

How COVID-19 Affected Me
By Alex Ponce-Reyes

COVID affected me because I couldn't physically go to school, and it was my first year in middle school. We had to go to school online, and that is really hard for me. It's really hard to learn and how to do stuff on the computer. Also, I don't get to go outside cause of COVID or go to the store without a mask. We need to wear masks since it is safer. It also affects me by always having to stay at the house and only go outside if necessary. We can't go to the park or the movies anymore since most of those places are closed. The worst part of all is that you have to social distance which means you can't see your friends or go somewhere far to see your family, and that you can't travel. This is how COVID-19 has affected my everyday life.
