UNIFORM CRIME REPORTS

State of New Jersey

1975

Honorable William F. Hyland
Attorney General
State of New Jersey

Colonel Clinton L. Pagano
Superintendent
New Jersey State Police

Major LeRoy F. Umholtz
Supervisor
Records and Identification Section
New Jersey State Police

Chief Walter C. Witt
Wall Township Police Department
President

New Jersey Association of Chiefs of Police

New Jersey Association of Chiefs of Police
Advisory Committee on Uniform Crime Reporting

Prepared and Issued By:
State of New Jersey, Division of State Police
Uniform Crime Reporting Unit
Box 7068, West Trenton, New Jersey 08625

STATE OF NEW JERSEY
WILLIAM F. HYLAND
ATTORNEY GENERAL
STATE HOUSE ANNEX
TRENTON, N.J. 08625
609 292-4919

TO: The Honorable Brendan T. Byrne
Governor of the State of New Jersey

Honorable Members of the Senate and
Assembly of the State of New Jersey

Dear Governor and Members of the Legislature:

Pursuant to N.J.S.A. 52:17B-5.5, there is hereby respectfully submitted the ninth annual report on information gathered and collated under the New Jersey Uniform Crime Reporting System, inaugurated on January 1, 1967, which provides a comprehensive compilation and analysis of crime statistics for New Jersey.

Effective law enforcement requires accurate crime statistics in order to identify the specific type, time and location of criminal activity. Criminal Justice administrators and planners have long recognized the Uniform Crime Reporting Program as the vehicle to accomplish this objective.

It would, of course, be impossible to complete this Report without the cooperation of New Jersey's municipal, county, state and other law enforcement agencies, 591 of whom contributed to this effort in 1975. It is with appreciation to these dedicated public servants, and in the interests of more effective law enforcement for all the citizens of New Jersey, that this ninth annual Uniform Crime Report is

Respectfully Submitted,

A handwritten signature in black ink, reading "William F. Hyland".

WILLIAM F. HYLAND
Attorney General of New Jersey

STATEWIDE CRIME SUMMARY

1975

OFFENSES

- There were 376,139 serious crimes (Index offenses) reported in the state during 1975, a 7 percent increase over 1974.
- The Crime rate was established at 5,059.8 victims for every 100,000 permanent inhabitants of the state, a 7 percent increase over 1974.
- The number and rate of violent crimes increased 2 percent since 1974.
- Law enforcement agencies solved almost 18 percent of all Index offenses reported in 1975, and juveniles (persons under 18) were involved in 36 percent of all these solved cases.
- The value of all reported stolen property in the state, amounted to \$150 million.
- Larcenies from motor vehicles and of motor vehicle parts and accessories increased 27 percent over 1974, and amounted to a \$12.4 million loss to victims. They accounted for 37 percent of all larcenies reported in 1975.
- Firearms were used in 44 percent of the murders and 15 percent of all atrocious assaults, the lowest firearm involvement recorded since 1968.
- Robbery was the motive for 19 percent of all murders committed during 1975. A total of 343 persons were murdered for the purpose of robbery during the period 1971 through 1975.
- Daytime breaking and enterings of residences accounted for 52 percent of all resident breaking and enterings reported.
- Urban crime increased 7 percent and accounts for 60 percent of the total Index crimes reported in the state. Suburban crime increased 8 percent, with 34 percent of the state total. Rural crime accounted for 6 percent of the total crime reported in New Jersey, and increased 9 percent over 1974.

ARRESTS

- During 1975, there were 340,824 persons arrested for all criminal acts, and increase of 4 percent over 1974.
- Persons over 18 accounted for 75 percent of all violent crime arrests.
- Persons under 18 accounted for 55 percent of all property crime arrests and 37 percent of all arrests made during 1975.
- Persons under 18 accounted for 6 of every 10 arrests for breaking and entering and almost 7 of every 10 arrests for motor vehicle theft.
- Arrests for narcotic drug law violations reflected a 15 percent decrease over 1974, the first annual decrease since the inception of the statewide Uniform Crime Reporting Program in 1967.
- Persons under 30 accounted for 94 percent of all narcotic arrests made.

POLICE KILLED AND ASSAULTED

- During 1975, there were three New Jersey police officers killed and 3,618 assaulted in the line of duty, a 7 percent increase over 1974.
- 20 of every 100 municipal police officers were assaulted during 1975.

THE NEW JERSEY UNIFORM CRIME REPORTING SYSTEM

DEFINED

The New Jersey Uniform Crime Reporting System involves the uniform compilation, classification, and analysis of crime statistics reported by all police agencies of the state pursuant to guides and regulations prescribed by law.

The statute which established the Uniform Crime Reporting System (N.J.S.A. 52:17 B-5.1 et seq) empowers the Attorney General to collect, gather, assemble, and collate information which would be of assistance in the proper administration of criminal justice. The Attorney General and the New Jersey State Police (the agency designated by the Attorney General to establish the Uniform Crime Reporting System), in an attempt to achieve uniformity with the FBI reporting system and to establish a broad base for the collection of data involving anti-social behavior, and other relevant information with respect thereto, have defined the word "crime" to include acts which technically within our State are not considered crimes. In this reporting system the word "crime" includes some "disorderly persons offenses." It also includes in a category entitled "all other offenses" violations of municipal ordinances. References to the relevant tables which set forth the Class I and Class II offenses contained in this report clearly indicate what is covered.

PURPOSE

Effective law enforcement requires the coordination of law enforcement activities within and among political subdivisions. Special attention must often be devoted to a selective and concentrated effort both areawide, as well as in terms of a specific pattern and type of criminal behavior. Selective and coordinated enforcement becomes possible only when the type and volume of crime can be analyzed on the basis of accurate information comprehensively developed and systematically collated.

Information revealing the location, frequency, and nature of crime is essential to this purpose. It is for these reasons that New Jersey's Uniform Crime Reporting System was developed.

DEVELOPMENT

The New Jersey Uniform Crime Reporting Law was enacted on May 16, 1966 and became effective January 1, 1967. Responsibility for the establishment, direction, control and supervision of the Uniform Crime Reporting System was assigned to the Attorney General of the State. After passage of the law, the Attorney General, as provided by the statute, designated the New Jersey State Police as the agency to collect, gather, assemble and collate information from the law enforcement jurisdictions within the state.

Prior to the enactment of the law, and at the request of Attorney General Arthur J. Sills, the New Jersey State

Police conducted research and study of crime reporting systems then operational throughout the country. Study results established that adoption of a reporting program paralleling that of the federal system of Uniform Crime Reporting would be the soundest approach toward development of a state system. The obvious advantage found in the adoption of the federal system included the desirability of having compatible state and federal systems thereby allowing absorption of state crime data into the national level.

The Committee on Uniform Crime Reporting of the New Jersey State Chiefs of Police Association has served the program in an advisory capacity since 1966. The contributions made by this committee have proven invaluable and, indeed, insured the success of the program. This body continues to work closely with the Uniform Crime Reporting Unit of the New Jersey State Police to improve further the quality of reporting and to recommend additional program standards, policies and procedures.

During the development phase of the program a study of the federal and various state systems of crime reporting revealed the importance of a sound internal police records system, if accurate crime statistics were to be forthcoming. Upon recognition of this factor, the State Police revised completely their method of internal reporting in order to meet the requirements of the Federal System of Uniform Crime Reporting. This step not only hastened program development but also proved invaluable throughout the operational phase.

Education of contributors to the program in the areas of mechanics, methods and concepts must be a constant operational requirement, if continued system adherence and valid statistics are to be expected. This vital need is satisfied by the personal contact between the five state troopers assigned as field representatives to the program, and the contributors to the system.

The difficult and important task of maintaining close liaison is obvious when it is realized that services now are extended by the New Jersey State Police Uniform Crime Reporting Unit, through its Field Representatives, to the 591 law enforcement agencies of the state. Although each contributor to the program is supplied with the "Uniform Crime Reporting Guide" describing system procedures and mechanics, personnel changes within reporting departments and program refinements make the educational phase a continuing one.

As an adjunct to the program, the New Jersey State Police has offered its revised method of internal reporting to those police departments who wish to adopt it. In all cases of report adoption and record up-dating, assistance is rendered by the Field Representative who provides the necessary guidance and instruction. The personal contact between the Field Representative and the contributor not only serves as a rapid means to resolve areas of report error, but also provides the opportunity to discuss other areas of mutual interest, thus providing an additional communication link between municipal, county and state law enforcement agencies.

PROGRAM EVALUATION

The scope of mandatory crime reporting in New Jersey extends far beyond the stated purpose of the initial program. The compilation and publication of an annual report, which identifies and offers analysis of the extent and nature of crime on a state, regional, county and municipal level, may be considered an end in itself. However, practical application of such data must be made before the program can be judged substantive.

Police executives throughout the state are making increased use of this data in administrative, planning and operational determinations for their respective jurisdictions. During 1975 the State Police Uniform Crime Reporting Unit rendered operational assistance to municipal police agencies by providing individual analysis of statistics as they related to specific crime problems and for use in identifying necessary police manpower and equipment needs. Program requirements have also increased police efficiency in the areas of reporting and record keeping. Examples of program application, as discussed here, aid police in their day to day operations and contribute toward the constant effort of upgrading the quality of police services in the community.

The State Law Enforcement Planning Agency, which was established in August of 1968 to conform with the provisions of the Omnibus Crime Control and Safe Streets Act of 1968, has the responsibility of improving law enforcement throughout the state. Since its inception, in all of its determinations as to application of allocated funds, this agency has used analyzed crime data obtained through the Uniform Crime Reporting program. The establishment of crime rates on regional, county and municipal levels with identification of specific crime problems allows the agency to construct priorities, formulate plans and implement these plans to the benefit of the state and all units of local government. This administrative application of such crime data illustrates the far reaching effect the program has on all efforts to combat crime in the state.

Since 1967, many states have studied the New Jersey system for adoption within their respective states. Several of these, presently have ongoing programs based on the New Jersey system and many more of the remaining states are in the process of implementing similar programs.

The element of compatibility of crime statistics between state and federal programs is vital, and evaluation must include consideration of the degree of that compatibility. The Uniform Crime Reporting Unit of the State Police has worked closely with the members of the Federal Bureau of Investigation who administer the National Uniform Crime Reporting Program. Invaluable aid and assistance has been given by the FBI which resulted in the New Jersey program being compatible with that of the national program. This compatibility allows absorption of state crime data into the national system without lengthy and costly conversion processes.

On January 1, 1969, the FBI, who have collected National Uniform Crime Reports in the states and counties since 1930, eliminated the direct collection of National Uniform Crime Reports from the police of New Jersey. This procedure change followed a two-year evaluation of the New Jersey program by the FBI and resulted in an

agreement wherein uniform crime reports for each municipality of the state are now being submitted to the national program by the State Police. This working relationship, which was coordinated through the Chiefs of Police Association, State Police and the FBI, is a direct result of the interest and cooperation of the law enforcement agencies of the state in the Uniform Crime Reporting program.

FACTORS RELATED TO CRIME

It has long been noted there are numerous factors, environmental and others, which have an important bearing on the scope and intensity of crime. As an adjunct to the statistical compilation and analysis of crime reported herein, special attention is devoted to certain of these factors.

To understand further the nature and scope of crime in various sections of the state, a section entitled "Profiles of Incorporated Municipalities in New Jersey" appears in this publication as it did in the first annual report of 1967. The profile information set forth in the areas of population, density rates, population growth, all relate to the year 1975, as do the urban, suburban, rural characterizations, given land areas and industrial populations.

Factors considered within profiles are those which are out of police control, but which may affect a community's crime rate and which may vary from community to community. The presence of these factors are noted in order that the resulting crime statistics may be reviewed in a more fair and equitable manner. The effect of these factors on a community's crime rate is not easily determined, but they are set forth for the purpose of alerting the reader to their existence in varying degrees in all New Jersey communities.

REFINEMENT OF THE SYSTEM

The collection of meaningful data to supplement that which is normally collected is a vital element of the system. This supplemental information regarding crime and the criminal, enters the system by way of special surveys and samplings. Periodic collection of such information enables better identification of specific crime problems and those factors which contribute to them. Analysis of refined information and dissemination to contributors provides additional intelligence upon which more effective police action can be based.

Special statewide surveys taken in previous years have dealt with the important mobility factor of crime and the specific offense of robbery. The results of the mobility study served as an indicator of the effect the criminal mobility can have on the crime experience of the community and the contribution it makes toward police problems in the control of crime. Robbery analysis, based on that special survey, better identified the nature of the crime, its impact on society and the robbery perpetrator.

The collection of refined information relative to crime was continued in 1969 through a one month "Special Auto Theft Survey" conducted in August of that year. The auto theft problem, although not unique to New Jersey, has grown to major proportions and its continuing growth suggests serious consequences for the individual and the community.

A statewide arrest survey on the vital issue of "Drug Abuse and Crime in New Jersey" was conducted during the month of August, 1970. For the first time a meaningful correlation was established between these two major problems. Complete results and analyses are contained in the publication "Drug Abuse and Crime in New Jersey" released June, 1971.

In 1971 crime statistics by urban, suburban and rural classifications were collated and analyzed for the first time since the beginning of the program in 1967. These statistics were presented in the 1971 publication and will be continued in all future publications.

The Uniform Crime Reporting Program of New Jersey, in its ninth year of operation, is now recognized as an effective vehicle to increase the efficiency of police operations in every municipality of the state. The System was originally designed to fulfill the need for accurate crime statistics for use in police administration, planning and operations. In its current status it does answer these needs to a great degree, but has not yet reached full potential as an operational tool.

In August, 1974, the New Jersey State Police, Uniform Crime Reporting Unit, through the New Jersey Law Enforcement Planning Agency, was awarded a Discretionary Grant from the Law Enforcement Assistance Administration, U.S. Department of Justice. The funds are for the purpose of assisting in the expansion of the Uniform Crime Reporting Program.

Based on the current Uniform Crime Reports submitted by the police departments throughout the state, a monthly "feedback" report is disseminated to each contributor to the program. This "feedback" report presents an accurate account of the status of crime in each municipality of the state. The report contains information as to the type and time of criminal operations and crime targets, as well as the volume and trend of crime within each municipality. In addition to comparing the current month with the same month of last year, further analysis is done for a current cumulative monthly total compared to the same period of last year. A trend for two prior years within the same crime categories is also established.

In addition to Monthly Crime Trend Reports, the Uniform Crime Reporting Unit updates and implements record-keeping systems for Criminal Justice agencies, upon request. The Unit also improves its capabilities to provide individual crime analyses for requesting Criminal Justice agencies.

COLLECTION OF CRIME DATA

As required by statute, all law enforcement agencies in the state submit crime reports to the program. During the year 1975, offense and related supplementary information, as well as arrest and disposition data, were received from 470 full-time municipal police departments, 53 special part-time municipal police departments and the New Jersey State Police who provided the necessary information for the 39 municipalities without local police services.

In addition to the above agencies, arrest and disposition data were received for the state's 21 county prosecutors'

and 21 sheriffs' offices, 2 county police departments and 8 county park police departments. In order to incorporate all New Jersey law enforcement under the system, the 9 other state agencies with law enforcement responsibilities were included. Also included are 6 college campus police departments reporting under a pilot program. This amounts to 591 law enforcement agencies reporting.

In the interest of satisfying a national, as well as a state need for uniformity, completeness, and accuracy in crime statistics, every report submitted under the system is prepared in triplicate by the contributor. One copy is retained by the contributor and the remaining copies are submitted to the State Police Uniform Crime Reporting Unit, which in turn forwards a copy to the Federal Bureau of Investigation for inclusion in the National Uniform Crime Reporting Program.

METHOD

Reported offenses are related to the municipality in which they occur, rather than to the agency which may investigate, arrest or otherwise in some manner, dispose of the case. The clearance, in every case, is attributed to the municipality in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense. Each contributing agency is responsible for compiling its own reports. The Uniform Crime Reporting Guide, which is supplied to all contributors, outlines reporting procedures in detail and is complete with examples and illustrations. Field Representatives provide additional instruction and clarification when required.

Municipal law enforcement agencies report the number of known offenses according to the following categories:

- (1) Homicide (Murder and Manslaughter)
- (2) Forcible Rape
- (3) Robbery
- (4) Assault
- (5) Breaking and Entering
- (6) Larceny—Theft
- (7) Motor Vehicle Theft

This count is determined from a record of all criminal complaints received by the police from victims or other sources or discovered by the police during their operations. Complaints determined by police investigation to be unfounded are eliminated from this count. The number of "offenses known" in each crime category is reported without regard to whether anyone is arrested, stolen property is recovered, local prosecutive policy, or any other consideration. Municipal law enforcement agencies also report the total number of these crimes cleared by arrest. A separate category is made for crimes cleared by the arrest of persons under 18 years of age. Certain other analytical data pertaining to specific crime categories are also reported, including, for example, total adult and juvenile arrests made during the month. Police killed or assaulted information is also collected by month.

Other monthly report forms contain data such as the number of persons arrested for all criminal offenses with respect to age, sex and race of the offender. An accounting of persons formally charged and their dispositions is submitted on an annual basis, as well as police employee data.

In summary, the presentation of this report, "Crime in New Jersey," reflects the compilation of the seven serious "offenses known to police," arrests of persons under 18 years of age and 18 years of age and over, and the ultimate disposition of those persons charged. This data is then related to the State of New Jersey, by population groups, character, designated crime reporting regions, individual counties and municipalities.

VERIFICATION PROCESSES

An obvious concern in the collection of crime statistics from 591 law enforcement agencies throughout the state is the uniformity of data received. Program aids such as guides and instructions do not necessarily guarantee the accuracy and correctness of the reports submitted by the contributors. Additional controls are therefore necessary.

Each report received by the Uniform Crime Reporting Unit is recorded and examined for mathematical accuracy and, possibly more important, for reasonableness as to interpretation of offense classifications. Fluctuations from levels established by previous reports submitted by the contributor become subject of inquiry as to reason for variations. Improper classification, changes in reporting procedures or actual change are identified in this manner. Errors of a minor nature are corrected by direct telephone contact with the contributors, while all other errors are resolved by a personal visit by a Field Representative to the reporting agency. These personal contacts are invaluable to the accuracy of the system. Field Representatives are engaged in a constant educational effort and, as such, provide a vital link between the program and the reporter.

CLASSIFICATION OF OFFENSES

Uniformity in reporting under the New Jersey system is based upon the proper classification of offenses by police. The adoption of the federal system of reporting included the utilization of the offense classifications of that system. Law enforcement in this state has made accurate application of those classifications in the reports submitted to the program.

In view of the need for compatibility with the federal system, "offenses" under the program are not distinguished by designation of "high misdemeanors," violations of the Disorderly Persons Act or municipal ordinances. The explanation of offense classifications may vary slightly with those employed at the federal level because the language used is familiar to law enforcement in this state. However, the major categories of offense classification remain the same as those employed nationally.

OFFENSE CLASSIFICATIONS

(1) Homicide

- 1a. Murder—The unlawful killing of a human being with malice aforethought.
General rule—Any death due to a fight, argument, quarrel, assault or commission of a crime.

- 1b. Manslaughter—The unlawful killing of a human being, by another, without malice aforethought.
General rule—The killing may result from the commission of an unlawful act or from a lawful act performed with gross negligence. Traffic deaths may be classified as such when due to gross negligence of someone other than the victim.

(2) Forcible Rape

- 2a. Rape by force—The carnal knowledge of a female forcibly against her will.
General rule—Forcible rape of a female, but excluding carnal abuse (Statutory Rape) or other sex offenses.
- 2b. Assault to rape—Attempts—All assaults and attempts to rape.

(3) Robbery—The felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. Includes all attempts.

General rule—Robbery differs from larceny in that it is aggravated by the element of force or the threat of force.

- 3a. Firearm—All robberies and attempted robberies involving the use of any type of firearm. This includes revolvers, shotguns, rifles, zip guns, etc.
- 3b. Knife or Cutting Instrument—All robberies and attempted robberies involving the use of cutting or stabbing objects, such as a knife, razor, axe, glass, ice pick, etc.
- 3c. Other dangerous weapon—All robberies and attempted robberies when any other object or thing is used as a weapon. (Clubs, bricks, acid, explosives, etc.)
- 3d. Strong arm—All robberies and attempted robberies where no weapon is used but strong-arm tactics are employed. This is limited to personal weapons such as hands, fists, feet, etc.

(4) Assaults—An assault is an attempt or offer, with unlawful force or violence, to do physical injury to another.

General rule—All assaults will be classified in the following categories, excluding assaults with intent to rob or rape.

- 4a. Gun—All assaults and attempted assaults involving the use of any type of firearms. (Revolvers, automatic pistols, shotguns, zip guns, rifles, pellet guns, etc.)
- 4b. Knife or cutting instrument—All assaults and attempted assaults involving the use of cutting or stabbing objects. (Knife, razor, hatchet, axe, cleaver, scissors, glass, broken bottle, dagger, ice pick, etc.)
- 4c. Other dangerous weapon—All assaults or attempted assaults when any other object or thing is used as a weapon. (Clubs, bricks, pick handles, bottles, explosives, acid, lye, poison, scalding water, burnings, etc.)

4d. Hands, fists, feet, etc.—Atrocious—Assaults which are of an atrocious nature when hands, fists, feet, etc. are used. To be classified as atrocious assault, the attack must result in serious personal injury.

- (5) Breaking and Entering—Unlawful entry or attempted forcible entry of any structure to commit a felony or larceny.

General rule—Any unlawful entry or attempted forcible entry of any dwelling, house, attached structure, public building, shop, office, factory, storehouse, apartment, house trailer, warehouse, mill, barn, other building, ship or railroad car.

Note: For Uniform Crime Reporting purposes, breaking, entering and larceny are classified only as breaking and entering, the larceny is excluded. Breaking and entering of a motor vehicle is classified as larceny.

5a. Forcible entry—All offenses where force of any kind is used to enter unlawfully a structure, with intent to steal or commit a felony. This includes entry by use of a master key, celluloid or other device that leaves no outward mark but is used to open a lock. Concealment inside a building, followed by the breaking out of the structure is also included.

5b. Unlawful entry—No force—Any unlawful entry without any evidence of forcible entry.

5c. Attempted forcible entry—When determined that Forcible entry has been attempted.

- (6) Larceny—Theft (Except motor vehicle theft)—The unlawful taking of the property of another with intent to deprive him of ownership.

General rule—All larcenies and thefts resulting from pocket-picking, purse-snatching, shoplifting, larceny from motor vehicle, larcenies of motor vehicle parts and accessories, theft of bicycles, larcenies from buildings, and from coin operated machines. Any theft that is not a robbery or the result of breaking and entering is included. Embezzlement, larceny by bailee, frauds or bad check cases are excluded.

- (7) Motor Vehicle Theft—The larceny or attempted larceny of a motor vehicle.

General rule—Thefts and attempted thefts of a motor vehicle. This includes all vehicles which can be registered as a motor vehicle in this state. Excludes where there is a lawful access to the vehicle, such as a family situation or unauthorized use of others with lawful access to the vehicle. (Chauffeur, employees, etc.)

7a. Autos—Includes the thefts of all sedans, station wagons, coupes, convertibles, and other similar motor vehicles which serve the sole purpose of transporting people from one place to another.

7b. Trucks and Buses—Includes those vehicles specifically designed to transport people on a commercial basis, and to transport cargo.

7c. Other vehicles—This category includes other

motor vehicles such as snowmobiles, motorcycles, trailbikes, etc. Farm and construction equipment are not considered motor vehicle thefts.

- (8) Other Assaults—Not atrocious—Assaults and attempted assaults which are not of an atrocious nature and are simple and minor in nature.

(9) Arson—Willful or malicious burning with or without intent to defraud. Include attempts.

(10) Forgery and Counterfeiting—Making, altering, uttering, or possessing or attempts to make, alter, utter or possess with intent to defraud. Anything false which is made to appear true.

(11) Fraud—Fraudulent conversion of another's money or property by false pretenses. Includes bad checks, except forgery and counterfeiting.

(12) Embezzlement—Misappropriation or misapplication of money or property in trust to one's care, custody or control.

(13) Stolen Property—Buying, receiving, possessing—Buying, receiving and possessing stolen property and attempts.

(14) Malicious Mischief—Willful or malicious destruction, injury, disfigurement or defacement of property without consent of the owner or persons having custody or control.

(15) Weapon: Carrying, possessing and etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing and manufacturing of deadly weapons or silencers and attempts.

(16) Prostitution and Commercialized Vice—Sex offenses of a commercialized nature and attempts. Such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes.

(17) Sex Offenses—Except forcible rape, prostitution and commercialized vice—Statutory rape, offenses against chastity, common decency, morals, and the like. Also include attempts.

(18) Drug Abuse Violations—Offenses relating to narcotics and drugs, such as unlawful possession, sale or use. Does not include: Failing to register as user or federal offenses.

(19) Gambling—Promoting, permitting, or engaging in gambling.

(20) Offenses against Family and Children—Non support, neglect, desertion, or abuse of family and children.

(21) Driving under the Influence—Driving or operating any motor vehicle while drunk or under the influence of liquor or narcotics.

(22) Liquor Laws—State or local liquor law violations, except "drunkenness" and "driving under the influence." Excludes federal violations.

(23) Drunkenness or Intoxication.

(24) Disorderly Conduct—Breach of the peace. (Disorderly persons.)

- (25) Failure to give Good Account—Vagabondage, begging, loitering, etc.
- (26) All other Offenses—All violations of state and local laws except classes 1–25.
- (27) Suspicion—Arrest for no specific offense and released without formal charges being placed.—Not reported in New Jersey.
- (28) Curfew and Loitering Laws (Juveniles)—Offenses relating to juveniles of local curfew or loitering ordinances, where such laws exist.
- (29) Runaways (Juveniles)—Limited to juveniles taken into protective custody under provisions of local statutes as runaways.

CRIME FACTORS

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of New Jersey and project a statewide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report *The Challenge of Crime In a Free Society*—(1967—Page 92)—“But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the

criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time.” Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

- Density and size of the community population and the metropolitan area of which it is a part.

- Composition of the population with reference particularly to age, sex and race.

- Economic status and mores of the population.

- Relative stability of population, including commuters, seasonal, and other transient types.

- Climate, including seasonal weather conditions.

- Educational, recreational, and religious characteristics.

- Effective strength of the police force.

- Standards governing appointments to the police force.

- Policies of the prosecuting officials and the courts.

- Attitude of the public toward law enforcement problems.

- The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

THE POLICE POINT OF VIEW -1975

As mentioned in the Introduction Section of this publication, the New Jersey State Police Uniform Crime Reporting Unit, is operating under a Federal Grant to expand the Unit's capabilities. One objective of the Grant is to contact police agencies in New Jersey and ascertain, for documentation and dissemination purposes, the police point of view concerning factors or reasons contributing to the unusual decreases or increases in specific crimes occurring in their municipality. There were many general type answers received from the police, such as the high unemployment rate, increased abuse of alcohol and drugs, decrease in police personnel, leniency of the courts, failure of the Criminal Justice System and increased seasonal population. Some of the more specific type of police views concerning unusual increases or decreases in crime are listed below:

Robbery:

Increases

Availability of new interstate roadways providing a swift avenue to and from communities previously difficult to reach. This factor has also been associated with breaking and enterings, particularly in suburban and rural areas.

Decreases

Additional vehicle, scooter and foot patrols in high crime areas; selective enforcement through identification of probable location and time of succeeding robberies. Based on this information, stakeout squads are assigned to the target area.

Breaking and Entering:

Increases

Husband and wife both working; leaving no one at home during the daylight hours. In addition, this creates a decrease in possible witnesses to the voluminous residential type of breaking and entering.

Unoccupied summer homes being entered during the off-season; another situation contributing to the lack of possible witnesses. Also insufficient manpower to properly patrol this type of residential area.

Little or no security measures initiated by the average citizen to protect his own property.

Juvenile repeaters receiving no detention after they are arrested numerous times for being involved in breaking and enterings.

Decreases

Arousing the public's interest and gaining their cooperation to combat crime. Police in general emphasize this as a practice absolutely necessary if we are to ever decrease the trend of crime in this country. Such programs as "Neighborhood Watch" and "Operation I.D." have proven to be successful as a deterrent to breaking and enterings, as well as other crimes.

Educating the public through the news media, how to protect their property. This type of education extends

to protection against many other property and violent type crimes.

Increased patrols during probable times and locations of residential and commercial breaking and enterings.

Larceny:

Increases

Larceny of auto parts and property contained inside motor vehicles is the most common type of larceny being reported to police in New Jersey. This is attributed to:

Shortage of police manpower to adequately patrol parking lot areas.

A lack of security provided by the various shopping malls in their own parking areas.

Availability and visibility of the articles left in the vehicles.

The popularity and resale opportunities of certain types of stolen property, such as, citizen band (CB) radios and tape decks have increased the volume of larcenies from vehicles.

Shoplifting is a special type of larceny which police have little or no control over. Store security forces are under the control of the store administration and their arrest policies do vary from strict enforcement, arrest and prosecution, to only a warning. Policy change has been directed towards prosecuting the offender rather than a warning, causing to some unknown extent, an increase in the number of shoplifting offenses reported to police.

Decreases

Surveillance of shopping mall parking areas, utilizing motor scooters, bicycles and plain clothes foot patrols. Also additional lighting in the parking areas.

Public awareness programs do contribute to the decrease in larceny from parked vehicles. This type of program also applies to motor vehicles and bicycle thefts.

Larceny of bicycles have decreased as a result of Safety and Security Programs implemented by police in the various schools. This includes the registration and marking of bicycles with a special number.

Motor Vehicle Theft:

Decreases

Motor vehicle thefts have been decreasing since 1972. Programs initiated by police have contributed to this decrease. Some of these programs include warning notices issued to persons leaving their vehicles unlocked. Taking keys that were left in vehicles and notifying the driver to recover them at Police Headquarters.

Police also attributed the decrease to the rapid identification of reported stolen vehicles through the New Jersey Statewide Communication Information System.

STATE, COUNTY AND MUNICIPAL PROFILES

The presentation of state, county and municipal profiles in this section is offered for the purpose of projecting, for the consideration of the reader, a group of recognizable factors which may affect the amount and type of crime that occurs from community to community. Selection of the areas of information to be related to individual municipalities was based on the immediacy and completeness of data available.

Population statistics presented here and throughout this publication, were obtained from the Division of Economic Development, Office of Business Economics. Character of

municipalities by urban, suburban and rural classifications and square miles, were compiled by the Division of State and Regional Planning, Bureau of Statewide Planning.

Certain other socio-economic factors, present in varying degrees in all communities, may have an influence on resulting crime rates. Obvious difficulties in the identification, documentation and measurement of these factors, however, precluded their application in this report.

Those factors presented were listed to affirm their existence within the county and community and to provide a base for consideration in the evaluation of that community's crime experience.

PROFILE OF NEW JERSEY

New Jersey is situated between the major industrial markets of New York and Philadelphia and can be classified as the "Crossroads of the East". The geographic location of the state has been a major factor in its growth and development. The many miles of super-expressway facilities within the state connect New Jersey directly with the neighboring states of New York, Pennsylvania and Delaware. Additionally, New Jersey as a corridor state, accommodates large volumes of traffic from both the eastern and western part of the United States.

The state is politically comprised of 21 counties which contain 567 incorporated municipalities. Nationally, New Jersey, although 46th in size, ranks ninth in population and first, as the most densely populated state in the country. In addition to this density of 989.9 persons per square mile, New Jersey still has many miles of rural area or sparsely settled communities. The areas of density show a heavy

concentration around the major urban centers and those areas most accessible for commuting.

Dramatic increases have occurred in specific counties and municipalities. The trend of this rapid growth in populations of the suburb and rural areas has resulted in the loss of some city populations. Much of the loss has occurred from urban redevelopment or renewal programs, but to a great degree have been absorbed by the outlying suburbs or rural areas. An interesting note is the fact that the shift of the urban population to suburban or rural areas has caused a large number of these municipalities to be reclassified to an urban status.

The unique image New Jersey presents for consideration is not only the result of the many and varied factors within its own boundaries, but also the complex elements of the megalopolis of which it is a part.

NJSP Table 1

NEW JERSEY CRIME INDEX - 1975

In this section, tabulations presented in tables and charts indicate the extent, fluctuation and distribution of crime for the state as a whole, reporting regions, counties, character groups, population groups and individual municipalities. The Crime Index, consisting of seven serious offenses, is used as a measure. Offenses are counted as they become known to law enforcement agencies. Crime classifications used in the index are: murder, forcible rape, robbery, atrocious assault, breaking and entering, larceny and motor vehicle theft. In the past, larceny \$50 and over has been used as one of the Crime Index offenses. Effective January 1973, total larceny-theft is being used instead of the larceny \$50 and over category. Larceny-theft is primarily a crime of opportunity and in most instances the value of the property taken is incidental to the actual criminal act.

Although the total number of criminal acts that occur are unknown, those that are reported to police provide the first means of a count. All crimes do not readily come to the attention of police nor are all crimes of sufficient importance to be significant in an index and further, not all important crimes occur with enough regularity to be meaningful in an index. With these considerations in mind, the above crimes were selected as a group to furnish some measure of the crime problem in New Jersey.

The volume of crime in a state, region, county or municipality is subject to those crime influencing factors set

forth elsewhere in this publication. Crime rates are constructed from estimates of current permanent population. The important transient population factor, although present in every community in varying degrees, cannot be measured in all instances and therefore is not included in the establishment of a crime rate. The existence of this factor, however, should be considered when reviewing the tabulations presented in this section.

The establishment of the base year New Jersey Crime Index for 1967 provided a foundation which allows year to year comparison of like data to be made. Specific areas of comparison presented in this publication are in respect to variances of offense volumes, rates, clearances and related information. Fluctuations in arrest volumes, rates and supplementary arrest information are also included in the tabulations shown.

CRIME AND POPULATION

Crime rates relate the incidence of crime to population. More specifically, a crime rate should be considered as a count of victims. The risk of victimization arises from crime-population computations and provides a numerical result for consideration. Crime influencing factors, which are complex in nature and exist in varying degrees in all areas, are not incorporated in the determination of a crime rate.

STATE OFFENSE DATA

VOLUME

A total of 376,139 Crime Index offenses were reported to law enforcement agencies of New Jersey during the Calendar Year 1975, a 7 percent increase in crime volume over 1974. When comparing the five year period, 1971 through 1975, a 30 percent increase evolves.

The Crime Index offenses referred to here represent the most common problem to law enforcement and the municipality. They are serious crimes by their nature, volume or frequency of occurrence. Basically, they can be categorized as violent crimes, such as murder, forcible rape, robbery and atrocious assault, or as crimes of a nonviolent nature, such as breaking and entering, larceny and motor vehicle theft.

The violent crimes as a group, accounted for 8 percent of the total Crime Index reported for 1975, and since 1974, rose 2 percent. The five year period, 1971 through 1975 disclosed a 14 percent increase. Murder increased 4 percent, 1975 over 1974, forcible rape decreased 4 percent, robbery increased less than 3 percent and atrocious assault increased 2 percent.

The nonviolent or property type group recorded an 8 percent increase since 1974. This group represents 92 percent of the Crime Index total. Breaking and entering increased 6 percent since 1974, larceny increased 11 percent and motor vehicle theft decreased 2 percent. The five year period, 1971 through 1975, revealed that property crime increased almost 32 percent.

A review of the distribution of offenses within the Index discloses that larceny accounted for 52 percent of the total 1975 Index, and breaking and entering accounted for 30 percent. The largest involvement of a violent crime was in the offense of robbery, at 4 percent of the total Index.

RATE

Crime rates relate the incidence of crime to the resident population. Many other factors which may contribute to the volume and type of crime in a given jurisdiction are not incorporated here, but are shown in the profile section of this publication.

In 1975 the crime rate was established at 5,059.8 victims for every 100,000 permanent inhabitants. This represents a 7 percent increase over 1974 and a 28 percent increase since 1971.

The 1975 rate for the violent crime group was established at 406.2 victims for every 100,000 inhabitants, a 2 percent increase over 1974. Within this violent crime group, robbery again recorded the greatest involvement of victims, 219 for every 100,000 residents. The nonviolent crime rate increased 8 percent over 1974 and resulted in a property crime rate of 4,653.6 per 100,000 inhabitants. Larceny contributed the most victims to the overall crime rate, 2,628 per 100,000 residents.

CLEARANCES

For Uniform Crime Reporting purposes, a crime is cleared when police have identified the offender, have evidence to charge him and actually take him into custody. Solutions of crimes are also recorded in exceptional instances when some element beyond police control precludes formal charges against the offender, such as the victims refusal to prosecute or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of solving one crime.

The police of New Jersey cleared or solved 17.5 percent of all Index offenses reported to them in 1975, a 4 percent increase over 1974. The violent crime group recorded a 46 percent solution rate, while the nonviolent or property group revealed a 15 percent rate. These are the highest clearance rates posted since 1967.

Considering individually the 1975 violent crime solution rate, it was determined that police were successful in solving 85 percent of the murders; 59 percent of the rapes; 25 percent of the robberies and 72 percent of the atrocious assaults. The nonviolent crime solution rates were as follows: Breaking and entering 15 percent; larceny 16 percent and motor vehicle theft 10 percent.

The relatively high clearance rate for violent crimes as compared to nonviolent crimes is in part attributable to the volume difference between the two. Nonviolent crime volume is much greater than that of violent crime and police investigation of violent crime is usually more intense. The element of confrontation between victim and perpetrator, as well as witness identification of the perpetrator, also contributes to this higher rate of solution.

JUVENILE CLEARANCES

A means of measuring the degree of criminal involvement for those of the young age group is to identify the number of crimes in which they are the offenders. In 1975, 36 percent of all Crime Index offenses solved in New Jersey involved persons under 18 years of age, an increase over the 35 percent juvenile involvement in 1974. This 1975 increase in juvenile involvement is in contrast to the decreases experienced during the period 1970 through 1972.

Violent crime solutions involving juveniles recorded the highest rate ever, at 18 percent of the cases. Nonviolent crime solutions involved juveniles in 41 percent of the instances. Both were increases over the juvenile involvement recorded in 1974.

The juvenile involvement in individual Index offenses during the Calendar Year 1975, reflected the following: Murder 9 percent; rape 17 percent; robbery 25 percent; atrocious assault 15 percent; breaking and entering 43 per-

cent; larceny 40 percent and motor vehicle theft 38 percent.

STOLEN AND RECOVERED PROPERTY VALUE

The total value of property stolen in 1975, was reported at \$149 million, an increase over the \$136 million reported in 1974. This dollar value represents the proceeds of all robberies, breaking and enterings, larcenies and motor

vehicle thefts reported by New Jersey police during 1975. Motor vehicle thefts reported during the year accounted for 40 percent of the total value of property stolen in 1975.

Police recovered 32 percent of the total value of property stolen in 1975, but the remaining unrecovered portion represents a loss of \$102 million to the victims. A little over 65 percent of the value of motor vehicles stolen was recovered.

MURDER BY DAY OF WEEK
1975

MURDER

Murder is defined as the unlawful killing of a human being with malice aforethought. Any death due to a fight, argument, quarrel, assault or commission of a crime is included. This Index offense is scored by police on the basis of their investigation without regard to findings of a court or jury or the decision of a prosecutor. Traffic deaths, caused by the negligence of someone other than the victim, are not included here, but are counted under manslaughter. Attempts to kill and assaults to kill are scored as atrocious assaults and not as murder. Suicides, accidental deaths, and justifiable homicides are also excluded.

VOLUME AND RATE

There were 500 murders reported by the police of New Jersey in 1975, a 4 percent increase over 1974, and a 19 percent increase since 1971. Murder accounted for one-tenth of one percent of all Index offenses reported during the year. In 1975, there were 6.7 victims per 100,000 inhabitants, a 3 percent increase when compared to 1974.

MURDER ANALYSIS

In all cases of murder reported under the system, a supplementary report is submitted by the reporting law enforcement agency. Pertinent information including age, sex and race of the victim, weapon used to commit the offense, and circumstances or motive which led to the crime, is among the data collected. Place of occurrence, relationship of victim to perpetrator, and day of week are also included.

The supplementary data used in the analysis of reported murders is limited to the "known" facts of the case. It is understandable that unsolved murders, in most cases, prevent complete data availability for murder analysis.

The frequency of murder during 1975 was highest in the month of December, when 49 murders occurred. Murder by day of week again disclosed Saturday to be the highest day, when 98 murders occurred.

In 1975, the male murder victims accounted for 72 percent of the total murder victims. Victim analysis by race disclosed that 54 percent were Negro and 45 percent were White. Analysis by age revealed that the 20-29 age group contained 27 percent of the total murder victims.

In the area of "known" perpetrators, the adult male-female ratio of involvement disclosed that adult males were identified as the perpetrators in 76 percent of all the murders solved. The remaining solved murder cases were perpetrated by juvenile males and females, 6 percent and less than 1 percent respectively.

During 1975, firearms were used in 44 percent of the murders reported in which the weapon was identified, the lowest firearm involvement since 1968. Within the firearm category, handguns were the most predominant weapon used, an 86 percent involvement, up from the 81 percent recorded in 1974. Cutting or stabbing weapons represented a 31 percent involvement in murders. Other weapons, such as clubs, hammers, poison, arson, etc., were used in 14 percent of the cases, and the remaining 11 percent being attributed to the use of personal weapons, such as hands, fists and feet.

Analysis of murder by location discloses that 58 percent of the murders occurred in private residences, an increase when compared to 1974. In many cases police are powerless to prevent this type of murder, which is made apparent by the type of circumstance or motive involved. Most murders, 81 percent, were committed by relatives or other persons acquainted with the victim. Further analysis revealed that 28 percent of the murders were perpetrated by a member of the immediate family group, and more specifically, 14 percent of the murders involved spouse killing spouse. Although most murders occur in residences, 22 percent of all the murders reported did occur on the highways or streets of our state, and 6 percent took place in bars.

The circumstances or motives for committing murder were derived from cases where this category of information is "known" and made available for analysis. Altercations or quarrels between the victim and perpetrator accounted for 58 percent of all murders reported in 1975, the largest single category. Lovers quarrels and romantic triangle situations which resulted in murder contributed 12 percent to this count with money quarrels, drinking quarrels, revenge motives and quarrels of undetermined nature accounting for the remaining 46 percent. "Felony" murders are defined under the program as those killings which are perpetrated during the commission of another crime. They are classified as robberies, sex crimes, gangland slayings, arson and other felonious activities. This type of circumstance or motive accounted for 32 percent of the murders where the motive was known. Robbery accounted for 19 percent of all known murder circumstances.

Child abuse was responsible for 6 percent of all murders during the year, historically the largest distribution recorded in this area. This figure also represents an increase from the 4 percent rate of distribution recorded in 1974.

CLEARANCES

The police of New Jersey were successful in clearing or solving 85 percent of the murders reported in 1975, the highest ever recorded. This clearance rate increased 12 percent as compared to 1974. The high solution rate, as compared to other Index offenses, becomes evident when the circumstances of this heinous type crime are considered, and this high clearance rate is shared by police universally.

Those murders solved by arrest of persons under 18 years of age amounted to 9 percent of all the cases solved, a 14 percent decrease over 1974.

FORCIBLE RAPE

Forcible rape is defined as the carnal knowledge of a female forcibly and against her will. All assaults and attempts to rape are counted, but carnal abuse, rape without force (statutory rape) and other sex offenses are not included.

MURDER VICTIMS
TYPE OF WEAPONS USED
1975

VOLUME AND RATE

The police of New Jersey reported 1,382 rapes during 1975. Numerically, volume decreased 56 over the 1974 total, with a trend decrease of 4 percent, the largest decrease of any Index offense. This also reflects the first Calendar Year decrease since the inception of the statewide Uniform Crime Reporting Program in 1967. In the past five years rape has increased by 31 percent. Rape accounted for four-tenths of one percent of the total Crime Index and 5 percent of all violent crimes in 1975.

A crime rate equates the number of crimes per unit of population, and in its proper perspective, is a victim risk rate. In 1975, 19 out of every 100,000 persons in this state were reported forcible rape victims. The availability of the 1970 census population data allows for the calculation of a forcible rape rate based on the female population alone. For every 100,000 females in New Jersey, 37 were reported victims of this violent crime. The risk of becoming a victim of this crime has increased 31 percent since 1971.

ANALYSIS OF RAPE

The highest incidence of rape during the year was recorded for the month of October, with August the second highest monthly volume, 145 and 135 respectively.

Forcible rapes accounted for 71 percent of the total rape offenses reported, while the remaining 29 percent were attempts or assaults to rape. The victims of this violent crime, in many cases, are hesitant in reporting the offense to police due to the fear and/or embarrassment of the victims when the possibility of a court appearance confronts them, or the effect it may have on their reputation when the facts become known. Additionally, there is difficulty in establishing the act of force when there is the presence of a prior relationship between the victim and perpetrator. Due to the usual clandestine nature of this offense, it occurs most often out of reach of police patrols. The offense of forcible rape, because of the above factors, is probably the most underreported crime within the Crime Index. However, crime counts in this publication must be limited to the actual offenses established by police investigation.

CLEARANCES

During 1975, 59 percent of all forcible rapes reported were solved. Persons under 18 years of age accounted for 17 percent of all rape cases solved.

ROBBERY

Robbery is defined as the felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. The element of personal confrontation is always present in this crime. Under the program, all assaults or attempts to rob are included. Effective January 1, 1974, the robbery subheadings were changed from armed and strong arm, to robbery by firearm, knife or cutting instrument, other dangerous weapon and strong

arm (hands, fists, feet, etc.). For comparative purposes, all prior year analyses will deal with the armed and strong arm categories.

VOLUME AND RATE

During the calendar year 1975 there were 16,273 robberies reported by the police of the state. When compared to the 15,879 robbery offenses reported in 1974, an increase of 3 percent evolves. These reported robberies for 1975, make up 4 percent of the total Crime Index for New Jersey.

The rate of robbery in 1975 increased 2 percent from 1974, with 219 victims for every 100,000 persons in the state. A one percent increase in reported robbery offenses is disclosed for the period 1971 through 1975.

ANALYSIS OF ROBBERY

Supplementary information, which reveals the nature of robbery, is collected under the program in order to gain further insight regarding this violent crime. Identification of the most frequent "targets" for robbery is accomplished by classification of the type of location where the crime was perpetrated and whether or not the offender was armed.

The armed robber was responsible for 58 percent of all robberies committed during 1975, with the remaining percentage of offenses attributed to the unarmed confrontation of the victim by the perpetrator where tactics such as muggings were employed.

The month of January recorded the highest month for robbery offenses, when 1,757 were reported by police in the state. A total of 1,587 robberies occurred in December and 1,491 in February.

Street robberies accounted for 57 percent of all robbery offenses reported during 1975. Robberies of business establishments other than gas stations, chain stores and banks, and robberies of persons in their home, each recorded a 12 percent involvement. Chain store robberies disclosed a 5 percent involvement in the total robberies reported and robberies of gas stations, 4 percent. Bank robberies accounted for a little more than one percent of the total robberies reported, but increased 70 percent (115 to 196 offenses) as compared to 1974.

The total value of property loss resulting from robberies reported during 1975, amounted to \$6.5 million, averaging out to a loss of \$399 per victim. Street or highway robberies reflected the highest category for total property value, a loss of \$1.9 million. Bank robberies, the lowest rate of incidence, reflected the highest average loss, \$7,368.

The impact of this violent crime on the victim cannot be measured in terms of money or property value alone, as it has been stated previously in the murder section of this publication, robbery was the motive for 19 percent of all murders committed in 1975. Numerically, there were 66 persons murdered as a result of robbery in 1975 and in the past five years a total of 343 persons were murdered for the purpose of robbery.

CLEARANCES

The police of New Jersey were successful in solving 25 percent of all robbery offenses reported to them in 1975.

Knife or Cutting Instrument

Strong Arm
(Hands, Fists, Feet, etc.)

Persons under 18 years of age accounted for 25 percent of all the solved robbery cases, an increase from the 22 percent rate of 1974.

ATROCIOUS ASSAULT

Atrocious Assault, as defined under the New Jersey Uniform Crime Reporting System, is an attempt or offer, with unlawful force or violence, to do serious physical injury to another. Attempts are included since it is not necessary that any injury result when a gun, knife or other weapon is used, which would result in serious personal injury if the crime were successfully completed.

VOLUME AND RATE

A total of 12,042 atrocious assaults were reported to the police of the state in 1975, a 2 percent increase when compared to 1974. This crime against the person accounted for 3 percent of the Crime Index.

In 1975, 162 persons out of every 100,000 in New Jersey were victims of atrocious assaults. This figure represents an increase of 2 percent over 1974, and a 33 percent increase over the past five years. May recorded the highest month, at 1,195 offenses.

WEAPON ANALYSIS IN ATROCIOUS ASSAULT

The use or attempted use of a dangerous weapon in an assault, or the serious injury inflicted by hands, fists or feet separates this Index offense from those assaults categorized as "simple" and not atrocious in nature. The victim of an actual assault of this type may suffer serious injury or permanent disability. All assaults to kill and attempts to kill are also included in this area.

Knives or other cutting instruments were determined to be the most frequently used weapons in atrocious assaults during 1975. These weapons accounted for 32 percent of the total atrocious assaults reported. Blunt objects or other dangerous types of weapons, a 28 percent involvement, and personal weapons, such as hands, fists, and feet accounted for 25 percent of all atrocious assaults. Firearms were used as a weapon in 15 percent of all atrocious assaults reported in 1975, the lowest firearm involvement recorded since 1967.

CLEARANCES

Solutions for atrocious assaults were made in 72 percent of all cases reported in 1975, an increase from the 69 percent reported in 1974. This relatively high clearance rate follows that of other crimes against the person. Offenses solved by the arrest of persons under 18 years of age accounted for 15 percent of the total cases solved, with the remaining 85 percent involving adults 18 years of age and over.

BREAKING AND ENTERING

Under this program, breaking and entering is defined as an unlawful entry or attempted forcible entry of any structure to commit a felony or larceny. Data collection for this offense is further categorized as to forcible entries, unlawful entries (where no force is used) and attempted forcible entries.

VOLUME AND RATE

A total of 111,264 breaking and enterings were reported by New Jersey law enforcement agencies during 1975, an increase of 6 percent over 1974. This offense contributes 30 percent to the overall offense counts for the year. The 1975 crime rate for breaking and entering was 1,497 victims for each 100,000 inhabitants of the state. This victim rate increased 6 percent over 1974 and 23 percent since 1971.

ANALYSIS OF BREAKING AND ENTERING

The month of January reflected the highest month of offense frequency, with December recording the second highest volume for an individual month.

Forcible entry was evident in 79 percent of all reported breaking and enterings in 1975, while 11 percent were cases of unlawful entry where no force was used, and the remaining 10 percent were attempts to forcibly enter. There has been no significant change over the past number of years.

In 62 out of every 100 offenses, a residence was the target of the perpetrator. The remaining 38 percent were targets of a nonresidential nature. Daytime breaking and enterings accounted for 52 percent of the "resident" crimes reported, when the time of occurrence could be determined. It was also determined that 84 percent of the nonresidential offenses occurred at night, when business volume is at a low.

During the year 1975, victims of breaking and enterings suffered an economic loss of \$48.5 million. The average dollar loss was reported at \$436 per offense. Breaking and enterings of residences accounted for \$33.1 million, with the remaining \$15.4 million loss attributed to nonresidences or commercial targets.

CLEARANCES

The volume of this offense presents the police with a serious enforcement problem which is made more difficult in some jurisdictions by the lack of sufficient personnel to act as a deterrent, or even to properly investigate and thus provide successful solutions to these crimes.

The police of New Jersey were successful in solving more than 15 percent of all breaking and entering offenses reported during 1975, an increase when compared to 1974. Juveniles were involved in 43 percent of all such case solutions.

LARCENY - THEFT

The definition of larceny-theft, as provided under this program, is the taking of the property of another with intent to deprive him of ownership. All larcenies and thefts resulting from pocket-picking, purse-snatching, shoplifting, larcenies from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., are included here. Embezzlement, unlawful conversions, larceny by bailee, frauds or bad check cases are not included.

VOLUME AND RATE

There were 195,374 larcenies reported during the year 1975. This amount represents an increase of 11 percent over 1974, and a 48 percent increase since 1971. This offense made up 52 percent of the total Crime Index, an increase over the 50 percent recorded in 1974.

The larceny crime rate for 1975 increased to 2,628 offenses per 100,000 population, a percentage increase of 11 percent over 1974, and an increase of 45 percent since 1971.

ANALYSIS OF LARCENY-THEFT

As in the past several years, offense frequencies were highest in the summer months of June, July and August, with August the individual high month.

The following analyses consider all larcenies, regardless as to the value. All types of larcenies identified in this section will differ in volume, depending upon the opportunity for theft offered in a given area.

The identification of larceny by type has disclosed that larcenies from motor vehicles and larcenies of motor vehicle parts and accessories, as a group, represented 37 percent of the total larcenies reported in 1975. When motor vehicle theft is added to this "motor vehicle" group, it is noted that almost 30 percent of all offenses within the Crime Index involve motor vehicles.

When considering individual "types" of larceny, the category of stolen bicycles recorded an 18 percent involvement, a decrease from last year's all-time high of 22 percent. It is also the first time that this category has decreased. Larceny from buildings accounted for 16 percent of all larcenies reported. This type of larceny occurs out of the reach of police patrols, and is not affected by proper deployment of patrols as a deterring factor. Thefts from motor vehicles, which is usually from inside the vehicle, accounted for 21 percent of the total larcenies reported.

Victims of larcenies suffered a total dollar loss of \$35 million. The average value of goods and property stolen from these victims was \$180.

Larceny from buildings recorded the highest dollar loss to its victims, a total of \$9.8 million, representing a \$306 average loss to each victim.

CLEARANCES

Larceny offenses solved by police are affected by the nature of the crime. The lack of witnesses and the volume of these crimes which are sometimes described as "sneak thievery" or "unobserved thefts," add to the difficulties encountered by law enforcement.

In 1975, almost 16 percent of the larcenies reported to police were solved. Those larceny offenses cleared by the arrest of persons under 18 years of age accounted for 40 percent of the total cases cleared.

MOTOR VEHICLE THEFT

In Uniform Crime Reporting, Motor Vehicle theft includes all thefts and attempted thefts of a motor vehicle. This includes all vehicles which can be registered as a motor vehicle in this state. This definition excludes taking a motor vehicle for temporary use, such as a family situation, or unauthorized use by others having lawful access to the vehicle. Effective January 1, 1974, the motor vehicle theft category was expanded to include the subheadings of autos, trucks and buses and other vehicles.

VOLUME AND RATE

In 1975, a total of 39,304 motor vehicles were reported stolen to the police of New Jersey, a decrease of 2 percent since 1974; this offense has declined for the past three consecutive years. Motor vehicle theft makes up 10 percent of the total Index offenses. Autos made up 91 percent of all motor vehicles stolen, trucks and buses 4 percent and other type vehicles accounted for the remaining motor vehicles stolen in 1975.

The rate for auto theft decreased from 541 in 1974 to 529 victims per 100,000 population in 1975. This represents a rate decrease of 2 percent, and the third consecutive year a decrease has occurred.

ANALYSIS OF MOTOR VEHICLE THEFT

The crime of motor vehicle theft has been documented primarily as a crime of opportunity. In most cases, it's the youthful offender who finds the automobile easily accessible for his immediate transportation needs and usually the vehicle is ready to drive away or the ignition is easily compromised. A prior study conducted under the Uniform Crime Reporting Program, disclosed that in 2,352 motor vehicle theft cases studied during the month of August 1969, 46 percent of the vehicles were left unlocked, and 17 percent of all the victims left the keys in the vehicle.

The highest incidence of auto theft during the year was recorded for the month of October, with August recording the second highest monthly volume, 3,535 and 3,434 respectively.

In 1975, stolen motor vehicle values reached \$60 million, and represented 40 percent of the value of all property stolen during the year. The average value of a stolen vehicle was \$1,514 at the time of the theft, and although police recovered 65 percent of the value of all stolen vehicles, the remaining unrecovered portion represents a loss of \$21 million to the victims. The loss figure does not take into account the monetary loss resulting from damage to the vehicle, property and persons which are a direct result of motor vehicle theft crimes.

The recovery of a vehicle does not clear or solve the offense, but the owner does benefit by the return of his vehicle. In 1975, 71 percent of the vehicles stolen were recovered by police. This relatively high rate of recovery can

**LARCENY (EXCEPT MOTOR VEHICLE THEFT)
1975**

CLASSIFICATION	NUMBER OF OFFENSES	PERCENT DISTRIBUTION	TOTAL VALUE	AVERAGE VALUE

TOTAL FOR NEW JERSEY	195,374	100.0	\$35,106,300	\$180

NJSP Table 10

be attributed to the fact that most vehicles are stolen for the purpose of transportation. However, in following the trend over the past several years, it was noted that the percentage of vehicles being recovered has diminished considerably from the 83 percent recovery rate reported in 1967.

As previously mentioned, the analysis of motor vehicle theft alone does not completely measure the special problem caused by the availability of the motor vehicle as a target for larceny of motor vehicle parts and accessories and larcenies from motor vehicles (from inside the vehicle.) New Jersey, although 46th in physical size, is ranked about 8th nationally in total motor vehicles registered, add to this the hundreds of thousands of motor vehicles which annually enter New Jersey from other states, then a true picture of motor vehicle volumes in the state emerges. During 1975 a total of 111,275 offenses involving motor vehicles were reported to police; this represented a loss of \$72 million to the victims.

CLEARANCES

Law enforcement agencies of New Jersey were successful in solving only 10 percent of all motor vehicle thefts reported to them during the year. This solution rate, the lowest of all Index offenses, reveals a slight increase over the percentage reported in 1974.

Many factors contribute to this low 10 percent solution or clearance rate. One is the high degree of mobility present in this offense, which is pointed out by the fact that 40 percent of the recovered vehicles were located in other jurisdictions. Another is the carelessness of the vehicle operator, when the perpetrator merely opens the door of a vehicle, with the keys already in the ignition, and drives it away. To a potential witness, this appears to be a normal act, thereby adding to the difficulties encountered in police detection and apprehension.

In 1975, 38 percent of the motor vehicle theft cases cleared involved a person under the age of 18.

STATE ARREST DATA 1975

STATE ARREST DATA

Under the Uniform Crime Reporting Program, an arrest is counted each time a person is taken into custody, notified or cited. The number of charges placed against a person at the time of the arrest is not considered in the count. The same person may be arrested several times during the year for similar offenses, as in cases of drunkenness or other disorderly conduct charges, and is counted each time he is arrested.

Arrest practices and emphasis do vary from place to place and within a municipality from time to time. For example, the volume of police arrests for certain unlawful conduct such as drunkenness or loitering violations is particularly influenced by this irregularity in arrest practices. On the other hand, murder, robbery and other arrests for serious crimes are more likely the result of standard procedures. In either case, arrests are used as a measure of law enforcement activity, and within certain limitations it can gauge criminality.

When a person under 18 years of age commits an offense and the circumstances are such that if the offender were an adult an arrest would be made, then the arrest is counted. It must be remembered that arrest counts do not reflect the specific number of persons arrested since one person may be arrested several times during the year.

PERSONS ARRESTED

During 1975, law enforcement officers of the state reported a total of 34,027 arrests for all criminal acts, a 4 percent increase over 1974. When related to 1975 population estimates for New Jersey, there were 46 arrests for every 1,000 persons, up from the 45 per 1,000 rate reported in 1974.

Those persons arrested for serious Crime Index offenses during the year, made up 22 percent of the total arrest figure, the arrest of persons under 18 years of age accounted for 49 percent of the arrests of this type.

The juvenile arrest involvement was, as in prior years, greater in the nonviolent crime categories of breaking and entering, larceny and motor vehicle theft where such juvenile arrests represented 55 percent of that group's arrest total. As in the past, almost 8 of every 10 persons arrested for violent crimes (murder, rape, robbery and atrocious assault) were adults.

ARREST TRENDS

Increases in arrest activity by police, were noted in many of the crime categories during the year. As stated previously, a total rise of 4 percent in arrests for all criminal acts was recorded for the period 1974 through 1975. Arrests for Index offenses increased 8 percent during the same period. Within the Index, arrests for violent crime rose 9 percent, and nonviolent crime arrests were up 8 percent.

Arrest increases within individual Index offenses were recorded for murder, up 13 percent, atrocious assault up 11 percent, breaking and entering increased 9 percent, larceny up 9 percent and robbery increased 8 percent over 1974. Forcible rape decreased 2 percent and motor vehicle theft 9 percent; the only decreases experienced within the Index offense arrests.

A review of some other relatively high percent increases in individual arrest categories, which are specific in title, disclosed a 24 percent increase in arrests for forgery and counterfeiting and a 20 percent increase in failure to give good account arrests. Significant increases in arrests for fraud and malicious mischief were also experienced over 1974.

Arrests for narcotic drug law violations reflected a 15 percent decrease over 1974, the first annual decrease since the inception of the statewide Uniform Crime Reporting Program in 1967. However, during the five year period 1971 – 1975, this type of arrest has increased 25 percent.

ARREST ANALYSIS BY AGE

During 1975, adult arrests rose 4 percent, while juvenile arrests increased 3 percent. For the five year period 1971–1975, arrests for all criminal acts increased 26 percent. During this same period, adult arrests increased 22 percent, and juvenile arrests increased 33 percent.

Adult arrests for the violent crimes of murder, rape, robbery and atrocious assault, increased 7 percent since 1974. Juvenile arrests for the same violent crimes increased by 13 percent. When comparing the last five year period it was noted that juvenile arrests for violent crimes were up 52 percent, while adult arrests were up 21 percent.

Adult arrests for the nonviolent crimes of breaking and entering, larceny and motor vehicle theft increased 11 percent, while juvenile arrests for the same group of non-violent crimes increased 5 percent. The five year period 1971–1975 disclosed that adult arrests increased 44 percent, and juvenile arrests increased 49 percent for the non-violent crime offense grouping.

The arrest involvement of young age groups for 1975 disclosed that 14 percent of all persons arrested were under the age of 15. Persons under the age of 18 accounted for 37 percent of all persons arrested, with persons under 21 years of age accounting for 53 percent of all arrests. As a further indication regarding the degree of serious crime involvement of juveniles, it was noted that 4 of every 10 persons arrested for robbery were under 18. Almost 6 of every 10 persons arrested for breaking and entering were in this young age group. This high juvenile involvement was also disclosed in motor vehicle theft arrests, almost 7 of every 10, and larceny arrests, 5 of every 10 persons arrested were under the age of 18.

Persons under 21 years of age accounted for 58 percent of the total arrests for narcotic drug law violations, a decrease from the 60 percent involvement recorded in 1974. A further breakdown disclosed that 32 percent were in the age bracket 18 through 20 years of age, while 14 percent were 16 years of age or under. Additional analysis of young persons 17 through 21 years of age, disclosed that these young persons in their last year of high school or of college age, contributed 51 percent to the total arrests for narcotic drug law violations in 1975. A slight decrease over the 52 percent involvement recorded in 1974. As a part of the young persons involvement in drug offenses, it was interesting to note that 94 percent were under the age of 30.

A matter for serious concern is the criminal arrest involvement of the young age groups, however, the adults

still record the highest involvement in the total arrest picture. Arrest of those persons 18 years of age and over represented 63 percent of all arrests reported in 1975. Adult arrests for violent crimes comprised 75 percent of that group's total arrest figure, which includes arrests for murder, rape, robbery and atrocious assault.

ARREST ANALYSIS BY SEX

During 1975 analysis of arrests by sex revealed that 85 percent of all persons arrested were male, no change since 1971.

Although female arrests represent only 15 percent of the total arrest picture, since 1971 they have increased 29 percent, while male arrests have increased 26 percent for the same period. A review of the period 1974-1975, disclosed a 3 percent increase in male arrests, and a 6 percent increase in female arrests.

The arrests for violent crimes disclosed that females accounted for 10 percent of the total arrests. This includes a 16 percent involvement in murder and a 14 percent involvement in atrocious assault arrests during 1975. In the non-violent or property crime category, arrest of females accounted for 18 percent of the total arrests recorded. Within this nonviolent group, female arrests for larceny recorded the largest involvement at 27 percent.

Female arrests for narcotic drug law violations accounted for only 13 percent of the 1975 arrest total for that offense. Male arrests for the same offense decreased 14 percent, and female arrests decreased 19 percent when compared to 1974.

During 1975, other specific arrest categories were analyzed and it was learned that male arrests for forgery and counterfeiting increased 16 percent, with female arrests up 56 percent, 1975 over 1974. Female arrests for weapons violations increased 7 percent, while male arrests increased 5 percent for the same period. Atrocious assault arrests disclosed that female arrests increased 13 percent, and male arrests for the same violation rose 11 percent during the year 1975.

ARREST ANALYSIS BY RACE

In 1975, an analysis by race of those persons arrested for all criminal acts during the year, disclosed that 69 percent were White, 30 percent were Negro and the remaining 1 percent were of other races. The arrest involvement by race for the Crime Index offenses revealed that 57 percent of all those arrested were White, 41 percent were Negro, the remaining percentage being of other races.

Arrests for violent crimes within the Index (murder, rape, robbery and atrocious assault) reflect that 59 percent were Negro, 39 percent White and the remaining 2 percent distributed among other races. Since 1971, the involvement of Whites in violent crimes has increased from 31 percent to 39 percent recorded in 1975.

During 1975, arrests for nonviolent crimes of breaking and entering, larceny and motor vehicle theft, disclosed that by race, 62 percent were White, 37 percent Negro and the remaining 1 percent being distributed among other races.

PERSONS CHARGED

The disposition made of those persons arrested and formally charged in a court of jurisdiction is of great interest to the police administrator. Knowledge as to the quality of the police investigation, case preparation and presentation, may be gained from the subsequent dispositions of those cases which reach the court level.

It must be recognized that not all persons who are arrested are turned over to the courts for prosecution. There are various reasons for this: Failure of the victim to cooperate or appear at time of trial, as victims of rape, is one reason for failure to prosecute effectively those persons arrested; lack of sufficient evidence to support a charge and evidence obtained which discloses the arrested person did not commit the offense, are additional reasons for an arrested person not being brought to trial. For example: Almost 51 percent of all juveniles arrested were handled by the individual law enforcement agencies, without a formal charge against them or referring them to juvenile authorities. Police methods in handling juveniles differ throughout the state, but in this section all tables concerning juveniles refer to those who were arrested and turned over to juvenile authorities in connection with specific criminal offenses.

During 1975, 86 percent of all persons arrested for Crime Index offenses were turned over to the courts. The adults charged with Crime Index offenses were found guilty by the courts in 73 percent of all cases presented.

An analysis of individual Index offenses determined that 27 percent of the murder defendants were either acquitted or their cases dismissed at some prosecutive stage. Forcible rape recorded the highest rate of acquittal or dismissal with a 59 percent rate. Atrocious Assault second, with 44 percent of the defendants being acquitted or their cases dismissed.

A review of all crime categories disclosed that convictions were high in the following offense categories: Of-

fenses involving alcoholic beverages recorded the highest conviction rates, with driving under the influence at 92 percent, liquor laws 89 percent and drunkenness 87 percent. Persons charged for offenses against family and children, which includes desertion and nonsupport, were found guilty in 84 percent of the cases presented. Gambling convictions were reported at 81 percent.

Of those persons charged with Crime Index offenses whose cases reached the court level, 7 percent were found guilty of a lesser crime and 27 percent were acquitted or dismissed. The highest percentage of persons found guilty on the original charge in 1975, as compared to those found guilty of a lesser offense, was in the larceny-theft category where 95 percent of all guilty defendants were convicted as charged. This was followed by robbery, where 89 percent of the defendants were found guilty of the original charge.

Disposition data for 1975 disclosed that acquittals or dismissals were greater in the violent crimes of murder, rape, robbery and atrocious assault, than in the nonviolent crimes of breaking and entering, larceny and motor vehicle theft. Dismissal or acquittal for the violent crimes was reported at 44 percent for 1975. The dismissal or acquittal rate for those crimes of a nonviolent nature was 22 percent for the same period.

The above data discloses the results of cases after police have arrested and formally charged the adult offender. The remaining cases pending court action, or undecided at the year's end, are classified as pending and are **carried** from year to year until a disposition is furnished **by a court** of jurisdiction. For the year ending 1975, 75,061 **cases** remain pending according to information supplied police by the various courts of New Jersey.

A final review of all crime categories discloses that 26 percent of all adults tried by the courts were either acquitted or their cases were dismissed at some prosecutive level. Persons of young age groups who were referred to Juvenile Court represented 21 percent of the total persons formally charged in all crime categories.

**CRIME STATISTICS BY
GEOGRAPHIC REGION AND
COUNTY
1975**

CRIME STATISTICS BY GEOGRAPHIC REGION AND COUNTY

The presentation of criminal statistics by geographic regions of New Jersey, and by counties within the respective regions, is made for the purpose of further analysis of crime within the state. The type and volume of crime will vary from place to place as do the influencing factors which contribute to a crime rate. Recognition of these variances, through identification, helps provide a more equitable base for consideration.

Geographic groupings by county, as shown in this section, were made using the following criteria: One, location in the state in relation to outside influence, (e.g., large urban centers); two, their general character, (e.g., urban or openness); three, the presence of major urban cores within individual counties. Employing these criteria, the state was divided into four regions.

The Northwest Region contains Sussex, Warren and Hunterdon Counties. The region is primarily a rural area because of its distance from the two major metropolitan centers of New York and Philadelphia, as well as the absence of any major core cities.

The Northeast Region contains the eight counties of Bergen, Morris, Passaic, Essex, Hudson, Union, Somerset and Middlesex. The character of this region is a suburban-urban mix. The most densely populated urban areas of the state and the nation with their complex problems are located within this region. The major urban cores are Newark, Jersey City and Paterson with surrounding suburban areas; but, of course, on the larger scale the region is oriented towards the New York metropolitan center. The industrial complex of the state is centered in this region as is 63 percent of the state's population.

The Southwest Region contains the four counties of Mercer, Burlington, Camden, and Gloucester. The character of this area is also a suburban-urban mix. The urban cores within the region are Trenton and Camden with surrounding suburban development, but the entire region is oriented towards the Philadelphia metropolitan center.

The Southeast Region contains the six counties of Monmouth, Ocean, Atlantic, Cape May, Cumberland and Salem. The general character of this region is rural except for the large resort area stretching along the Atlantic coast. The major center for this region is Atlantic City. The resident population of the resort counties within this region is dramatically supplemented during the summer season resulting in urban-like problems not normally associated with a "rural" classification.

NORTHWEST REGION

A total of 7,230 Crime Index offenses were reported to the police of the Northwest Region during 1975. When compared to 1974, this represents a 10 percent increase, the largest increase within the regions.

Only 3 percent of all the offenses were of the violent crime group, which includes murder, rape, robbery and atrocious assault. The remaining 97 percent were of a non-violent nature, which includes breaking and entering, larceny and motor vehicle theft.

Increases were recorded in larceny, up 21 percent and atrocious assault, up 7 percent. All other Index offenses recorded decreases during 1975, as compared to 1974.

During the month of June, there were 700 Crime Index offenses reported, the highest volume month for the year. July recorded 679, the second highest volume for the year 1975.

In 1975, there were 3,035 victims of Index offenses for every 100,000 inhabitants of the region, representing a 9 percent increase over 1974. The 1975 crime rate is still the lowest reported for any of the four regions.

CLEARANCES

The police of the Northwest Region solved 23 percent of all Crime Index offenses reported to them in 1975. As with other regions of the state, the percentage of solutions for those crimes of a violent nature far exceeded that for those crimes of the nonviolent or property group.

NORTHEAST REGION

The police of the Northeast Region reported a total of 236,080 Crime Index offenses received by them from the inhabitants of this populous region during 1975. This figure represents an increase of 8 percent over 1974.

Within the Index offenses, volumes for those crimes of a violent nature, which includes murder, rape, robbery and atrocious assault, rose 4 percent during the year. The non-violent crime group of breaking and entering, larceny and motor vehicle theft reflected an increase of 9 percent for the same period.

During 1975, significant increases occurred in larceny, up 12 percent, breaking and entering, up 7 percent and murder up 6 percent over 1974. There were decreases in the crime categories of forcible rape and motor vehicle theft of less than one percent.

The months of July and August recorded the highest volumes during 1975 — 21,754 and 21,532 respectively.

The 1975 crime rate for the Northeast Region was reported at 5,023 victims for every 100,000 inhabitants. This rate represented an 8 percent increase over 1974.

CLEARANCES

In 1975, 17 percent of the reported Crime Index offenses were solved; the same solution rate that was recorded in 1974.

SOUTHWEST REGION

The police of the Southwest Region reported 68,533 Crime Index offenses during the year 1975. When compared to 1974, this figure represents a 7 percent increase.

The violent crime group of murder, rape, robbery and atrocious assault represented 7 percent of all the Index offenses reported. The remaining 93 percent of the Index offenses reported were of the nonviolent crime group.

Percentage increases were noted in the offenses of murder, up 21 percent, larceny, up 11 percent and breaking and entering increased 7 percent during the year 1975. Decreases were recorded in the four remaining Index offenses, with atrocious assault decreasing 11 percent and rape decreasing 7 percent.

The month of August recorded 6,244 Index offenses, and October, a close second, recorded 6,198 for the year 1975.

Region crime volumes, when related to population, result in a rate of victimization at 4,197 persons for every 100,000 inhabitants of the region. The crime rate for this region increased 6 percent over 1974.

CLEARANCES

Police in the Southwest Region solved 19 percent of all Index offenses reported to them in 1975; an increase over the 17 percent solution rate reported in 1974.

SOUTHEAST REGION

During the year 1975, a total of 64,296 Crime Index offenses were reported to the police of the Southeast Region. This represents a 5 percent increase over 1974, the smallest increase within the four regions of the state.

Violent crime accounted for 5 percent of all Index offenses reported, with 95 percent being classified as nonviolent or property type offenses. When comparing 1975 to

1974, violent crime increased 6 percent, and nonviolent crime increased 5 percent.

Significant decreases were recorded in murder, down 13 percent, motor vehicle theft, down 12 percent and rape down 9 percent. The largest increase, 10 percent, was noted in atrocious assault.

As would be expected in this resort oriented area, the crime volumes were highest during the summer months of August with 7,154 offenses and July with 6,946 offenses.

A crime rate of 5,465 victims for every 100,000 persons in the Southeast Region was reported for 1975, an increase of 5 percent over 1974.

CLEARANCES

Law enforcement agencies of the Southeast Region solved 19 percent of all Crime Index offenses reported to them during the year, a 9 percent increase over 1974.

URBAN-SUBURBAN-RURAL CRIME

URBAN

Urban communities disclosed a 7 percent increase in the Crime Index and an 8 percent increase in the crime rate for the comparative period 1975 over 1974. The group accounted for less than 60 percent of the total crime reported in the state; steadily decreasing since 1972 when they reported almost 65 percent of the total crime. Although this distribution has been decreasing, the urban group recorded more than 81 percent of the violent crime total. Significant increases were noted in the offenses of larceny, up 12 percent, breaking and entering, up 7 percent, and murder up 6 percent. Forcible rape decreased 3 percent and motor vehicle theft decreased 2 percent.

SUBURBAN

An increase of 8 percent in the Crime Index and a 6 percent increase in the crime rate was reported for the period

1974 through 1975. The Suburban group accounted for slightly more than 34 percent of the total crime reported in New Jersey, an increase from the 31 percent recorded in 1972. Significant increases were noted in the offenses of larceny, up 10 percent, forcible rape, up 9 percent and robbery increased 7 percent.

RURAL

Rural communities, as a group, disclosed the largest percentage increase of the three groups, a trend that has continued since 1972. The Crime Index rose 9 percent over 1974. However, the rural communities accounted for only 6 percent of the total Crime Index of the state, identical to that of 1974 and a slight increase over 1972. The most significant increases were noted in the offenses of atrocious assault, which increased 30 percent, robbery rose 23 percent and larceny, up 13 percent.

OFFENSES BY POPULATION GROUPS

The presentation of crime statistics by population groups was made for the purpose of projecting, for consideration, the relative crime experience of communities of varying populations. Although the individual municipalities within the various groups may be geographically separated, their inclusion into a specific group was predicted by the similarity in population with the other municipalities within the group. Municipalities within the same

group may differ widely when all factors are considered, but they do share the common bond of population size. The grouping of communities in this manner allows recognition of variances in the crime volumes, rates and clearances between the established groups.

Set forth below are the established municipal groupings as used in this section:

GROUP I

7 Municipalities over 100,000

Total population – 1,216,280

GROUP II

17 Municipalities 50,000 to 100,000

Total population – 1,049,155

GROUP III

39 Municipalities 25,000 to 50,000

Total population – 1,408,210

GROUP IV

67 Municipalities 15,000 to 25,000

Total population – 1,305,720

GROUP V

199 Municipalities 5,000 to 15,000

Total population – 1,867,010

GROUP VI

141 Municipalities 2,000 to 5,000

Total population – 476,745

GROUP VII

97 Municipalities under 2,000

Total population – 110,800

Table 38

MUNICIPAL OFFENSE DATA

The 1975 offense data provided in this section is shown as it relates to the incorporated New Jersey municipality in which the offense occurred and is based on the individual contribution of crime statistics by the respective police jurisdictions of the state.

The isolation of offenses by place of occurrence, as shown in the table, makes possible the projection of a more accurate statistical picture of the individual community's crime experience. Additionally, this approach has provided a sound base for offense computation and analysis by county, region, character, population group and state. This application has been made, in varying forms, in all of the preceding offense information shown.

The statistical tables which follow offer numerical counts of all Index offenses reported during 1975, also a "Crime Index Total" column, which is used to compute the crime rate of a municipality, has been included. A Crime Index consists of murder, rape, robbery, atrocious assault, breaking and entering, larceny and motor vehicle theft. A crime rate column has also been included. Crime rates relate to incidence of crime to the resident population. For comparative purposes, all crime rates are based on population units of 100,000, and are calculated by dividing the current population into the Crime Index. In addition, columns for violent and nonviolent crime rates have been added for the purpose of identifying more specifically the crime experience of a given municipality.

POLICE EMPLOYEE DATA

The Uniform Crime Reporting Program of New Jersey incorporates the collection of pertinent data relating to the police of the state. Information regarding police employee strength, distributions, assaults against law enforcement officers and circumstances surrounding the killings of police officers are discussed in this section.

Individual listings of full-time state, county, municipal and college police departments of the state are shown in tables succeeding the narrative portion of this section.

The determination of police strength for any given area or municipality should be a subject for serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. Some of these factors, discussed elsewhere in this publication, relate to size, density of population, geographic location, character, and proximity to metropolitan areas. The tables and charts shown in this section relate to reported police employee strength and should not be interpreted as recommended strength for any given municipality. Such determinations should be made after objectively evaluating the individual need for police services based on the above factors.

*COMPARISONS SHOWN IN THE NARRATIVE
PORTION OF THIS SECTION DO NOT INCLUDE
THE DIVISION OF INSTITUTIONS AND
AGENCIES*

TOTAL POLICE EMPLOYEES

During 1975, there were 29,076 persons employed full-time by all police agencies in New Jersey. This number represents a 2 percent increase over 1974. Male employees accounted for 87 percent of the total police employee strength in 1975.

In 1975, there were 6,363 civilian police employees in the state, representing a 4 percent increase when compared to 1974. Female employees accounted for 55 percent of the total civilian police employee strength in the state.

A total of 22,713 police officers were employed in the state during 1975, a 2 percent increase over 1974. Only 358 of the 22,713 police officers were females.

MUNICIPAL POLICE EMPLOYEES

In 1975, the number of municipal police employees in New Jersey (including civilian personnel) increased to 19,401 from the 19,046 reported in 1974; an increase of 2 percent. Individual county volumes for municipal police employees in 1975, disclosed an extensive range of increases and decreases when compared to 1974. Sussex County experienced the largest percentage increase, up 27 percent, while Hudson County decreased 6 percent over 1974. Bergen County reported the largest volume increase, with an additional 68 police employees for 1975.

MUNICIPAL POLICE EMPLOYEE RATES

The number of municipal police employees (including civilian personnel) for every 1,000 inhabitants of New

Jersey, remained at 2.6 per 1,000 during the year 1975; no change when compared to 1974. A 13 percent increase has been recorded for the period 1971 through 1975; a relatively small increase when considering the rise in the criminal and noncriminal demands placed upon the police of New Jersey today.

During 1975, the populous Northeast Region recorded the highest rate, at 2.7 police employees per 1,000 inhabitants. Within this region, Essex County recorded the highest police employee rate, a 3.6 per 1,000 population. The Southeast Region was second with 2.8 police employees per 1,000 inhabitants. The Southwest Region reported 2.2 police employees per 1,000 population during the year 1975. The rural Northwest Region recorded 1.3 employees per 1,000 population, the lowest of the four regions.

MUNICIPAL CIVILIAN EMPLOYEES

The personnel of each department differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties. This current upward trend in employing civilians in police departments to perform clerical duties, is in line with the thinking of many police administrators who recommend the use of civilians in this capacity, thus freeing the sworn personnel for actual police related services.

In 1975, 12 percent of all police employees were civilians. Within regions, the percentage of civilian municipal police employees varied from 9 percent in the Southwest Region to 10 percent in the Northeast Region.

MUNICIPAL POLICE OFFICERS

The number of full-time municipal police officers in New Jersey was recorded at 17,023; less than one percent increase over the 16,940 reported in 1974.

In 1975, the number of full-time municipal police officers for each 1,000 persons of the state was recorded at 2.3; no change when compared to 1974. Since 1971 the police officer rate per 1,000 inhabitants has increased only 15 percent.

Regionally, the number of full-time municipal police officers ranged from 1.1 in the Northwest Region to the 2.5 per 1,000 in the Northeast Region. Individual county rates ranged from the 1.0 in Warren and Hunterdon Counties to the 3.9 per 1,000 permanent inhabitants for Cape May County.

The police employee rates for 1,000 population presented here should not be construed as being recommended ratios. The determination of police strength for any municipality or jurisdiction should be based on the numerous factors which create the need for police services. These factors, as crime, vary in type and degree from place to place. Some examples are seasonal populations, geographic location, density and composition of the population.

COUNTY POLICE, SHERIFFS AND PROSECUTORS

The functions of county law enforcement officers vary widely throughout the state. The operation of one sheriff's department may be limited exclusively to civil areas and the administration of the county jail, or they may be actively involved in criminal matters throughout the county. County police departments are varied in their activities as well, in that some are responsible for enforcement throughout the county while others may have as their primary mission the policing of county parklands. The responsibilities of county prosecutor's officers include criminal investigations, trial preparation, court presentation and special probes. Because of the difference in the types of police service rendered, rates for county law enforcement agencies are not presented here.

The various county law enforcement agencies of the state employed a total of 4,479 full-time police employees during the year 1975. This figure represents a 5 percent increase over 1974.

The full-time civilian employees accounted for 25 percent of the total police employees reported by county law enforcement agencies during 1975. The remaining 75 percent were sworn personnel.

STATE POLICE

The New Jersey State Police is empowered to provide all phases of law enforcement throughout the state. It also renders police services, upon request, to all the law enforcement agencies in the state. No rates are used due to the variations in the nature and extent of the police services performed by the State Police.

The Division of State Police employed a total of 2,532 persons during the year 1975. Of these, 31 percent or 789 were civilians, with the remaining 1,743 being sworn personnel. The total number of State Police employees increased 3 percent. Included in this increase was a rise of 4 percent in civilian personnel, and a 3 percent increase in sworn personnel.

OTHER POLICE (State Agencies)

In 1975, there were nine state agencies (excluding State Police) with law enforcement responsibilities, who reported police employee data to the System. Together these agencies reported a total of 6,131 full-time police employees. Included in this total are 3,776 civilians and 2,355 sworn personnel.

No rates were computed here, due to the variations in the types of police services rendered and their statewide jurisdiction.

POLICE KILLED AND ASSAULTED

The killing or assault of a police officer has an effect on society which reaches far beyond the overt act. Such occurrences constitute an immediate threat to the well being of the community and a serious breach of the internal security of the country. Today a young man who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society he is sworn to protect. This deplorable situation should be a subject of serious public concern for, in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers

acting in the line of duty is clearly demonstrated by the following information.

POLICE KILLED

In 1975, three New Jersey police officers lost their lives as a result of a criminal action directed against them.

During the last five years, there have been 13 police officers killed in the line of duty in New Jersey. Specifically, there were 4 killed in 1971, one in 1972, 4 in 1973, one in 1974 and 3 in 1975.

ASSAULTS ON POLICE OFFICERS

During 1975, there were 3,618 police officers assaulted in New Jersey. This figure represents police assaults reported by all police agencies of the state. When compared to 1974, a 7 percent increase is disclosed. The five year period 1971-1975 disclosed a 57 percent increase.

No police assault rates are computed for total police officers assaulted, because of the broad field of services performed by many state and county police agencies.

ASSAULTS ON MUNICIPAL POLICE OFFICERS

Municipal police officers of the state were the victims of 3,402 cases of assault during the year 1975, a 7 percent increase over such cases reported for the year 1974. Since 1971, assaults on municipal police officers have increased 51 percent.

While every police officer who is assaulted does not suffer personal injury, 34 percent of those assaulted during 1975 did sustain physical injury to one degree or another. The assaults resulting in physical injury to the officer are frequently followed by loss of duty time by the officer.

In 1975, rate of municipal police assaulted in the state was computed at 20.0 assaults for every 100 municipal police officers, a 6 percent increase over 1974. Since 1971, the police assault rate has increased 33 percent. Assault and injury rates are shown by population groups in table form for the purpose of projecting the comparative assault experience of police in communities of varying populations.

OTHER POLICE OFFICERS ASSAULTED

The following state and county law enforcement agencies are dealt with separately, and are not included when computing municipal assault rates. The services performed, in most cases by these agencies, vary greatly from the functions of municipal police agencies, thus requiring their separation.

County police officers, which includes county police, county park police, sheriff's and prosecutor's offices, reported a total of 112 sworn personnel assaulted during the year 1975. A total of 45 officers received some type of injury as a result of the attack on their person.

The New Jersey State Police reported a total of 77 troopers assaulted during the year 1975; of these, 16 received physical injury.

Other state agencies with police powers, reported a total of 27 sworn personnel being assaulted during the year; of these, 15 received physical injury.

ADDITIONAL ANALYSIS

The following analyses deal with weapons used against police officers, type of service being performed when assaulted, times of assaults and police assault cases solved.

WEAPONS USED

In 1975, personal weapons, such as hands, fists and feet were used in 90 percent of all assaults on police officers in the state. Other dangerous weapons, such as clubs, bricks, jack handles, etc., were used in 6 percent of all cases of police assault. Knives reflected a 2 percent involvement, and firearms a 2 percent involvement. The five year period 1971–1975 has disclosed very little change in the weapon usage.

TYPE OF ACTIVITY

The police services performed by law enforcement agencies vary widely in both criminal and noncriminal activities. The services performed are governed by the nature of the demands for this service. Analysis by the type of service being rendered when the police officer was assaulted, provides an indication as to the degree of jeopardy a police officer is placed when responding to a given situation.

During 1975, those police officers responding to disturbance calls, which includes family disputes and tavern disorders, again accounted for most of the police officer assault situations. More than 29 percent of all police assault cases fell into this category. Police officers attempting to effect an arrest accounted for 20 percent of the assaults in 1975. The police officers assaulted who were engaged in the investigation of suspicious persons accounted for 10 percent of the total assaults. Officers assaulted while stopping a vehicle for a traffic violation also contributed 10 percent to the total police assault problem.

Police officers assaulted while transporting prisoners accounted for 12 percent of the total police assaults.

TIME OF POLICE ASSAULTS

The analysis of police officers assaulted by time of day disclosed very little change over 1974. The four hour period 8:00 p.m. to midnight accounted for 35 percent of the assaults on police officers in 1975. The assaults during this four hour period were divided almost evenly between the two hour periods of 8:00 p.m. to 10:00 p.m. and 10:00 p.m. to midnight. The six hour period 8:00 p.m. to 2:00 a.m. accounted for 49 percent of the police assault cases, with the eight hour period 8:00 p.m. to 4:00 a.m. accounting for 61 percent of the assaults on police in 1975. Additional time periods of assaults are shown in a chart following this section.

CLEARANCES AND ARRESTS

The police of New Jersey were successful in clearing by arrest, 98 percent of the assaults directed against them. Assaults against officers attempting to perform their duty would tend to indicate the disrespectful attitude of the perpetrators involved, even though almost immediate apprehension exists.

Although an assault upon a police officer is a high misdemeanor in New Jersey, police charged only 41 percent of the adults arrested with this serious crime. The remaining adults were charged under the less severe misdemeanor or nonindictable section of the law. A little over 9 percent were determined to be juveniles. Numerically, those arrested for the indictable offense numbered 1,438, those persons charged with the nonindictable offense reached 1,716 and the juveniles arrested for assaulting police officers totaled 325.
