

Disclaimer

These minutes reflect the actions taken by the Commission during its February 12, 2021 meeting. Although these minutes have been approved by the Commission, no action authorized by the Commission during this meeting, as reflected in these minutes, shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of these minutes has been delivered to the Governor for review, unless prior to expiration of the review period the governor approves same, in which case the action shall become effective upon such approval. These minutes were delivered to the Governor on February 23, 2021.

PINELANDS COMMISSION MEETING

MINUTES

February 12, 2021

The February 12, 2021 Pinelands Commission meeting was conducted remotely. All participants were present via Zoom conference and the meeting was livestreamed through YouTube: <https://www.youtube.com/watch?v=-vSCLkRrQuo>

Commissioners Participating in the Meeting

Alan W. Avery Jr., Shannon Higginbotham, Jerome H. Irick, Ed Lloyd, Mark Lohbauer, William Pikolycky, Gary Quinn and Chairman Richard Prickett. Also participating were Executive Director Nancy Wittenberg and Deputy Attorney General (DAG) Kristina Miles and Governor's Authorities Unit representative Rudy Rodas.

Commissioners Absent

Daniel Christy, Jordan P. Howell, Jane Jannarone and D'Arcy Rohan Green.

Call to Order

Chairman Prickett called the meeting to order at 9:32 a.m.

DAG Miles read the Open Public Meetings Act Statement (OPMA).

Executive Director Wittenberg called the roll and announced the presence of a quorum.

The Commission pledged allegiance to the Flag.

Minutes

Chairman Prickett presented the minutes from the Commission's January 8, 2021 meeting. Commissioner Pikolycky moved the adoption of the minutes. Commissioner Lohbauer seconded the motion.

The minutes from the January 8, 2021 Commission meeting were adopted by a vote of 8 to 0.

Honoring Commissioner Sean W. Earlen

Commissioner Avery made a motion Expressing the Commission's Appreciation to Sean W. Earlen for his Service as a Member of the Commission From July 27, 2011 to December 12, 2020 (See Resolution # PC4-21-03). Commissioner Lloyd seconded the motion.

Chairman Prickett read the resolution aloud. Commissioners in attendance thanked Commissioner Earlen for his service, for establishing the Land Use, Climate Impacts and Sustainability Committee, leading the Commission through many tough meetings and for the countless hours he committed to the Commission.

ED Wittenberg said Commissioner Earlen was a good Commissioner and Chairman. She said he was both reliable and smart.

Committee Reports

Chairman Prickett provided an update on the January 29, 2021 Policy and Implementation (P&I) Committee meeting:

The Committee adopted the minutes of its October 30, 2020 meeting.

The Committee recommended that the full Commission certify the following two ordinances:

- Medford Township Ordinances 2020-21 and 2020-23, adopting a Redevelopment Plan for the Taunton and Tuckerton Rehabilitation Area and rezoning two lots from the CC (Community Commercial) Zone in the Regional Growth Area to the RS-2 (Rural Suburban) Zone in the Rural Development Area
- Monroe Township Ordinances O:27-2020 and O:29-2020, adopting an amendment to the Williamstown Square Redevelopment Plan and a new redevelopment plan for the St. Mary's Redevelopment Area

The Committee received an update on the draft Comprehensive Management Plan (CMP) amendments for stormwater management. These complex amendments will be presented at the Committee's February 26, 2021 meeting. The Pinelands municipalities have all been advised that the March 2, 2021 obligation to meet the New Jersey Department of

Environmental Protection's deadline to adopt an implementing ordinance for its new stormwater rules applies only to the non-Pinelands area.

The Committee received a presentation on those activities that are exempt from application to the Commission and requested further discussion.

The Committee recommended the full Commission adopt the resolution celebrating the 40th Anniversary of the Pinelands CMP.

Commissioner Lohbauer provided an update on the January 20, 2021 Land Use, Climate Impacts & Sustainability (LUCIS) Committee meeting:

The minutes of the October 30, 2020 meeting were adopted.

Staff then presented information on several subjects that were each followed by discussion by the Committee:

Staff gave an update on solar energy facility development in the Pinelands Area. It was noted that the NJ Board of Public Utilities (BPU) Community Solar Pilot Program is underway and includes projects planned for the Pinelands. Staff will develop draft amendments to the CMP for the consideration of the Committee on this issue.

Staff also updated the Committee on the NJDEP's NJ Protecting Against Climate Threats (PACT) regulatory reform program.

Staff demonstrated the NJ Flood Mapper Total Water Level tool, which is an interactive map available to the public online at www.njfloodmapper.org. The tool shows the possible impact of flooding to an area in the state utilizing data from the National Weather Service, the National Oceanic and Atmospheric Administration, and the Federal Emergency Management Agency.

Staff staff also provided an update of pending legislation in the Statehouse that has bearing on the work of the Committee, including:

- S2607 and A2785 passed both the Senate and the Assembly in December and when signed into law will require that all Municipal Master Plans include a climate change vulnerability assessment;
- S2605 and companion bill A4554, which directs the NJ BPU to develop utility-scale solar energy plants coupled with utility-scale battery storage, to be incentivized by the Preserve NJ Fund.
- S3184 and companion bill A2421 which would provide a corporation business tax credit and a personal income tax deduction for the cost of installation of Electric Vehicle charging stations, and

- S3091 and companion bill A4933 which require builders to offer unit concrete products that utilize Carbon footprint-reducing technology as an option in new construction; establishes tax incentives, and State and local purchasing requirements, for unit concrete products that utilize Carbon footprint-reducing technology.

It was noted that the Committee Chairman supplied the Committee members with a copy of a letter sent by a group of climate scientists to President Biden urging his support of proforestation as a carbon mitigation technique and recommending that the Committee examine proforestation as well. The Committee Chairman also suggested the possibility of changing the name of the Committee.

Chairman Prickett said he would like discuss the possibility of re-instating the Agricultural Committee as a subcommittee of the P&I or LUCIS Committees.

Executive Director's Report

ED Wittenberg provided information on the following items:

- The Commission will begin the process to fill a number of vacant positions stemming from employees that have either retired or left.
- Staff has been very busy during the last month, working on the Kirkwood-Cohansey rules and draft stormwater amendments.
- Staff prepared a number of letters for solar energy facilities in the Pinelands Area. The letters address whether a proposed facility is consistent with Pinelands land use priorities and are a requirement for submitting an application to the New Jersey Board of Public Utilities Community Solar Energy Pilot Program.

Chuck Horner, Director of Regulatory Programs, provided information on the following regulatory matters:

- Staff worked closely with Winslow Township officials regarding a six-acre parking lot expansion at an existing large warehouse. Staff recently issued a letter permitting the final site plan approval issued by the Winslow Township Planning Board to take effect.
- There continues to be great public interest in the change of use application for the Atco Raceway. The Commission issued a Certificate of Filing in November of 2020 and the application is now before the Waterford Land Use Board.
- Staff has been working with Galloway Township to resolve a commercial violation and attended a municipal court hearing on the matter. The applicant was advised to apply to the Township and the Commission.
- A Woodland Township resident filed legal action against the municipality for a procedural defect in the Township's process for a proposed communication tower at the Fire and EMS station. The Commission issued a Certificate of Filing for the tower but a hearing was scheduled because of a permitted use issue. The applicant will be seeking a new approval from the planning board.

Director Horner shared a recent situation where a staff member had to review an old file that only exists on paper and not in a digital format. He said staff has maintained very good records for development applications dating back to 1980.

Planning Director Susan R. Grogan added that sometimes a town will call the Planning Office looking for one of its own old master plans or ordinances and staff is almost always able to assist. She said the Commission's records are extensive and well kept.

Director Grogan provided an update on the following Planning matters:

- Staff has made great progress on the draft stormwater amendments, which will be shared with the P&I Committee later this month.
- The Commission is working on a potential partnership with the U.S. Geological Survey (USGS) for the modeling review process associated with implementation of the Kirkwood-Cohansey rules.
- As ED Wittenberg briefly mentioned, the Commission staff issued about 10 to 12 letters to consultants and developers applying for the second round of the Community Solar Energy Pilot Program. Some of the solar projects were proposed on landfills, two were for floating solar arrays and some were on sites where staff was previously unaware of any interest or application.
- At this time, there is no news on the national designation of the Pine Barrens Byway.

Stacey Roth, Chief of Legal and Legislative Affairs, said she recently responded to an inquiry from Congressman Van Drew's office.

Paul Leakan, Communications Officer, said the CMP turned 40 on January 14th and since then staff have been sharing the specially curated messaging campaign on all its social media outlets. Most recently the Commission highlighted each Pinelands Management Area including many photos and shared more than 150 photos of sites located within those management areas. He said the posts have helped to educate the public about the purpose and importance of the management areas. He said upcoming, daily posts will focus on plant and animal species that benefit from Pinelands protection. The Commission's staff will compose and share future posts about the work of the Regulatory Programs, Planning, Science and the Communications offices. The Commission's social media sites are thriving as a result of these popular, daily postings, which have been reaching almost 30,000 people during the past 28 days.

Public Development Projects and Other Permit Matters

Chairman Prickett presented a resolution recommending approval of a Waiver of Strict Compliance for the development of a single family dwelling in Lacey Township.

Commissioner Lloyd made a motion Approving With Conditions an Application for a Waiver of Strict Compliance (Application Number 2019-0143.001) (See Resolution # PC4-21-04). Commissioner Lohbauer seconded the motion.

Director Horner said the waiver is necessary because the parcel is slightly under a one-acre parcel. He said the lot is located in a Pinelands Village and will be served by an on-site septic system.

The Commission adopted the resolution by a vote of 8 to 0.

Planning Matters

Chairman Prickett presented the Medford Township Ordinances and Redevelopment Plan.

Commissioner Lloyd made a motion Issuing an Order to Certify Medford Township Ordinance 2020-21, Adopting the Redevelopment Plan for the Taunton & Tuckerton Rehabilitation Area, and Ordinance 2020-23, Amending the Redevelopment Plan for the Taunton & Tuckerton Rehabilitation Area (See Resolution # PC4-21-05). Commissioner Pikolycky seconded the motion.

Director Grogan noted that the Ordinances and Redevelopment Plan were discussed at length at the P&I Committee meeting, where Medford Township's consulting planner joined the conversation and provided additional information as to Medford's intentions. She said the area is commercially zoned and in a Pinelands Regional Growth Area. She noted that two residentially developed lots are being rezoned from a Regional Growth Area to a Rural Development Area, and it is an appropriate management area designation change.

The Commission adopted the resolution by a vote of 8 to 0.

Chairman Prickett presented the Monroe Township Ordinance and Redevelopment Plan.

Commissioner Avery made a motion Issuing an Order to Certify Monroe Township Ordinance O:27-2020, Adopting the Second Amendment to the Williamstown Square Redevelopment Plan, and Ordinance O:29-2020, Adopting the St. Mary's Redevelopment Plan (See Resolution # PC4-21-06). Commissioner Lohbauer seconded the motion.

Director Grogan said the Redevelopment Plans are in response to the township's affordable housing settlement agreement with the Fair Share Housing Center. She said the St. Mary's Redevelopment Plan situated along the Black Horse Pike will allow for 100% age-restricted affordable housing. She said there will be about 75-80 apartment units in one or more buildings, and that equates to a density of about 20-units per acre. She said the Williamstown Square Redevelopment Plan is an amendment to a redevelopment plan the Commission has previously approved. The Township plans to adjust some of the permitted uses in the redevelopment area, adding assisted living facilities. Additionally, there will be an increase in the minimum number of units required. Maximum permitted density has also increased. She said because the St. Mary's Redevelopment Plan is limited to 100% affordable housing, the Township has chosen to transfer the Pinelands Development Credit obligation that would normally apply in the St. Mary's area to the Williamstown Square Redevelopment Area.

Commissioner Irick asked if the overall density of Monroe Township has changed as a result of the Redevelopment Areas.

Director Grogan said there has been an increase in density, but noted that the CMP permits municipalities to increase density in Regional Growth Areas as long as certain standards are met.

Commissioner Irick requested that redevelopment be discussed in general at a future P&I Committee meeting.

Chairman Prickett said redevelopment can be added to a future P&I Committee meeting agenda.

The Commission adopted the resolution by a vote of 8 to 0.

Public Comment on Public Development Applications and Items where the record is open

Chairman Prickett read the list of Public Development Applications. No one provided comment on the applications.

Ordinances Not Requiring Commission Action

Chairman Prickett read the list of ordinances not requiring Commission action.

- Hamilton Township Ordinance 1940-2020
- Stafford Township Ordinances 2020-38, 2020-39, 2020-40 & 2020-41

No questions were raised.

Other Resolutions

Chairman Prickett presented the resolution recognizing the 40th Anniversary of the Comprehensive Management Plan.

Commissioner Lohbauer made a motion Celebrating the 40th Anniversary of the Pinelands Comprehensive Management Plan (See Resolution # PC4-21-07). Commissioner Lloyd seconded the motion.

Communications Officer Leakan said this resolution helps to raise awareness of the Pinelands, marks this important milestone and recognizes everyone who has been involved in the success of the CMP.

Commissioner Lohbauer and Chairman Prickett both noted how they wish Commissioner Ashmun could be here so she could reflect on the last 40 years.

The Commission adopted the resolution by a vote of 8 to 0.

General Public Comment

Rhyan Grech of the Pinelands Preservation Alliance (PPA) said there must be accountability for the six Inadvertent Returns (IRs) that occurred in the Pinelands Area during the construction of the SRL pipeline. She said more than 1,300 gallons of drilling sludge was released into Pinelands wetlands and forests. She said the CMP requires the protection of water, wetlands, plants and wildlife. She said the 2017 Executive Director's Report made certain assurances that horizontal directional drilling (HDD) would not damage the wetlands, even though Ms. Grech asserted that HDD has an industry failure rate of 50%. She said there should be a full investigation as to the cause and impacts of the IR incidents and the Commission should work with the NJDEP on the matter.

Patricia Caruso of Upper Freehold Township thanked the Commissioners who voted against the SRL pipeline. She said it's disturbing and disappointing that New Jersey Natural Gas allowed numerous spills to occur without consequences. She said it's also disturbing and disappointing that the Executive Director withheld information about the spills. She raised concerns about NJNG's ability to properly install the pipeline. She spoke about her neighbor's house being condemned and she said she hopes that some of the vacant seats on the Commission can be filled.

Written comments were received from a member of the public after the meeting and are attached to these minutes.

Chairman Prickett suggested HDD be discussed at a future P&I Committee meeting. He noted that Commissioner Avery was curious about the source of the HDD failure rate and some other Commissioners had questions.

Commissioner Irick said he attended the IR site visit and it appeared that the site had been restored, however there is no way to know what has happened underground. He asked if the Commission has the authority to request an underground study of one of the IR sites.

DAG Miles said that she could provide advice but the Commission would have to retire into closed session, and because there is barely a quorum at today's meeting, it might be better to wait.

Commissioner Lohbauer said he would like guidance on Ms. Grech's suggestion of partnering with the NJDEP on providing monitoring data of the IR sites.

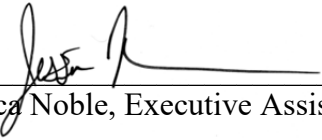

Members of the Commission agreed to wait for attorney-client guidance at a future Commission meeting.

Commissioner Irick suggested that when Commissioners leave the Commission, they should be provided with a plaque in addition to a resolution. He would like to discuss that topic further.

Adjournment

Commissioner Lohbauer moved to adjourn the meeting. Commissioner Irick seconded the motion. The Commission agreed to adjourn at 11:17 a.m.

To: Info, PC <info@pinelands.nj.gov>

Subject: [EXTERNAL] Public Comment was not available during 12 Feb. mtg.

Good morning,

I tried multiple times this morning to call into the meeting today for public comment. I was put into a waiting room, and it was not possible to get through. I would like to encourage the Commission to make sure that it is possible to call into the meeting. I would like to voice my concern for the public record and I include my statement below:

"I'm calling to express my alarm that fracked gas and unsound pipeline practices have been invited into the Pinelands, an environmentally sensitive region, under your watch. I am alarmed by the lack of transparency. On the Commission website, there is no information about the multitude of spills, about any environmental impact report or plan to report on the impact of 8 accidents. These forewarned accidents spilled over 1300 gallons of drilling sludge into the region that you are charged to protect, our Freshwater Wetlands, which are under extreme pressure on account of loss of habitat in our state. Our state suffers from an abundance of superfund sites, including a remediated one at Fort Dix. This area has repeatedly suffered from negative environmental intervention on our watch. As Commissioner Prickett has said there are a lot of "teeny species" and these are under your charge. How deeply sloppy and alarming is this timeline of spills: on Feb 4, Feb 7, Feb 8 of 2019. What impact does this have on overwintering animals in the wetlands? The significant damage done to our streams. It's a case study of dereliction of duty, industrial negligence, and an incredible ignorance among the Commission about the national impacts of HDD. How has there been no accountability??

Thank you, Commissioner Lohbauer, for your thorough review of sustainable and carbon-reducing initiatives that will be considered to move the state and the Pinelands towards carbon neutrality and climate protection— of high concern for the mid Atlantic states. It is alarming, however, that the spills was not addressed in your reports. I ask the Commission to include more information on its public page, to hold NJNG accountable - truly accountable, to map where these spills occurred, to post the Inadvertent Return Response Plan. For those of us who have read, visited, suffered the harms of water contamination, land contamination, and the real injury that stems from toxins infiltrating water systems— this has been devastating news. You are all charged with stewardship of one of the most precious regions in NJ, in the country. Please do better, please hold NJNG accountable. Spills must be unacceptable, which means that this project should have never passed through the Pinelands in the first place. It is equally devastating to hear the Commission say that they need to review pipeline practices because this might occur in the future. That is deeply disheartening given the clear potential for devastation. A commissioner mentioned that it "looks" like the spills were cleaned up, but there absolutely needs to be a professional and thorough investigation of the spills.

Finally, I have a suggestion for the name change from the Committee for Land Use Sustainability and Climate Change *to* the Committee for Sustainable Environmental Action. "CSEA" "C-C" "Climate Change" to center climate change and action."

Thank you for recording my public comment.

Respectfully,

--

Kristen Strehle, Ph.D.

Disclaimer

These minutes reflect the actions taken by the Commission during its January 8, 2021 meeting. Although these minutes have been approved by the Commission, no action authorized by the Commission during this meeting, as reflected in these minutes, shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of these minutes has been delivered to the Governor for review, unless prior to expiration of the review period the governor approves same, in which case the action shall become effective upon such approval. These minutes were delivered to the Governor on January 15, 2021.

PINELANDS COMMISSION MEETING

MINUTES

January 8, 2021

The January 8, 2021 Pinelands Commission meeting was conducted remotely. All participants were present via Zoom conference and the meeting was livestreamed through YouTube: <https://www.youtube.com/watch?v=hIO74j0rBHc>

Commissioners Participating in the Meeting

Alan W. Avery Jr., Daniel Christy, Shannon Higginbotham, Jordan P. Howell, Jane Jannarone, Ed Lloyd, Mark Lohbauer, William Pikolycky and Chairman Richard Prickett. Also participating were Executive Director Nancy Wittenberg and Deputy Attorney General (DAG) Kristina Miles and Governor's Authorities Unit representative Joy-Michelle Johnson and Rudy Rodas.

Commissioners Absent

Jerome H. Irick, Gary Quinn and D'Arcy Rohan Green.

Call to Order

Chairman Prickett called the meeting to order at 9:33 a.m.

DAG Miles read the Open Public Meetings Act Statement (OPMA).

DAG Miles swore-in Burlington County's new representative, Shannon Higginbotham.

Chairman Prickett welcomed Commissioner Higginbotham.

Executive Director Wittenberg called the roll and announced the presence of a quorum.

The Commission pledged allegiance to the Flag.

Minutes

Chairman Prickett presented the minutes from the Commission's December 11, 2020 meeting. Commissioner Lohbauer moved the adoption of the minutes. Commissioner Avery seconded the motion.

Chairman Prickett noted that there was a missing word on page 87. Jessica Noble advised that she would correct the December 11, 2020 minutes.

The minutes from the December 11, 2020 Commission meeting were adopted by a vote of 9 to 0.

Committee Reports

There were no Committee meetings held in December. Commissioners discussed scheduling conflicts related to the Land Use, Climate Impacts and Sustainability Committee.

Executive Director's Report

ED Wittenberg said the Commission offices lost power during a storm in late December. The storm also caused some trees to fall down, one of which caused minor damage to a gutter. The tree will be removed. She also reported that one staff member tested positive for Covid-19. The staff member quarantined and the buildings were thoroughly cleaned, since the staff member had been in the office along with other staff. Employees who were in the building on that day were notified.

Chuck Horner, Director of Regulatory Programs, provided information on the following regulatory matters:

- Staff members have been working with Galloway Township officials regarding a violation matter. Development occurred in the Tilton Road area of the township without application to the Commission or receiving municipal permits. The matter will be in municipal court on January 14th.
- Staff continues to spend time on an application for a communications tower in Chatsworth. A public hearing has been scheduled for the application because it has not been demonstrated that the proposed tower qualifies as an accessory use to an existing EMS/ Fire Company. A communications tower is only permitted if it is determined to be an accessory use or if the tower is sited as part of the Comprehensive Management Plan's (CMP) cellular plan rules.
- Staff worked with an applicant to resolve an issue regarding language in the threatened and endangered (T&E) deed restriction at the Legler Landfill solar development site in Jackson Township. The applicant provided a draft T&E deed

restriction to the Commission staff that proposed a utility company easement through a portion of the T&E deed restricted area. The Commission staff advised the applicant that the proposed utility company easement was not consistent with the Commission's regulations. The applicant and staff worked together to come up with a revised T&E deed restriction. Construction of the solar facility is expected to begin shortly.

- Staff participated in a virtual meeting to resolve a zoning issue in Egg Harbor Township. A residential development application received approvals many years ago, lots were created and over time the zoning changed on the created lots.

Commissioner Howell asked Director Horner to provide more details about the zoning matter in Egg Harbor Township.

Director Horner said the Municipal Land Use Law (MLUL) provides development approvals with protection from zoning changes for a certain number of years. He said in this instance a residential development project was approved in the early 2000's, many years passed and the zoning protection under the MLUL expired. The residential development no longer meets current density and lot size requirements. He said in most instances staff find a resolution to the matter, sometimes requiring the applicant to purchase Pinelands Development Credits (PDCs).

Stacey Roth, Chief of Legal and Legislative Affairs, said the MLUL established a very specific time period for protection of local approvals. She said zoning changes aren't a problem for the developers who continue to work on their projects. She said from a legal perspective a developer can argue vested rights, because they have spent a large amount of money on the project. It becomes an equitable estoppel argument against the state and it is very case-specific.

Susan R. Grogan, Director of Planning, said when working with a municipality on zoning changes related to zoning boundaries and lot size, staff tries to identify projects that may have old approvals. Staff request municipalities do their own research regarding old approvals in order for them to be aware of potential situations like Director Horner just described.

Director Grogan provided an update on the following items:

- Notification for possible designation of the Pine Barrens Byway as a National Scenic Byway has been delayed.
- The CMP amendments for the septic pilot program took effect on December 21, 2020. The next step is to prepare model ordinances for Pinelands municipalities. Municipalities will have one year to adopt the ordinance.
- Staff continues to work on draft stormwater management policies. The New Jersey Department of Environmental Protection's (NJDEP) stormwater regulations take effect in early March. The NJDEP recently emailed all municipalities in New Jersey a model ordinance that caused confusion for Pinelands towns. Staff will be

advising Pinelands Area municipalities to disregard NJDEP's email as it does not apply to them.

- Staff met virtually with the New Jersey Board of Public Utilities (BPU) to discuss BPU's community solar pilot program which is currently in round two. Staff shared the Commission's application process and the CMP's standards for solar facilities. The BPU has plans to incorporate the community solar pilot program as permanent rules.
- The Pinelands Development Credit Bank remains busy processing sales and redemptions. A recent sale was for \$15,000 per right.

Commissioner Howell asked if the PDC price increase could be attributed to anything in particular.

Director Grogan said she believes the price has increased because there is a higher demand for PDCs right now. She said development has picked up over the last couple of years and it has helped the price become more competitive.

Commissioner Avery asked if a community solar project could proceed without subsidies from the BPU.

Director Grogan said she asked that question during the meeting with BPU and confirmed that community solar projects not selected by BPU as part of its pilot program can still be constructed. They would not be eligible for subsidies or incentives from BPU.

Stacey Roth said the Commission was notified that Atlantic County completed its acquisition of a property for the South Jersey Transportation Authority's new Grassland Conservation Management Area (GCMA). The acquisition was required under the 2019 First Amendment To The February 26, 2004 Memorandum Of Agreement (MOA) Between The New Jersey Pinelands Commission And The South Jersey Transportation Authority.

Paul Leakan, Communications Officer, provided information on the messaging campaign created to celebrate the CMP's 40th Anniversary. The CMP turns 40 on January 14th, and the Commission will celebrate the milestone by sharing 10 newly filmed video interviews with former Commissioners and staff members who created and/or adopted the plan. As part of the celebration and messaging campaign, the Commission will also create and share dozens of posts that chart the history, implementation and success of the plan on the Commission's Facebook page and Instagram site during the next few months. Mr. Leakan also said the Commission is once again hosting free, educational webinars. Lastly, he said the Commission just shared a link to a newly created Pine Barrens Byway website that was created by a consultant for the New Jersey Department of Transportation.

Commissioner Avery said it's a shame that some very instrumental people who were involved in the success of the CMP are no longer with us.

Public Development Projects and Other Permit Matters

Chairman Prickett presented a resolution recommending approval of recreational improvements at West End Park in Pemberton Township.

Commissioner Lohbauer made a motion Approving With Conditions an Application for Public Development (Application Number 1982-3514.004) (See Resolution # PC4-21-01). Commissioner Jannarone seconded the motion.

Director Horner said staff and the township worked for some time to come up with the approach outlined in the public development report for the construction of several recreation fields. He said the site is a fallow farm field but under the CMP, a portion is considered a wetland. Chairman Prickett asked what percentage of wetlands would be disturbed. Director Horner said the pilings for the boardwalk will be the only disturbance to wetlands and it is expected to be about 1,100 square feet.

Commissioner Lloyd said he was concerned about the possibility of heavy construction equipment disturbing the wetlands.

Director Horner said he didn't think there would be any heavy machinery but staff would raise the concern with Pemberton Township officials.

The Commission adopted the resolution by a vote of 9 to 0.

Chairman Prickett presented a resolution recommending approval of a Waiver of Strict Compliance for the development of a single family dwelling.

Commissioner Lohbauer made a motion Approving With Conditions an Application for a Waiver of Strict Compliance (Application Number 1989-0219.001) (See Resolution # PC4-21-02). Commissioner Lloyd seconded the motion.

Director Horner said this application is for a Waiver of Strict Compliance that was approved in 2007. He noted that Waivers are only valid for five years. He said the Waiver is for the minimum depth to the season high water table for a septic system and the minimum buffer to wetlands. He noted that an alternate design septic system would be required, just as it was in the 2007 Waiver.

The Commission adopted the resolution by a vote of 9 to 0.

Public Comment on Public Development Applications and Items where the record is open

Chairman Prickett said there were no Public Development or Waiver of Strict Compliance applications on the agenda.

Ordinances Not Requiring Commission Action

Chairman Prickett read the list of ordinances not requiring Commission action.

- Berkeley Township Ordinances 19-44-OAB & 20-37-OAB
- Southampton Township Ordinances 2020-08, 2020-09 & 2020-11
- Wrightstown Borough Ordinance 2020-08

No questions were raised.

Presentation

Chief Scientist John Bunnell outlined the importance of studying snake species in the Pinelands. He reviewed each of the five snake research projects the Commission's science office is working on and described some of the preliminary results. Some of the research is accomplished through radio telemetry, which involves surgically implanting radio transmitters into snakes and using a receiver and antenna to locate the snakes on a regular basis. The research focuses primarily on corn snakes, kingsnakes, and pine snakes (for further details see attached the presentation slides). The entire presentation can be viewed on YouTube : www.youtube.com/watch?v=hIO74j0rBHc

General Public Comment

While waiting for public comment, Commissioner Lohbauer invited Commissioner Higginbotham to join the LUCIS Committee.

Rhyan Grech, of the Pinelands Preservation Alliance (PPA), said she looks forward to the videos and postings that the Commission staff will share for the 40th Anniversary of the CMP. She said she hopes the Commission will consider protecting the Black Run headwaters and focus on stopping Off-Road Vehicle (ORV) destruction in 2021. She said it's important for the Commission to work with the NJDEP and adopt a map of roads.

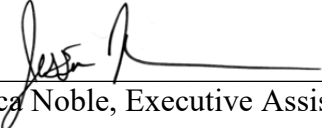

Commissioner Lohbauer said he would be sharing a YouTube video of Jeeps causing damage in the Pinelands.

Mr. Bunnell said he recently spoke with NJDEP representatives and they plan to resume blocking individual sites that need protection from ORVs.

Adjournment

Commissioner Lohbauer moved to adjourn the meeting. Commissioner Jannarone seconded the motion. The Commission agreed to adjourn at 11:34 a.m.
