om our P&I)

"basic"

...are necessary in the daily lives of individual consumers.

Metal masks for OLED display manufacturing

Battery pouches for lithium-ion batteries

Optical films used for displays

Photo printing dye-sublimation thermal transfer printing media

DNP products and services
with top global share

Business areas

Since our founding in 1876, we have expanded our business domains by leveraging our strengths in printing and information (P&I) and have entered into new business areas including the environment, energy and life sciences.

Information Communication

We are developing a wide range of businesses to realize communication that allows people to effect change in the midst of diversifying information media.

Lifestyle and Industrial Supplies

We are striving to realize a sustainable society throughout the product life cycle by providing many products that are indispensable for people's comfortable lives and corporate business processes.

Electronics

We have been providing value-added products for more than half a century, while responding to the evolution of information equipment and leveraging cutting-edge technology cultivated in printing.

Beverages (Japanese production only)

The Hokkaido Coca-Cola Bottling Company operates a beverage business in the Hokkaido region of Japan.
