Minutes

SADC Regular Meeting of March 25, 2021 (Open Session)

It was moved by Mr. Germano and seconded by Mr. Schilling to approve the Open Session minutes of the SADC regular meeting of March 25, 2021. Ms. Jones and Mr. Norz abstained from the vote. The motion was approved by the remaining members.

Report of the Chairman

Chairman Fisher stated that the SADC is dealing with issues surrounding large scale and dual use solar installations, and is working closely with the Governor's office to balance the state's alternative energy initiatives with the retention of prime farmland soils and preservation programs. He noted that the Governor's environmental agenda is addressing climate change, social justice, an open and fair economy, and technological innovations. Chairman Fisher stated that it appears most people will be satisfied with the work that will be done once the legislative bills are passed.

NOTE: Martin Bullock joined the meeting.

Report of the Executive Director

Ms. Payne wished everyone a Happy Earth Day. Earlier in the week she and staff members visited the Cassaday Farm in Salem County. Ms. Payne said it was a great opportunity to meet with a farmer who has been able to expand his farming operations to approximately 3,000 acres of land as a result of involvement in the Farmland Preservation Program (FPP).

Ms. Payne stated that it was great to meet a farmer who is a big believer in the FPP and to discuss some conservation challenges on the property. She stated how helpful it was to be on the ground and hear directly from farmers regarding what's good about the FPP and what can be improved. She noted that staff would like to do more farm visits once the pandemic eases.

Ms. Payne stated that the Soil Protection Standards will be sent to partners today and staff is asking for informal comments within sixty days. Those comments will then be given to the SADC to see what changes are needed and then go through the formal rule making process, hopefully in the summer and early fall.

Ms. Payne stated that staff did get final approval of a Deed of Easement (DOE) for use in the Federal government's Agricultural Land Easement Program. She thanked Ms. Reynolds, staff attorney, who was instrumental in getting this approval. Now that staff has an approved deed, it can begin to close farms with federal funding. Ms. Payne stated that a package will be going out to the partners regarding this approval.

Communications

Ms. Payne stated that Ms. Winzinger is doing an amazing job putting a very comprehensive package together about agricultural economy, land prices and solar energy as well as a host of other important subjects. She asked that the committee take time to review the communications packets when they can. Chairman Fisher added that the communication packets help to understand current events as well as major policy concerns.

Chairman Fisher stated that he had the pleasure of talking with Senator Corey Booker who is now on the Senate Agriculture Committee. He noted that Senator Booker is very engaged in issues affecting farming and family farms, and that he is also very interested in food policy and nutrition. Chairman Fisher stated that he was interested to hear what the senator's thoughts were on New Jersey farming.

Public Comment

Ms. Payne advised that anyone wishing to make a public comment at this meeting should email their comments to SADC@AG.NJ.GOV. All public comments will be read during the public comment portions of the meeting.

There was no public comment.

1. Resolution: Extension of Commercial Non- Agricultural Use Permit

Mr. Roohr referred the committee to a draft resolution approving a 5-year extension to the only nonagricultural use permit issued by the SADC in 2016 for floral design classes, craft workshops and other related events in a former milk house building on MJC Properties, LLC . The original request was for 36 events per year, and the approval only contemplated indoor events. Due to covid related safety concerns and the Governor's executive orders related to social distancing and occupancy rules for businesses, SADC approved an internal amendment in July 2020 that allowed for the use of a 30 x 30 tent outside the milk house area so that MJC could continue to operate while meeting necessary covid safety protocols. This amendment for the outside use was effective until November 2020.

MJC's current request is to expand the type of events, increase the number of events and allow for permanent use of the outdoor area. The expansion of the types of events include weddings and more elaborate special occasion events.

Mr. Roohr stated that because the rural microenterprise (RME) rules and prior nonagricultural use permit rules are not entirely consistent, and because of anticipated legislative action on special occasion events (SOE) within the next few months that could affect this application, staff is recommending the SADC approve a 5-year extension to its prior permit issued to MJC , with no changes. At the end of the 5-year period the permittee can either apply for an RME permit under applicable rules or seek approval for SOEs pursuant to whatever legislation and regulations are then in effect.

Ms. Payne reiterated the fact that the tent was requested due to covid reasons and the resolution says that the use of the tent would continue through November 30, 2021 or until the Governor declares the end of the public health emergency, whichever is later. This approval would allow the landowner to use the tent throughout the end of the season so as not to disturb any events if the public health emergency is lifted sooner.

Chairman Fisher asked what the reasoning was for limiting the landowners to one extension and stated that there are many instances of situations that are grandfathered based on the rules that were set in place at the time.

Mr. Roohr stated that the RME rules replaced the prior commercial nonagricultural use regulations. Technically, if someone were to make a new request today, he would be making that request under the RME regulations. Mr. Roohr stated that MJC Properties came in under the old rules, and even though the rules changed, this would give MJC the opportunity to adjust its operations in compliance with the current rules and the SOE rules that are likely forthcoming.

Ms. Payne stated that prior commercial nonagricultural use rules that have been removed from the books do not live on forever, so the landowner can't anticipate having access to those rules indefinitely. SADC repealed those rules and replaced them with RME rules and this is the only application that has been issued a permit under the old rules and this is a unique case.

It was moved by Mr. Germano and seconded by Mr. Schilling to approve Resolution FY2021R4(1), granting approval to the following application, as presented, subject to any conditions of said resolution.

Mary Coombs, a principal of MJC, stated that it has been a complicated process trying to fit this unique business into the regulations, and everyone has worked together to make this happen, especially Mr. Roohr. She noted that if all lines of communication are kept open it will help the business move forward and make the process easier for other landowners in the future.

Ms. Fischetti asked what would happen if the landowners want to keep the tent up after the health crisis is over; is it subject to the type of events that are to be held or to the one-time extension. Ms. Payne stated that the previous non-agricultural use rules prohibited outside activity. She explained that the tent was a flexibility extended due to the public health emergency, so that is the rationale for departing from the rules.

Ms. Payne stated that her goal is to try and avoid the landowner having to apply for an RME permit when the SOE law could pass and result in a reconfiguration of MJC's operations again. By permitting the extension, MJC can keep its business running and then can decide later whether to apply for an RME or an SOE.

Mary Coombs stated that they don't personally own the tent and there were just two or three occasions where the tent was up for a 24-hour period, so there is no need for the tent for an extended period of time at this point.

Chairman Fisher stated that the MJC is a great farm with great operators and he's glad that the SADC was able to accommodate the operation.

MJC Properties, LLC., Resolution FY2021R4(1), Block 102, Lot 3, Upper Deerfield Township, Cumberland County, 88.77 Acres.

A roll call was taken. The motion was unanimously approved. A copy of Resolution FY2021R4(1) is attached to and a part of these minutes.

2. Resolution: House Replacement Request

Note: Mr. Bullock recused from the discussion.

Mr. Willmott referred the committee to the house replacement request. He reviewed the specifics of the request with the committee and stated that staff recommendation is to grant final approval.

Mr. Waltman stated that the house looks spectacular, but he's concerned about farmland affordability and whether future farmers will have the ability to purchase this farm. Ms. Payne stated that farmland affordability was a topic of conversation in 2005. There was a discussion at that time whether the SADC should amend the Deed of Easement (DOE) to include a house size limitation, but there was insufficient support for that policy change.

Chairman Fisher stated that each county can decide to put a house size limit in the DOE. Ms. Payne stated that the counties can make that a standard provision in their DOE and the SADC can approve it. The SADC itself, when doing direct easement purchases, does not have a house size limit. If the committee would like to go in that direction, that can be done. Chairman Fisher stated that the subject can be discussed at a later date.

It was moved by Mr. Germano and seconded by Ms. Jones to approve Resolution FY2021R4(2), granting approval to the following application, as presented, subject to any conditions of said resolution.

Virag-Non Farm, Resolution FY2021R4(2), Block 87.01, Lots 9 & 9.01, Freehold Township, Monmouth County, 36.535 acres.

A roll call vote was taken. The motion was unanimously approved. A copy of Resolution FY2021R4(2) is attached to and a part of these minutes.

B. Resolution: Review of Non-Agricultural Development in the ADA (N.J.S.A. 4:1C-19) South Jersey Gas Deepwater Gas Pipeline Replacement Project: Salem County

Mr. Bruder referred the committee to a Non-Agricultural Development in the ADA for the Deepwater Gas Pipeline Replacement Project by South Jersey Gas in Salem County. He reviewed a draft resolution finding that a proposed in-kind replacement of 4.2 miles of an existing natural gas pipeline in Carney's Point and Pilesgrove townships, Salem County does not cause unreasonably adverse effects on the preserved farms, the ADA or State agricultural preservation and development policies pursuant to the Agriculture Retention and Development Act.

The proposed project includes 2.52 miles of pipeline in existing road rights-of-way (ROW) and approximately 1.68 miles through Salem County's ADA and on privately owned lands, including two SADC-preserved farms and one NRCS-preserved farm. He reviewed the

specifics of the request with the committee and stated that staff recommendation is to grant final approval.

It was moved by Mr. Schilling and seconded by Mr. Bullock to approve Resolution FY2021R4(3), granting approval of Non-Agricultural Development in the ADA (N.J.S.A. 4:1C-19) South Jersey Gas Deepwater Gas Pipeline Replacement Project for Salem County. The motion was unanimously approved. A copy of Resolution FY2021R4(3) is attached to and a part of these minutes.

C. Resolutions: Final Approval – County PIG Program

Mr. Everett reviewed a substantial acquisition project for final approval. At nearly 400 acres, the four parcels that collectively comprise Kerr Ridge Farm/Kerr Ridge Associates render it perhaps the largest remaining unpreserved farm in Hopewell Township. Identified by NJ Conservation Blueprint as high priority lands for farmland preservation not only given its size but also its soils - 89% of the farm is mapped by NRCS as Important NJ Soils - significant development pressure emanating from the nearby I-295 corridor renders the property vulnerable to conversion if not preserved.

Operated by the next generation of the Kerr family, the young farmer who produces soybeans, wheat, hay and straw on the property does so by using conservation tillage practices. Additional natural resource management is evident in the intact forested riparian buffer along Jacobs Creek, a tributary of the Delaware River, which the County wishes to acquire as a conservation easement for use as a hiking trail.

In addition to the agricultural and natural resources noted above, the subject properties are located within the Bear Tavern Road/Jacobs Creek Crossing National Register Historic District, with two extant late eighteenth/early nineteenth century farmhouses on the property. Notably, the property was traversed by General George Washington's Continental Army during its march to Trenton to defeat the Hessian garrison quartered there after the celebrated Delaware River crossing on Christmas Day, 1776. Total purchase price for the 357 acres of farmland easements is just over \$4 million, with an SADC cost share of \$2.4 million.

Mr. Waltman stated that this is an exciting day for Hopewell Township and Mercer County. He noted that this farm is everything and more that Mr. Everett just described, and this is a fitting act for the SADC to take on Earth Day to preserve this very important farm. He thanked the staff for all of the hard work that it took to preserve this farm.

Ms. Mandelbaum referred the committee to five requests for final approval under the County PIG Program. She reviewed the parcel configuration rates and the certified market value of the requests with the committee and stated that staff recommendation is to grant final approval.

It was moved by Mr. Waltman and seconded by Ms. Jones to approve Resolutions FY2021R4(4) through FY2021R4(7), granting approval to the following applications under the County PIG Program, as presented, subject to any conditions of said resolution. Mr. Siegel advised that he was recusing on this matter.

1. Kerr Ridge Associates (Lot 15S), SADC ID#11-0183-PG, Resolution FY2021R4(4), Block 98, Lot 15, Hopewell Township, Mercer County, 139.477 acres.
2. Kerr Ridge Associates (Lot 15N), SADC ID#11-0182-PG, Resolution FY2021R4(5), Block 98, Lot 15, Hopewell Township, Mercer County, 139.477 acres.
3. Kerr Ridge Associates (Lot 3S), SADC ID#11-0185-PG, Resolution FY2021R4(6), Block 95, Lot 3, Hopewell Township, Mercer County, 259.001 acres.
4. Kerr Ridge Associates, SADC ID#11-0184-PG, Resolution FY2021R4(7), Block 95, Lot 3, Hopewell Township, Mercer County, 259.001 acres.

A roll call vote was taken. The motion was approved, with Mr. Siegel recusing on the vote. A copy of Resolutions FY2021R4(4) through FY2021R4(7) is attached to and a part of these minutes.

Ms. Mandelbaum referred the committee to the request for the George and Terri Hitchner final approval under the County PIG Program. She reviewed the specifics of the request with the committee and stated that staff recommendation is to grant final approval.

It was moved by Mr. Germano and seconded by Mr. Siegel to approve Resolution FY2021R4(8), granting approval to the following application under the County PIG Program, as presented, subject to any conditions of said resolution.

5. George & Terri Hitchner, SADC ID#06-0195-PG, Resolution FY2021R4(8), Block 65, Lot 1, Hopewell Township, Cumberland County, 153 acres.

A roll call vote was taken. The motion was unanimously approved. A copy of Resolution FY2021R4(8) is attached to and a part of these minutes.

D. Resolutions: Final Approval – Direct Easement Purchase Program

Ms. Mandelbaum referred the committee to two requests for final approval under the Direct Easement Purchase Program. She reviewed the specifics of the requests with the committee and stated that staff recommendation is to grant final approval.

It was moved by Mr. Siegel and seconded by Mr. Germano to approve Resolutions FY2021R4(9) and FY2021R4(10) granting approval to the following application under the Direct Easement Purchase Program, as presented, subject to any conditions of said resolution.

1. Richard Gardner, SADC ID#21-0077-DE, Resolution FY2021R4(9), Block 48, Lots 12.01 & 14, Franklin Township, Warren County, 97.1 net easement acres.
2. Paul and Vouletti Mitchell, SADC ID#10-0278-DE, Resolution FY2021R4(10), Block 39, Lots 2 & 27, Kingwood Township, Hunterdon County, 72.8 net easement acres.

A roll call vote was taken. The motion was unanimously approved. A copy of Resolution FY2021R4(9) and FY2021R4(10) is attached to and a part of these minutes.

E. Resolution: Nonprofit Fee Transfer – Muckshaw Preserve

Ms. Reynolds referred the committee to a request for a nonprofit fee transfer for the Muckshaw Preserve from the Ridge and Valley Conservancy to the Foodshed Alliance.

The preserve consists of two preserved farms - one located in Fredon and Andover Townships and the other entirely in Fredon Township, Sussex County. The first farm was preserved in 2001 and the other in 2002 with nonprofit fee simple grants to the nature conservancy. In December 2019, the SADC approved the fee transfer from the Nature Conservancy to the Ridge and Valley Conservancy.

The Foodshed Alliance, currently a lessee of the property, runs a Sustainable Agriculture Enterprise, or “SAGe” program, on the property in which plots are leased to sustainable farm businesses at affordable rates. Ms. Reynolds explained that currently there are seven leases, totaling 50 acres. Ms. Reynolds pointed out that the resolution of approval refers to 6 leases; however, the Foodshed Alliance just finalized a new lease this past week, so the resolution of approval will be modified accordingly. Paragraph 24 in both DOEs state that the land can’t be sold unless it continues to be used for agricultural purposes and production. The SADC must be notified in advance that the land will be offered for sale and the SADC approves the transfer prior to the conveyance.

Additionally, under paragraph 5 of both DOEs, the grantor agrees to reimburse the SADC 50% of the net proceeds in the event of a sale of any interest in the preserved farm. However, Ridge and Valley Conservancy intends to transfer its fee interests for nominal consideration and, therefore, the deed transferring the fee simple interest specifically references the paragraph 5 reimbursement clause as well as other paragraphs in the DOE placing requirements on a future transfer so that those provisions remain intact, and future landowners are on notice .

Ms. Reynolds described for the committee the different farm operations that are leasing plots under the SAGe program. Some of the agriculture engaged in on the farm include hemp, bees, mixed vegetables, fruits, chickens and goats. She stated that the descriptions were provided to her by Eric Derby, the SAGe program manager. Ms. Reynolds noted that Mr. Derby, as well as Kendrya Close, Foodshed Alliance Executive Director, and George Shawbert, the Ridge and Valley Conservancy Vice President, are all in attendance at the meeting.

Ms. Reynolds stated that based on the foregoing, as well as the finding that the land will be used for agricultural use and production, the staff recommends approval of the fee transfer.

Mr. Norz asked why this particular case has to be approved through the SADC. Ms. Reynolds stated that this is a regulatory requirement specific to the nonprofit programs. Chairman Fisher asked if the farm will still be referred to as the Muckshaw Preserve. Mr. Derby confirmed that the name will remain the same. Ms. Payne clarified that the approval

of the resale is a condition of any acquisition made with fee simple grant funds, and the SADC will be involved in the review of the sale transaction.

Ms. Payne stated that this endeavor is very exciting and she thanked Ms. Close and Mr. Derby for working together to make this a unique agricultural incubator in NJ. She noted that she was on a panel discussion where the SAgE program came up, and people across the country are interested in how to connect farmland with new and beginning farmers. Ms. Payne stated that the SADC wants to stay close to this endeavor to gain a better understanding of the successes and challenges of this project.

It was moved by Mr. Waltman and seconded by Mr. Germano to approve Resolution FY2021R4(11) granting approval to the following application under the Nonprofit Fee Transfer for the Muckshaw Preserve from the Ridge and Valley Conservancy to the Foodshed Alliance, as presented, subject to any conditions of said resolution.

Muckshaw Preserve (Ridge and Valley Conservancy to the Foodshed Alliance)

Block 1001, Lot 30,
Fredon Township, Sussex County
Block 153, Lots 33 & 33.01
Andover Township, Sussex County, 197.864 acres (Parcel A)

Block 801, Lot 33
Block 1001, Lot 1.01
Fredon Township, Sussex County, 132.099 acres (Parcel B)

A roll call vote was taken. The motion was unanimously approved. A copy of Resolution FY2021R4(11) is attached to and a part of these minutes.

Mr. Derby stated that the SAgE Project started out as a way to help people gain access to land given the huge expense that is entailed. The mission is to make sure natural organic farmers in NJ get access to land and get educated on preserved state farmland. Farmers that are approved get 10-year leases after a rigorous application process that includes providing their production plan, mission statement, years of experience, business plan and marketing process. The applicants have to adhere to organic guidelines and follow national organic protocols. Mr. Derby noted that the farmers have all been working really well together and everyone has been a delight to work with.

Chairman Fisher thanked Mr. Derby and everyone for joining in the discussion and congratulated them on the approval of the transfer.

Public Comment

Ms. Winzinger stated that there was a comment from Mr. Scott Lenox from the Barnegat Oyster Collective in regard to a legal analysis for Right to Farm Act (RTFA) protection of shellfish aquaculture farms.

April 22, 2021

Ms. Payne stated that Mr. Lenox is in the process of submitting an SSAMP application to the Monmouth County Agriculture Development Board (MCADB) for his retail market operation for his oysters in Wall Township, Monmouth County. The harvest of oysters takes place offshore and the oysters are brought onshore and processed and then sold at a market located in Wall Township. The SADC hasn't had a RTFA case like this before, and it's pretty clear that the Act was not written with this type of aquaculture in mind.

Ms. Payne stated that she, Ms. Reynolds, Ms. Purcell and NJDA aquaculture staff are working together to understand how the RTFA could apply to aquaculture. Staff shared this advisory and consultative information with the MCADB. Ms. Payne stated that the SADC can't give detailed advice to Mr. Lenox because if the MCADB issues a decision in his case and any party was dissatisfied, they could appeal the decision to the SADC.

WHEREAS, the SADC finds that this request for an extension may be considered under the same regulations governing review and approval of the original application, rather than subjecting the owner to the new RME regulatory requirements at this time given the potential passage of SOE legislation that will further define the extent to which SOEs are permitted on preserved farmland; and

WHEREAS, on March 10, 2021, the Cumberland CADB found that the Owner was not in violation of any provision of the Deed of Easement, that the application was compliant with the Commercial Non-Agricultural Activity regulations, N.J.S.A.4:1C-32.1 and N.J.A.C. 2:76-22.1, et seq., and approved the issuance of a permit to include the additional activities requested by the Owner, and subject to further approval by the SADC, within the former milk house structure; and

April 22, 2021

WHEREAS, pursuant to the Agriculture Retention and Development Act, N.J.S.A. 4:1C-19, et seq., any public body or public utility which intends to exercise the power of eminent domain within an Agricultural Development Area (ADA), or which intends to advance a grant, loan or interest subsidy or other funds within an ADA for the construction of dwellings, commercial or industrial facilities, transportation facilities or water or sewer facilities to serve nonfarm structures shall file a Notice of Intent (NOI) with the County Agriculture Development Board (CADB) and the State Agriculture Development Committee (SADC) 30 days prior to the initiation of the action; and

WHEREAS, CADBs and the SADC are charged with the responsibility, pursuant to N.J.S.A. 4:1C-19, to review the proposed action to determine the its effect upon the preservation and enhancement of agriculture in the ADA, the municipally approved program, and overall State agriculture preservation and development policies; and

WHEREAS, South Jersey Gas (SJG), through its consultants HMI Technical Solutions, submitted a NOI to the Salem CADB and the SADC on January 15, 2021 for the in-kind replacement of an existing natural gas pipeline in Carneys Point and Pilesgrove Townships, Salem County; and

WHEREAS, the proposed 12.75-inch diameter steel pipeline is needed to replace an existing 12-inch South Jersey Gas transmission pipeline which is nearing the end of its useful life; and

WHEREAS, the proposed project is necessary to enhance the reliability and safety of SJG's system for existing customers in the surrounding area; and

WHEREAS, the 4.2-mile pipeline project will extend from the Forest Lane Regulator Station in Carneys Point Township to the Sharptown Road Regulator Station in Pilesgrove Township and has been designed to be placed in State and County road rights-of-ways and on private lands within SJG's pre-existing easements, as shown on Schedule A; and

WHEREAS, SJG's right-of-way extends approximately 13,300 linear feet, or 2.52 miles, within the existing road rights-of-way and 8,900 linear feet, or 1.68 miles, through privately owned land within Salem County's ADA; and

WHEREAS, approximately 4,300 linear feet, or an area of 1.947 acres, of the right-of-way is on Block 24, Lot 11 and Block 25, Lot 6 in Pilesgrove Township which is subject to a USDA-NRCS Agricultural Conservation Easement Program - Grasslands of Special Environmental Significance easement obtained without SADC participation; and

WHEREAS, approximately 1,300 linear feet, or an area of 0.596 acres, of the right-of-way is on the SADC/Harris-Nature Conservancy farm, Block 25, Lots 5 & 8 in Pilesgrove Township, preserved through the SADC's Fee Simple program; and

WHEREAS, SJG's easements predate the 2018 USDA-NRCS easement and the 1990 preservation of the SADC/Harris-Nature Conservancy farm; and

WHEREAS, alternative route options that would avoid the Salem County ADA were identified by SJG's consultants but were found to be impractical given that the project can be accomplished within pre-existing easement areas and public rights-of-way; and

WHEREAS, two proposed temporary staging / laydown areas of approximately 3,750 square feet are proposed on Block 24, Lot 11 and one approximately 3,750 square foot temporary staging / laydown area is proposed on Block 25, Lot 6; all within SJG's existing easement area as identified in Schedule B; and

WHEREAS, one approximately 9,000 square foot temporary staging / laydown area is proposed within SJG's existing easement area on Block 25, Lot 8 of the SADC/Harris-Nature Conservancy farm as identified in Schedule C; and

WHEREAS, the pipeline will be installed via direct bury methods with the exception of known environmentally sensitive areas where HDD technology will be implemented; and

WHEREAS, HMI Technical Solutions submitted an Agricultural Impact Mitigation Plan (AIMP) for the proposed project which describes the methods, approaches and procedures that SJG and its construction subcontractors will utilize during the construction, restoration and operation of the pipeline to minimize impacts on affected agricultural lands; and

WHEREAS, the AIMP notes that the pipeline will have a minimum 4' of cover to allow for the continuance of agricultural operations and will a minimum of 1' of separation between the top of the pipeline and any existing or planned tile drainage; and

WHEREAS, topsoil will be stripped, stockpiled and replaced following construction from any agricultural land to be trenched for the pipeline and for HDD entry and exit pits; and

WHEREAS, for areas such as access roads and staging / laydown areas SJG has agreed to require its construction subcontractors to either place timber matting over the bare ground prior to construction or strip the topsoil and use a geotextile base layer with dense graded aggregate to distribute the weight of machinery to minimize compaction of farmland soils in active agricultural areas within the ADA; and

WHEREAS, where dense graded aggregated is used on active agricultural lands SJG will test for soil compaction and take measures to address subsoil compaction, as necessary, prior to replacement of topsoil; and

WHEREAS, SJG has outlined a process to communicate with landowners and tenant farmers about site-specific agricultural issues, notify them of impending construction activities, and address any questions or concerns and a process to compensate for any crop damage or loss incurred; and

WHEREAS, for all potential sites in the ADA, the pipeline project and the temporary staging / laydown areas have also been designed to allow farmer access to remaining fields during construction and to avoid or minimize impacts to existing buffer areas, surface waters and groundwater aquifers; and

WHEREAS, it is anticipated that the Salem CADB, at a special meeting on April 28, 2021, will also review the project to determine if the proposed action would cause unreasonably adverse effects on preserved farms, the ADA, or State agricultural preservation and development policies; and

WHEREAS, the SADC has reviewed the NOI submitted by SJG and their environmental consultants, met with the Salem CADB staff, and determined that SJG has adequately addressed all requirements and information about the project pursuant to N.J.S.A. 4:1C-19 and N.J.A.C. 2:76-7.1, et seq.

NOW, THEREFORE, BE IT RESOLVED that the SADC has reviewed the proposed action to determine its effect upon the preservation and enhancement of agriculture in the ADAs, the municipally approved program, and upon overall State agriculture preservation and development policies, and finds that the proposed project as described would not cause unreasonably adverse effects on the preserved farms, ADA or State agricultural preservation and development policies pursuant to N.J.S.A. 4:1C-19, N.J.S.A. 4:1C-25, and N.J.S.A 40:55D-128 for the following reasons:

1. The project is necessary in order to maintain the reliability and safety of SJG's natural gas transmission infrastructure;
2. SJG has taken measures to limit the extent of agricultural land impacted by the project by planning project activities within its existing right-of-way;
3. In addition to soil conservation practices required for Soil Erosion and Sediment Control Plan approval, SJG has agreed to implement measures to address soil compaction on agricultural land within the ADA;
4. SJG has committed to the removal of stone or other fill needed in temporary work areas to maintain preexisting grade and farmable conditions, and otherwise working with landowners and tenant farmers to ensure the future agricultural use of their properties is not inhibited; and

BE IT FURTHER RESOLVED the WHEREAS paragraphs set forth above are incorporated herein by reference; and

BE IT FURTHER RESOLVED that the SADC will work with SJG, the Salem CADB and farmers / landowners to resolve site-specific impacts to farms in the ADA, particularly with respect to soils in agricultural production and surface and subsurface drainage systems, during and after construction; and

BE IT FURTHER RESOLVED that should amendments to the project as described in the NOI be necessary, SJG shall revise and resubmit its NOI so that the Salem CADB and SADC may reconsider their findings in light of any amended project requirements and impacts; and

BE IT FURTHER RESOLVED that this action is not effective until the Governor's review period expires pursuant to N.J.S.A. 4:1C-4f.

WHEREAS, the Owner has read and signed SADC Guidance Documents regarding Exceptions, Division of the Premises, and Non-Agricultural Uses; and

WHEREAS, the Property includes one (1), approximately 3.007-acre non-severable exception area for a future single family residential unit and to afford future flexibility for nonagricultural uses resulting in approximately 66.453 net survey acres to be preserved, hereinafter referred to as "the Premises"; and

4. Any unused funds encumbered from either the base or competitive grants at the time of closing shall be returned to their respective sources (competitive or base grant funds).
5. Should additional funds be needed due to an increase in acreage and if base grant funding becomes available the grant may be adjusted to utilize unencumbered base grant funds.
6. 7. The SADC shall enter into a Grant Agreement with the County in accordance with N.J.A.C. 2:76-6.18.

 1. Mercer County's policy for house size limitations on preserved farms applies to both non-severable exception areas and the easement area. The policy limits new residences to 4,000 square feet of livable space and enclosed structures ancillary to residential use, including attached and detached garages, are limited to 1,500 square feet.
 - d. Additional Conditions:
 1. The certification of easement value, as well as SADC final approval, will be conditioned upon the landowners completing the subdivision of Lot 3 without restriction prior to closing and the simultaneous preservation of both farms.
 3. The application includes a 28.5-acre nonseverable exception for a public access corridor. It is our understanding from the maps provided the exception area boundary is within a wooded area and therefore any future trail construction would be naturally buffered from the open farm fields with existing vegetation. The SADC will need to review the public access easement prior to recording.

3. Grantor certifies that at the time of the application to sell the development easement to the Grantee and at the time of the execution of this Deed of Easement the nonagricultural uses indicated on attached Schedule (B) existed on the Premises. All other nonagricultural uses are prohibited except as expressly provided in this Deed of Easement.

4. All nonagricultural uses, if any, existing on the Premises at the time of the landowner's application to the Grantee as set forth in Section 3 above may be continued and any structure may be restored or repaired in the event of partial destruction thereof, subject to the following:

- i. No new structures or the expansion of pre-existing structures for nonagricultural use are permitted;
- ii. No change in the pre-existing nonagricultural use is permitted;
- iii. No expansion of the pre-existing nonagricultural use is permitted; and
- iv. In the event that the Grantor abandons the pre-existing nonagricultural use, the right of the Grantor to continue the use is extinguished.

5. No sand, gravel, loam, rock, or other minerals shall be deposited on or removed from the Premises excepting only those materials required for the agricultural purpose for which the land is being used.

6. No dumping or placing of trash or waste material shall be permitted on the Premises unless expressly recommended by the Committee as an agricultural management practice.

7. No activity shall be permitted on the Premises which would be detrimental to drainage, flood control, water conservation, erosion control, or soil conservation, nor shall any other activity be permitted which would be detrimental to the continued agricultural use of the Premises.

- i. Grantor shall obtain within one year of the date of this Deed of Easement, a farm conservation plan approved by the local soil conservation district.
- ii. Grantor's long term objectives shall conform with the provisions of the farm conservation plan.

8. Grantee and its agents shall be permitted access to, and to enter upon, the Premises at all reasonable times, but solely for the purpose of inspection in order to enforce and assure compliance with the terms and conditions of this Deed of Easement. Grantee agrees to give Grantor at least 24 hours advance notice of its intention to enter the Premises, and further, to limit such times of entry to the daylight hours on regular business days of the week.

9. Grantor may use the Premises to derive income from certain recreational activities such as hunting, fishing, cross country skiing and ecological tours, only if such activities do not interfere with the actual use of the land for agricultural production and that the activities only utilize the Premises in its existing condition. Other recreational activities from which income is derived and which alter the Premises, such as golf courses and athletic fields, are prohibited.

10. Nothing shall be construed to convey a right to the public of access to or use of the Premises except as stated in this Deed of Easement or as otherwise provided by law.

11. Nothing shall impose upon the Grantor any duty to maintain the Premises in any particular state, or condition, except as provided for in this Deed of Easement.

12. Nothing in this Deed of Easement shall be deemed to restrict the right of Grantor to maintain all roads and trails existing upon the Premises as of the date of this Deed of Easement. Grantor shall be permitted to construct, improve or reconstruct any roadway necessary to service crops, bogs, agricultural buildings, or reservoirs as may be necessary.

13. At the time of this conveyance, Grantor has zero existing single family residential buildings on the Premises and zero residential buildings used for agricultural labor purposes. Grantor may use, maintain, and improve existing buildings on the Premises for agricultural, residential and recreational uses subject to the following conditions:

- i. Improvements to agricultural buildings shall be consistent with agricultural uses;
- ii. Improvements to residential buildings shall be consistent with agricultural or single and extended family residential uses. Improvements to residential buildings for the purpose of housing agricultural labor are permitted only if the housed agricultural labor is employed on the Premises; and
- iii. Improvements to recreational buildings shall be consistent with agricultural or recreational uses.

14. Grantor may construct any new buildings for agricultural purposes. The construction of any new buildings for residential use, regardless of its purpose, shall be prohibited except as follows:

- i. To provide structures for housing of agricultural labor employed on the Premises but only with the approval of the Committee. If the Committee grants approval for the construction of agricultural labor housing, such housing shall not be used as a residence for Grantor, Grantor's spouse, Grantor's parents, Grantor's lineal descendants, adopted or natural, Grantor's spouse's parents, Grantor's spouse's lineal descendants, adopted or natural; and
- ii. To construct a single family residential building anywhere on the Premises in order to replace any single family residential building in existence at the time of conveyance of this Deed of Easement but only with the approval of the Committee.
- iii. No residual dwelling site opportunities have been allocated pursuant to the provisions of N.J.A.C. 2:76-6.17. No residential buildings are permitted on the Premises except as provided in this Deed of Easement.

For the purpose of this Deed of Easement:

"Residual dwelling site opportunity" means the potential to construct a residential unit and other appurtenant structures on the Premises in accordance with N.J.A.C. 2:76-6.17.

15. The land and its buildings which are affected may be sold collectively or individually for continued agricultural use as defined in Section 2 of this Deed of Easement. However, no division of the land shall be permitted without the approval in writing of the Grantee. In order for the Grantor to receive approval, the Grantee must find that the division shall be for an agricultural purpose and result in agriculturally viable parcels. Division means any division of the Premises, for any purpose, subsequent to the effective date of this Deed of Easement.

- i. For purposes of this Deed of Easement, "Agriculturally viable parcel" means that each parcel is capable of sustaining a variety of agricultural operations that yield a reasonable economic return under normal conditions, solely from each parcel's agricultural output.

16. In the event of any violation of the terms and conditions of this Deed of Easement, Grantee may institute, in the name of the State of New Jersey, any proceedings to enforce these terms and conditions including the institution of suit to enjoin such violations and to require restoration of the Premises to its prior condition. Grantee does not waive or forfeit the right to take any other legal action necessary to insure compliance with the terms, conditions, and purpose of this Deed of Easement by a prior failure to act.

17. This Deed of Easement imposes no obligation or restriction on the Grantor's use of the Premises except as specifically set forth in this Deed of Easement.

18. This Deed of Easement is binding upon the Grantor, the Grantor's heirs, executors, administrators, personal or legal representatives, successors and assigns and the Grantee; it shall be construed as a restriction running with the land and shall be binding upon any person to whom title to the Premises is transferred as well as upon the heirs, executors, administrators, personal or legal representatives, successors, and assigns of all such persons.

19. Throughout this Deed of Easement, the singular shall include the plural, and the masculine shall include the feminine, unless the text indicates otherwise.

20. The word 'Grantor' shall mean any and all persons who lawfully succeed to the rights and responsibilities of the Grantor, including but not limited to the Grantor's heirs, executors, administrators, personal or legal representatives, successors and assigns.

21. Wherever in this Deed of Easement any party shall be designated or referred to by name or general reference, such designation shall have the same effect as if the words, 'heirs, executors, administrators, personal or legal representatives, successors and assigns' have been inserted after each and every designation.

22. Grantor, Grantor's heirs, executors, administrators, personal or legal representatives, successors and assigns further transfers and conveys to Grantee all of the nonagricultural development rights and development credits appurtenant to the lands and Premises described herein. Nothing contained herein shall preclude the conveyance or retention of said rights by the Grantee as may be permitted by the laws of the State of New Jersey in the future.

23. Grantor shall pay the Committee 50 percent of that portion of the net proceeds, representing the value of the land only (and not the value of the improvements), of a condemnation award or other disposition of the Premises following termination of this Deed of Easement, as permitted pursuant to N.J.S.A. 4:1C-11 et seq., P.L. 1983, c.32.

24. Grantor agrees not to sell, lease, exchange or donate the lands unless:

- (a) The lands will continue to be maintained for agricultural use and production pursuant to this Deed of Easement and N.J.A.C. 2:76-6.15;
- (b) The Committee is notified that the restricted farm is being offered for sale, exchange or donation; and
- (c) The Committee approves the transfer in writing prior to the nonprofit's offering, for sale or conveyance, of any of its interest in the land.

25. In the event Grantor sells or donates any interest in the Premises, Grantor shall pay to the Committee 50 percent of the net proceeds. For purposes of this provision, "net proceeds" shall be calculated by subtracting the difference between the original purchase price and the value on which the Committee's cost-share grant was based from the gross proceeds.

26. Any proceeds received by Grantor from a sale of the Premises shall be dedicated for farmland preservation purposes. The Committee's 50 percent share of any such proceeds, calculated pursuant to Paragraph 25 of this Deed

All other nonagricultural uses are prohibited except as expressly provided in this Deed of Easement.

4. All nonagricultural uses, if any, existing on the Premises at the time of the landowner's application to the Grantee as set forth in Section 3 above may be continued and any structure may be restored or repaired in the event of partial destruction thereof, subject to the following:

- i. No new structures or the expansion of pre-existing structures for nonagricultural use are permitted;

- iii. No expansion of the pre-existing nonagricultural use is permitted; and
- iv. In the event that the Grantor abandons the pre-existing nonagricultural use, the right of the Grantor to continue the use is extinguished.

5. No sand, gravel, loam, rock, or other minerals shall be deposited on or removed from the Premises excepting only those materials required for the agricultural purpose for which the land is being used.

6. No dumping or placing of trash or waste material shall be permitted on the Premises unless expressly recommended by the Committee as an agricultural management practice.

7. No activity shall be permitted on the Premises which would be detrimental to drainage, flood control, water conservation, erosion control, or soil conservation, nor shall any other activity be permitted which would be detrimental to the continued agricultural use of the Premises.

- i. Grantor shall obtain within one year of the date of this Deed of Easement, a farm conservation plan approved by the local soil conservation district.
- ii. Grantor's long term objectives shall conform with the provisions of the farm conservation plan.

8. Grantee and its agents shall be permitted access to, and to enter upon, the Premises at all reasonable times, but solely for the purpose of inspection in order to enforce and assure compliance with the terms and conditions of this Deed of Easement. Grantee agrees to give Grantor at least 24 hours advance notice of its intention to enter the Premises, and further, to limit such times of entry to the daylight hours on regular business days of the week.

9. Grantor may use the Premises to derive income from certain recreational activities such as hunting, fishing, cross country skiing and ecological tours, only if such activities do not interfere with the actual use of the land for agricultural production and that the activities only utilize the Premises in its existing condition. Other recreational activities from which income is derived and which alter the Premises, such as golf courses and athletic fields, are prohibited.

10. Nothing shall be construed to convey a right to the public of access to or use of the Premises except as stated in this Deed of Easement or as otherwise provided by law.

11. Nothing shall impose upon the Grantor any duty to maintain the Premises in any particular state, or condition, except as provided for in this Deed of Easement.

MLC

12. Nothing in this Deed of Easement shall be deemed to restrict the right of Grantor to maintain all roads and trails existing upon the Premises as of the date of this Deed of Easement. Grantor shall be permitted to construct, improve or reconstruct any roadway necessary to service crops, bogs, agricultural buildings, or reservoirs as may be necessary.

13. At the time of this conveyance, Grantor has zero existing single family residential buildings on the Premises and zero residential buildings used for agricultural labor purposes. Grantor may use, maintain, and improve existing buildings on the Premises for agricultural, residential and recreational uses subject to the following conditions:

- i. Improvements to agricultural buildings shall be consistent with agricultural uses;
- ii. Improvements to residential buildings shall be consistent with agricultural or single and extended family residential uses. Improvements to residential buildings for the purpose of housing agricultural labor are permitted only if the housed agricultural labor is employed on the Premises; and
- iii. Improvements to recreational buildings shall be consistent with agricultural or recreational uses.

14. Grantor may construct any new buildings for agricultural purposes. The construction of any new buildings for residential use, regardless of its purpose, shall be prohibited except as follows:

- i. To provide structures for housing of agricultural labor employed on the Premises but only with the approval of the Committee. If the Committee grants approval for the construction of agricultural labor housing, such housing shall not be used as a residence for Grantor, Grantor's spouse, Grantor's parents, Grantor's lineal descendants, adopted or natural, Grantor's spouse's parents, Grantor's spouse's lineal descendants, adopted or natural; and
- ii. To construct a single family residential building anywhere on the Premises in order to replace any single family residential building in existence at the time of conveyance of this Deed of Easement but only with the approval of the Committee.
- iii. No residual dwelling site opportunities have been allocated pursuant to the provisions of N.J.A.C. 2:76-6.17. No residential buildings are permitted on the Premises except as provided in this Deed of Easement.

For the purpose of this Deed of Easement:

"Residual dwelling site opportunity" means the potential to construct a residential unit and other appurtenant structures on the Premises in accordance with N.J.A.C. 2:76-6.17.

15. The land and its buildings which are affected may be sold collectively or individually for continued agricultural use as defined in Section 2 of this Deed of Easement. However, no division of the land shall be permitted without the approval in writing of the Grantee. In order for the Grantor to receive approval, the Grantee must find that the division shall be for an agricultural purpose and result in agriculturally viable parcels. Division means any division of the Premises, for any purpose, subsequent to the effective date of this Deed of Easement.

- i. For purposes of this Deed of Easement, "Agriculturally viable parcel" means that each parcel is capable of sustaining a variety of agricultural operations that yield a reasonable economic return under normal conditions, solely from each parcel's agricultural output.

mc

16. In the event of any violation of the terms and conditions of this Deed of Easement, Grantee may institute, in the name of the State of New Jersey, any proceedings to enforce these terms and conditions including the institution of suit to enjoin such violations and to require restoration of the Premises to its prior condition. Grantee does not waive or forfeit the right to take any other legal action necessary to insure compliance with the terms, conditions, and purpose of this Deed of Easement by a prior failure to act.

17. This Deed of Easement imposes no obligation or restriction on the Grantor's use of the Premises except as specifically set forth in this Deed of Easement.

18. This Deed of Easement is binding upon the Grantor, the Grantor's heirs, executors, administrators, personal or legal representatives, successors and assigns and the Grantee; it shall be construed as a restriction running with the land and shall be binding upon any person to whom title to the Premises is transferred as well as upon the heirs, executors, administrators, personal or legal representatives, successors, and assigns of all such persons.

19. Throughout this Deed of Easement, the singular shall include the plural, and the masculine shall include the feminine, unless the text indicates otherwise.

20. The word 'Grantor' shall mean any and all persons who lawfully succeed to the rights and responsibilities of the Grantor, including but not limited to the Grantor's heirs, executors, administrators, personal or legal representatives, successors and assigns.

21. Wherever in this Deed of Easement any party shall be designated or referred to by name or general reference, such designation shall have the same effect as if the words, 'heirs, executors, administrators, personal or legal representatives, successors and assigns' have been inserted after each and every designation.

22. Grantor, Grantor's heirs, executors, administrators, personal or legal representatives, successors and assigns further transfers and conveys to Grantee all of the nonagricultural development rights and development credits appurtenant to the lands and Premises described herein. Nothing contained herein shall preclude the conveyance or retention of said rights by the Grantee as may be permitted by the laws of the State of New Jersey in the future.

23. Grantor shall pay the Committee 50 percent of that portion of the net proceeds, representing the value of the land only (and not the value of the improvements), of a condemnation award or other disposition of the Premises following termination of this Deed of Easement, as permitted pursuant to N.J.S.A. 4:1C-11 et seq., P.L. 1983, c.32.

24. Grantor agrees not to sell, lease, exchange or donate the lands unless:

- (a) The lands will continue to be maintained for agricultural use and production pursuant to this Deed of Easement and N.J.A.C. 2:76-6.15;
- (b) The Committee is notified that the restricted farm is being offered for sale, exchange or donation; and
- (c) The Committee approves the transfer in writing prior to the nonprofit's offering, for sale or conveyance, of any of its interest in the land.

25. In the event Grantor sells or donates any interest in the Premises, Grantor shall pay to the Committee 50 percent of the net proceeds. For purposes of this provision, "net proceeds" shall be calculated by subtracting the difference between the original purchase price and the value on which the Committee's cost-share grant was based from the gross proceeds.

26. Any proceeds received by Grantor from a sale of the Premises shall be dedicated for farmland preservation purposes. The Committee's 50 percent share of any such proceeds, calculated pursuant to Paragraph 25 of this Deed of Easement, shall be deposited in the Garden State Farmland Preservation Trust Fund to be used for the purposes of that fund.

MLC

26. The Grantor signs this Deed of Easement as of the date of the top of the first page. If the Grantor is a corporation, this Deed of Easement is signed and attested to by its proper corporate officers, and its corporate seal, if any, is affixed.

Vision

The Foodshed Alliance Sustainable Agriculture Enterprise is a place where farmers who practice resilient agriculture can access land to expand, diversify, and teach about their farming methods, where people can learn about the source of food and the benefits of healthy food, where people can experience a unique natural landscape, and where a diverse natural world can thrive.

Location

290 Route 206 South, Newton, NJ 07860

Foodshed Alliance Sustainable Agriculture Enterprise (SAGE)

Background

The Nature Conservancy – New Jersey Chapter (TNC) is transferring ownership in a cooperative partnership with Ridge and Valley Conservancy (RVC) and the Foodshed Alliance of the deed-restricted property known as Valley View Farm, located in Andover and Fredon Townships, Sussex County, between State Route 206 and County Route 519. The farm consists of 333 acres of agricultural fields and forest, and hosts several limestone sinkhole ponds. TNC has decided that it no longer wishes to own the property, but would like to see it owned by an organization that shares TNC values and that will advance sustainable farming on the property. The property also contains hiking trails and sensitive environmental features, which TNC would like to see protected in perpetuity.

The Foodshed Alliance and RVC are currently in the process of assuming ownership of the site. Once the property is transferred, Ridge and Valley Conservancy and the Foodshed Alliance will jointly manage the property. Ridge and Valley Conservancy will manage the parts of the property that have conservation value and maintain the trail system. The Foodshed Alliance will manage the farmland and oversee leases to sustainable farm businesses.

The Foodshed Alliance and RVC formed a Farm Committee to evaluate possible uses of the property, define sustainable agricultural practices that would be carried out on the farm, identify suitable farmers to lease the land, and develop a plan to allow for access for the public to learn about sustainable farming methods practiced on the property and use hiking trails.

The Foodshed Alliance Sustainable Agriculture Enterprise evolves out of the Regional Foodshed Resiliency Plan for the northern New Jersey published by the Foodshed Alliance in 2015, which identified major challenges to our regional food system and farming sector. (<http://foodshedalliance.org/downloads>). This project addresses the challenge of accessing affordable farmland by helping sustainable farmers gain long-term access to productive, preserved farmland within reach of viable markets.

The property has 60 tillable acres, a functioning well and 5,000-foot frontage on Route 206. Through this project, the Foodshed Alliance plans to lease individual plots (up to 10 acres each) to sustainable farm businesses at affordable rates. Leases will begin for the 2019 growing season.

Initial leases signed during the period while the land is being transferred from TNC to RVC and the Foodshed Alliance will be for two years, or until the land transfer is completed, whichever comes first. New leases will then be issued for a period of at least 10 years.

Foodshed Alliance Sustainable Agriculture Enterprise (SAGE)

Requirements for Sustainable Farm Businesses

The Foodshed Alliance Sustainable Agriculture Enterprise is available to farmers who can demonstrate solid farming experience and marketing and business plans.

Ideal candidates should have:

- 2+ years commercial farm management experience
- 3+ years commercial farming experience
- Detailed Farm Management Plan
- Detailed business/marketing plan
- A commitment to sustainable agricultural practices

We are recruiting farmers in the following categories, as appropriate to the land available: diversified vegetable, fruit, flowers, herbs, layer hen, poultry (meat), swine, goat, orchards and woodland products.

Sustainable Agriculture Practices and Environmental Stewardship

In keeping with the Foodshed Alliance's mission of protecting our rural environment, we will recruit farmers who are dedicated to regenerative agriculture through the use of sustainable, organic and/or biodynamic methods.

We encourage organic and humane certification for all relevant agricultural practices taking place. However, organic certification is not required as long as National Organic Program (NOP) guidelines are used. For specifics, please see Land Use Protocols on page 10.

We encourage participating farmers to prepare and file a conservation plan with the Natural Resources Conservation Service. We also encourage participating farmers to apply for certification through the River Friendly Farms initiative, managed by North Jersey RC&D and the Foodshed Alliance, to protect waterways.

Partnership with Foodshed Alliance

We envision working in partnership with the farmers in this program, providing ongoing technical assistance and facilitating synergistic and cooperative relationships with all farmers on the land. In addition, we will facilitate opportunities for the general public to learn about the source of food. Our role is also to oversee farmer compliance with the Farm Management Plan.

Farm Management Plan

Each applicant must submit a Farm Management Plan to be approved by the Foodshed Alliance. The plan will outline the farming approach proposed, timing, and needs, and designate what contingencies will be followed to adjust to unforeseen conditions. The plan should address the following:

FARM OPERATION: A description of intended crop or livestock production, including how they relate to the program's Sustainable Agricultural Guidelines.

LABOR: The maximum number of farm laborers that will be employed seasonally.

Foodshed Alliance Sustainable Agriculture Enterprise (SAGE)

TEMPORARY INFRASTRUCTURE: What structures are proposed, needed or anticipated. All structures must be approved, including design, materials and locations. Structures must be kept in viable condition. All structures and materials must be removed upon departure of participant unless approved to leave on site by Foodshed Alliance.

STORAGE AND MAINTENANCE OF EQUIPMENT: How equipment will be stored areas. Abandoned equipment must be removed. No equipment can compromise the sustainable farming guidelines (no leaking fuel, fluids, etc.).

WEED CONTROL: How weeds will be controlled. Farmers must incorporate control of noxious and invasive weeds into their farm management plan and carry out approved practices.

PEST MANAGEMENT: Identify the means by which they plan controlling pests that jeopardize their operation. Solutions shall comport with the sustainable farming tenets outline above, be humane, and shall not impinge on the operations of other farmers.

FERTILITY/COMPOSTING: Any plans for fertilizing and on-site composting should be outlined in the plan. All fertilizer should be approved for organic usage. If there is a need for composting off production fields, the plan should identify this need, as the Foodshed Alliance may make compost areas available to the farmer. Any composting must be in compliance with local ordinances and state statutes.

LIVESTOCK: If raising of livestock is proposed, the farmer must define how animals will be secured and well-tended, demonstrate that the carrying capacity of the land proposed to be used will not be exceeded, and how slaughtering or marketing of animals will be addressed, if this is planned.

EVENTS: Holding of events is regulated under the farmland preservation easement held by the State Agricultural Development Committee. Only events approved by the Foodshed Alliance can be held. These generally would consist of educational events or events to promote the overall farm project.

MARKETING: The farmer shall address any plans for marketing on the farm, including space needs, seasonal needs, etc.

Other Requirements

BUSINESS/MARKETING PLAN: Share your roadmap to profitability and growth as the foundation of your business, describing your goals, strengths, weaknesses, opportunities, including your plans for selling your products.

Program Description and Standards

APPLICATION PROCESS: For the 2019 growing season, a minimum of 3 to 4 farmers will be selected for leasing plots of tillable land. Applications will be evaluated on a case-by-case basis, in terms of whether their comfort with the mission of the Farm and the sustainable farming practices, outlined above. Whether Farm Management Plans are mutually supportive will be a factor in evaluating applicants.

PLOT CONFIGURATION AND ACREAGE: Acreage and configuration of each plot depends on the scale of farming undertaken and which areas are appropriate to these needs. The amount of acreage needed for the proposed farm operation will be determined by the farm management plan submitted during the application process. Tillable fields will be allocated to individual farm operations based on suitability to the proposed use, spatial considerations, and relationship to other needs (irrigation, marketing, etc.) Farm lanes will be considered to be part of individual farm fields and managed as part of the farm operation.

FARM MANAGEMENT PLAN: Farmers will have the right to carry out an approved Farm Management Plan. The plan will be reviewed at the end of each season. Farmers have the right to seek to modify plans, and carry out changes after Foodshed Alliance approval.

ACCESS TO WATER: A limited number of interconnections to the two irrigation wells on site will be available. Farmers that have need for water and approval through their management plan have the right to connect to irrigation sources. Irrigation delivery systems shall not interfere with other infrastructure, access to water by other farmers, or be wasteful. All irrigation infrastructure shall be removed at the end of the lease period, unless other arrangements are made. Water-use will be based on a conservation-based irrigation plan, availability of water from source, and viability of delivery system. Costs will be set at the outset of the lease.

ACCESS TO ELECTRICITY: Farmers have the right to arrange for the delivery of electric power to the site, and to share in any solar power-sharing arrangement that might be established for the program. Farmers will be responsible for metering and delivery system; system must be approved by landowner and have all necessary zoning approvals.

FENCING: Farmers have the right to erect fencing to keep deer and the public off of areas of production. Fencing must be secure and well maintained but must not block any public access areas. Electric fences must be labeled as such to provide a warning to public. Fencing plans must be approved by the Foodshed Alliance.

IMPROVEMENTS: Any improvements the farmers wish to make, such as hoop houses, pole barns, farm stands, etc., will be made at the farmers' own expense, within easement restrictions, and with the approval of the Foodshed Alliance.

SIGNS: Farmers have the right to erect signs identifying their operation or marketing their products, so long as the signs do not interfere with the operations of other farmers or restrict public access, and are approved by the Foodshed Alliance.

Foodshed Alliance Sustainable Agriculture Enterprise (SAGE)

MARKETING ON-FARM: Farmers have the right to incorporate an on-farm marketing strategy in their management plans, and to carry out those plans once approved. Final approval shall be based on any required local zoning approval of marketing structures, ingress and egress, hours of operation, etc. Farmers may form independent cooperatives for marketing purposes.

SOLID WASTE: The Foodshed Alliance will provide a centralized location for disposal of solid waste and recycling. Guidelines relative to the type of waste and volume will be incorporated into individual leases.

SANITARY FACILITIES: The Foodshed Alliance will provide centralized toilet facilities on the property.

PUBLIC ACCESS AND TRAILS: The public will have access to hiking trails which will be maintained by the Ridge and Valley Conservancy. The location of trails and trail regulations will be made known to farmers, who have the right to prevent users from accessing non-trail areas used in farm operations.

LANDOWNER INCENTIVE PROGRAMS: The Foodshed Alliance will cooperate with farmers who wish to pursue available landowner incentive programs that benefit the farm operation. The potential for any cost-sharing will be evaluated on a case-by-case basis.

COMPLIANCE TO FARM MANAGEMENT PLAN: The Foodshed Alliance will monitor compliance with your Farm Management Plan. Farmers who do not comply with their Plan and the land use protocols of this program will be asked to leave the program at the end of the growing season.

LEASE RENEWAL: Farmers have the right to renew their lease, should they be in compliance with an approved farm management plan and in good standing with respect to all other requirements.

Land Use Protocols

SEEDS: Farmers may choose to purchase conventionally produced seeds but may not use treated seed. If a farmer does choose to not purchase certified-organic seed, he or she may NOT use genetically modified/engineered seed (aka GM or GE), nor seed that has been treated with a non-approved chemical seed treatment.

COVER CROPS AND ROTATION: Farmers must cover crop and rotate crops once they acquire land as a standard practice to maintain soil tilth and health. Cover cropping includes spring-planted varieties (e.g. oats and field peas, clover), summer varieties (buckwheat or sorghum-sudan grass), and fall-planted varieties (oats, winter rye and hairy vetch). Cover crop types and varieties should be chosen according to specific goals of the farmer (building organic matter, fixing nitrogen, suppressing weeds, etc.) Cover crop varieties planned should be included in the submitted Farm Management Plan.

Farmers must lease enough land for proper crop rotation. We recommend for all non-perennial farmers an equal number of acres in cover crops as in cash crops. A minimum of 2/3 tillable acreage in cash crop and 1/3 tillable acreage in cover crop is required. A winter cover crop on all parcels is required whenever possible. Lease agreements will be the same for cash crop and cover crop parcels.

Perennial crop farms do not need to maintain this ratio of cover crop to cropped land. However, farmers must rotate perennials when feasible.

Any farmer(s) that require an exemption from these protocols must request the exemption in writing.

FERTILIZER/COMPOST APPLICATION: Proper soil management is the responsibility of each farm. All materials applied to fields must meet the standards set by the NOP. A nutrient management plan in accordance with the Natural Resources Conservation Service and the Warren County Soil Conservation District must be written before raw or composted animal manure may be imported onto the site.

WEED MANAGEMENT: Preventing weeds from reseeding and regenerating is essential to sustainable farm management. Acceptable means of controlling weeds are as follows: mulching, mowing, hoeing, cultivating and torching with flame weeders. Farmers may not use chemical substances to control weeds unless approved for organic use by the NOP.

Farmers are responsible for making regular field inspections for weed growth. Fields, field edges and road sides are required to be regularly maintained.

INSECT MANAGEMENT requires attracting and encouraging beneficial insect populations as a means to balance populations of insect pests. Farmers are required to understand current organic methods of control, including crop rotation, row cover and screens, biocontrols, and approved products. They should be versed in monitoring techniques such as scouting and trapping. Synthetic pesticides that are not approved by NOP standards are not allowed. Farmers must keep records of all pest controls in a log from year to year. This log is subject to inspection by Foodshed Alliance staff and may be requested for annual reporting.

DISEASE MANAGEMENT: The Sustainable Agriculture Enterprise does not allow the use of non-NOP approved synthetic chemicals, fungicides, or bactericides. Acceptable controls

Foodshed Alliance Sustainable Agriculture Enterprise (SAGE)

include: crop rotation, promotion of air flow, diseased plant removal and disposal, tool sanitation, restriction of foot traffic, cleanliness of clothing, boots, and gloves, straw mulch, black plastic mulch use, drip irrigation, and NOP-approved organic fungicides and biocontrols. Farmers need to be familiar with plant diseases and be able to identify them when they appear. Enterprise farmers must keep records of disease infections and controls to include in annual reports.

CRITTERS: Enterprise farmers are responsible for their own deer fencing and other systems to keep unwanted wildlife out of their fields. Possible wildlife includes deer, rabbits, voles, mice, raccoons, and groundhogs.

IRRIGATION: See section on Irrigation in previous section "Program Description and Standards." All farmers are expected to be courteous with their irrigation usage, and stay to the cooperative schedule unless approved otherwise by the Foodshed Alliance.

END OF YEAR REPORTS: Farmers are required to submit an end-of-year report each year. End of year reports are due by December 1 each year. Starting in Year 2 and after, the End of Year Reports should also include a copy of the previous year's Schedule F tax return. For example, with the December 2020 report, the farmer's 2019 Schedule F should be included.

EMPLOYEES: Farmers may hire employees. Employees must be properly registered and paid according to all local, state, and federal labor regulations. It is the responsibility of the farmer to be aware of all relevant labor regulations, including payroll taxation, workers compensation, child labor, and minimum wage. Farmers are expected to provide their employees with adequate time for water, bathroom, and lunch breaks, as well as to provide adequate training on food safety measures, tool safety techniques, and other relevant matters.
