

New Jersey's Leisure, Hospitality and Retail Cluster

Prepared by:
New Jersey Department of Labor
& Workforce Development
Office of Research and Information
Bureau of Labor Market Information
Winter 2014 – 2015

LEISURE, HOSPITALITY & RETAIL: Background

- Whether you are out for a meal, buying jeans or down the shore at a New Jersey casino or boardwalk, jobs in the Leisure, Hospitality & Retail (LHR) industry are all around you. While there are many entry-level jobs with entry-level hourly wages, many of those jobs can lead workers to a variety of long-term career paths to better paying jobs. In some LHR occupations, workers are paid mainly through tips, allowing workers in those occupations opportunities to earn well above the minimum wage. Hard work, people skills and the right attitude can take an employee a long way in LHR and advanced education is rarely required.
- New Jersey has a well-earned reputation as a place for great entertainment, vacations and shopping which is why the LHR industry continues to thrive throughout the state. The northern part of the state has a higher concentration of retail and hospitality jobs with its higher density of shopping malls and hotels in close proximity to New York City and large corporate centers. The southern part of the state has fewer large malls, although it does have shopping outlets, and tourism is strongly represented in its shore towns including Atlantic City.

LEISURE, HOSPITALITY & RETAIL

Industry Cluster: Description and Overview

What is the Leisure, Hospitality and Retail (LHR) Industry Cluster? Composition of NAICS Codes

4

44-45 Retail Trade

- 441 Motor Vehicle and Parts Dealers
- 442 Furniture and Home Furnishings Stores
- 443 Electronics and Appliance Stores
- 444 Building Material & Garden Supply Stores
- 445 Food and Beverage Stores
- 446 Health and Personal Care Stores
- 447 Gasoline Stations
- 448 Clothing and Clothing Accessories Stores
- 451 Sporting Goods/Hobby/Book/Music Stores
- 452 General Merchandise Stores
- 453 Miscellaneous Store Retailers
- 454 Non-store Retailers

71 Arts, Entertainment & Recreation

- 711 Performing Arts and Spectator Sports
- 712 Museums, Parks and Historical Sites
- 713 Amusement, Gambling & Recreation Ind

72 Accommodations and Food Services

- 721 Accommodations
- 722 Food Services and Drinking Places

Highlights of the LHR Industry Cluster

5

- The latest data show that:
 - Leisure, hospitality and retail trade (LHR) employment totaled 796,788 in 2013, or nearly one-quarter (24.6%) of all private sector workers in the state. In comparison, the cluster represented 25.9 percent of the nation's private sector employment in 2013.
 - LHR represented \$44.7 billion or 8.8 percent of the state's real Gross Domestic Product in 2013.
 - New Jersey LHR employers paid nearly \$22 billion in wages during 2013, or 11.5 percent of the state total. In addition, LHR businesses accounted for 21.5 percent of all units in the statewide total private sector in 2013.
- Many of the businesses within LHR are involved in New Jersey's travel and tourism and directly support 320,328 jobs, a slight increase over 2012 (0.5 percent).

Workforce Development,
November 2014

Tourism

7

- Since the state's LHR industry cluster has a symbiotic and overlapping relationship with tourism, it is good news that more than \$40 billion in overall tourism-related demand was generated. Visitor spending, capital investment and general government support of tourism tallied a record of \$40.4 billion, a 1.3 percent increase over 2012. Visitation in New Jersey also rose to 87.2 million in 2013, a 5.9 percent increase compared to 2012.
- Tourism directly supports 320,238 jobs, a slight increase over 2012 (less than 1%). This is also good news for New Jersey, as employment growth in 2013 meant that tourism employment has grown for three consecutive years while sustaining more than 511,750 jobs including indirect and induced impacts. These jobs represent 9.9 percent of total employment or one-in-ten jobs in New Jersey.
- Tourism generated \$35.9 billion of state GDP in 2013, or 7 percent of the entire state economy. Were tourism in New Jersey a company, its sales would rank #70 on the Fortune 500 list – more than Sears, DuPont and Hess.
- Including both direct and indirect impacts, tourism in New Jersey generated \$4.6 billion in state and local taxes and \$5.2 billion in federal taxes last year.

An Oxford Economics Company

LHR By Industry

➤ The 2013 average annual wage for New Jersey's LHR cluster was \$27,516 or less than half the state average for all private sector workers (\$59,026).

➤ In comparison, the annual average wage in the nation's LHR cluster was \$24,321 in 2013 or nearly 50 percent (48.9%) of the national average for all private sector workers (\$49,700).

New Jersey's Leisure, Hospitality & Retail Trade Cluster (2013)			
Industry Components	Employment	Establishments	Average Annual Wage (\$)
LHR Cluster	796,788	54,154	27,516
Retail Trade	446,058	31,226	30,940
Arts/Entertainment/Recreation	56,681	3,620	34,176
Accommodations	57,100	1,361	33,267
Food Services & Drinking Places	236,949	17,947	18,091
Private Sector Employment, NJ Total	3,234,796	251,194	59,026
Source: NJ Department of Labor and Workforce Development, Quarterly Census of Employment and Wages, 2013 Annual Average			

- Total wages paid in New Jersey's LHR industry cluster during 2013 accounted for just 11.5 percent of the private sector wages paid in the state.
- The LHR cluster's much lower average annual wage reflects the entry level, lower skill, seasonal and part-time nature of many of the occupations found within it.

LEISURE, HOSPITALITY & RETAIL

Detailed Industry Employment: Current and Trend Analysis

Current Employment Statistics (CES): Description

10

- Preliminary monthly estimates are based on reports submitted by a sample of New Jersey employers.
- The estimates are benchmarked each year based on more complete and accurate counts of data, which are obtained primarily from employer reports required by the State's unemployment insurance system.
- The employment data are grouped by industry according to the 2012 North American Industry Classification System (NAICS).

NJ's LHR employment performed slightly below the private sector as a whole and excluding LHR from 1990-2002. Since then, the cluster has performed slightly better.

➤ From 1990 to 2013, LHR has added over 92,300 new jobs in New Jersey or about 30.8 percent of the state's employment gain. However, its share of total employment increased only slightly during this period, from 19.5 percent in 1990 to 20.3 percent in 2013.

➤ Employment in Arts, Entertainment and Recreation has grown 52.9 percent over the last 23 years.

➤ The recession and consumer spending has led Retail employment to be the laggard among LHR's major components.

(For illustrative purposes: NAICS 721 & 722 combined)

Source: NJLWD, Current Employment Statistics
 Prepared by: New Jersey Department of Labor and Workforce Development, December 2014

From about 2002 to late 2005, employment growth in NJ's LHR industry cluster generally outperformed the nation.

12

NJ and US Leisure, Hospitality & Retail Industry Cluster Employment Index
January 2002 - December 2014
Seasonally Adjusted
Current Employment Statistics (CES)

➤ Since 2005, growth in the state's LHR cluster has lagged that of the nation. The worst national recession since the Great Depression deserves credit for most of the job losses in the LHR cluster. Businesses that were surviving in a growing economy with liberal credit for both consumers and businesses found the going tough when consumers severely cut back on discretionary spending and banks tightened lending standards.

NJ and US Employment Index January 2002 - December 2014 Seasonally Adjusted Current Employment Statistics (CES)

13

NJ and US *Leisure and Hospitality* Employment Index

From January 2002 until the fall of 2006, employment in leisure and hospitality fared better in the state than the U.S.

From the end of 2006 to the end of 2010, LHR job growth in NJ and the U.S. occurred at about the same pace.

Since then, leisure and hospitality employment in the U.S. has taken off separating itself from NJ's lackluster inconsistent performance which is mainly due to the downsizing and closing of several casino hotels in Atlantic City in recent years.

Quarterly Census of Employment and Wages (QCEW): Description

15

- Tabulations of employment and wage data for employers covered under the New Jersey Unemployment Compensation Law. QCEW is a program of the Bureau of Labor Statistics, U.S. Department of Labor.
- Beginning with the release of 2001 annual and 2002 quarterly data, the program has switched to the North American Industry Classification System (NAICS) as the basis for the assignment and tabulation of economic data by industry.
- NAICS uses a production-oriented approach to categorize economic units. Units with similar production processes are classified in the same industry. NAICS focuses on how products and services are created, as opposed to the SIC focus on what is produced. This approach yields significantly different industry groupings than those produced by the SIC approach.

Leisure, Hospitality & Retail Quarterly Census of Employment & Wages Employment: Annual Averages 2004 - 2013

16

As illustrated above, New Jersey's LHR employment has shown steady improvement after being down in two consecutive years: '07-'08 and '08-'09...as a result of the recession

Leisure, Hospitality & Retail Quarterly Census of Employment & Wages Establishments & Wages: Annual Averages 2004 - 2013

Prepared by: New Jersey Department of Labor and Workforce Development, November 2014

More Recent Analysis: 2008 - 2013

NJ LHR Employment Change: 2008 to 2013

➤ Retail trade job levels dropped over 9,000 while employment in Accommodations fell nearly 8,200. For retail in particular, NJ is an inviting marketplace given its population density (highest in the nation) and per capita income (second highest). As a result, competition is intense and margins are tight.

➤ Inject a serious national recession with a sharp decline in discretionary spending into the mix and the recent retail job losses are not surprising. In Accommodations, 97.2 percent or 7,958 of the losses occurred within Atlantic City's casino hotels.

➤ The other two of the cluster's four primary components (Food Services/Drinking Places and Arts/Entertainment/Recreation) added jobs during this five-year period. Full-service restaurants accounted for about 73.3 percent in the Food Services/Drinking Places industry, while Fitness & Recreational Sports Centers created most of the new jobs (80.7%) in the Arts/Entertainment/Recreation industry.

Source: NJLWD, Quarterly Census of Employment and Wages
 Prepared by: New Jersey Department of Labor and Workforce Development,
 November 2014

Breaking the four primary components into their 17, three-digit NAICS industries and comparing the state's percent change in employment to the nation's from 2008-to-2013 yields the table below:

19

NAICS	Industry	2008-2013	
		Percent Change	
		NJ	US
447	Gasoline stations	14.8	2.1
443	Electronics and appliance stores	-2.8	-11.5
454	Nonstore retailers	14.5	6.0
452	General merchandise stores	9.6	1.5
713	Amusements, gambling, and recreation	7.5	1.8
441	Motor vehicle and parts dealers	-1.5	-2.1
722	Food services and drinking places	7.4	7.9
445	Food and beverage stores	0.7	2.3
448	Clothing and clothing accessories stores	-8.2	-5.7
444	Building material and garden supply stores	-6.7	-3.8
453	Miscellaneous store retailers	-7.8	-4.4
442	Furniture and home furnishings stores	-18.9	-15.5
711	Performing arts and spectator sports	0.1	3.8
451	Sporting goods, hobby, book and music stores	-15.7	-7.1
446	Health and personal care stores	-9.1	0.6
721	Accommodation	-12.5	-0.5
712	Museums, historical sites, zoos, and parks	-11.5	8.1

- While employment in New Jersey's and the nation's three-digit industries often moved in tandem, either both rising or both declining, it was not always the case.
- Two NJ LHR industries posted losses while the nation's rose: Health and Personal Care Stores (-9.1% vs. +0.6%) and Museums, Parks and Historical Sites (-11.5% vs. +8.1%).
- The state LHR industry that posted the largest difference in employment gain than the nation was Gasoline Stations (+14.8% vs. +2.1%) due to Wawa's ongoing expansion. NJ is one of two states (Oregon is the other) without self-service thus creating extra jobs.
- The significant gain in nonstore retailers could be partly attributed to an increase in online shopping.

 December 2014

2013 Percentage of employment: Four primary components

20

**NJ LHR Employment by Major Industry Components
2013 Annual Averages**

➤ In terms of employment, the Retail Trade and Food Services/Drinking Places components combined accounted for more than four of every five jobs (86%) in the LHR cluster in 2013.

➤ Most of the businesses in the LHR cluster are familiar to even the most casual observer. Retail Trade, which represented 56.0 percent of the cluster's employment in 2013, has nearly one of every four jobs (24.6%) in Food Stores.

➤ Food Services/Drinking Places, which accounted for 29.7 percent of the cluster's employment in 2013, is dominated by restaurants and other eating places, which represent over three quarters (84.1%) of its employment.

➤ Accommodations, which represents just 7.2 percent of the cluster's employment, would be an even smaller portion were it not for the existence of legalized gambling in Atlantic City. The city's hotel casinos employed an average of 30,193 in 2013; more than the other 1,348 Accommodations establishments in the NJ combined.

November 2014

“Food” plays a significant role in the LHR industry cluster

NJ LHR 2013 Employment by 3-digit NAICS

- “Restaurants” are the primary component of the top-ranked “Food Services/Drinking Places” and “Food Stores” is a distant but still significant second place.
- Of the 17 three-digit industries within the LHR cluster, these two accounted for over 43 percent of all the jobs.
- Food Services/Drinking Places accounted for 29.7 percent of the cluster’s total employment in 2013 with another 13.8 percent in Food Stores.

Source: NJLWD, Quarterly Census of Employment and Wages
 Prepared by: New Jersey Department of Labor and Workforce Development,
 November 2014

Digestion of Food data

- Within the *Food Services/Drinking Places* industry, the new group (NAICS 7225, which now combines full- and limited-service) restaurants and other eating places dominates with 83.7 percent of the establishments, 84.1 percent of the employment and 81.2 percent of the total wages paid in 2013.
- Despite a *decrease* in the number of drinking places (-152 units) from 2008 to 2013, payrolls *increased* by 236 (or 2.6%) accounting for 6.7 percent of establishments, 3.9 percent of employment and 3.7 percent of total wages in 2013.
- The 2013 annual average wage of those employed in *Food Services/Drinking Places* was \$18,901, which was just 32.0 percent of the state's private sector average wage (\$59,026) and 68.7 percent of the LHR cluster's average wage (\$27,516).

Inside Food Stores...

23

- In the Food Stores industry, supermarkets and other grocery stores (except convenience stores) accounted for nearly three of every four (72.6%) jobs, 74.9 percent of the total wages paid and more than one third (36.4%) of the establishments.

- In terms of employment, Convenience Stores and Beer, Wine and Liquor Stores round out the top three accounting for about 10.4 and 8.7 percent of the Food Stores total, respectively.
- The 2013 average annual wage of those employed in the Food Stores industry was \$24,527, which was 89.1 percent of the LHR cluster's average wage (\$27,516) but just 41.6 percent of the state's private sector average wage (\$59,026). Supermarkets and Other Grocery Stores, the largest segment of Food Stores, posted a 2013 annual average wage of \$25,302.

Local Employment Dynamics (LED)

24

- The LED Program at the Census Bureau, together with its state partners (including the New Jersey Department of Labor and Workforce Development), provides new information - the Quarterly Workforce Indicators (QWI) - on Local Employment Dynamics that is: local at the county and sub county level - so that decisions can be made in the right context.
- Information on Employment for workers in different industries and different age and sex groups - so that you know where the jobs are - together with earnings - so you know what people are getting paid.
- Also provides dynamic information on the rapidly changing economy - with information on where jobs are being created and destroyed, how much turnover there is in each industry together with long-term trends.

Greatest average monthly earnings for new hires: (Two-Digit NAICS: 2013Q1 to 2013Q4, averaged)

➤ Due to the lower-paying nature of the jobs within the industry cluster, the bottom-ranked (18th, 19th and last) of all 20 industries are leisure, hospitality and retail-related.

➤ The annual wage for Accommodations may actually be *lower* were it not for the hotel casino industry's greater proportion of higher paying jobs compared to similar non-gaming establishments.

Per U.S. Census Bureau's Local Employment Dynamics data extraction tool: Average monthly earnings of newly stable employees in statewide private firms (i.e., full-quarter employees who were new hires with a firm in the previous quarter).

Source: QWI Explorer application, U.S. Census Bureau, Local Employment Dynamics

Lowest Average Monthly Earnings (3-digit NAICS):

All NAICS subsectors	\$5,089
722 Food Services and Drinking Places	\$1,605
452 General Merchandise Stores	\$1,855
713 Amusement, Gambling & Recreation Industries	\$1,864
812 Personal and Laundry Services	\$2,000
485 Transit and Ground Passenger Transportation	\$2,228
448 Clothing and Clothing Accessories Stores	\$2,229
712 Museums, Historical Sites, and Similar Institutions	\$2,233
445 Food and Beverage Stores	\$2,236
624 Social Assistance	\$2,241
447 Gasoline Stations	\$2,434
453 Miscellaneous Store Retailers	\$2,500
115 Support Activities for Agriculture and Forestry	\$2,505
814 Private Households	\$2,507
512 Motion Picture and Sound Recording Industries	\$2,550
111 Crop Production	\$2,671
112 Animal Production	\$2,711
623 Nursing and Residential Care Facilities	\$2,793
721 Accommodation	\$2,869
315 Apparel Manufacturing	\$3,188
487 Scenic and Sightseeing Transportation	\$3,205
446 Health and Personal Care Stores	\$3,222

➤ Based on three-digit Local Employment Dynamics (LED) data from the US Census Bureau, the **top three** and **ten of the 22 lowest (red) of all industries** by average monthly wages fall within the Leisure, Hospitality and Retail industry cluster. Two other industries (purple) are considered “tourism-related”

➤ Additionally, the lowest paid of these industry subsectors, “Food Services & Drinking Places”, is the one that has been growing the most and is projected to grow the most.

Per LED extraction tool: 2013Q1 to 2013Q4 (\$) averaged, Average monthly earnings of employees with stable jobs (i.e., worked with the same firm throughout the quarter).
NJ Private Firms Only

U.S. Census Bureau,
Local Employment Dynamics

Employee Distribution

27

- The following graphs illustrate the statewide workforce characteristics by age and sex for the three LHR industry components:

NAICS 44-45 Retail

NAICS 71 Arts, Entertainment & Recreation

NAICS 72 Accommodation and Food Services

Employee Distribution by Age and Sex: Statewide

Industries: NAICS 44-45, 71 & 72

Date = 20131Q to 20134Q, Private Firms Only

Ages 25 to 34 lead the male workforce composition of all three industries.

45-54 year old females have the largest percentage in the retail and arts, entertainment & recreation workforce while in accommodation and food services, 25 to 34 has the largest make-up.

Middlesex	4,250	66,478	26,848	1,784,809,401	20.3%	19.9%
Essex	4,414	51,327	27,714	1,422,479,631	22.7%	19.7%

Due primarily to their tourism-based economies, over one-half of Atlantic (56.1%) and Cape May (54.6%) counties' 2013 total private employment is concentrated in the LHR cluster while the state's is almost one-quarter (24.6%).

Three counties had annual average wages over \$30,000 while the state averaged \$27,516 in LHR:

Morris - \$35,690
Bergen - \$31,156
Somerset - \$30,353

LHR Employment by Industry: 2013

Over one-quarter (28.3%) of all employment in the LHR cluster is concentrated in three counties: Bergen; Monmouth and Middlesex.

Atlantic County ranks fourth for LHR employment due mainly to the presence of its casino hotel industry.

Retail Employment Gains/Losses: 2008 - 2013 by County (Percent)

33

The graph ranks the state's counties by their percent rise/drop in retail trade employment.

As previously noted, the primary component, Retail Trade, recorded the LHR cluster's greatest employment decline from 2008-to-2013 (-9,050).

Sixteen of the state's 21 counties recorded a drop in retail employment over this five-year period.

Food Service and Drinking Places Employment Gains/Losses: 2008 - 2013 by County (Percent)

34

Food Services/Drinking Places was the LHR component with the greatest employment gain from 2008-to-2013 (16,260).

The last national recession had some impact on consumer discretionary spending which impacted statewide employment in Food Services/Drinking Places. This industry constantly added to its annual payrolls since at least 2004 *except for the 2008 to 2009 period.*

In general, this industry also experiences a high degree of business openings and closings regardless of the economic conditions.

Note: Morris, Warren & Salem data are suppressed due to employer confidentiality issues

Prepared by: New Jersey Department of Labor and Workforce Development, December 2014

LHR Employment & Population: 2013

Number of Residents Per LHR Job

35

- While it is generally true that the distribution of Retail Trade employment across the state's 21 counties is likely to correlate to their resident population count, adding Leisure & Hospitality to the mix can in some cases take the distribution of the cluster's employment by county in a different direction.
- In addition to the distribution of LHR employment by county, it also may be useful to rank the state's counties by number of residents per LHR job. The lower the number, the greater the concentration of LHR jobs per capita. For example, in top-ranked Atlantic County, there was one LHR job for every 4.4 county residents in 2013.
- The most notable examples are the tourism dependent counties of Atlantic and Cape May, which rank one and two in number of LHR jobs on a per capita basis.

Top Employers in LHR

- According to New Jersey Business magazine's Top Employers in 2014, five of New Jersey's top ten largest employers fall within leisure, hospitality and retail trade.
- Overall, these 20 employers account for about one of every four to five jobs (22.4%) in the state's LHR industry cluster.

LEISURE, HOSPITALITY & RETAIL

Detailed Industry Occupational Analysis

New Jersey Resident 2013 Workforce Characteristics: Occupations All Industries in NJ vs. LHR

➤ The cluster had a higher proportion in only **four** out of 18 occupational categories due to the defined nature of the industry components' type of work.

➤ For example, “Food preparation & service” is mainly in Food Services/Drinking Places (*component of Leisure & Hospitality*) while “Sales/Marketing” has a significant job presence in *Retail Trade*.

 Prepared by: New Jersey Department of Labor and Workforce Development, December 2014

Wages by Occupation

42

- As might be expected, the cluster's largest occupational category, *retail salesperson*, pays wages that vary by type of industry sector. Retail salespersons within the retail trade segment has the highest annual wage (\$26,685) followed by arts, entertainment and recreation (\$25,375).
- *Retail salespersons* tended to receive the lowest wages in establishments involved with accommodations and food services (\$23,225).
- Wages paid to *cashiers*, the cluster's second largest group, tended to fall within a narrow range between the three industry sectors (NAICS 44-45, 71 & 72) that for a full-time, year-round employee would usually amount to, \$19,490 - \$20,735.
- To the extent that tip income is reported accurately, *waiters/waitresses* (3rd largest occupation) do somewhat better with a full-time, year-round worker earning wages in the \$21,680 (NAICS 72) - \$26,720 (NAICS 71) range.

Wages by Occupation

43

- Wages paid to *combined food preparation and serving workers*, the cluster's fourth largest, generally paid in the \$9.10 to \$10.10 per hour range (\$18,880 - \$20,005, annual). The lower wages were similar to cashiers mainly due to entry-level, part-time, lower skill and education requirements.
- The other occupation with a significant presence in LHR is *stock clerks/order fillers*. The pay varied widely between two of its segments: 44-45 Retail Trade (\$11.25/hr. & \$23,450/yr.) and 72 Accommodation and Food Services (\$15.00/hr. & \$31,155/yr.).
- On the upper end of the pay scale, LHR occupations that pay an average of \$100,000 or more per year mostly include managers of all types as well as *pharmacists, engineers and chief executives*.

LEISURE, HOSPITALITY & RETAIL

Demographic Characteristics of the Industry Cluster Workforce

New Jersey Resident Workforce Demographic Characteristics All Industries in NJ vs. LHR: 2013 Age, Sex, Race & Hispanic Origin

45

➤ The LHR industry cluster is characterized by a large number of seasonal and part-time jobs and by workers who are younger than the average for all industries. About one-half (48.9%) of all workers in the cluster are under 35 years old compared with nearly one-third (32.3%) for all industries.

➤ Many businesses in the cluster increase hiring during the summer, often employing high school-age and college-age workers. Some segments of the industry cluster are heavily reliant on immigrant and guest workers such as boardwalk and amusement establishments. Over 53 percent of the cluster's workforce is male and 21.7 percent Hispanic vs. 18.6 percent for all industries.

<u>By Age</u>	<u>All</u>	<u>LHR</u>
Less than 25	12.1%	27.9%
25-34	20.2%	21.0%
35-44	21.2%	16.5%

Hispanic	18.6%	21.7%

New Jersey Resident Workforce Characteristics All Industries in NJ vs. LHR: 2013 Earnings

46

➤ The LHR cluster had a significantly higher proportion than “All industries” in the lowest dollar range in *Personal Earnings*: “Less than \$25,000”.

➤ This is the result of the low paying nature of the occupations in leisure, hospitality and retail industries.

<u>By Personal Earnings</u>	<u>All</u>	<u>LHR</u>
Less than \$25,000	36.6%	60.0%
\$25,000-\$50,000	23.4%	21.9%
\$50,000-\$75,000	17.0%	9.1%
\$75,000-\$100,000	9.0%	3.5%
\$100,000-\$150,000	8.2%	3.5%
\$150,000-\$200,000	2.6%	0.9%
\$200,000 & more	3.3%	1.2%

New Jersey Resident Workforce Characteristics All Industries vs. LHR: 2013 Educational Attainment

47

Source: 2013 American Community Survey Public Use Micro-data Sample (5% Sample)

- A greater proportion of LHR workers have achieved a lower level of education than workers overall due to its lower skilled, entry-level positions with a higher turnover rate.
- The 2013 American Community Survey states nearly 1/2 (45.4%) of the workers in this industry cluster do not have any formal education beyond high school compared with about 1/3 (34.9%) for employees in all industries statewide.

LEISURE, HOSPITALITY & RETAIL

Outlook and Projections

➤ As for the outlook by occupation, the top five and, overall, nine (in red) of the top eleven occupations in the state with the greatest number of projected average annual job openings are LHR-related. The typical minimum requirements for these occupations are no work experience, short-term on-the-job training and no college degree.

➤ The nine occupations account for 24.7% of all average annual job openings that New Jersey is expected to add through 2022.

Outlook

52

- As it did during the 2008-to-2013 period, the Foods Services/Drinking Places component is projected to continue creating the greatest number of new jobs (26,300) from 2012-to-2022. This 11.3 percent increase is more than the state's projected rate (7.5%).
- The cluster's largest component, Retail Trade with 56 percent of employment, is projected to grow by 27,250 jobs or 6.1 percent during this 10-year period, while Arts/Entertainment/Recreation is projected to add 5,300 new jobs for a 9.5 percent advance.

Outlook

59

- Along with other service sectors such as the hospitality industry, retail is a critical point of entry, or “gateway,” into the labor force and provides workers with foundational skills in customer service, punctuality, and responsibility.

- The retail industry offers substantial employment opportunities. Part-time and temporary work is plentiful across a range of employers, from small, independent retailers to national and multinational retail chains. Solid store experience can lead to an array of retail management and store support career ladders.
- A college degree can afford direct entry into management training programs and regional/corporate level career paths.
