

The Office of Health Care Affordability and Transparency (OHCAT)

The Office of Health Care Affordability and Transparency (OHCAT) works to make high quality health care affordable and accessible for everyone in New Jersey.

Health costs have risen faster than incomes for years. As a result, many residents delay or skip care, putting pressure on families, employers, and public budgets. OHCAT partners with state agencies, health care leaders, and consumer advocates to address these challenges and support policies that put people first.

HART Program

On December 21, 2021, Governor Murphy signed Executive Order 277, to launch the Health Care Affordability, Responsibility, and Transparency (HART) Program.

The HART Program sets targets to slow the growth of health care costs in New Jersey and collects data to measure progress and improve transparency.

This effort looks at all areas of health care spending, including insurance, hospitals, providers, and pharmaceuticals. By gathering and analyzing data, the program helps identify the factors driving costs and points to policy solutions to address them.
