality/adjacent municipality Medium preference: county/adjacent county No Points: any geographic location within the EDC service territory	5
Project Maturity Higher preference: project has received all non-ministerial permits; project has completed an interconnection study	5

Pursuant to the PY2 Application Form, projects must score a minimum 50 points total in order to be considered by the Board. Projects that scored above 50 points were broken out by electric distribution company (“EDC”) service territory, and ranked in order, starting with the highest-scoring application.

Following review of the applications, Staff consulted with the New Jersey Department of Environmental (“NJDEP”) for preliminary feedback on non-rooftop applications, to verify that the facts presented in the applications were correct. This high-level review was not a formal assessment of the projects. Staff recommends that the Board require that all non-rooftop projects contact the NJDEP’s Office of Permitting and Project Navigation (“OPPN”) within 30 days of the effective date of the Board’s Order, and comply with all information requests and/or follow-up meetings deemed necessary by the OPPN.

Recommended Project Awards

Based upon the above review process, the Evaluation Committee recommends that the Board grant conditional approvals to the Applications identified in the attached Appendix 1. The approvals would be conditional upon the receipt of all relevant permits, interconnection approvals, and be contingent upon the project being constructed and operated as it was proposed in its application.

All applications recommended for conditional approval in Appendix 1 propose to develop LMI projects, i.e. are projects in which at least 51% of the project's capacity is subscribed by LMI subscribers [N.J.A.C. 14:8-9.8(b)]. The list of recommended project awards is therefore compliant with the requirement at N.J.A.C. 14:8-9.4(e) that "at least 40% of the annual capacity limit shall be allocated to LMI projects."

The Evaluation Committee recommends that the Board deny without prejudice the remaining applications, identified in the attached Appendix 2.

If the recommendations above are adopted, the Board would grant conditional approvals to 105 projects representing a total of 164.69524 MWdc, broken down as follows:

Table 4: PY2 Conditionally Approved Capacity in Each EDC Territory		
EDC	Number of Applications Conditionally Approved	Conditionally Approved Capacity (in MWdc)
ACE	7	21.323
JCP&L	28	47.4487
PSE&G	67	90.32454
RECO	3	5.599
Total	105	164.69524

Special Considerations for Municipal Automatic Enrollment Projects

Based on feedback from some stakeholders, the Board proposed a rule amendment to the Pilot Program rules that would enable a limited scale testing of automatic enrollment of subscribers (also known as "opt-out" subscriber enrollment) in the context of LMI municipal projects.⁸ The PY2 Application Form included a section dedicated to projects interested in utilizing automatic enrollment subscriber enrollment where owned and operated by a local government entity. The PY2 Application Form specified that permission to operate as an automatic enrollment project was contingent on the Board's approval of the proposed rule amendment, stating that "if the application is selected but the proposed rule amendment is not approved by the Board, the project will be required to proceed using affirmative consent (i.e. "opt-in") subscriber enrollment rules, as currently provided for in the Pilot Program rules at N.J.A.C. 14:8-9.10(b)(1)."

One of the applications recommended for approval in Appendix 1 indicated its interest in proceeding as a municipal automatic enrollment project, namely the application with the Docket Number QO21020400. At this time, the Board has not yet considered final adoption of the rule amendment that would permit automatic enrollment of municipal LMI projects.

Therefore, Staff recommends that the Board approve this application with the caveat that it must follow the Pilot Program rules currently in effect. Should the Board approve the rule amendment allowing automatic enrollment at a later date, the application identified above would be allowed to proceed as an automatic enrollment project, contingent on maintaining compliance with the Pilot Program rules and the facts stated in the application.

⁸ 52 N.J.R. 2041(a).

Milestones for Selected Projects

In Section A-III.13 of the PY2 Application Form (Terms and Conditions: Milestones and Follow-Up for Approved Projects), the Board stated that should a proposed community solar project be approved by the Board for participation in the Pilot Program, such approval would be conditional on the project being constructed and operated as was proposed in its application. In order to monitor compliance, the Board stated that conditionally approved projects would be required to submit updates to the Board at three Milestones: 1) prior to beginning of construction; 2) prior to applying for Permission to Operate ("PTO"), and 3) prior to applying to the relevant EDC for allocation of bill credits.

As was implemented in PY1, Staff recommends that monitoring of applications be tied to the existing TI Program administration, so as to provide a process that is effective and does not create an undue burden on applicants, the Board, and Board Staff. Additionally, some milestone requirements were modified by a rule amendment adopted by the Board in a companion item on this Board Agenda.⁹

As such, Staff recommends that the Board implement the following process:

- 1) Conditionally Approved projects submit an initial TI registration package within 14 days of the effective date of the Board's Order, and comply with all applicable TI Program regulations;
- 2) Conditionally Approved projects provide quarterly updates on the status of project progress through a community-solar specific Milestone Reporting Form associated with their TI Program registration;
- 3) Conditionally Approved projects become fully operational within 18 months of the effective date of the Board's Order. Staff may grant one six-month extension if substantial progress is demonstrated toward becoming fully operation within the initial 18-month period pursuant to N.J.A.C. 14:8-9.3(c)(8);
- 4) Conditionally Approved projects submit a TI Program Final As-Built packet, which includes (but is not limited to):
 - a. Copies of all permits received, including local and State permits;
 - b. A copy of the EDC Permission to Operate; and
 - c. A signed and notarized affidavit certifying that the community solar facility was built and will be operated as it was proposed in the original Application; and
- 5) After completion of the TI Program requirements, Staff would direct the TI Program Administrator to issue a Transition Renewable Energy Certificate ("TREC") Certification Number.

Furthermore, as stated previously, for all conditionally approved projects not located on a rooftop or a parking canopy, Staff recommends that the Board require contact with NJDEP's OPPN within 30 days of the effective date of the Board's Order, and comply with all information requests and/or follow-up meetings deemed necessary by the OPPN. Staff also notes that some projects recommended for conditional approval in Appendix 1 may have applications pending with the board, or have been granted conditional certification, pursuant to L. 2012, c. 24 ("Solar Act"), codified at N.J.S.A. 48:3-87(t) ("Subsection (t)"). Staff recommends that the Board disallow concurrent TI registrations for duplicative PY2 and Subsection (t) projects.

⁹ See BPU Docket No. QX20090577, Proposed: November 16, 2020, at 52 N.J.R. 2039(a), Adopted Amendments: N.J.A.C. 14:8-9.2, 9.3, 9.4, 9.6, 9.8, and 9.10.

Pilot Program Year 3 and Permanent Program

The CEA directs the Board to “convert the Community Solar Energy Pilot Program to a permanent program” “no later than 36 months after adoption of the rules and regulations [establishing the Pilot Program].” This three-year milestone will occur on February 19, 2022.

The Pilot Program has enabled the Board to explore and test the implementation of community solar in New Jersey, and to launch a new segment of the solar industry in New Jersey. The Pilot Program rules envisioned that a competitive solicitation would occur during each of the three (3) calendar years [N.J.A.C. 14:8-9.3(a) and 14:8-9.4(b)]. It will be exceedingly difficult to hold a third solicitation before February 2022. Additionally, Staff believes the PY1 and PY2 solicitation process have provided the experience necessary to convert the Pilot Program into a permanent program. As such, Staff recommends that the Board waive its rules at N.J.A.C. 14:8-9.4(b) establishing a capacity allocation for Program Year 3 (“PY3”), and instead proceed immediately to the development of the permanent program.

FINDINGS AND DISCUSSION

The Board **HEREBY FINDS** that 412 applications for PY2 of the Pilot Program were received by the deadline on February 5, 2021 at 5:00 p.m. EST.

The Board **GRANTS** conditional approval to the projects listed as “Conditionally Approved” in the attached Appendix 1 (henceforth called “Conditionally Approved Projects”). The Board **DENIES** without prejudice the Applications listed in the attached Appendix 2. The Board **FINDS** that applications that are not selected may reapply in future community solar application proceedings, subject to meeting applicable rules and regulations.

The Board **DIRECTS** applicants with Conditionally Approved Projects to submit an initial TI Program registration package within 14 days of the effective date of this Order, in accordance with N.J.A.C. 14:8-9.7(q) and N.J.A.C. 14:8-10.4(e). The Board **ORDERS** that a Conditionally Approved Project may not have concurrent PY2 and Subsection (t) TI registrations, and **DIRECTS** applicants with existing TI registrations pursuant to Subsection (t) to withdraw such registrations prior to submission of the TI Program registration package for PY2 projects. The Board **ORDERS** all applicants with Conditionally Approved Projects to comply with the regulations and procedures of the TI Program including, but not limited to, submission of quarterly Milestone reporting forms. The Board **FINDS** that, in compliance with N.J.A.C. 14:8-9.11, applicants with Conditionally Approved Projects must notify the Board in writing within 30 days of any changes to the project developer, owner, or operator in case of sale, transfer, contract modification, or other material change to the parties initially listed in the Application. The Board **DIRECTS** Staff to develop a standard affidavit certifying that the community solar facility was built and will be operated as it was proposed in the original applications. The Board **ORDERS** that all conditionally approved community solar facilities must be built and operated as they were proposed in the original application, and **ORDERS** applicants with Conditionally Approved Projects to sign, notarize, and submit the affidavit developed by Staff stating as such along with the “Final As-Built” packet to the TI Program Administrator. The Board **FURTHER ORDERS** applicants with Conditionally Approved Projects to comply with any requests from Board Staff intended to verify that a project was constructed and operated in compliance with its original application, this Order, and applicable rules and regulations.

The Board **ORDERS** that, pursuant to the Pilot Program rules at N.J.A.C. 14:8-9.3(c)(7), as amended, Conditionally Approved Projects must provide quarterly updates on the status of the

project, and that these updates be provided by means of the TI Program Milestone Reporting Form. The Board **FURTHER ORDERS** that, pursuant to the Pilot Program rules at N.J.A.C. 14:8-9.3(c)(8), as amended, Conditionally Approved Projects must become fully operational within 18 months of the effective date of this Order. Pursuant to N.J.A.C. 14:8-9.3(c)(8), as amended, Board Staff may approve one six-month extension if substantial progress is shown towards becoming fully operational within the initial 18-month period. The Board may grant subsequent extensions if it deems warranted upon review of a petition submitted to the Board.

The Board **DIRECTS** Staff to issue a TREC Certification Number to Conditionally Approved Projects upon the applicant's demonstration that all requirements for full certification have been satisfied, including the receipt of all necessary permits, fulfillment of all TI Program requirements, and being otherwise in compliance with applicable laws, rules, and regulations. The Board **FURTHER FINDS** that allocation of bill credits to subscribers of a project by the relevant EDC is contingent upon receipt of a TREC Certification Number.

The Board **ORDERS** all Conditionally Approved Projects that are not sited on a rooftop or parking lot canopy to contact the NJDEP OPPN within 30 days of the effective date of this Order, and comply with all information requests and/or follow-up meetings deemed necessary by the OPPN.

The Board **FINDS** that, if a Conditionally Approved Project fails to comply with the requirements of this Order, the Pilot Program rules at N.J.A.C. 14:8-9 et seq., or to be built and operated as proposed in its original application, this failure may be grounds to cancel the Board's conditional approval of a project.

The Board **URGES** the applicants with Conditionally Approved Projects to review all applicable rules and regulations, particularly N.J.A.C. 14:8-9.10, regarding consumer protections, and N.J.A.C. 14:8-9.11, regarding reporting.

The Board has the authority to waive its rules pursuant to N.J.A.C. 14:1-1.2(b), which provides that "[i]n special cases and for good cause shown," the Board may relax or permit deviations from these rules. Further, in accordance with the general purposes and intent of its rules, the Board shall waive sections of its rules if "full compliance with the rule would adversely affect the ratepayers of a utility or other regulated entity, the ability of said utility or other regulated entity to continue to render safe, adequate and proper service, or the interests of the general public."¹⁰ The Board **HEREBY FINDS** that, in light of the timing of the permanent program and the experience gained throughout the implementation of the Pilot Program, there is good cause to waive its rules at N.J.A.C. 14:8-9.4(b) establishing a capacity allocation for PY3, and instead proceed immediately to the development of the permanent program. The Board **FURTHER DIRECTS** Staff to launch a stakeholder proceeding, and to report back to the Board with recommendations regarding the establishment of rules for the permanent program.

Finally, in order to create regulatory certainty for PY2 applicants, the Board found in its October 2 Order, and again in its July 2021 Order, that the TI incentive shall be available to selected PY2 projects regardless of whether Board selection occurred after closure of the TI program and opening of the Successor program. Here, a waiver of the Board's TI rules is proper and necessary to effectuate the intent of the Board's prior orders, and is also necessary because full compliance with the TI rules would adversely affect the PY2 community solar program and the interests of the general public. Therefore, consistent with the October 2 and July 2021 Orders, the Board **HEREBY FINDS** good cause to waive those portions of the Board's TI Rules at N.J.A.C. 14:8-

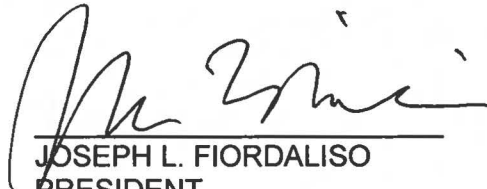

¹⁰ N.J.A.C. 14:1-1.2(b).

10.1, N.J.A.C. 14:8-10.4(c), and N.J.A.C. 14:8-10.4(e) to the extent that they would otherwise prevent PY2 Conditionally Approved Projects from being eligible for registration in the TI Program.

The effective date of this Order is November 4, 2021.
