

The Road Back:

Restoring Economic Health Through Public Health

Six Key Principles

Governor Phil Murphy announced his vision, “**The Road Back: Restoring Economic Health Through Public Health**,” to restart New Jersey and put the state on the road to recovery. Gov Murphy’s stay-at-home Executive Order, which has been in effect since March 21st, will remain in effect in its entirety until further notice. The following **six principles** and key metrics will guide the process for lifting restrictions and **restoring New Jersey’s economic health** through public health.

Principle 1: Demonstrate Sustained Reductions in New COVID-19 Cases and Hospitalizations

- 14-day trend lines showing appreciable and sustained drop in cases, hospitalizations, and other metrics;
- Hospitals stepping down from functioning under crisis standards of care.

Principle 2: Expand Testing Capacity

- At least double current diagnostic testing capacity;
- Prioritize testing for health care workers, essential personnel, and vulnerable populations;
- Create a flexible testing plan accessible to all residents;
- Expand partnerships with institutions of higher education, private-sector labs, and the federal government.
- Ensure that those who test positive are linked to a health care provider.

Principle 3: Implement Robust Contact Tracing

- Recruit and deploy an army of personnel who will identify and follow-up with contacts;
- Leverage technological data and innovative solutions to increase efficiency;
- Coordinate the approach of local and state health officials, which will have a coordinated county/regional component.

Principle 4: Secure Safe Places and Resources for Isolation and Quarantine

- To the greatest extent possible, provide individuals who do test positive in the future with a safe and free place to isolate and protect others from COVID-19;
- Ensure that quarantined contacts are provided supportive services, if needed.

Principle 5: Execute a Responsible Economic Restart

- Create the Governor’s Restart and Recovery Commission to advise on the process and recommend responsible and equitable decisions;
- Plan for a methodical and strategic return to work based on level of disease transmission risk and essential classification;
- Continuation of social distancing measures where feasible and appropriate;
- Leverage any available federal funds and programs to support health care, individual, and small business recoveries.

Principle 6: Ensure New Jersey’s Resiliency

- Learn from the lessons of COVID-19 and prepare for the possibility of a resurgence;
- Ensure hospitals, health care systems, and other health delivery facilities have inventories of personal protective equipment and ventilators;
- Build our own state personal protective equipment and ventilator stockpile;
- Create a playbook for future administrations for the next pandemic.
