## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally, their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

## **Proposed changes to the List of Threatened and Endangered Species that are Critically Dependent on Regulated Waters for Survival 30 Day Comment Period**

Please be advised that the New Jersey Department of Environmental Protection, Division of Land Resource Protection, is proposing the following additions to the List of Threatened and Endangered Species that are Critically Dependent on Regulated Waters for Survival pursuant to the Flood Hazard Area Control Act (FHACA) rules (N.J.A.C. 7:13). This action is being taken to update the list, last revised May 15, 2008, to reflect changes in the status of various nongame animal species in New Jersey consistent with the adoption of recent changes made to the List of Endangered and Nongame Species in accordance with the Endangered and Nongame Species Conservation Act, N.J.S.A. 23:2A-1 et seq. This list revision will make the list consistent with the Department's recently adopted endangered and nongame species New Jersey status amendments (56 N.J.R. 936(a) (June 3, 2024), 57 N.J.R. 19(b) (Jan. 6, 2025)). At this time the List of Threatened and Endangered Species that are Critically Dependent on Regulated Waters for Survival for plant species is not being updated due to anticipated amendment in 2025 of the State Endangered Plant List Act.

The species proposed for addition to the list have attained endangered or threatened species status in New Jersey and have life history characteristics that make them critically dependent on regulated waters, specifically as to their water quality, flow rate, flood regime, and riparian buffers for the completion of the species' annual life cycles. Providing the stream habitat of these species with the protection standards applicable to a critically dependent on the regulated waters designation (See N.J.A.C. 7:13-4.1(c)2iii) comports with the goals and objectives of the Flood Hazard Area Control Act and the Endangered and Nongame Species Conservation Act.

The Department anticipates beginning to use the revised List of Threatened and Endangered Species that are Critically Dependent on Regulated Waters for Survival after considering public comments as described below and issuing a second public notice in a future NJDEP Bulletin. Upon publication of the second notice, the revised List will apply to all applications submitted under the FHACA rules, except for applications submitted prior to the date of the second public notice that are deemed "complete for review" by the Department as defined at N.J.A.C. 7:13-1.2.

The Department is seeking public comment on these proposed additions and any other relevant information on the status of endangered or threatened animal species as they relate to their status as being critically dependent on watercourse habitats. Comments may be submitted within 30 days of the date of this notice via mail to:
