The Department of Environmental Protection is inviting all citizens interested in the satisfaction of their community's future water supply needs to attend one of the five regional meetings to be held throughout the State for a presentation and discussion of the Statewide Water Supply Master Plan Project.

This 3 year project, to be completed in December of 1979, has been undertaken in order to assure that New Jersey will be able to meet its future water supply needs and will have a sound framework for the future planning and management of its water resources. The plan will strengthen and improve State's decision making in water supply by laying the foundations for the selection of available options to meet future needs and more efficiently utilize presently developed supplies.

At this session, which is being conducted as part of the Project's Public Participation and Inter-governmental Coordination Program, Dirk C. Hofman, Acting Deputy Director of the Division of Water Resources, will discuss the issue areas to be explored and work tasks to be carried out in the planning effort. Citizen participants, who will later represent the region in reviewing the project's work, will also be selected.
