About Advertising.

Advertising, to-day, is a fine art, and a modern necessity. To try to do business without advertising has been compared to hugging a pretty girl in the dark—you may know what you are doing, but nobody else does. We offer no opinion as to the propriety of the thing, but the illustration it furnishes is first class.

It was a very smart child who, when he was dying, said: "Mother, when I'm gone, don't bury me in yonder church-yard, where babbling lovers can come and sit upon my grave and make me tired with their tales of eternal devotion; bury me under the counter of some merchant who does not advertise, for there I shall find perfect rest."

Advertising, to do permanent good, must be truthful. We suppose there is more lying to the square inch in modern advertising than in any similar amount of reading matter on earth. Talk about one Recording Angel making a note of all the lies which find their way into print; why it would take a dozen for the advertising branch of the business alone, and they would have to work with coats off and sleeves rolled up. But there are some things about which the truth is so much more forcible than any fiction that to lie about them would be downright insanity. When, for instance, we try to present the merits of our Clothing, the truth about it and ourselves is the strongest recommendation we can think of. For now nearly a quarter of a century our goods have been before the public and our methods of trade known to them. We keep in the city of Newark a strictly first class Clothing Store. Our stock, as the seasons make their appearance, is one which, for variety, style, make up and finish, has no equal in this town and no superior out of it. It is always new, because trade is brisk and keeps it in constant motion. There are no moths in our garments; no flies on us. In fit, our clothing is perfect, in style the latest, in make up all that care and watchfulness can achieve. Perhaps you are expecting us to say, in price the lowest. O, no! there are lower priced garments in the market than we can offer you, because we don't deal in trash. And yet, if you will come in and look, our prices, for the character of the goods we offer, will astonish you, especially if you have looked elsewhere. We find no customers so easy to serve as those who have looked about a little. Don't put too much faith in advertising. We don't ask you to believe this one, but come and see. All we ask is an honest comparison and a righteous judgment, and victory will perch upon our banner, so to speak.

HAVING A GOOD TIME.

FECUNDITY OF INSECTS.

Fecundity of Insects.

Some silkworms lay from 1,000 to 2,000 eggs. The wasp deposits 3,000. The ant from 4,000 to 5,000. The queen bee lays from 5,000 to 6,000 eggs, according to Burmeister, but Kirby and Spence state that in one season the number may amount to 40,000 or 50,000. But, above all, the white ant (*Termes fatalis*) produces 86,400 eggs each day, which, continuing for a lunar month, gives the astonishing number of 2,419,000—a number far exceeding that produced by any other known animal.

CENTENNIAL LEAP YEARS.

BLANCHE.

Leap Years' Centennial Years.

No centennial year is a leap year unless it can be divided evenly by 400. Therefore 1600 and 2000 are leap years, but 1700, 1800, 1900, 2100, etc., are not leap years. If the true year consists of 365 days and 6 hours, then the addition of a full day every four years would keep the calendar and true time together. But the year is only 365 days, 5 hours, 48 minutes, 48.6 seconds, thus lacking between 11 and 12 minutes of 6 hours. The adopted system therefore adds a day to February every fourth year until the hundredth year is reached, then skips that day for 300 years, thus recompensing the calendar for the 11 minutes 48.6 seconds, which the accounting had annually gained. On the four hundredth year, however, the day is added, squaring the account within the smallest fraction.

PLANETS BRIGHTEST OR BEST SEEN.

Planets Brightest, or Best Seen.

Mercury, February 14 to 17, June 9 to 12, and October 5 to 8, setting early in the evenings. Also March 30 to April 2, July 29 to August 1, and November 17 to 20, rising mornings some before the Sun.

Venus, not brightest this year.

Mars, April 11.

Jupiter, May 22.

Saturn, January 23.

Uranus, April 4.

Neptune, Nov. 22.

The Emperor William, of Germany, is the tallest monarch, being just six feet. The defunct King of Bavaria was the "shortest," being in debt several million dollars.

NAMES OF FABRICS.

LEARNING TO WALK.

Names of Fabrics.

Very few know the origin of the names of many of the goods they handle. For the information of such we give the derivation of the names of the following goods: damask is from the city of Damascus; satins from Zayton in China; calico from Calicut, a town in India. Muslin is named from Mosul, in Asia. Alpaca from an animal in Peru, of the llama species. Buchram takes its name from Bochara; fustian comes from Fostat, a city of the middle ages, from which the modern Cairo is descended, Taffeta and tabby from a street in Bagdad, Cambric from Cambrai. Gauze has its name from Gaza; baize from Bajac; dimity from Damietta, and jeans from Jean. Drugget is derived from a city in Ireland, Drog-

heda. Duck from Torque, in Normandy. Blanket is called after Thomas Blanket, a famous clothier connected with the introduction of woolens into England about 1340. Serge derives its name from Xerga, a Spanish name for a peculiar woolen blanket. Diaper is not from D'Ypres, as is sometimes stated, but from the Greek *diaspron*, figured. Velvet is from the Italian *vellute*, woolly (Latin, *vellus*, a hide or pelt). Shawl is the Sanscrit *sala*, floor, for shawls were first used as carpets and tapestry. Bandanna is from an Indian word meaning to bind or tie, because they are tied in knots before dyeing. Chintz comes from the Hindu word *chett*. Delaine is the French "of wool."

Who Invented the Alphabet?

It has been ascribed to a Phœnician. Previous to his invention, pictures or hieroglyphics were used to record events; and letters were, probably, a generalization of these. At this day the Chinese have no letters, but have two hundred and fourteen keys to classes of words, distinguished by the number of strokes combined in each. The English language has twenty-six letters; the French twenty-three; Hebrew twenty-two; Greek twenty-four; the Latin twenty-two; the Arabic twenty-eight. The figures used in arithmetic are a universal character, and many attempts have been made by the learned, to introduce a universal character into language, but at present there are two hundred or three hundred various alphabets.

The Gem Calendar.

(FOR BIRTHDAY GIFTS.)

JANUARY—*Garnet*—Constancy and fidelity.

FEBRUARY—*Amethyst*—Preventive against passions and drunkenness.

MARCH—*Chrysoptase* (*Bloodstone Heliotrope.*)—Courage and wisdom—Firmness in affection.

APRIL—*Sapphire*—Frees from enchantment, and denotes repentance and kindness.

MAY—*Emerald*—Discovers false and true witnesses. Insures happiness.

JUNE—*Agate*—Insures long life, health and prosperity.

JULY—*Ruby*—Discovers poison ; cures evils from the unkindness of friends.

AUGUST — *Sardonyx* — Insures conjugal felicity.

SEPTEMBER — *Chrysolite*—Frees from passions and sadness.

OCTOBER—*Opal*—Denotes hope and sharpens the sight.

NOVEMBER—*Topaz*—Fidelity and friendship; calms passions—prevents bad dreams.

DECEMBER—*Turquoise*—Prosperity in love.

THE ORIGIN OF PLAYING CARDS.—Playing cards were invented for Charles VI., who had fallen into a melancholy condition. The four suits represent the four classes in the kingdom, namely : Hearts, the ecclesiastics ; spades, the nobility and military ; diamonds, the merchants ; clubs, the husbandry. The kings represent the four nations : The Jews, by David ; Greeks, by Alexander ; Romans, by Cæsar ; Franks, by Charles. The queens represent : Agnie, beauty ; Esther, piety ; Judith, fortitude ; Belle, wisdom. Knaves, servants to the kings and queens.

THE SIGNIFICANT NUMBER.

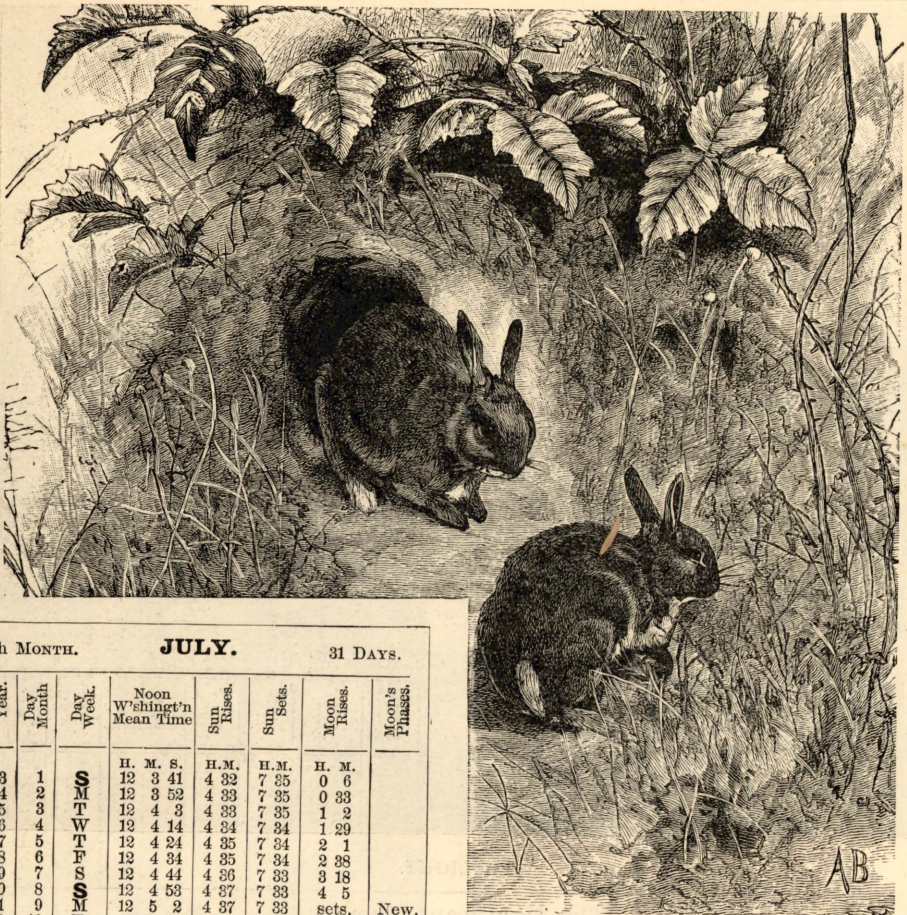

TWILIGHT.

The Significant Number.

The number 3: When the world was created we find land, water and sky, sun, moon and stars; Noah had but three sons. Jonah was three days in the whale's belly. There were three patriarchs. Abraham entertained three angels. Samuel was called three times. Daniel was thrown into a den of three lions for praying three times a day. Shadrach, Meshech and Abednego were rescued from the flames of the oven. The Ten Commandments were delivered on the third day. Job had three friends. Those famous dreams of the baker and the butler were to come to pass in three days, and Elijah prostrated himself three times on the body of the dead child. Sampson deceived Delilah three times before she discovered the source of his strength. Christ was crucified in his thirty-third year and was three days in the tomb. Peter denied Christ thrice. St. Paul speaks on faith, hope and charity, these three. The three sacred letters on the cross are I. H. S.; so also the Roman motto was composed of three words, "In hoc signo." There are three conditions for men: the earth, heaven and hell. Three is also the Holy Trinity. In mythology there are three graeces; Cerberus with his three heads; Neptune holding his three-toothed staff; the Oracle of Delphi cherished with veneration the tripod, and the nine muses sprang from three. In nature we have male, female and offspring; morning, noon and night. Trees group their leaves in three; there is the three leafed clover. We have fish, flesh and fowl. What could be done in mathematics without the aid of a triangle? Witness the power of the wedge, and in logic three premises are indispensable.

POPULATION OF AFRICA.

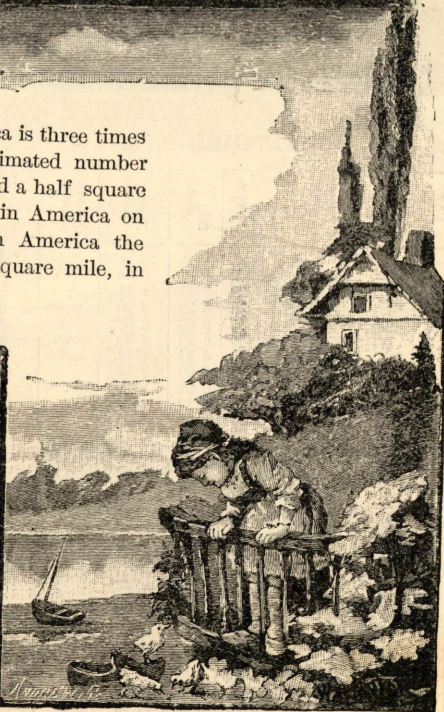

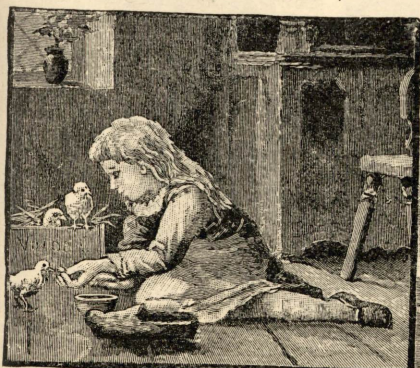

A storm travels 36 miles in an hour, a hurricane 80 miles a **minute**; a rifle ball 1,000 miles, sound 743 miles, a **second**; light 192,000 miles and electricity 288,000 miles, *a second*.

The most trustworthy estimate of the number of people on the earth is 1,423,917,000.

It is a fact worth thinking about that Africa is three times as densely populated as America. The estimated number of inhabitants of Africa on about eleven and a half square miles of territory is more than twice that in America on about fifteen and a half square miles. In America the average is five and a half people to the square mile, in Africa seventeen and a half.

Peregrine Falcons.

In olden times in "Merrie England" many ancient sports were carried on that are now a thing of the past, among which was the cruel amusement of hawking by means of this race of birds.

The falcon used to be blindfolded or hooded as seen in the picture and fastened to the wrist of the owner by a chain or strap. He was then carried into the fields, and when a wild fowl or heron or any suitable prey was sighted the bird was unhooded and, after soaring aloft for a few seconds would pounce upon the object of his search.

The art of falconry was then such a fashionable amusement that rarely any person of rank ever went without their hawks either in their own keeping or in the hands of an attendant.

Notice how compact their shapes are, full well-rounded breasts, short neck and large heads, their bills stumpy and thick and their eyes large and keen and of a deep hazel color, their claws as you see very strong and well curved, plumage of a deep bluish grey, throat and neck white, and wings barred with black.

PEREGRINE FALCONS.

All from a Ton of Coal.

From one ton of ordinary gas-coal may be produced 1500 pounds of coke, 20 gallons of ammonia water, and 140 pounds of coal-tar. By destructive distillation the coal-tar will yield 69.6 pounds of pitch, 17 pounds of creosote, 14 pounds of heavy oils, 9.5 pounds naphtha yellow, 6.3 pounds of naphthaline, 4.75 pounds naphthol, 2.25 pounds alazarin, 2.4 pounds solvent naphtha, 1.5 pounds phenol, 1.2 pounds aurine, 1.1 pounds benzine, 1.1 pounds analine, 0.77 of a pound toluidine, 0.46 of a pound anthracine, and 0.9 of a pound toluene. From the latter is obtained the new substance known as saccharine, which is 230 times as sweet as the best cane sugar.

HISTORICAL FRIDAY.

NOW I'M GRANDMA.

Historical Friday.

Friday, long regarded as a day of ill omen, has been an eventful one in American history. Friday, Christopher Columbus sailed on his voyage of discovery. Friday, ten weeks after, he discovered America. Friday, Henry VII., of England gave John Cabot his commission which led to the discovery of North America. Friday, St. Augustine, the oldest town in the United States, was founded. Friday, the Mayflower with the Pilgrims arrived

at Plymouth; and on Friday they signed the august compact, the forerunner of the present constitution. Friday, George Washington was born. Friday, Bunker Hill was seized and fortified. Friday, the surrender of Saratoga was made. Friday, the surrender of Cornwallis, at Yorktown, occurred, and on Friday the motion was made in Congress that the United Colonies were, and of right ought to be, free and independent.

THE OLD POACHER.

THE DEEPEST HOLE IN THE WORLD.

The Deepest Hole in the World.

The deepest boring yet made is at the village of Schladebach, near the line between Leipzig and Corbetha. It has been made by the Prussian government to test for the presence of coal, and was bored with diamond drills. Its depth is 1,390 metres (4,560 feet); its breadth at the bottom is two inches, and at the top eleven inches. It has occupied three and a half years to bore, and cost a little over £5,000 sterling. The temperature at the bottom is 118 degrees Fahrenheit.

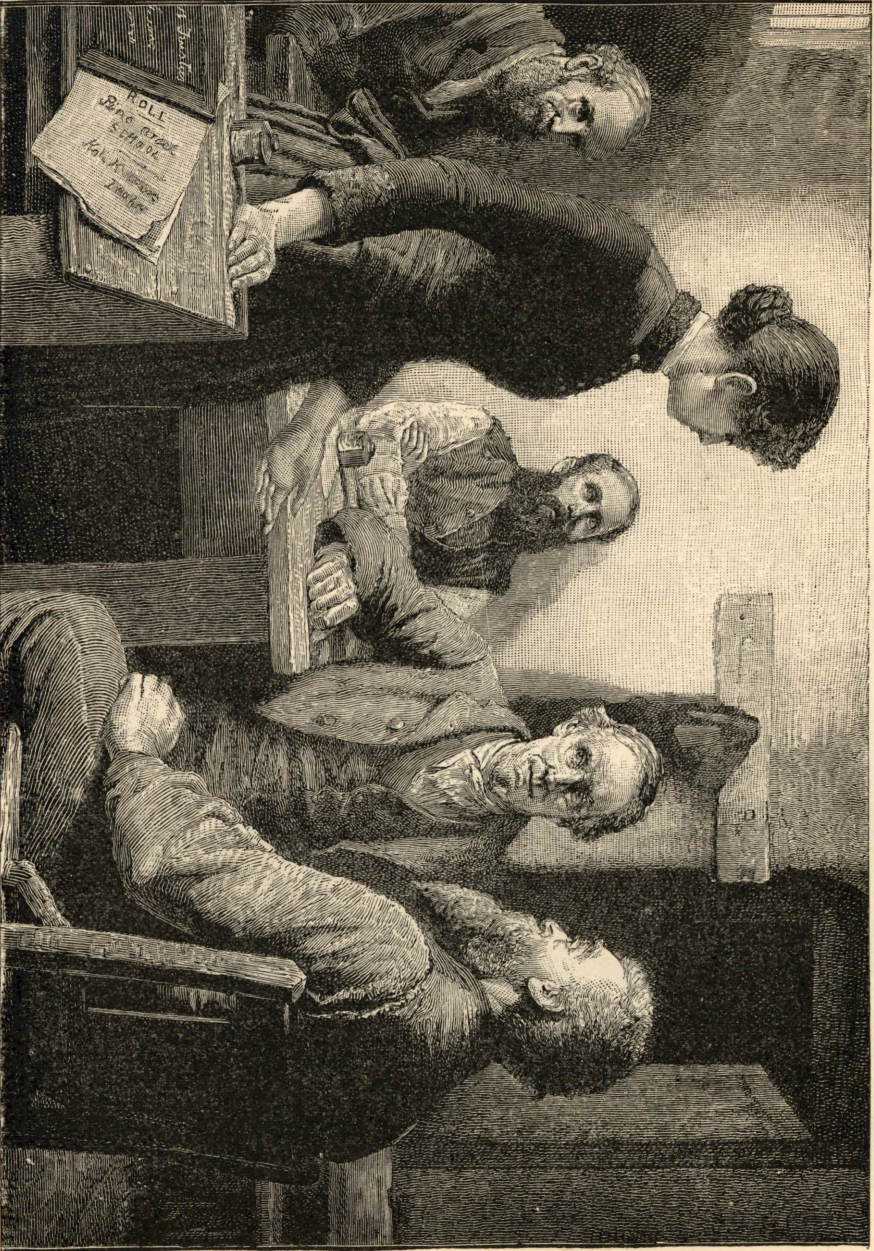

The tramp's distaste for work may be very much exaggerated. You will always find him ready to mow the lawn in winter or shovel snow in summer.

THE OCEAN.

GIVE ME A PENNY, GRAND-PA?

The Ocean.

The Atlantic Ocean covers 25,000,000 square miles ; the Antarctic, 30,000,000 ; the Arctic, 8,400 ; the Pacific, 50,000,000 ; the Indian, 17,000,000 ; the Mediterranean, 1,006,600 ; the Caspian Sea, 160,000 ; the Black Sea, 950,000 ; the Baltic, 175,000. Including all inland bays and seas, the ocean comprises 147,800,000 square miles—about three-fourths of the earth's surface. Taking it at two miles deep, the contents will be nearly 300,000,000 cubic miles.
