Charles A. Richman  
*Acting Commissioner*

BULLETIN NO.

90-5

Date: **December 1990**

Subject: **Placement of Gas Piping  
Inspection Stickers**

In an effort to continue to develop cooperation between gas utility and construction code enforcement inspectors, the Department of Community Affairs feels that inspection stickers for gas piping systems should be placed in a uniform location. This can eliminate voiced complaints from construction code enforcement inspectors that gas companies often supply gas before the system has been approved, and conversely from utility inspectors that the inspection sticker (approved or disapproved) cannot be found.

Therefore, the Department is recommending that construction code inspectors place the gas piping inspection sticker on the stub out to the gas meter location.
